SAMCO SICAV

Société d'Investissement à Capital Variable established in Luxembourg

Prospectus

6 January 2026

- **Prospektversion Schweiz -**

IMPORTANT INFORMATION

The Company is organised as an investment company with variable capital under Luxembourg law ("société d'investissement à capital variable") in accordance with Part I of the 2010 Law.
No dealer, salesman or any other person has been authorised to give any information or to make any representations, other than those contained in the **Prospectus** and in the documents referred to herein, in connection with the offer hereby made, and, if given or made, such information or representations must not be relied upon as having been authorised by the Company or the distributors.

This Prospectus does not constitute an offer or solicitation by anyone in any jurisdiction in which such offer or solicitation is not lawful or in which the person making such offer or solicitation is not qualified to do so or to anyone to whom it is unlawful to make such offer or solicitation.

Shares of the Company may be acquired on the basis of the Prospectus and the most recent audited annual report or semi-annual report of the Company (if more recent than such annual report) which are available at the registered office of the Company. Only the information contained in the Prospectus and in one of the documents referred to therein shall be deemed to be valid. The Shares of the sub-funds of the Company are not listed on the Luxembourg Stock Exchange. The issue and redemption of Shares are subject to the regulations prevailing in the country concerned.

Shares of the Company are marketed to both professional and retail clients in the European Union, in Switzerland, and in any other country as may be identified by the Board of Directors.

Shares of this Company may not be offered, sold or delivered to investors who are US Persons. A US Person is any person who:

(i) is a United States person within the meaning of Section 7701(a)(30) of the US Internal Revenue Code of 1986, as amended, and the Treasury Regulations promulgated thereunder;
(ii) is a US person within the meaning of Regulation S under the US Securities Act of 1933 (17 CFR § 230.902(k));
(iii) is not a Non-United States person within the meaning of Rule 4.7 of the US Commodity Futures Trading Commission Regulations (17 CFR § 4.7(a)(1)(iv));
(iv) is in the United States within the meaning of Rule 202(a)(30)-1 under the US Investment Advisers Act of 1940, as amended; or
(v) is any trust, entity or other structure formed for the purpose of allowing US Persons to invest in the Company.

Notwithstanding the above, investment companies registered with the Securities and Exchange Commission may buy shares in the Company on behalf of their clients.

Processing of personal data

Personal data related to identified or identifiable natural persons provided to, collected or otherwise obtained by the Company (the "Controller") will be processed by the Controller in accordance with a privacy notice (the "**Privacy Notice**") and in accordance with the General Data Protection Regulation (EU) 2016/679. Investors and any person contacting, or otherwise dealing directly or indirectly with the Controller are invited to read and carefully consider the Privacy Notice, prior to contacting or otherwise so dealing, and in any event prior to providing or causing the provision of any data directly or indirectly to the Controller.

The Privacy Notice is available and can be obtained on demand at the registered office of the Company.

As in the case of any investment, the Company cannot guarantee future performance and there can be no certainty that the investment objectives of the Company's individual Sub-Funds will be achieved.

SAMCO SICAV – ARTICO SUSTAINABLE EMERGING MARKETS 60

GLOSSARY

2010 Law	Means the Luxembourg law dated 17 December 2010 on Undertakings for Collective Investments, as amended from time to time.
Administrative Agent	Means Northern Trust Global Services SE.
Administrative Agreement	Means the agreement between the Company, the Administrative Agent and the Management Company related to central administration services.
Appendix I	Refers to the document listing the investment restrictions applicable to all Sub-Funds with the exception of the Feeder Sub-Funds.
Appendix II	Refers to the document listing the investment restrictions applicable to the Feeder Sub-Funds.
Article	Refers to the Articles of Incorporation of the Company, as amended from time to time.
Board of Director	Means the Board of Directors of SAMCO SICAV.
Business Day	means bank business days on which banks are open in Luxembourg, with the exception of (i) individual, non-statutory rest days, (ii) days on which exchanges in the main countries in which a Sub-Fund invests are closed or (iii) at least 50% of the respective Sub-Fund's investments cannot be adequately valued. Non-statutory rest days are days on which banks and financial institutions are closed.
CFD(s)	Means Contract(s) For Difference. A CFD is a contract between two parties, typically described as "buyer" and "seller", stipulating that the seller will pay to the buyer the difference between the current value of an asset and its value at contract time (if the difference is negative, then the buyer pays instead to the seller). It allows investors to gain exposure to underlying assets which they may not be entitled to purchase directly, but also provides exposure to the price change without exposure to the related currency risk. Unlike futures contracts (which are settled through a clearing firm), contracts for difference are privately negotiated between two parties and are not standardised.
CHF	Means the Swiss Franc.
China A-Shares	Means shares in mainland China-based companies that trade on Chinese stock exchanges
Commitment approach	One of two standard methodologies recognised for investment funds to estimate a sub-fund's exposure to market risk through the use of derivatives. Global exposure related to derivative instruments under the commitment approach is the sum of the notional values of derivatives instruments excluding a) financial derivative instruments involved in netting or hedging arrangements and b) other types of financial derivative instruments which may be excluded from global exposure calculations as per CESR/10-788 Guidelines on Risk Measurement expressed as a percentage of the total net asset value and limited to 100%.
Company	Means SAMCO SICAV.
CRS	Refers to Common Reporting Standards.
CRS Law	Means law of 18 December 2015 on the automatic exchange of financial account information in the field of taxation.
DAC 2	Means COUNCIL DIRECTIVE 2014/107/EU of 9 December 2014 amending Directive 2011/16/EU as regards mandatory automatic exchange of information in the field of taxation.
DAC 6	Means COUNCIL DIRECTIVE (EU) 2018/822 of 25 May 2018 amending Directive 2011/16/EU as regards mandatory automatic exchange of information in the field of taxation in relation to reportable cross-border arrangements.
Dealing Day	Means a Business Day on which a NAV is calculated and applied to orders received before the corresponding cut-off.
Depositary	Means UBS Europe SE, Luxembourg Branch.
Depositary and Paying Agent Agreement	Means the agreement between the Company, the Depositary and the Management Company related to depositary and paying agent services.

Distributor	Means an entity appointed by the Global Distributor to distribute all or certain Share Classes of the Fund in agreed countries.
EPM	Means Efficient Portfolio Management. Reference to Efficient Portfolio Management throughout this Prospectus shall means reference to techniques and instruments which fulfil the following criteria: a) they are economically appropriate in that they are realised in a cost effective way; b) they are entered into for one or more of the following specific aims; I. reduction of risk; II. reduction of cost; III. generation of additional capital or income for the Sub-Fund(s) with a level of risk which is consistent with the risk profile of the Sub-Fund(s) and the risk diversification rules laid down in Appendix I or II. c) their risks are adequately captured by the risk management process of the Company
Fund Custodial Assets	Refers to financial instrument held in custody within the meaning of article 35 (1) of the 2010 Law and article 12 of the UCITS-CDR.
ESG	Means environmental, social and governance.
ESMA	Refers to the European Securities and Markets Authority.
ETF	Means Exchange Traded Fund.
EUR	Means Euro.
EVIC	Means enterprise value including cash.
FATCA	Refers to the Hiring Incentives to Restore Employment ("HIRE") Act of 18 March 2010, commonly referred to as the Foreign Account Tax Compliance Act.
FATCA Law	Means the Luxembourg law by the Law of 24 July 2015 relating to FATCA
Feeder Sub-Fund(s)	Means SAMCO SICAV - Artico Sustainable Dynamic Flagship and SAMCO SICAV – Artico Sustainable Dynamic Emerging Markets.
FFI(s)	Refers to financial institutions outside the U.S. under FATCA.
Forward Contracts	A forward contract is a customized contract between two parties to buy or sell an asset at a specified price on a future date. A forward contract can be used for hedging or speculation, although its non-standardized nature makes it particularly suitable for hedging. Unlike standard futures contracts, a forward contract can be customized to any financial asset, amount and delivery date.
Futures	Fundamentally, Forward contracts and Futures have the same function in that both types of contracts allow investors to buy or sell a specific type of asset at a specific time at a given price.
GDPR	Means REGULATION (EU) 2016/679 OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL of 27 April 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data, and repealing Directive 95/46/EC (General Data Protection Regulation).
Global Distributor	Means FUNDSIGHT S.A.
Investment Manager	Means AWEA Fonds AG.
IPO	Means Initial Public Offering.
Luxembourg IGA	Refers to the Model 1 Intergovernmental Agreement entered into by the Luxembourg with the United States of America.
Management Company	Means FUNDSIGHT S.A.
Master Funds	Means SAMCO SICAV – Artico Sustainable Global Core; and SAMCO SICAV – Artico Sustainable Emerging Markets.
Member State	Means a member state of the European Union.

Net Asset Value ("NAV")	Means, as the case may be the value of the assets less liabilities of a Sub-Fund, of a Class of Shares or of a Share in a Sub-Fund, determined in accordance with the principles set out in the Prospectus.
OECD	Means Organisation for Economic Co-operation and Development.
Option(s)	Means a contract giving the A put option is an option contract giving the owner the right, but not the obligation, to sell (PUT) or to buy (CALL) a specified amount of an underlying security at a specified price within a specified time.
OTC	Means Over-The-Counter.
PRC	Means People's Republic of China
Prospectus	Refers to the current sales Document.
QFI	Means Qualified Foreign Institutional Investor (in the context of investment in Chinese financial markets)
Regulated Market	Means a market within the meaning of Article 4 point 1 (14) of directive 2004/39/EC of 21 April 2004 on markets in financial instruments and any other market which is regulated, operates regularly and is recognised and open to the public.
RESA	Refers to Recueil Electronique des Sociétés et Associations.
RMB	Means Renminbi, the official currency of the People's Republic of China.
SEK	Means the Swedish Krona.
SFDR	SFDR refers to regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability related disclosures in the financial services sector, as may be amended from time to time.
SFT	Securities Financing Transaction.
SFTR	SFTR refers to regulation (EU) 2015/2365 of the European Parliament and of the Council of 25 November 2015 on transparency of securities financing transactions and of reuse, as may be amended from time to time.
Share(s)	A Share in any Class of Shares of any one Sub-Fund in the capital of the Company.
Share Class(es)	Means a group of shares having the same characteristics within a Sub-Fund.
SPAC	means to Special Purpose Acquisition Company.
Shareholder(s)	A holder of Shares.
Stock Connect	Stock Connect is a securities trading and clearing link scheme by Hong Kong Exchanges and Clearing Limited (HKEx), Shanghai Stock Exchange (SSE) and China Securities Depository and Clearing Corporation Limited (ChinaClear) and, most recently,, allowing mutual market access between Mainland China and Hong Kong.
Sub-Fund(s)	means a separate portfolio of assets established for one or more Share Classes of the Company which is invested in accordance with a specific investment objective. The Sub-Funds do not have a legal existence distinct from the Company; however each Sub-Fund is liable only for the debts, liabilities and obligations attributable to it. The specifications of each Sub-fund will be described in Part B - Sub-Funds Particulars.
Sub-Fund(s) Particular	Refers to Part B of the Prospectus detailing the specificities of each Sub-Fund.
Swaps	A swap is a derivative in which two counterparties exchange cash flows of one party's financial instrument for those of the other party's financial instrument. Specifically, two counterparties agree to exchange one stream of cash flows against another stream. These streams are called the 'legs' of the swap. The swap agreement defines the dates when the cash flows are to be paid and the way they are accrued and calculated. Usually at the time when the contract is initiated, at least one of these series of cash flows is determined by an uncertain variable such as a floating interest rate, foreign exchange rate, equity price, or commodity price.

	Swaps are not traded on an exchange but OTC.
Sustainability Risks	Sustainability risks are an environmental, social or governance event or condition that, if it occurs, could cause an actual or a potential material negative impact on the value of the investment, as defined under the SFDR.
Transferable Securities	Has the meaning ascribed to it under the 2010 Law.
TRS	Means Total Return Swaps. A TRS is a swap agreement in which one party makes payments based on a set rate, either fixed or variable, while the other party makes payments based on the return of an underlying asset, which includes both the income it generates and any capital gains. In TRS, the underlying asset, referred to as the reference asset, is usually an equity index, financial index or bonds. This is owned by the party receiving the set rate payment. TRSs allow the party receiving the total return to gain exposure and benefit from a reference asset without actually having to own it.
UCI	Means Undertaking(s) for Collective investment.
UCITS	Means Undertaking(s) for Collective investment in transferable Securities.
UCITS-CDR	Means COMMISSION DELEGATED REGULATION (EU) 2016/438 of 17 December 2015 supplementing Directive 2009/65/EC of the European Parliament and of the Council with regard to obligations of depositaries.
USD	Means US Dollar.
Valuation Day	Means a Business Day on which the NAV is calculated.
VaR	Value-at-risk is a statistical measure to estimate the size of a potential loss that could arise over a given time horizon at a given confidence level. For the funds which apply a VaR approach to calculate their global exposure, this is measured at a 99% confidence level and based on a time horizon of one month.
VaR Approach	As a second standard methodology, a sub-fund can use either the relative VaR approach or the absolute VaR approach to calculate global exposure. The investment funds decide which VaR approach is the most appropriate and then either calculates the VaR relative to its net asset value (“NAV”) (the “absolute VaR approach”) or to the VaR of a reference portfolio (the “relative VaR approach”). For sub-funds using the relative VaR approach, the VaR of their portfolio is not allowed to exceed twice the VaR of the reference portfolio. The absolute VaR approach is generally used when there is no reference portfolio or benchmark. For sub-funds using the absolute VaR approach, the maximum VaR limit is 20% of the sub-fund’s NAV.
VAT	Means value Added Tax.
Warrants	A warrant is a contract that confers the right, but not the obligation, to buy or sell a security– normally an equity – at a certain price before expiration. The price at which the underlying security can be bought or sold is referred to as the exercise price or strike price. As opposed to a call option, a warrant is issued by the company who also issues the underlying stock.

PART A: GENERAL FUND INFORMATION

The Company

The Company has an umbrella structure and therefore consists of at least one Sub-Fund. The details with regard to each Sub-Fund are part of the respective Sub-Fund Particular to the Prospectus, which will be updated upon the inception of each new Sub-Fund.

The Company can issue several Share Classes within each of the Sub-Funds.

Legal aspects

Name of the Company		SAMCO SICAV	
Legal form:		The Company was incorporated on 27 June 2011 for an unlimited period under the name ARTICO SICAV-SIF. The Articles of the Company were published on 20 July 2011 in the Mémorial C, Recueil des Sociétés et Associations N°1619 (the "**Mémorial C**"). The Company was originally set up as a specialised investment fund pursuant to the law dated 13 February 2007 on specialised investment funds. It was converted into a Part II fund pursuant to the Law on 17 December 2010 by way of a notarial deed that was published in the Mémorial on 3 February 2016. Its name then changed into ARTICO SICAV and to SAMCO SICAV on 4 December 2023. It has finally been converted into a Part I fund pursuant to the Law on 17 December 2010 by way of a notarial deed dated 5 June 2024 that has been published on 20 June 2024 on the RESA under number RESA_2024_1391130.	
Currency of account		USD	
Date of incorporation:		27 June 2011	
Number in Luxembourg Commercial Register:		R.C.S. Luxembourg B 162069	
Financial year:		1 July to 30 June	
Annual general meeting:		Annually on 12 December (for the first time in 2012) at 11.00 CEST at the registered office of the Company; should the 12 December occur on a day which is not a business day in Luxembourg (i.e. a day on which banks in Luxembourg are normally open for business), then the general meeting will be held on the next business day.	
Articles:			
	Initial publication	20 July 2011	Published in the “Mémorial C”
	Amendments	3 February 2016	Published in the “Mémorial C”
		4 December 2023	Published on the RESA on 12/01/2024
		6 June 2024	Published on the RESA on 20/06/2024

The consolidated version of the Articles is held by the Commercial and Company Register in Luxembourg for inspection. Any amendments are published in the RESA by way of a notice of deposit and, to the extent required, in the official publications of the individual distribution countries. Amendments become legally binding in respect of all shareholders subsequent to their approval by the general meeting of Shareholders.

The entirety of the individual Sub-Funds’ net assets forms the total net assets of the Company, which corresponds, at all times, to the share capital of the Company and consists of fully paid in and no-par-value Shares.

At general meetings, Shareholders have the right to one vote per Share held, irrespective of the difference in value of Shares in the respective Sub-Funds. Shares of a particular Sub-Fund carry the right of one vote per Share held when voting at meetings affecting this Sub-Fund.

The Company forms a legal entity. The rights of investors and creditors regarding a Sub-Fund or arising from the creation, the operation or the liquidation of a Sub-Fund are limited to the assets of that Sub-Fund. The assets of a Sub-Fund are exclusively available to satisfy the rights of investors in relation to that Sub-Fund and the rights of creditors whose claims have arisen in connection with the creation, the operation or the liquidation of that Sub-Fund.

The Board of Directors of the Company is empowered, at all times, to liquidate existing Sub-Funds and/or to establish new Sub-Funds as well as different Share Classes with specific characteristics within these Sub-Funds. This Prospectus will be updated each time a new Sub-Fund is launched.

The Company is unlimited with regard to duration and total assets.

A. Board of Directors

The Board of Directors is responsible for the administration and management of the Company and of the assets of each Sub-Fund. It may carry out all acts of management and administration on behalf of the Company; it may in particular purchase, sell, subscribe or exchange any transferable securities, money market instruments and other eligible assets and exercise all rights directly or indirectly attached to the Company's assets.

The list of the members of the Board of Directors, as well as of the other administrative bodies in operation may be found in this Prospectus and in the periodic reports.

B. Management Company

The Board of Directors of the Company has designated FUNDSIGHT S.A. to act as its management company under the terms of the Management Company Services Agreement entered into as of 6 June 2024 for an indefinite period of time.

The Management Company is a company incorporated under Luxembourg laws with registered office at 106, Route d'Arlon – L-8210 Mamer, registered with the *Registre de Commerce et des Sociétés* under number B-44.870. The Management Company was incorporated for an indeterminate period on 1st September 1993, under a former name, in the form of a joint stock company (*société anonyme*).

The articles of incorporation of the Management Company were published in the Mémorial, Recueil des Sociétes et Associations for the first time on 5th October 1993.

The latest amendments to the articles of incorporation reflecting the change of name of the Management Company became effective on 16 June 2025 and were published in the Recueil Electronique des Sociétés et Associations on 26 June 2025.

The subscribed and fully paid-up capital of the Management Company as at 28th February 2025 amounts to EUR 3,196,700.00 and is in accordance with the provisions of the 2010 Law.

The Management Company is authorised as a management company in accordance with the provisions of Chapter 15 of the 2010 Law and is supervised by the CSSF. It is registered on the official list of Luxembourg management companies governed by Chapter 15 of the 2010 Law.

Under the supervision of the Board of Directors of the Company, the Management Company is responsible on a day-to-day basis for providing investment management, administration and marketing services in respect of all Sub-Funds of the Company.

Subject to the requirements set forth by the 2010 Law, the Management Company is authorised to delegate under its responsibility and supervision part or all of its functions and duties to third parties.

1. Other funds managed by Management Company

As of the date of the Prospectus, the Management Company manages in addition to the Company other undertakings for collective investment, including alternative investment funds, the list of which is available at the registered office of the Management Company.

2. Remuneration Policy

The Management Company applies a remuneration policy and practice that is consistent with, and promotes, sound and effective risk management and does not encourage risk-taking which is inconsistent with the risk profile and Articles of Incorporation.

Furthermore, the remuneration policy is in line with the business strategy, objectives, values and interests of the Management Company and the UCITS that it manages and of the investors in such UCITS and includes measures to avoid conflicts of interest.

The remuneration policy reflects the Management Company's objectives for good corporate governance as well as sustainable and long-term value creation for investors. Fixed and variable components of total remuneration are appropriately balanced, and the fixed remuneration component represents a sufficiently high proportion of the total remuneration to allow the operation of a fully flexible policy on variable remuneration components, including the possibility to pay no variable remuneration component.

Where, and to the extent applicable, the assessment of performance is set in a multi-year framework appropriate to the holding period recommended to the investors of the Company in order to ensure that the assessment process is based on the longer-term performance of the Company and its investment risks and that the actual payment of performance-based components of remuneration is spread over the same period.

The Management Company complies with the remuneration principles described above in a way and to the extent that is appropriate to its size, internal organisation and the nature, scope and complexity of its activities.

The principles of the remuneration policy are reviewed on a regular basis and adapted to the evolving regulatory framework.

Further information on the remuneration policy of the Management Company is available at which includes in particular a description of the calculation methods of remuneration and benefits for specific employee categories as well as the identification of the persons responsible for the allocation, including if applicable the members of the remuneration committee. Upon request, the Management Company will provide such information free of charge in paper form to Shareholders of the Fund.

3. Conflict of Interest Policy

The Management Company has established, implemented an effective conflict of interest policy which is maintained and available on its website .

C. Investment Manager

The Management Company has appointed AWEA Fonds AG, as Investment Manager to carry out investment management services and to be responsible for the investment activities within the parameters and restrictions set out in this Prospectus and each Sub-Fund Particular

The Investment Manager will provide or procure each such Sub-Fund investment management services, pursuant to the provisions of the relevant investment management agreement and in accordance with the investment policy, objective and restrictions of the relevant Sub-Fund as set out in the Articles, the Prospectus and the relevant Sub-Fund Particular and with the aim to achieve the Sub- fund's Investment Objective.

Any such Investment Manager may be assisted by one or more Investment Advisers or delegate their functions, with the approval of the CSSF, the Management Company and the Board, to one or more sub-managers. In case sub-managers/advisers are appointed, the relevant Sub-Fund Particular will be updated.

Based on article 110(1)(g) of the 2010 Law, the Management Company may terminate the mandate of an Investment Manager at any time when this is in the interests of the Shareholders.

Unless otherwise stated in the relevant Sub-Fund Particular, Investment Manager is responsible for, among other matters, identifying and acquiring the investments of the Company. The Investment Manager is granted full power and authority and all rights necessary to enable them to manage the investments of the relevant Sub-Funds and provide other investment management services to assist the Company and the Management Company to achieve the Investment Objectives and Policy set out in this Prospectus and any specific Investment Objectives and Policy set out in the relevant Sub-Fund Particular. Consequently, the responsibility for making decisions to buy, sell or hold a particular security or asset rests with the Board, the Management Company, the Investment Manager, subject always to the overall policies, direction, control and responsibility of the Board and the Management Company.

D. Depositary and Paying Agent

UBS Europe SE, Luxembourg Branch has been appointed as Depositary and paying agent of the Company within the meaning of the Law of 17 December 2010 relating to undertakings for collective investment, as amended (the "2010 Law") and the Commission Delegated Regulation (EU) 2016/438, as amended, supplementing the UCITS Directive (UCITS Level II Regulation), pursuant to a Depositary and Paying Agent Agreement entered into for an unlimited duration and can be terminated by either party by giving three months prior notice.

The Depositary is a Luxembourg established branch of UBS Europe SE, a European Company (*Societas Europaea*), having its registered office in Frankfurt am Main, Germany, registered with the German Trade Register under number HRB 107046. UBS Europe SE, Luxembourg Branch has its address at 33A, avenue John F. Kennedy, L-1855 Luxembourg, Grand Duchy of Luxembourg, registered with the Luxembourg trade and companies register under number B 209.123.

Depositary Duties

The relationship between the Company, the Management Company and the Depositary is subject to the terms of the Depositary and Paying Agent Agreement. Pursuant to the Depositary and Paying Agent Agreement, the Depositary has been appointed for the safekeeping of financial instruments that can be held in custody, for the record keeping and verification of ownership of other assets of the Company as well as to ensure the effective and proper monitoring of the Company's cash flows in accordance with the provisions of the 2010 Law and the Depositary and Paying Agent Agreement. Assets held in custody by the Depositary shall not be reused by the Depositary, or any third party to which the custody function has been delegated, for their

own account, unless such reuse is expressly allowed by the 2010 Law.

In addition, the Depositary shall also ensure that:

1. the sale, issue, repurchase, redemption and cancellation of Shares are carried out in accordance with Luxembourg law and the Articles of Incorporation,
2. the value of the Shares is calculated in accordance with Luxembourg law and the Articles of Incorporation,
3. the instructions of the Management Company or the Company are carried out, unless they conflict with applicable Luxembourg law and/or the Articles of Incorporation,
4. in transactions involving the Company's assets any consideration is remitted to the Company within the usual time limits, and
5. the Company's income is applied in accordance with Luxembourg law or the Articles of Incorporation.

The Depositary shall assume its duties and responsibilities in accordance with the provisions of the 2010 Law. The Depositary must act honestly, fairly, professionally, independently and solely in the interest of the Company and its shareholders.

Delegation and conflict of interests

In compliance with the provisions of the Depositary and Paying Agent Agreement and the 2010 Law, the Depositary may, subject to certain conditions, delegate part or all of its safekeeping duties in relation to financial instruments that can be held in custody to sub-custodian(s) (including any affiliates of UBS AG), as they are appointed by the Depositary from time to time.

Prior to the appointment of any sub-custodian and on an ongoing basis pursuant to applicable laws and regulations as well as its conflict of interests policy, the Depositary shall assess potential conflicts of interests that may arise from the delegation of safekeeping functions. The Depositary is part of the UBS Group, a worldwide, full-service private banking, investment banking, asset management and financial services organization which is a major participant in the global financial markets. As such, potential conflicts of interest from the delegation of its safekeeping functions could arise as the Depositary and its affiliates are active in various business activities and may have differing direct or indirect interests. Irrespective of whether a given sub-custodian is part of the UBS Group or not, the Depositary shall exercise the same level of due skill, care and diligence both in relation to the selection and appointment as well as in the on-going monitoring of the relevant sub-custodian. Furthermore, the conditions of any appointment of a sub-custodian that is member of the UBS Group shall be negotiated at arm's length in order to ensure the protection of interests of the Company and its shareholders. Should a conflict of interest occur and in case such conflict of interest cannot be mitigated, such conflict of interest as well as the decisions taken will be disclosed to the shareholders of the Company. An up-to-date description of any safekeeping functions delegated by the Depositary and an up-to-date list of these delegates can be found on the following webpage: .

Liability

The Depositary is liable to the Company and its shareholders for the loss of a financial instrument held in custody (such financial instruments as defined in article 34(3)(a) of the 2010 Law and article 12 of the UCITS Level II Regulation, the "Company Custodial Assets") by the Depositary and/or a sub-custodian in accordance with article 35 of the 2010 Law (the "Loss of a Company Custodial Asset").

In case of Loss of a Company Custodial Asset, the Depositary shall return a financial instrument of an identical type or the corresponding amount to the Company without undue delay. In accordance with the provisions of the 2010 Law, the Depositary shall not be liable for the Loss of a Company Custodial Asset, if such Loss of a Company Custodial Asset has arisen as a result of an external event beyond its reasonable control, the consequences of which would have been unavoidable despite all reasonable efforts to the contrary.

The Depositary shall also be liable to the Company and to the shareholders for all other direct losses suffered by them as a result of the Depositary's negligent or intentional failure to properly fulfil its duties in accordance with the 2010 Law.

The Depositary's liability shall not be affected by any delegation, unless otherwise stipulated in the 2010 Law.

Termination

The Company and the Depositary may terminate the Depositary and Paying Agent Agreement at any time by giving three (3) months' prior written notice. The Depositary and Paying Agent Agreement may also be terminated on shorter notice in certain circumstances, for instance where one party commits a material breach of its obligations. In case no new depositary is appointed before the expiry of the notice period, the Depositary shall take all necessary steps to ensure good preservation of the interests of the Company investors, including the obligation to maintain or open all the accounts necessary for the safekeeping of the different assets of the Company until the closure of liquidation of the Company.

Fees

The Depositary is entitled to receive a remuneration for its services as agreed in the Depositary and Paying Agent Agreement. In addition, the Depositary is entitled to be reimbursed by the Company for its reasonable out-of-pocket expenses and disbursements, including, but not limited to, taxes, duties, charges and broker fees, whether existing now or imposed in the future and which are paid by the Depositary or for which the Depositary may be held liable and for the charges of any correspondents.

Depositary's independence from the Company

The Depositary is not involved, directly or indirectly, with the business affairs, organization or management of the Company and is not responsible for the content of this document and thus accepts no responsibility for the accuracy of any information contained herein or the validity of the structure and investments of the Company. The Depositary has no decision-making discretion nor any advice duty relating to the Company's investments and is prohibited from meddling in the management of the Company's investments. The Depositary does not have any investment decision-making role in relation to the Company.

Outsourcing and data protection

Information about outsourcing and potential processing of investors' data by the Depositary may be found at .

E. Domiciliation Agent and Corporate Secretary

The Company has appointed UBS Europe SE, Luxembourg Branch as its Corporate Secretary and Domiciliation Agent, pursuant to the Corporate Secretary and Domiciliation Agent Agreement effective 4th December 2023. In such capacity, UBS Europe SE, Luxembourg Branch is entrusted with the domiciliation of the Company and shall, in particular, allow the Company to establish its registered office at the place of business of UBS Europe SE, Luxembourg Branch and provide facilities in the course of the day-to-day administration of the Company. The Domiciliation Agent/Corporate Secretary is entitled to charge commission in line with the scale of fees customarily applied at the financial center of Luxembourg.

F. Administrative Agent

The Management Company, with the consent of the Company, has appointed Northern Trust Global Services SE, as administrative, registrar and transfer and communication agent of the Company pursuant to the Administrative Agreement and applicable legislation and regulations currently in force, in particular the CSSF Circular 22/811. The Administrative Agent has its business address at 10, rue du Château d'Eau, L-3364 Leudelange, Grand Duchy of Luxembourg and is registered with the Luxembourg Trade and Companies Register under number B 232281.

The Administrative Agent, Northern Trust Global Service SE, is a credit institution with the legal form of a European Company, incorporated under the laws of the Grand Duchy of Luxembourg. The Administrative Agent is authorised and regulated by the CSSF in Luxembourg under the 1993 Act. The Administrative Agent is an affiliated company of the Northern Trust Company.

The relationship between the Company, the Management Company and the Administrative Agent is subject to the terms of the Administration Agreement. Under the terms of the Administration Agreement, the Administrative Agent will carry out all general administrative duties related to the administration of the Company required by Luxembourg law, calculate the Net Asset Value per Share, maintain the accounting records of the Company, as well as process all subscriptions, redemptions, conversions, and transfers of Shares, and register these transactions in the register of Shareholders. In addition, as registrar and transfer agent of the Company, the Administrative Agent is also responsible for collecting the required information and performing verifications on investors to comply with applicable anti-money laundering rules and regulations and communication function.

The Administrative Agent is not responsible for any investment decisions of the Company or the effect of such investment decisions on the performance of the Company.

The Administration Agreement has no fixed duration and each party may, in principle, terminate the agreement on not less than three (3) months' prior written notice by registered letter. The Administration Agreement may also be terminated on shorter notice in certain circumstances, for instance where one party commits a material breach of its obligations. Based on article 110(1)(g) of the 2010 Law, the Management Company may terminate the mandate of the Administrative Agent at any time when this is in the interests of the Shareholders.

G. Distributor

The Management Company will act as Global distributor and may appoint distributors of the Company and of its Sub-Funds.

The distributors may in turn appoint Sub-distributor(s) to distribute Shares of different Sub-Funds from time to time.

All Sub-distributors that are entitled to receive subscription monies and/or subscription, redemption or conversion orders on behalf of the Company and Financial Intermediary must be (i) professionals of the financial sector of a FATF member country which are subject under their local regulations to anti money laundering rules equivalent to those required by Luxembourg Law or (ii) professionals established in a non-FATF member State provided they are a subsidiary of a professional of the financial sector of a FATF member State and they are obliged to follow anti money laundering and terrorism financing rules equivalent to those required by Luxembourg Law because of internal group policies. Whilst and to the extent that such arrangements subsist, underlying investors will not appear in the Register and will have no direct right of recourse against the Company.

Any Sub-distributors or Financial Intermediary holding their Shares through Euroclear or Clearstream or any other relevant clearing system as an accountholder also will not be recognised as the registered Shareholder in the Register. The relevant Financial Intermediary of Euroclear or Clearstream or the other relevant clearing system will be recognised as the registered Shareholder in the Register in such event, and in turn would hold the Shares for the benefit of the relevant accountholders in accordance with the relevant arrangements.

The terms and conditions of any (sub-)distribution agreement(s) with arrangements to provide Financial Intermediary services will have to allow that an underlying investor who (i) has invested in the Company through a Financial Intermediary and (ii) is an Eligible Investor, may at any time, require the transfer in his/her/its name of the Shares subscribed through the Financial Intermediary. After this transfer, the investor will receive evidence of his shareholding at the confirmation of the transfer from the Financial Intermediary.

Copies of the various agreements between the Management Company, the Company, and the distributors or Financial Intermediary(ies) are available at the registered office of the Company as well as at the registered office of the Administrative Agent or of the Management Company, distributor, Sub-distributor(s)/Financial Intermediary(ies) during the normal business hours on any Business Day.

The Management Company and any Investment Manager, the Investment Adviser(s), the distributor may from time to time and at their sole discretion, pay all or part of the fees and charges they receives as a commission, retrocession, rebate or discount to some or all investors, financial intermediaries or Sub-distributors on the basis of (but not limited to) the size, nature, timing or commitment of their investment within the limits laid down in applicable laws including, without limitation Directive 2014/65/EU of the European Parliament and of the Council of 15 May 2014 on markets in financial instruments, as may be amended or supplemented from time to time.

1. INVESTMENT OBJECTIVE, POLICY AND RESTRICTIONS

A. General Investment Objective

The Company provides investors with the opportunity to invest in professionally managed portfolios while spreading investment risks. The investment policy of each Sub-Fund is described in the Sub-Fund Particular referring to the respective Sub-Fund.

B. Investment Restrictions

The investment restrictions defined in Appendix I or II will be applicable to all Sub-Funds. Furthermore, the restrictions relating to risk diversification requirements set out in Appendix I shall not apply during a period of six (6) months following the launching of each Sub-Fund.

C. ESG Disclosure

Sub-Funds Classification

SAMCO SICAV – Artico Sustainable Emerging Markets	Article 9 SFDR

ESG Policy

The ESG policy may vary depending on the sub-fund. As part of their investment process, the equity sub-funds labelled “Artico Sustainable” integrate ESG factors fully in their (pre-) investment analysis procedure and investment decision process.

Such investment process in relation to the equity Sub-Funds labelled “Artico Sustainable” is covered by the risk management procedure and internal controls which take sustainability risk into account. The Investment Manager of these Sub-Funds will invest under normal market conditions in companies with good fundamental characteristics based on their published financial statements and ESG information from third-party data providers.
These “good fundamental characteristics” include (i) superior income growth, (ii) a higher profitability, (iii) a healthier balance sheet, (iv) a lower valuation and (v) a better ESG score (according to MSCI ESG scores) than the investment universe and/or the benchmark of the relevant Sub-Fund.
By aiming at such superior fundamental characteristics in all these 5 dimensions at portfolio level (not necessarily for each individual company) the Investment Manager will fully integrate ESG criteria in its investment decision process. At individual security level, the Investment Manager bases its decisions to buy or to sell securities on financial and economic indicators and on the above ESG criteria (it being noted that the Investment Manager has however the possibility not to follow their result in its decision to buy a security).

The Investment Manager applies both a positive selection based on ESG factors as described above as well as negative exclusion of sectors or business activities, which the Investment Manager deems not to be aligned with a sustainable global economy.

The Investment Manager is qualified and has the relevant human resources to analyse investment from an ESG perspective.

Considerations about principal adverse impacts

FUNDSIGHT S.A. as a third party Management Company is considering principal adverse impacts on sustainability factors while engaging with portfolio managers on investment decisions. Details on this consideration and the due diligence policies with respect to the principal adverse impacts of investment decisions on sustainability factors required as per Article 4 of SFDR can be found on its website. FUNDSIGHT S.A. will publish on its website an annual consolidated report on principal adverse impact for the funds it has under management.

Sustainability Objective

Not all sub-funds have a sustainability objective. As stated in the Sub-Funds Particular (see Part B) all Sub-Funds classified under Article 9 SFDR have a sustainability objective to contribute to the reduction of greenhouse gas emissions and to align themselves to the objectives of the Paris climate agreement dated 12 December 2015. Feeder Sub-Funds also are classified under Article 9 SFDR provided they invest exclusively in units of other Article 9 funds. This sustainability objective is applied to all Sub-Fund holdings (except cash and derivatives) and is achieved through multiple steps:

- The decarbonization is steered at the portfolio level based on the carbon intensity (scope 123) in relation to the weighted-average EVIC. A fund-specific carbon intensity target is calculated each year based on an initial 50% reduction in carbon intensity against the broad market benchmark at base date (June 2020) and a 7% annual decarbonization rate applied thereafter, adjusted for inflation.
- Fossil fuels companies are excluded from the fund, subject to a de minimis threshold of revenue.
- The Company targets that the carbon intensity of the funds is at least 20% lower than their corresponding benchmark.
- The Company considers potentially negative impacts on environmental and social matters and typically does not invest in companies with very bad ESG ratings.
- In order to guarantee both minimum safeguards and no significant harm to the sustainable investment objective the Company strictly excludes companies subject to very severe (Red flag) controversies or severe (Orange flat) environmental controversies according to MSCI methodology.

Paris-aligned MSCI benchmarks – where available – will be used to monitor and report the achievement of the sustainability objectives in terms of decarbonization.

For each Sub-Fund that has sustainable investments as objective (within the meaning of Article 9 of the SFDR), information about such objective is available in the pre-contractual disclosures applicable to each Sub-Fund contained in Part B.

D. Changes in the investment strategy or investment policy

The Board of Directors may decide to change the investment strategy or investment policy of the Company or its Sub-Funds. All changes require a corresponding Prospectus change and hence the prior approval of the CSSF. Material changes require prior notification to investors as further described in Section “Amendments to the Prospectus” hereafter.

2. GENERAL RISK WARNINGS

In accordance with the 2010 Law and the applicable regulations, including the CSSF Circular 11/512, as amended, the Company shall use a risk management process that enables it to assess the exposure of the Sub-Funds to market, liquidity, counterparty and any other risks, including operational risks, which are considerable for the Sub-Funds in question.

Within the framework of the risk management process, either the Commitment Approach or an approach based on relative or absolute VaR shall be used to manage and measure the overall exposure of each Sub-Fund. The choice of the approach shall be based on the investment strategy for each Sub-Fund and on the types and complexity of the derivative financial instruments employed, as well as on the portion of the Sub-Fund's portfolio made up of derivative financial instruments. The Board shall decide on the methodology used to determine the overall exposure of each Sub-Fund. This shall be defined for each Sub-Fund in Part B of the Prospectus.

The Commitment Approach measures the overall exposure linked to the positions on derivative financial instruments and other investment techniques (taking into account the settlement and hedging effects) which may not exceed the Net Asset Value. According to this approach, the position in each derivative financial instrument is in principle converted to the market value of an equivalent position in the underlying asset for that derivative instrument.

The VaR is a measurement of the maximum expected loss, bearing in mind a given confidence level over a given period.

The calculation of the VaR is arrived at based on a one-tailed confidence interval of 99% and a holding period equivalent to 1 month (20 days).

When using the relative VaR, the overall risk linked to all the positions in the portfolio of the relevant Sub-Fund as calculated through VaR shall not exceed twice the VaR of a benchmark portfolio.

When using the absolute VaR, the VaR of the relevant Sub-Fund shall be limited to a maximum of 20% of its Net Asset Value.

The method of determining the overall risk and the benchmark portfolio for the Sub-Funds using the VaR Approach will be more fully detailed for each Sub-Fund in Part B.

A. Use of derivatives

Derivative financial instruments are not in themselves investment instruments but rights whose valuation mainly derives from the price and the price fluctuations and expectations of an underlying instrument. Investments in derivative financial instruments are subject to the general market risk, management risk, credit and liquidity risk.

Depending on the specific characteristics of derivative financial instruments, however, the aforementioned risks may be of a different kind and occasionally turn out to be higher than the risks with an investment in the underlying instruments.

That is why the employment of derivative financial instruments not only requires an understanding of the underlying instrument but also in-depth knowledge of the derivative financial instruments themselves.

The risk of default in the case of derivative financial instruments traded on an exchange is generally lower than the risk associated with derivative financial instruments that are traded OTC on the open market, because the clearing agents, which assume the function of issuer or counterparty in relation to each derivative financial instrument traded on an exchange, assume a performance guarantee. To reduce the overall risk of default, such guarantee is supported by a daily payment system maintained by the clearing agent, in which the assets required for cover are calculated. In the case of derivative financial instruments traded OTC on the open market, there is no comparable clearing agent guarantee and in assessing the potential risk of default, the Company must take account of the creditworthiness of each counterparty.

There are also liquidity risks since it may be difficult to buy or sell certain derivative financial instruments. When derivative transactions are particularly large, or the corresponding market is illiquid (as may be the case with derivative financial instruments traded OTC on the open market), it may under certain circumstances not always be possible to fully execute a transaction or it may only be possible to liquidate a position by incurring increased costs.

Additional risks connected with the employment of derivative financial instruments lie in the incorrect determination of prices or valuation of derivative financial instruments. There is also the possibility that derivative financial instruments do not completely correlate with their underlying assets, interest rates or indices. Many derivative financial instruments are complex and frequently valued subjectively. Inappropriate valuations can result in higher demands for cash by counterparties or in a loss of value for the Company. There is not always a direct or parallel relationship between a derivative financial instrument and the value of the assets, interest rates or indices from which it is derived. For these reasons, the use of derivative financial instruments by the Company is not always an effective means of attaining the Company's investment objective and can at times even have the opposite effect.

B. Swap Agreements

A Sub-Fund may enter into Swap agreements (including TRS and CFDs) - with respect to various underlyings, including securities

and indices. A Swap is a contract under which one party agrees to provide the other party with something, for example a payment at an agreed rate, in exchange for receiving something from the other party, for example the performance of a specified asset or basket of assets. A Sub-Fund may use these techniques to take positions in or protect against changes in securities indices and specific securities prices.

In respect of securities and securities indices a Sub-Fund may utilise total return Swap contracts where the Sub-Fund may exchange interest rate cash flows for cash flows based on the return of, for example, an equity or fixed income instrument or a securities index. These contracts allow a Sub-Fund to manage its exposures to certain securities or securities indices. For these instruments, the Sub-Fund's return is based on the movement of interest rates relative to the return on the relevant security or index. The Sub-Fund may also use Swaps in which the Sub-Fund's return is relative to the volatility of price of the relevant security (a volatility Swap, which is a Forward Contract whose underlying is the volatility of a given product. This is a pure volatility instrument allowing investors to speculate solely upon the movement of a stock's volatility without the influence of its price) or to the variance (the square of the volatility) (a variance Swap which is a type of volatility Swap where the payout is linear to variance rather than volatility, with the result that the payout will rise at a higher rate than volatility).

Where a Sub-Fund enters into TRS (or invests in other financial derivative instruments with the same characteristics) it will only do so on behalf of the Sub-Fund with counterparties that will be entities with legal personality typically located in OECD jurisdictions and will be subject to a credit assessment. Where the counterparty is subject to a credit rating by any agency registered and supervised by ESMA, that rating shall be taken into account in the credit assessment. Where a counterparty is downgraded to A3 or below (or comparable rating) by such a credit rating agency, a new credit assessment in respect of the counterparty will be undertaken without delay.

Subject to compliance with those conditions, the Investment Manager have full discretion as to the appointment of counterparties when entering into TRS in furtherance of the relevant Sub-Fund's investment objective and policies.

The maximum and expected proportion of assets that may be subject to Swaps and TRS will be set out for each Sub-Fund in the relevant Sub-Fund Particular. If a Sub-fund intends to make use of SFTs or TRS, the relevant Sub-Fund Particular will include the disclosure requirements of SFTR.

Assets subject to Swaps and TRS and other transactions owned by the Company will be held in custody by the Depositary or any of its sub-custodians to which the Depositary has delegated safe-keeping of the Company's assets.

C. Insolvency Risk on Swap Counterparties

Margin deposits made in relation to Swap contracts will be held with brokers. Though there are provisions in the structure of these contracts intended to protect each party against the insolvency for the other, these provisions may not be effective. This risk will further be mitigated by the exclusive choice of reputable Swap counterparties.

D. Potential Illiquidity of Exchange Traded Instruments and Swap contracts

It may not always be possible for the Company to execute a buy or sell order on exchanges at the desired price or to liquidate an open position due to market conditions including the operation of daily price fluctuation limits. If trading on an exchange is suspended or restricted, the Company may not be able to execute trades or close out positions on terms which the Investment Manager believes are desirable.

Swap contracts are OTC contracts with a single counterparty and may as such be illiquid. Although Swap contracts may be closed out to realize sufficient liquidity, such closing out may not be possible or very expensive for the Company in extreme market conditions.

E. Ability to take positions through Swap contracts

Insofar as provided for by the Special Investment Policy of the relevant Sub-Fund, the ability of such Sub-Fund to take short positions and to achieve leverage may be dependent on the ability to enter into Swap contracts with appropriate counterparties and terms. The Company may not be able to enter into such contracts because of, for example, changes in laws, regulations or the situation of the Swap counterparties.

F. Synthetic Short Selling

Typically, UCITS invest on a "long only" basis. This means that the respective net asset value will rise (or fall) in value based on the market value of the assets held. A "short" sale involves the sale of a security that the seller does not own in the hope of purchasing the same security (or a security exchangeable for such security) at a later date at a lower price. To make a delivery to the buyer, the seller must borrow the security and is obligated to return the security (or a security exchangeable for such security) to the lender, which is accomplished by a later purchase of said security. Although the Company is not permitted to enter into short sales under the 2010 Law, a Sub-Fund may, by employing certain derivative techniques (such as CFDs) designed to produce the same economic effect as a short sale (a "synthetic short"), establish both "long" and "short" positions in individual stocks and markets. As a result, as well as holding assets that may rise or fall with markets, a Sub-Fund may also hold positions that will rise as the market value falls, and fall as the market value rises. Taking synthetic short positions involves trading on margin and accordingly can involve greater risk than investments based on a long position. Investors should also

consider the risk factors under "Use of Derivatives" above.

G. Convertible Bonds Transactions

Convertible bond transactions are designed to be relatively market neutral i.e., they hedge out the directional risks generally associated with un-hedged investments in the underlying instruments. However, should the credit status of an issuer weaken, losses may result from changes in valuation or a loss of liquidity with respect to the security. These losses will be limited by the short hedge (through synthetic hedging techniques) on the underlying security, but may still be substantial in relation to the Net Asset Value of the Sub-Fund.

H. Market Risk

The investments of the Company are subject to normal market fluctuations and the risks inherent in equity securities and similar instruments and there can be no assurances that appreciation will occur. The price of Shares can go down as well as up and investors may not realise their initial investment. Although the Investment Manager will attempt to restrict the exposure of the Company to market movements, there is no guarantee that this strategy will be successful.

To achieve the desired level of market exposure the Company may use Futures, which may result in losses to the portfolio.

I. Emerging Markets

The special investment policies of Sub-Funds may provide for the possibility to invest in countries where the local stock exchanges may not yet qualify as Regulated Markets, which operate regularly and are recognised and open to the public.

The attention of potential investors is drawn to the fact that investments in such Sub-Funds are subject to a higher degree of risk. The stock markets and the economies of emerging markets are generally volatile. Investments in certain emerging markets may also be adversely affected by political developments and/or changes in local laws, taxes and exchange controls.

Finally, in some emerging markets, it is difficult to clearly identify what conditions of ownership apply to certain companies as a result of ongoing privatisation processes.

J. FATCA

The Company may be subject to regulations imposed by foreign regulators, in particular to the provisions of FATCA. It includes provisions generally known as FATCA. FATCA provisions generally impose a reporting to the U.S. Internal Revenue Services of non-U.S. financial institutions that do not comply with FATCA and U.S. persons' (within the meaning of FATCA) direct and indirect ownership of non-U.S. accounts and non-U.S. entities. Failure to provide the requested information will lead to a 30% withholding tax applying to certain U.S. source income (including dividends and interest) and gross proceeds from the sale or other disposal of property that can produce U.S. source interest or dividends.

Under the terms of FATCA, the Company will be treated as a Foreign Financial Institution (within the meaning of FATCA - "FFI"). As such the Company may require all Shareholders to provide documentary evidence of their tax residence and all other information deemed necessary to comply with the above-mentioned regulations.

Despite anything else herein contained and as far as permitted by Luxembourg law, the Company shall have the right to:

- withhold any taxes or similar charges that it is legally required to withhold, whether by law or otherwise, in respect of any shareholding in the Company;
- require any Shareholder or beneficial owner of the Shares to promptly furnish such personal data as may be required by the Company in its discretion in order to comply with any law and/or to promptly determine the amount of withholding to be retained;
- divulge any such personal information to any tax authority, as may be required by law or such authority; and
- withhold the payment of any dividend or redemption proceeds to a Shareholder until the Company holds sufficient information to enable it to determine the correct amount to be withheld.

K. Forward Foreign Exchange Contracts

The Company may enter into forward foreign exchange contracts. A forward foreign exchange contract is a contractually binding obligation to purchase or sell a particular currency at a specified date in the future. Forward foreign exchange contracts are not uniform as to the quantity or time at which a currency is to be delivered and are not traded on exchanges. Rather, they are individually negotiated transactions. Forward foreign exchange contracts are made through a trading system known as the interbank market. It is not a market with a specific location but rather a network of participants electronically linked documentation of transactions generally consists of an exchange of telex or facsimile messages. There is no limitation as to daily price movements on this market and in exceptional circumstances there have been periods during which certain banks have refused to quote prices for forward foreign exchange contracts or have quoted prices with an unusually wide spread between the price at which the bank is prepared to buy and that at which it is prepared to sell. Transactions in forward foreign exchange contracts are not regulated by any regulatory authority nor are they guaranteed by an exchange or clearing house. The Company will be subject to the risk of the inability or refusal of its counterparties to perform with respect to such contracts. Any such default would eliminate any profit potential and compel the Company to cover its commitments for resale or repurchase, if any, at the then current market price. These events could result in significant losses.

Currency Options: Unless otherwise provided for in the investment policy of the relevant Sub-Fund, the Company may acquire currency Options, the value of which depend largely upon the likelihood of favourable price movements in the underlying currency in relation to the exercise (or strike) price during the life of the Option. Many of the risks applicable to trading the underlying currencies are also applicable to OTC Options trading. In addition, there are a number of other risks associated with the trading of Options including the risk that the purchaser of an Option may at worst lose his entire investment (the premium it pays).

L. Currency Exposure

The Shares may be denominated in different currencies and Shares will be issued and redeemed in those currencies. Certain of the assets of the Company may, however, be invested in securities and other investments which are denominated in other currencies. Accordingly, the value of such assets may be affected favourably or unfavourably by fluctuations in currency rates. The Company will be subject to foreign exchange risks. The Company may engage in currency hedging but there can be no guarantee that such a strategy will prevent losses. In addition, prospective investors whose assets and liabilities are predominantly in other currencies should take into account the potential risk of loss arising from fluctuations in value between the reference currency of a Sub-Fund and such other currencies.

M. Financial Intermediary arrangements

The Company draws the investors' attention to the fact that any investor will only be able to fully exercise his/her/its investor rights directly against the Company, in particular the right to participate in general meetings of Shareholders, if the investor is registered himself/herself/itself and in his/her/its own name in the register of Shareholders. In cases where an investor invests in the Company through an intermediary investing into the Company in his/her/its own name but on behalf of the investor, it may not always be possible for the investor to exercise certain Shareholder rights directly against the Company. Investors are advised to take advice on their rights.

N. Conflicts of interest

The Board of Directors, the Management Company, the Investment Manager, the Depositary, the Administrative Agent and the other service providers of the Company, and/or their respective affiliates, members, employees or any person connected with them may be subject to various conflicts of interest in their relationships with the Company.

As further described in the Articles, any director of the Company who has, directly or indirectly, an interest in a transaction submitted to the approval of the Board of Directors which conflicts with the Company's interest, must inform the Board of Directors. The director may not take part in the discussions on and may not vote on the transaction. Where, by reason of a conflicting interest, the number of directors required in order to validly deliberate is not met, the board of directors may submit the decision on this specific item to the general meeting of shareholders.

The Management Company has adopted and implemented a conflicts of interest policy and has made appropriate organisational and administrative arrangements to identify and manage conflicts of interests so as to minimise the risk of the Fund's interests being prejudiced, and if they cannot be avoided, ensure that the Company is treated fairly.

O. Investments in UCIs and UCITS

Sub-Funds, whose net assets are partially or fully invested in existing UCI and UCITS in accordance with their particular investment policies, accordingly have either partially or fully the structure of a fund of funds.

The general advantage of a fund of funds compared with direct investment in specific funds is the broader diversification or spread of risk. In a fund of funds, portfolio diversification extends not only to its own investments because the investment objects (target funds) themselves are also governed by the stringent principles of risk diversification. A fund of funds enables the investor to invest in a product which spreads its risks on two levels and thereby minimises the risks inherent in the individual investment object. The Company additionally permits investment in a single product, by which means the investor gains an indirect investment in a wide range of securities.

Certain commission payments and expenses may occur more than once when investing in existing funds (for example, commission for the Custodian Bank and the Central Administrative Agency, Management Company, investment management/advisory fees and issuing/redemption commission of the UCI and/or UCITS in which an investment is made). Such commission payments and expenses are charged at the level of the target fund as well as of the fund of funds.

P. Master-Feeder structure

There is a risk that the performance of a Feeder Sub-Fund is not exactly the same as the performance of the Master Fund due to, i.e. cash holding, hedging, transactional costs.

A redemption in a Master Fund may have an impact on the relevant Sub-Fund. Indeed, without prejudice to Article 11 (2) and Article 28 (1) (b) of the 2010 Law, if a Master Fund temporarily suspends the repurchase and redemption of its Shares, whether at its own initiative or at the request of its competent authorities, each of the relevant Feeder Sub-Funds are entitled to suspend the repurchase and redemption of its shares notwithstanding the conditions laid down in Article 11 (2) and Article 28 (1) (b) of the 2010 Law within the same period of time as the Master Funds.

Moreover, the liquidation or the merger of a Master Fund may also have an impact on the redemption in the relevant Feeder

Sub-Fund.

Q. Risks relating to investments in SPACs

SPACs are shell companies that are admitted to trading on a trading venue with the intention to acquire a business and are often referred to as blank check companies. The persons responsible for setting up SPACs are the sponsors, who typically have significant expertise in one or more economic sectors and use the SPAC to acquire companies in those sectors.

The life cycle of a SPAC is typically divided into three phases:

(i) the first stage is the IPO, whereby the shares and warrants in the SPAC are admitted to trading on a trading venue;

(ii) in the second stage, the SPAC searches for a target company to acquire; and

(iii) the third and final stage consists of the business combination with the target company, typically through a merger.

After the third stage, the SPAC is a normal listed company.

Investments in SPACs include different risks such as dilution risk – for example, dilution arising from the payment of the sponsors' fees in shares, the exercise of warrants and/or in relation to the financing of the acquisition – , liquidity risk, risk of conflicts of interest – in situations where the interests of the sponsor or affiliated parties of the SPAC would differ from the interests of its shareholders – or uncertainty as to the identification, the evaluation and eligibility of the target company. Moreover, the structure of SPACs can be complex and their characteristics may vary largely from one SPAC to another.

R. Investments in PRC

The securities markets in the PRC are emerging markets that are undergoing rapid growth and changes. Most PRC laws and regulations governing securities and corporations might be subject to unpredictable changes and development. The effect of such changes can be retrospective and can have an adverse impact on the investments of the Sub-Funds and on the NAV.

Trading China A-Shares will be achieved through the Stock Connect. Stock Connect is still developing and will be open to all investors without the requirement of a licence and there are only limited restrictions relating to, inter alia, settlement currency, locking up the proceeds of sale or delaying repatriation of those proceeds. A particular risk around Stock Connect is the manner in which assets are held as part of the Stock Connect and ensuring proper segregation of those assets. Compared to a clearing system in a non-Emerging Market, there is a greater risk of assets being lost or being unable to be properly identified as belonging to the Company when utilizing Stock Connect.

Although the above mentioned trading facilities are signs of a greater internationalization of the RMB and the liberalization of China's financial markets, it should also be noted that (i) China A-Shares held through Stock Connect directly or via market access products may have limited voting rights and (ii) the RMB is subject to foreign exchange restrictions and is not a fully convertible currency.

Risks relating to Stock Connect

Under Stock Connect, the Company through its Hong Kong brokers may trade certain eligible securities listed and traded on the Shangai Stock Exchange, including China A-Shares (the "SSE Securities"). Such trading is subject to the laws and regulations of PRC and Hong Kong and the relevant rules, policies or guidelines issued from time to time.

Segregation and beneficial ownership of SSE Securities

The SSE Securities are held in a financial intermediary account in the name of Hong Kong Securities Clearing Company Limited ("HKSCC"), opened with ChinaClear, which is an omnibus account in which all SSE Securities of the investors of Stock Connect are commingled. The SSE Securities are beneficially owned by the investors (a Sub-Fund) and are segregated from the own assets of HKSCC.

In addition, the SSE Securities beneficially owned by investors (including a Sub-Fund) will be segregated in the accounts opened with HKSCC by relevant sub-custodians, and in the accounts opened with the relevant sub-custodians of such Sub-Fund in the Hong Kong Central Clearing and Settlement System maintained by the HKSCC as the central securities depositary in Hong Kong.

PRC laws suggest that the Sub-Fund would have beneficial ownership of SSE Securities. It is expressly stipulated in the Several Provisions on the Pilot Programme of Stock Connect (as published by the China Securities Regulatory Commission to prescribe the launch and operation of the Stock Connect) that HKSCC acts as the financial intermediary and the Sub-Fund would own the rights and interests with respect to the SSE Securities. The Stock Exchange of Hong Kong Limited has also stated that it is the Sub-Fund who is the beneficial owner of the SSE Securities.

However, it should be noted that the exact nature and methods of enforcement of the rights and interests of a Sub-Fund under PRC law is not certain and there have been few cases involving a financial intermediary account structure in the PRC courts.

It should also be noted that as with other clearing systems or central securities depositaries, Stock Connect is not obliged to enforce the rights of a Sub-Fund in the PRC courts. If a Sub-Fund wishes to enforce its beneficial ownership rights in the PRC courts, it will need to consider the legal and procedural issues at the relevant time.

Quota limitations

Stock Connect is subject to an aggregate cross-boundary investment quota as well as a daily quota which does not belong to a Sub-Fund and can only be utilised on a first-come-first-served basis. In particular, once the remaining balance of the North-bound daily quota drops to zero or the Northbound daily quota is exceeded during the opening call session, new buy orders will be rejected (though investors will be allowed to sell their cross-boundary securities regardless of the quota balance). Therefore, quota limitations may restrict a relevant Sub-Fund's ability to invest in SSE Securities through Stock Connect on a timely basis, and a Sub-Fund may not be able to effectively pursue its investment strategies.

Settlement

The Company will set up arrangements with its Hong Kong brokers and sub-custodian to ensure that cash payment is received against delivery of securities for the trades of the SSE Securities (delivery versus payment settlement). To this end, for the trades of the SSE Securities by a Sub-Fund, Hong Kong brokers will credit or debit the cash account of a Sub-Fund on the same day for the settlement of securities, for an amount equal to the funds relating to such trading.

Clearing and settlement risk

HKSCC and ChinaClear will establish the clearing links and each will become a participant of each other to facilitate clearing and settlement of cross-boundary trades. For cross-boundary trades initiated in a market, the clearing house of that market will on one hand clear and settle with its own clearing participants, and on the other hand undertake to fulfill the clearing and settlement obligations of its clearing participants with the counterparty clearing house.

Should a ChinaClear default occur and ChinaClear be declared as a defaulter, HKSCC's liabilities in Northbound trades under its market contracts with clearing participants will be limited to assisting clearing participants in pursuing their claims against ChinaClear. HKSCC will in good faith, seek recovery of the outstanding stocks and monies from ChinaClear through available legal channels or through ChinaClear's liquidation. In that event, a Sub-Fund may suffer delay in the recovery process or may not be able to fully recover its losses from ChinaClear.

No Protection by Investor Compensation Fund

Investment through Stock Connect is conducted through broker(s), and is subject to the risks of default by such brokers' in their obligations. A Sub-Fund's investments through Northbound trading under Stock Connect is not covered by the Hong Kong's Investor Compensation Fund. Therefore Sub-Funds are exposed to the risks of default of the broker(s) it engages in its trading in SSE Securities through Stock Connect.

Suspension risk

Both the Stock Exchange of Hong Kong Limited and SSE reserve the right to suspend Northbound and/or Southbound trading if necessary for ensuring an orderly and fair market and risks are managed prudently. Consent from the relevant regulator would be sought before a suspension is triggered. Where a suspension in the Northbound trading through Stock Connect is effected, the relevant Sub-Fund's ability to access the PRC market will be adversely affected.

Differences in trading day

Stock Connect will only operate on days when both the PRC and Hong Kong markets are open for trading and when banks in both markets are open on the corresponding settlement days. So it is possible that there are occasions when it is a normal trading day for the PRC market but not for the Hong Kong market, in which case a Sub-Fund will not be able to access the PRC market via Stock Connect. A Sub-Fund may be subject to a risk of price fluctuations in SSE Securities during the time when Stock Connect is not trading as a result.

Operational risk

Stock Connect provides a new channel for investors from Hong Kong and overseas to access the China stock market directly. Stock Connect is premised on the functioning of the operational systems of the relevant market participants.

Market participants are able to participate in this programme subject to meeting certain information technology capability, risk management and other requirements as may be specified by the relevant exchange and/or clearing house. It should be appreciated that the securities regimes and legal systems of the two markets differ significantly and in order for the trial programme to operate, market participants may need to address issues arising from the differences on an on-going basis.

Further, the "connectivity" in Stock Connect requires routing of orders across the PRC-Hong Kong border. This requires the development of new information technology systems on the part of the Stock Exchange of Hong Kong Limited and exchange participants (i.e. a new order routing system ("China Stock Connect System") to be set up by Stock Exchange of Hong Kong Limited to which exchange participants need to connect).

There is no assurance that the systems of the Stock Exchange of Hong Kong Limited and market participants will function properly or will continue to be adapted to changes and developments in both markets. In the event that the relevant systems failed to function properly, trading in both markets through the programme could be disrupted. A Sub-Fund's ability to access the SSE Securities market (and hence to pursue its investment objective) will be adversely affected.

Restrictions on selling imposed by front-end monitoring

PRC regulations require that before an investor sells any SSE Securities, there should be sufficient SSE Securities in the account; otherwise SSE will reject the sell order concerned. Stock Exchange of Hong Kong Limited will carry out pre-trade checking on SSE Securities sell orders of its participants (i.e. the stock brokers) to ensure there is no over-selling. If a Sub-Fund desires to sell certain SSE Securities it holds, it must transfer those SSE Securities to the respective accounts of its brokers before the market opens on the day of trading. If it fails to meet this deadline, it will not be able to sell those SSE Securities on the trading day. Because of this requirement, the relevant Sub-Fund may not be able to dispose of holdings of SSE Securities in a timely manner.

Regulatory risk

Stock Connect is subject to regulations circulated by regulatory authorities and implementation rules made by the stock exchanges in the PRC and Hong Kong. Further, new regulations may be circulated from time to time by the regulators in connection with operations and cross-border legal enforcement in connection with cross-border trades under Stock Connect.

It should be noted that the regulations are untested and there is no certainty as to how they will be applied. Moreover, the current regulations are subject to change. There can be no assurance that Stock Connect will not be abolished. A Sub-Fund, which may invest in the PRC markets through Stock Connect, may be adversely affected as a result of such changes.

Taxation risk

On 14 November 2014, the Ministry of Finance, the State Administration of Taxation and the China Securities Regulatory Commission published the Circular on relevant Tax Treatment for the Pilot Programme of Shanghai-Hong Kong Stock Connect.

Such circular provides that funds investing in SSE Securities via Stock Connect are temporarily exempt from income tax on capital gains derived from the transfer of SSE Securities on or after 17 November 2014 (the "Stock Connect Exemption"). Dividends from SSE Securities paid to a fund will continue to be subject to 10% withholding tax which is to be withheld at source. It is possible that any new tax laws and regulations and any new interpretations may be applied retroactively.

Risks associated with QFI regime

In addition the following additional risks apply.

QFI Risk. The application and interpretation of the regulations which regulate investments through QFI regime in the PRC are subject to change and there is no certainty as to how they will be consistently applied as the PRC authorities and regulators have been given wide discretion in such investment regulations and there is no precedent or certainty as to how such discretion may be exercised now or in the future. Any possible restrictions on repatriation imposed in respect of the relevant investments through the QFI regime may have an adverse effect on the Sub-Fund's ability to meet redemption requests. Any change in the QFI regime generally, including the possibility of the QFI-Investment Manager losing its QFI status, may affect the relevant Sub-Fund's ability to invest in eligible securities in the PRC directly through the relevant QFI. In addition, should the QFI status be suspended or revoked, the Sub-Fund's performance may be adversely affected as the Sub-Fund may be required to dispose of its QFI eligible securities holdings. The applicable laws, rules and regulations on QFI are subject to change and such change may have potential retrospective effects.

QFI Investment Restrictions Risk. Although the QFI does not anticipate that QFI investment restrictions will impact on the ability of the Sub-Fund to achieve its investment objective, investors should note that the relevant PRC laws and regulations may limit the ability of a QFI to acquire securities in certain PRC issuers from time to time and may force the Sub-Fund to dispose of its securities, thus affecting its capacity in making investments in PRC. Trading of China securities may be impacted by any temporary or permanent suspensions imposed from time to time by the Shanghai and/or Shenzhen stock exchanges or pursuant to any regulatory or governmental intervention with respect to particular investments or the markets generally. Any such suspension or corporate action may make it impossible for the Sub-Fund to acquire or liquidate positions in the relevant securities as part of the general management and periodic adjustment of the Sub-Fund's investments through the QFI or to meet redemption requests. Such circumstances may also make it difficult for the Net Asset Value of the Sub-Fund to be determined and may expose the Sub-Fund to losses. In order to mitigate the effects of extreme volatility in the market price of securities, the Shanghai and Shenzhen stock exchanges currently limit the amount of fluctuation permitted in the prices of securities during a single trading day. The daily limit represents the maximum amount that the price of a security (during the current trading session) may vary either up or down from the previous day's settlement price. The daily limit governs only price movements and does not restrict trading within the relevant limit. However, the limit does not limit potential losses because the limit may work to prevent a liquidation of any relevant securities at the fair or probable realization value for such securities which means that the Sub-Fund may be unable to dispose of unfavourable positions. There can be no assurance that a liquid market on an exchange would exist for any particular security or for any particular time.

Counterparty Risk. Any assets acquired through the QFI regime will be maintained by a local custodian pursuant to the PRC regulations, in electronic form via the QFI securities account(s) and any cash will be held in Renminbi cash account(s) with the local custodian. Whilst the assets held in such accounts are segregated and held separately and belong solely to the Sub-Fund, it is possible that the judicial and regulatory authorities in the PRC may interpret this position differently in the future.

The Sub-Fund may also incur losses due to the acts or omissions of the local custodian in the execution or settlement of any transaction or in the transfer of any funds or securities. Cash held by the local custodian in the Renminbi cash account(s) will not be segregated in practice but will be a debt owing from the local custodian to the relevant Sub-Fund as a depositor.

Such cash will be co-mingled with cash belonging to other clients of the local custodian. In the event of insolvency of the local custodian, the Sub-Fund will not have any proprietary rights to the cash deposited in the cash account opened with the local custodian, and the Sub-Fund will become an unsecured creditor, ranking pari passu with all other unsecured creditors, of the local custodian. The Sub-Fund may face difficulties and/or encounter delays in recovering such debt, or may not be able to recover it in full or at all, in which case the Sub-Fund will lose some or all of its cash.

Counterparty Risk to PRC broker(s) The QFI -Investment Manager selects brokers in the PRC ("PRC Broker(s)") to execute transactions for the Sub-Fund in markets in the PRC. There is a possibility that the QFI -Investment Manager may only appoint one PRC Broker in respect of each stock exchange in the PRC as a result of the requirement in the PRC that securities are sold through the same PRC Broker through which they were originally purchased. If, for any reason, the QFI -Investment Manager is unable to use the relevant broker in the PRC, the operation of the Sub-Fund may be adversely affected. The Sub-Fund may also incur losses due to the acts or omissions of any of the PRC Broker(s) in the execution or settlement of any transaction or in the transfer of any funds or securities. If a single PRC Broker is appointed, the Sub-Fund may not pay the lowest commission available in the market. However, the QFI -Investment Manager shall, in the selection of PRC Brokers, have regard to factors such as the competitiveness of commission rates, size of the relevant orders and execution standards. There is a risk that the Sub-Fund may suffer losses from the default, insolvency or disqualification of a PRC Broker. In such event, the Sub-Fund may be adversely affected in the execution of transactions through such PRC Broker. As a result, the Net Asset Value of the Sub-Fund may also be adversely affected. To mitigate the Company's exposure to the PRC Broker(s), the QFI -Investment Manager employs specific procedures to ensure that each PRC Broker selected is a reputable institution and that the credit risk is acceptable to the Company.

Remittance and Repatriation of RMB Risk. Repatriations of RMB are currently not subject to, any lock-up periods or prior regulatory approval; although authenticity and compliance reviews will be conducted and monthly reports on remittances and repatriations will be submitted to the State Administration of Foreign Exchange of the PRC by the local custodian. The repatriation process may be subject to certain requirements set out in the relevant regulations (e.g. submission of certain documents when repatriating the realised cumulative profits). Completion of the repatriation process may be subject to delay.

There is no assurance that PRC rules and regulations will not change or that repatriation restrictions will not be imposed in the future. Further, such changes to the PRC rules and regulations may be applied retroactively. Any restrictions on repatriation imposed in respect of the Sub-Fund's cash may have an adverse effect on the Sub-Fund's ability to meet redemption requests.

Furthermore, as the local custodian's review on authenticity and compliance is conducted on each repatriation, the repatriation may be delayed or even rejected by the local custodian in case of non-compliance with the QFI rules and regulations. In such case, it is expected that redemption proceeds will be paid to the redeeming shareholder as soon as practicable and after the completion of the repatriation of funds concerned. The actual time required for the completion of the relevant repatriation will be beyond the QFI -Investment Manager's control.

3. INVESTMENTS IN THE COMPANY

A. Conditions for the issue and redemption of Shares

Unless otherwise described in the **specific section of every Sub-Fund**, Shares of available classes are in principle issued and redeemed on each Business Day. Every such Business Day may be a "Dealing Day" as further defined in the specific section of every Sub-Fund.

No issue or redemption, save redemptions in kind, will take place on days on which the Company has decided not to calculate the Net Asset Value as described in the paragraph "Suspension of the Net Asset Value calculation and of the issue and redemption of Shares".

In addition, the Company is empowered to reject subscription applications at its discretion.

These orders are processed on the basis of the Net Asset Value calculated for that Dealing Day in accordance with the provisions set out below, provided that they are received before the cut-off time. The cut-off time is the deadline fixed on the Business Day immediately preceding a Dealing Day.

Subscription and redemption applications received after the cut-off time defined for each Sub-Fund **in the respective Appendix** will be processed on the next following Dealing Day.

This means that the Net Asset Value for settlement purposes is not known when the order is placed (forward pricing). It will be calculated as of the Dealing Day based on the Net Asset Value of the Sub-Fund for such date. Redemption payments are generally made under normal circumstances within two Business Days. A Sub-Fund may have differing payment schedules as defined in the Appendix referring to the respective Sub-Fund.

In the case of extraordinary circumstances, the Company may, with the consent of the investors, deliver redemption proceeds in-kind.

To secure punctual forwarding to the Administrative Agent, earlier cut-off times may apply for submission of applications placed with sales agencies in Luxembourg or abroad. Information on this may be obtained from the sales agency concerned. The individual valuation principles applied are described in the paragraph that follows.

B. Issue of Shares

The issue prices of Shares of each class are calculated according to the paragraph "4. Net Asset Value" below.

Shareholders should note that the Net Asset Value may be adjusted in accordance with the Single Swing Pricing policy set out in the section "Swing Pricing" below and that any reference to the issue price of Shares is to the Net Asset Value as may be adjusted pursuant to such Single Swing Pricing policy.

In case of a subscription, the fees (brokerage fees, etc.) which arise on average for the Sub-Fund in order to invest the amount subscribed can be invoiced to the investor unless otherwise specified in the respective Sub-Fund Appendix. Any taxes, commissions and other fees incurred in the respective countries in which Shares are sold will also be charged.

Subscriptions for Shares are accepted at the issue price of the relevant Share Class by the Company, the Administrative Agent as well as any other sales agency.

Unless otherwise described in the Appendix referring to the respective Sub-Fund, payments must be received by the Depositary at the latest one (1) Business Day after the respective Dealing Day. The Shares will be transferred to the investors concerned without delay upon payment of the full issue price. The Company may decide to issue certain classes of Shares as non-certificated registered Shares. Fractions of Shares will be issued up to the third decimal. All Shares of each class have the same rights. However, the Articles envisage the possibility of establishing within a Sub-Fund various Share Classes with specific features.

The Board of Directors is entitled to refuse, at its own discretion, subscription applications and to temporarily or permanently suspend or limit the sales of Shares. It may furthermore at any time and at its own discretion proceed to redeem Shares held by Shareholders who are not entitled to do so.

The Board of Directors may furthermore, at its discretion, accept subscriptions in kind, in whole or in part. However in this case the investments in kind must be in accordance with the respective Sub-Fund's investment policy and restrictions. In addition these investments will be audited by the auditor appointed by the Company. The related costs are borne by the investor.

C. Redemption of Shares

Unless otherwise described in the specific section of every Sub-Fund, Shareholders can request redemption of their Shares for each Dealing Day by providing written notice to the Company, the Administrative Agent or to one of the other sales agencies authorised to accept such applications. Unless stated otherwise in the Appendix referring to the respective Sub-Fund, redemption applications must be received at the latest **one Business Day** before the respective Dealing Day and be accompanied by

any certificates which might have been issued. Any notice provided to the Sub-Fund by a Shareholder in connection with redemption will be irrevocable by the Shareholder.

Any taxes, commissions and other fees incurred in the respective countries in which Shares are sold will be charged to the investor.

The development of the Net Asset Value determines whether the redemption price is higher or lower than the issue price paid by the investor.

Unless otherwise described in the Appendix referring to each Sub-Fund, redemption payments are made under normal circumstances within two Business Days after the applicable Dealing Day subject to the Sub-Funds' ability to make redemptions in the underlying funds.

The Company at the explicit request of an investor shall effect redemptions in kind, in whole or in part. To the extent possible, investors may receive a representative selection of the Sub-Fund's holding in securities, cash and other assets pro rata to the number of Shares redeemed. In addition these redemptions will be audited by the auditor appointed by the Company. The related costs are borne by the investor.

In case of redemption, the fees (brokerage fees, etc.) which arise on average for the Sub-Fund in order to disinvest the amount subscribed can be charged to the relevant Shareholder unless otherwise specified in the respective Sub-Fund Appendix. Any taxes, commissions and other fees incurred in the respective countries in which Shares are sold will also be charged.

The Company may establish specific redemption terms and conditions as provided for in the Appendix referring to each Sub-Fund.

D. Conversion of Shares or Share Classes

Shareholders may have the right, subject to the provisions hereinafter specified and subject to any limitations set out in relation to one or more Sub-Funds in the Appendices of the Prospectus, to convert on the Valuation Day specified for each Sub-Fund in the Appendices of the Prospectus whole or part of their Shares of one class into Shares of another class, if any, within the same Sub-Fund or between Sub-Funds of the company.

The rate at which Shares of any class in any Sub-Fund shall be converted will be determined by reference to the respective Net Asset Values of the relevant Shares calculated as of the first Business Day which is a Valuation Day of both classes concerned following receipt of the documents referred to below by a time defined in the Appendices of the Prospectus for each class individually in each Sub-Fund.

A conversion fee may be charged by the Company. Such conversion fee shall not exceed actual transaction costs incurred by such conversion.

Written confirmations of shareholding (as appropriate) will be sent to Shareholders within twenty (20) Business Days after the relevant Valuation Day, together with the balance resulting from such conversion, if any.

In converting Shares of a class of Shares of another class of Shares, a Shareholder must meet the applicable minimum investment requirements imposed by the acquired Sub-Fund in the relevant class, if any.

If, as a result of any request for conversion, the aggregate Net Asset Value of the Shares held by the converting Shareholder in a class of Shares fall below the minimum holding requirement indicated in the Appendices of the Prospectus, the Company may treat such request as a request to convert the entire shareholding of such Shareholder in such class. At the discretion of the Board of Directors, the Company reserves the right to transfer any existing Shareholder who falls below the minimum shareholding requirement for a class of Shares into another appropriate class of Shares without charge.

Shares of any class, if any, in any Sub-Fund will not be converted in circumstances where the calculation of the Net Asset Value per Share of such Sub-Fund is suspended by the Company.

E. Swing pricing

The Company may suffer a reduction in the value of its investment as a result of the transaction costs incurred in the purchase and sale of its underlying investments and the spread between the buying and selling prices of such investments caused by subscriptions, redemptions and/or conversions in and out of the Company.

In order to counter this and to protect Shareholders' interests, the Company may apply "swing pricing" as part of its valuation policy. This method of valuation is intended to pass the estimated costs of its underlying investment activity to its Shareholders and to help protect Shareholders who continue to hold Shares from the potentially negative effects on Sub-Fund value that can be created by large volumes of transactions in Sub-Fund Shares.

The swing pricing mechanism is applied on the capital activity at the level of the Company and does not address the specific

circumstances of each individual investor transaction.

The adjustment may vary from Sub-Fund to Sub-Fund and will normally not exceed 2% of the original Net Asset Value per Share unless exceptional market conditions occur. Estimated transaction costs including market impact and tax charges that may be incurred by the Sub-Fund, as well as the estimated bid-ask spreads of the assets in which the Sub-Fund invests, may be taken into account. Such an adjustment will lead to an increase in the net asset value per share if the net movements result in a net inflow of capital in the Sub-Fund concerned. It will lead to a decrease in the net asset value per share if the net movements result in a net outflow of capital.

The Board of Directors of the Company can set a threshold value for each Sub-Fund. This may be calculated from the ratio of net movement on a given trading day to the net fund assets, or from a single amount in the currency of the relevant Sub-Fund. In such a case, the net asset value per share would only be adjusted if this threshold were to be exceeded on a given trading day.

All Sub-Funds may be subject to swing pricing.

4. NET ASSET VALUE

A. General Principles

1. Definition and calculation of the Net Asset Value

The Net Asset Value per share of each Sub-Fund and class of shares of the Company is calculated in Luxembourg by the Administrative Agent, under the responsibility of the Board of Directors, in principle on each Valuation Day on a frequency as defined in the Sub-Funds' relevant data sheets under Part B, provided this day is a Business Day.

Unless otherwise described in the specific section of every Sub-Fund, the Net Asset Value per Share of any Share Class is expressed in the reference currency of the Share Class concerned and is calculated every Valuation Day.

The Net Asset Value per Share is calculated by dividing the overall net assets of the Sub-Fund attributable to each Share Class by the number of Shares issued in the particular Share Class of the Sub-Fund. The percentage of the Net Asset Value which is attributable to each respective Share Class of a Sub-Fund is determined by the ratio of the Shares issued in each Share Class to the total number of Shares issued in the Sub-Fund, and will change each time Shares are issued or redeemed.

2. Valuation of the assets

The value of the assets held by each Sub-Fund is calculated as follows:

a) The value of any cash at hand or on deposit, bills, demand notes and accounts receivable, prepaid expenses, dividends and interests matured but not yet received shall be valued at the par-value of the assets, except if it appears that such value is unlikely to be received. In such a case, subject to the approval of the Board of Directors, the value shall be determined by deducting a certain amount to reflect the true value of the assets.

b) The value of transferable securities and money market instruments listed on an official Stock Exchange or dealt in on a Regulated Market, as defined by laws and regulations in force, is based on the latest available price and if such transferable securities are dealt in on several markets, on the basis of the latest known price on the stock exchange which is normally the principal market for such securities. If the latest known price is not representative, the value shall be determined based on a reasonably foreseeable sales price to be determined prudently and in good faith.

c) In the event that any transferable securities or/and money market instruments are not listed or dealt in on any stock exchange or any other Regulated Market operating regularly, recognised and open to the public, as defined by the laws and regulations in force, the value of such assets shall be assessed on the basis of their foreseeable sales price estimated prudently and in good faith.

d) The liquidating value of derivative contracts not traded on exchanges or on other Regulated Markets shall mean their net liquidating value determined by the Board of Directors in a fair and reasonable manner, on a basis consistently applied for each different variety of contracts. The liquidating value of Futures, forward and Options contracts traded on exchanges or on other Regulated Markets shall be based upon the last available settlement prices of these contracts on exchanges and Regulated Markets on which the particular Futures, forward or Options contracts are traded by the Company; provided that if a Futures, forward and Options contract could not be liquidated on the day with respect to which net assets are being determined, the basis for determining the liquidating value of such contract shall be such value as the Board of Directors may deem fair and reasonable.

e) The value of money market instruments not listed or dealt in on any stock exchange or any other Regulated Market and with remaining maturity of less than 12 (twelve) months and of more than 90 (ninety) days is deemed to be the nominal value thereof, increased by any interest accrued thereon. Money market instruments with a remaining maturity of 90 (ninety) days or less will be valued by the amortised cost method, which approximates market value.

f) Units of UCITS and/or other UCI will be valued at their last determined and available Net Asset Value or, if such price is not representative of the fair market value of such assets, then the price shall be determined by the Directors on a fair and equitable basis. Units or shares of a closed-ended UCI will be valued at their last available stock market value.

g) Interest rate Swaps will be valued at their market value established by reference to the applicable interest rate curve.

h) All other securities and other assets will be valued at fair market value, as determined in good faith pursuant to procedures established by the Board of Directors.

i) The value of all assets and liabilities not expressed in the reference currency of a Sub-Fund will be converted into the

reference currency of such Sub-Fund at rates last quoted by major banks. If such quotations are not available, the rate of exchange will be determined in good faith by or under procedures established by the Board of Directors.

j) The Board of Directors, at its sole discretion, may permit some other method of valuation to be used if it considers that such valuation better reflects the fair value of any asset of the Company.

In circumstances where the interests of the Company or its Shareholders so justify (avoidance of market timing practices, for example), the Board of Directors may take any appropriate measures, such as applying a fair value pricing methodology to adjust the value of the Company' s assets.

All and any assets not expressed in the currency of the Sub-Fund to which they belong shall be converted into the currency of that Sub-Fund at the exchange rate applying on the concerned Business Day or at such exchange rate as may be agreed in the relevant Forward Contracts.

The Company is authorized to apply other generally recognized and auditable valuation criteria chosen in good faith in order to achieve an appropriate valuation of the Net Asset Value if, due to extraordinary circumstances, a valuation in accordance with the above-mentioned regulations proves to be unfeasible or inaccurate.

In the case of extraordinary circumstances, additional valuations, which will affect the prices of the Shares to be subsequently issued or redeemed, may be carried out within one Valuation Day.

The rights of Shareholders who have subscribed to Shares of the Company through a Financial Intermediary (the "Final Beneficiaries") may be affected when paying compensation in the event of NAV calculation errors/non-compliance with the investment rules of the Sub-Funds. In the event of an error or non-compliance, all relevant information will be transmitted to the financial intermediaries who act on behalf of Final Beneficiaries in order to enable such intermediaries to provide the necessary compensation to the Final Beneficiaries.

In the case of extensive redemption applications, the Company may establish the value of the Shares of the relevant Sub-Fund on the basis of the prices at which the necessary sales of securities are affected. In such an event, the same basis for calculation shall be applied for issue and redemption applications submitted at the same time.

B. **Suspension of the Net Asset Value calculation and of the issue and redemption of Shares**

The Company may temporarily suspend calculation of the Net Asset Value and the issue and redemption of Shares, save redemptions in kind, for one or more Sub-Funds when:

- one or more stock exchanges or markets in which the valuation of a major part of the net assets is based, or foreign exchange markets in whose currency the Net Asset Value or a major part of the net assets is denominated, are closed on days that are not customary holidays or trading is suspended or when these stock exchanges and markets are exposed to limitations or temporary severe fluctuations, provided that such restriction or suspension affects the valuation of the investments of the Company attributable to such Sub-Fund quoted thereon;
- any political, economic, military events or other circumstances beyond the control, liability or influence of the Company make it impossible to access the Sub-Fund's assets under normal conditions without seriously harming the interests of the Shareholders;
- the existence of any state of affairs constitutes an emergency in the opinion of the Board of Directors as a result of which disposal or valuation of assets owned by the Company attributable to such Sub-Fund would be impracticable;
- disruptions in the means of communications or computation necessary for calculation of the price or value of any of the investments of such Sub-Fund or the current price or value on any stock exchange or other market in respect of the assets attributable to such Sub-Fund or the Net Asset Value of the such Sub-Fund make it impossible to calculate with sufficient exactitude the value of a considerable part of the Sub-Fund's net assets;
- the Company is unable to repatriate funds for the purpose of making payments on the redemption of Shares of such Sub-Fund, or during which any transfer of funds involved in the realisation or acquisition of investments or payments due on redemption of Shares cannot, in the opinion of the Board of Directors, be made at normal rates of exchange;
- restrictions on foreign exchange transactions or other transfers of assets render the execution of the Company's transactions impossible;
- the Board of Directors or the general meeting of Shareholders have decided upon the liquidation of a Sub-Fund;
- the Net Asset Values attributable to such Sub-Fund, cannot promptly or accurately be ascertained or;

- upon the publication of a notice convening a general meeting of Shareholders for the purpose of winding-up the Company.

A suspension of the calculation of the Net Asset Value, a suspension of the issue or redemption of Shares will be notified without delay to all the responsible authorities in those countries in which Shares are distributed by private placement and to the investors.

In addition, the Company is at any time empowered:
(a) to refuse purchase applications at its own discretion;
(b) to redeem Shares which were purchased in defiance of an exclusion order.

5. PREVENTION OF MONEY LAUNDERING AND TERRORIST FINANCING, MARKET TIMING AND LATE TRADING

A. **Prevention of money laundering and terrorist financing**

In accordance with international regulations and Luxembourg laws and regulations (including, but not limited to, the amended Law of 12 November 2004 on the fight against money laundering and financing of terrorism, the Grand-Ducal Regulation dated 1 February 2010, the CSSF Regulation 12/02 of 14 December 2012, CSSF Circulars 13/556, 15/609 and 17/650 concerning the fight against money laundering and terrorist financing, and any respective amendments or replacements), obligations have been imposed on all professionals of the financial sector in order to prevent undertakings for collective investment from acts/occurrences of money laundering and financing of terrorism. As a result of such provisions, the registrar and transfer agent of a Luxembourg UCI must ascertain the identity of the subscriber in accordance with Luxembourg laws and regulations. Accordingly, the Administrative Agent may require subscribers to provide any document it deems necessary to effect such identification. In case of a subscription by an intermediary and/or Financial Intermediary acting on behalf of an investor, enhanced customer due diligence measures for this intermediary and/or Financial Intermediary will be applied in accordance with the amended Law of 12 November 2004 and the amended CSSF Regulation 12/02 of 14 December 2012, as amended by CSSF Regulation 20-05 of 14 August 2020. In this context, investors must inform without delay the Administrative Agent when the person(s) designated as beneficial owner(s) change and in general, ensure at all times that each piece of information and each document provided to the Administrative Agent or intermediary and/or Financial Intermediary remains accurate and up-to-date.

In case of delay or failure by an applicant to provide the required documentation, the subscription request will not be accepted and in the event of redemption, payment of redemption proceeds delayed. Neither the Company nor the Administrative Agent will be held responsible for said delay or for failure to process deals resulting from not providing documentation or providing incomplete documentation.

From time to time, Shareholders may be asked to supply additional or updated identification documents in accordance with clients' ongoing due diligence obligations according to the relevant laws and regulations.

The Management Company, under the ultimate responsibility of the Board of Directors, shall ensure that due diligence measures on the Company's investments are applied on a risk-based approach in accordance with Luxembourg applicable laws and regulations

B. **Market Timing and Late Trading**

Prospective investors and Shareholders should note that the Company may reject or cancel any subscription, conversion or redemption orders for any reason and in particular in order to comply with the CSSF Circular 04/146 relating to the protection of UCIs and their investors against Late Trading and Market Timing practices.

For example, excessive trading of Shares in response to short-term fluctuations in the market, a trading technique sometimes referred to as Market Timing, has a disruptive effect on portfolio management and increases the Sub-Funds' expenses. Accordingly, the Company may, in the sole discretion of the Board, compulsorily redeem Shares or reject any subscription orders and conversions orders from any investor that the Company reasonably believes has engaged in Market Timing activity. For these purposes, the Company may consider an investor's trading history in the Sub-Funds and accounts under common control or ownership.

In addition to the Subscription or Conversion Fees which may be of application to such orders as set forth in the Sub-Fund Particular of the relevant Sub-Fund, the Company may impose a penalty of maximum 2% (two per cent.) of the Net Asset Value of the Shares subscribed or converted where the Company reasonably believes that an investor has engaged in Market Timing activity. The penalty will be credited to the relevant Sub-Fund. Neither the Company nor the Board will be held liable for any loss resulting from rejected orders or mandatory redemption.

Furthermore, the Company will ensure that the relevant deadlines for requests for subscriptions, redemptions or conversions are strictly complied with and will therefore take all adequate measures to prevent practices known as Late Trading.

C. **Luxembourg Register of beneficial owners**

The Luxembourg Law of 13 January 2019 creating a Register of Beneficial Owners (the "Law of 13 January 2019") entered into force on the 1st of March 2019 (with a 6 month grandfathering period). The Law of 13 January 2019 requires all companies registered on the Luxembourg company register, including the Company, to obtain and hold information on their beneficial owners ("Beneficial Owners") at their registered office. The Company must register Beneficial Owner-related information with the Luxembourg Register of beneficial owners, which is established under the authority of the Luxembourg ministry of justice. The Company will have to be compliant with the Law of 13 January 2019 by the end of August 2019.

The Law of 13 January 2019 broadly defines a Beneficial Owner, in the case of corporate entities such as the Company, as any natural person(s) who ultimately owns or controls the Company through direct or indirect ownership of a sufficient percentage of the shares or voting rights or ownership interest in the Company, including through bearer shareholders, or through control via other means, other than a company listed on a Regulated Market that is subject to disclosure requirements consistent with EU law or subject to equivalent international standards which ensure adequate transparency of ownership information.

A shareholding of 25% plus one share or an ownership interest of more than 25% in the Company held by a natural person shall be an indication of direct ownership. A shareholding of 25% plus one share or an ownership interest of more than 25% in the Company held by a corporate entity, which is under the control of a natural person(s), or by multiple corporate entities, which are under the control of the same natural person(s), shall be an indication of indirect ownership.

In case the aforementioned Beneficial Owner criteria are fulfilled by an Investor with regard to the Company, this Investor is obliged by law to inform the Company in due course and to provide the required supporting documentation and information which is necessary for the Company to fulfill its obligation under the Law of 13 January 2019. Failure by the Company and the relevant Beneficial Owners to comply with their respective obligations deriving from the Law of 13 January 2019 will be subject to criminal fines. Should an Investor be unable to verify whether they qualify as a Beneficial Owner, the investor may approach the Company for clarification.

For both purposes the following e-mail address may be used:

6. TAXATION

The following information is based on the laws, regulations, decisions and practice currently in force in Luxembourg and is subject to changes therein, possibly with retrospective effect. This tax section is a short summary of certain Luxembourg tax principles that may be or may become relevant with respect to the investments in the Company. IT DOES NOT PURPORT TO BE A COMPREHENSIVE DESCRIPTION OF ALL LUXEMBOURG TAX LAWS AND CONSIDERATIONS THAT MAY BE RELEVANT TO A DECISION TO INVEST IN, OWN, HOLD, OR DISPOSE OF SHARES. IT DOES NOT CONSTITUTE AND SHOULD NOT BE CONSIDERED AS TAX ADVICE TO ANY PARTICULAR INVESTOR OR POTENTIAL INVESTOR. Prospective investors should consult their own professional advisers as to the implications of buying, holding or disposing of Shares and to the provisions of the laws of the jurisdiction in which they are subject to tax. This summary does not describe any tax consequences arising under the laws of any state, locality or other taxing jurisdiction other than Luxembourg.

A. Taxation of the Company

The Company is, in principle, subject to a subscription tax (taxe d'abonnement) levied at the rate of 0.05% per annum based on its net asset value at the end of the relevant quarter, calculated and paid quarterly.

A reduced subscription tax rate of 0.01% per annum is applicable to:

- the Sub-Funds provided their exclusive object is the collective investment in money market instruments, the placing of deposits with credit institutions, or both;
- the Sub-Funds or classes of Shares where the Shares of those individual Sub-Funds or classes are only held by one or more institutional investors within the meaning of the Law.

A subscription tax exemption applies to:

- the portion of the Company's assets (pro rata) invested in a Luxembourg UCI subject itself to the subscription tax;
- the Company and its Sub-Funds where (i) the securities are only held by institutional investor(s), and (ii) the sole object is the collective investment in money market instruments and the placing of deposits with credit institutions, and (iii) the weighted residual portfolio maturity does not exceed 90 days, and (iv) the securities have obtained the highest possible rating from a recognised rating agency. If several classes of Shares are in issue in the Company meeting (ii) to (iv) above, only those classes of Shares meeting (i) above will benefit from this exemption;
- the Sub-Funds if their main objective is the investment in microfinance institutions;
- the Sub-Funds if (i) the securities issued by the Sub-Funds are listed or traded on at least one stock exchange or another Regulated Market and (ii) their exclusive object is to replicate the performance of one or more indices. If several classes of Shares are in issue in the Sub-Fund meeting (ii) above, only those classes of Shares meeting (i) above will benefit from this exemption; and
- the Company if the securities issued by the Company are reserved for (i) institutions for occupational retirement pension and similar investment vehicles, set-up on the initiative of one or more employers for the benefit of their employees and (ii) companies of one or more employers investing funds they hold to provide retirement benefits to their employees.

Tax implication of the investment into the Master Sub-Funds for the Feeder Sub-Fund: investment into the Master Sub-Funds has no specific Luxembourg tax impact.

B. Value Added Tax

The Company is considered in Luxembourg as a taxable person for VAT purposes even though it carries out only exempt activities with no right to deduct input VAT. No Luxembourg VAT registration is necessary unless (i) the Company receives non-exempt services from abroad (including, notably, legal and tax advisory services, non-exempt financial and banking services, etc.) or (ii) purchases goods from another Member State. In such a case, the Company will need to register for VAT purposes order to self-assess Luxembourg input VAT (reverse charge mechanism). A VAT exemption applies in Luxembourg for services qualifying as fund management services, including (inter alia) asset management / portfolio services or investment advisory services. No VAT liability arises in principle in Luxembourg in respect of any income received by the Company or paid by the Company to its investors, as long as those payments do not constitute consideration received for taxable services supplied.

C. Withholding Tax

1. Investor withholding tax

Distributions made by the Company as well as capital gains realised on a disposal or a redemption of Shares are not subject to withholding tax in Luxembourg.

2. Withholding tax in source countries

Interest and dividend income received by the Company may be subject to non-recoverable withholding tax in the source countries. The Company may further be subject to tax on the realised or unrealised capital appreciation of its assets in the countries of the investments. However, the Company may benefit from double tax treaties entered into by Luxembourg which may provide for exemption from withholding tax or reduction of withholding tax rate.

Distributions by the Company as well as liquidation proceeds and capital gains derived therefrom are made free and clear from withholding tax in Luxembourg.

D. Taxation of non-resident Shareholders

Non-resident investors without a permanent establishment, a permanent representative, or a fixed place of business in Luxembourg to which the Shares are attributable, are not, in principle, subject to any capital gains tax, income tax, withholding tax or net wealth tax in Luxembourg.

The tax consequences for Shareholders wishing to purchase, subscribe, acquire, hold, convert, sell, redeem or dispose Shares will depend on the relevant laws of any jurisdiction to which the Shareholder is subject.

E. Other Taxes

Neither the issuance nor the transfer of the Shares will give rise to any Luxembourg stamp duty, value added tax, issuance tax, registration tax, transfer tax or similar taxes or duties.

No inheritance tax is levied on the transfer of the Shares upon death of an investor in cases where the deceased was not a resident of Luxembourg for inheritance tax purposes. Where the investor is a resident of Luxembourg for tax purposes at the time of his/her death, the Shares may be included in his/her taxable estate for inheritance tax purposes.

Gift tax may be due on donation of the Shares if passed before a Luxembourg notary or recorded in a deed registered in Luxembourg.

F. Residence

An investor will not become resident, or deemed to be resident, in Luxembourg by reason only of holding the Shares.

G. German Investment Tax ("GITA")

Since the enforcement of the GITA on 1st January 2018, German investors of foreign and domestic investments funds are taxed:

- on dividend distributions made by the investment fund;
- on an annual upfront prepayment charge ("annual lump sum taxation"); and
- on capital gains upon disposal of the shares of the investments.

Article 20(1) of GITA allows partial exemption. This is the case for investment funds qualifying as equity funds. In order for the Sub-Funds to qualify as equity funds and benefit from this partial exemption (as foreseen in article 2(6) of GITA), it is clarified that the following Sub-Funds will always invest at least 50% of their assets in equities (as defined under article 2(8) of GITA):

- Artico Sustainable Global Core;
- Artico Sustainable Emerging Markets;
- Artico Sustainable Global Small Cap;
- Artico Sustainable Dynamic Flagship; and
- Artico Sustainable Dynamic Emerging Market.

For sake of clarity, In the case of investments in target investment funds, these target investment funds are taken into account by the Sub-Funds when calculating their equity participation rate. Insofar as such data is available, the equity participation

ratios of the target investment funds, which are calculated and published at least weekly, are taken into account in this calculation in accordance with Section 2(6) of GITA.

H. FATCA

FATCA requires FFIs to pass information about "Financial Accounts" held by "Specified U.S. Persons", directly or indirectly, to the U.S. tax authorities (the Internal Revenue Service, "IRS") on an annual basis. A 30% withholding tax is imposed on certain U.S. source income of any FFI that fails to comply with this requirement.

On 28 March 2014, the Grand Duchy of Luxembourg entered into the Luxembourg IGA and a memorandum of understanding in respect thereof. The Company would hence have to comply with this Luxembourg IGA as implemented into FATCA Law in order to comply with the provisions of FATCA rather than directly complying with the U.S. Treasury Regulations implementing FATCA. Under the FATCA Law and the Luxembourg IGA, the Company may be required to collect information aiming to identify its financial account holders (including certain entities and their controlling persons) that are Specified U.S. Persons for FATCA purposes ("FATCA Reportable Accounts"). Any such information on FATCA Reportable Accounts provided to the Company will be shared with the Luxembourg tax authorities (Administration des Contributions Directes) which will exchange that information on an automatic basis with the IRS.

The Company intends to comply with the provisions of the FATCA Law and the Luxembourg IGA to be deemed compliant with FATCA and will thus not be subject to the 30% withholding tax with respect to its share of any such payments attributable to actual and deemed U.S. investments of the Company. The Company will continually assess the extent of the requirements that FATCA, and notably the FATCA Law, place upon it.

To ensure the Company's compliance with FATCA, the FATCA Law and the Luxembourg IGA in accordance with the foregoing, the Company may:

a) request information or documentation, including W-9 or W-8 tax forms, a Global Intermediary Identification Number, if applicable, or any other valid evidence of a Shareholder’s FATCA registration with the IRS or a corresponding exemption, in order to ascertain that Shareholder's FATCA status;
b) report information concerning a Shareholder and his/her/its account holding in the Company to the Luxembourg tax authorities (Administration des Contributions Directes) if such account is deemed a FATCA Reportable Account under the FATCA Law and the Luxembourg IGA;
c) report information to the Luxembourg tax authorities (Administration des Contributions Directes) concerning payments to Shareholders with FATCA status of a non-participating foreign financial institution;
d) deduct applicable U.S. withholding taxes from certain payments made to a Shareholder by or on behalf of the Company in accordance with FATCA, the FATCA Law and the Luxembourg IGA; and
e) divulge any such personal information to any immediate payer of certain U.S. source income as may be required for withholding and reporting to occur with respect to the payment of such income.

By investing in the Company, the Shareholders acknowledge that (i) the Company is responsible for the treatment of the personal data provided for in the FATCA Law; (ii) the personal data will inter alia be used for the purposes of the FATCA Law; (iii) the personal data may be communicated to the Luxembourg tax authorities (Administration des Contributions Directes) and to the IRS; (iv) responding to FATCA-related questions is mandatory; and (v) the Shareholders have a right of access to and rectification of the data communicated to the Luxembourg tax authorities (Administration des Contributions Directes).
The Company reserves the right to refuse any subscription for Shares if the information provided or not provided does not satisfy the requirements under FATCA, the FATCA Law and the Luxembourg IGA.

Prospective investors should consult their professional advisor on the individual impact of FATCA.

I. Automatic Exchange of Information

CRS

OECD has developed a CRS to achieve a comprehensive and multilateral automatic exchange of information on a global basis.

On 29 October 2014, Luxembourg signed the OECD’s multilateral competent authority agreement to automatically exchange information under the CRS. On 9 December 2014, DAC2 was adopted to implement the CRS among the Member States. The CRS and the DAC2 were implemented into Luxembourg law by the CRS Law.

The CRS Law requires Luxembourg financial institutions to identify their financial account holders (including certain entities and their controlling persons) and establish if they are fiscally resident in (i) a Member State other than Luxembourg or (ii) a jurisdiction which has signed the OECD's multilateral competent authority agreement and which is identified in the list of reportable jurisdictions published by Grand Ducal Decree ("CRS Reportable Accounts"). The first official list of CRS reportable jurisdictions was published on 24 March 2017 and is updated from time to time. Luxembourg financial institutions will then report the information on such CRS Reportable Accounts to the Luxembourg tax authorities (Administration des Contributions Directes), which will thereafter automatically transfer this information to the competent foreign tax authorities on a yearly basis.

Accordingly, the Company may require its Shareholders to provide information or documentation in relation to the identity and fiscal residence of financial account holders (including certain entities and their controlling persons) in order to ascertain their CRS status; and report information regarding a Shareholder and his/her/its account holding in the Company to the Luxembourg tax authorities (Administration des Contributions Directes) if such an account is deemed a CRS Reportable Account under the CRS Law.

By investing in the Company, the Shareholders acknowledge that (i) the Company is responsible for the treatment of the personal data provided for in the CRS Law; (ii) the personal data will inter alia be used for the purposes of the CRS Law; (iii) the personal data may be communicated to the Luxembourg tax authorities (Administration des Contributions Directes) and to the tax authorities of CRS reportable jurisdictions; (iv) responding to CRS-related questions is mandatory; and (v) the Shareholders have a right of access to and rectification of the data communicated to the Luxembourg tax authorities (Administration des Contributions Directes).

The Company reserves the right to refuse any subscription for Shares if the information provided or not provided does not satisfy the requirements under the CRS Law.

Prospective investors should consult their professional advisor on the individual impact of the CRS.

J. DAC6

On 25 May 2018, the EU Council adopted DAC 6 that imposes a reporting obligation on parties involved in transactions that may be associated with aggressive tax planning.

More specifically, the reporting obligation will apply to cross-border arrangements that, among others, satisfy one or more "hallmarks" provided for in DAC6 (the "Reportable Arrangements").

In the case of a Reportable Arrangement, the information that must be reported includes the name of all relevant taxpayers and intermediaries as well as an outline of the Reportable Arrangement, the value of the Reportable Arrangement and identification of any member states likely to be concerned by the Reportable Arrangement.

The reporting obligation in principle rests with persons that design, market or organise the Reportable Arrangement and professional advisors (intermediaries). However, in certain cases, the taxpayer itself can be subject to the reporting obligation.

The information reported will be automatically exchanged between the tax authorities of all Member States.

DAC6 must be implemented in the domestic laws of the Member States by 31 December 2019 and will only apply from 1 July 2020 with the first reporting deadline being 31 August 2020. However, at that time, it will be necessary to report the Reportable Arrangements the first step of which was implemented between 25 June 2018 and 1 July 2020.

In light of the broad scope of DAC6, transactions carried out by the Company may fall within the scope of DAC6 and thus be reportable (subject however to the way DAC6 will be implemented into national laws).

7. EXPENSES PAID BY THE COMPANY

The Company will bear all the costs incurred in connection with the management, administration, portfolio management, advisory services and safekeeping of the Company's assets and the sale of the Company as listed below:

Sub-Funds	Share Class	Management Company Fee[1]and[2]	Maximum Annual Management Fee **please see footnote 1) below**	Performance Fee	Administration **Please see footnote 1) and 2) below**	Transfer Agency Fee	Custody Fee **Please see footnote 1) and 2) below**
SAMCO SICAV – Artico Sustainable Emerging Markets	"QI"	Up to 0.10% with a minimum of EUR 20,000.- per year[iii]	1.25% p.a.[4)]	None	Max. 0.07% p.a.	Max EUR 150 per acccount per annum	Max. 0.07% p.a.
	"X"		None		Max. 0.07% p.a.		Max. 0.07% p.a.
	"USD"		0.95% p.a.		Max. 0. 07% p.a.		Max. 0. 07% p.a.
	"XL"		0.75% p.a.		Max. 0.07% p.a.		Max. 0.07% p.a.
	"CHF"		0.95% p.a.		Max. 0.07% p.a.		Max. 0.07% p.a.
	"EUR"		0.95% p.a.		Max. 0.07% p.a.		Max. 0.07% p.a.
	"SEK"		0.95% p.a.		Max. 0.07% p.a.		Max. 0.07% p.a.

Currency of account of the Sub-Funds: USD

Footnotes	
1)	Calculated on the average total net assets of the Sub-Fund and paid monthly.
2)	For Central Administration, an aggregated minimum annual fee of EUR 120,000.- will be charged SAMCO SICAV – Artico Sustainable Global Core, SAMCO SICAV – Artico Sustainable Global Small Cap, SAMCO SICAV and Artico Sustainable Emerging Markets. If the fee for Central Administration is lower than the minimum fee, the higher amount will be borne by the mentioned Sub-Funds on a pro rata basis and paid monthly.
3)	For the portion invested in other sub-funds of the Company no Administration and Custody Fee shall be charged
4)	A size dependent rebate on the Management Fee is available to all investors.
5)	Calculated quarterly with High Water Mark on performance exceeding the Index Benchmark, as defined in the Sub-Fund's Particulars.

The Company currently offers the Share Classes listed above. The following table describes the characteristics of the respective Share Classes:

Name Component of Share Class	Description
"QI"	Share Class, which is addressed to qualified investors as defined by the Swiss law dated 23.6.2006, concerning collective investment schemes (KAG)
"X"	Share Class, which is addressed to institutional investors who signed an agreement with Artico Partners or AWEA Fonds AG or one of their authorised contractual partners. The costs for asset management are charged to investors under the aforementioned agreements

[1] For sake of clarity, the Management Company offers a wide range of services on top of its mandate as an alternative investment fund manager and may hence be appointed by the Company to perform ad hoc services, which may result in additional costs to be borne by all Sub-Funds.

[2] Sub-Funds subject to the VàR approach are subject to an additional 0.01% fee p.a. with a maximum of EUR 18,000.- per year.

"USD"	Share Class, which is available to all investors with a minimum investment of 1 share.
"XL"	Share Class, which is only available to institutional investors with a minimum investment of USD 10.000.000.
"CHF"	Share Class, which is available to all investors with a minimum investment of 1 share, denominated in CHF. Currency hedging into CHF may be applied (partially or fully)
"EUR"	Share Class, which is available to all investors with a minimum investment of 1 share, denominated in EURO. Currency hedging into EURO may be applied (partially or fully)
"SEK"	Share Class, which is available to all investors with a minimum investment of 1 share, denominated in SEK. Currency hedging into SEK may be applied (partially or fully)

As a consequence of the investment policy a significant part of the Sub-Funds' portfolios can be invested in target funds. Therefore, certain commission payments and expenses may occur more than once (for example, commission for the Depositary and the Administrative Agent, Management Company, investment management/advisory fees and issuing/redemption commission of the UCI and/or UCITS in which an investment is made). Such commission payments and expenses are charged at the level of the target fund as well as of the Sub-Funds.

In addition, the Company shall bear the following expenses:

- all taxes which may be payable on the Company's assets or income and especially the "taxe d'abonnement";
- the customary commissions usually incurred on security transactions;
- the costs which may be incurred for extraordinary steps or measures, in particular expert opinions or lawsuits which might be necessary for the protection of the Company's assets;
- all costs relating to the setting-up of the Company;
- Fees for additional administrative services i.e. additional Share-class fees, special fund event fees, transfer agency account maintenance fee
- the fees of the Board of Directors where applicable
- the cost of preparing, depositing and publishing agreements and other documents concerning the Company, including fees for the notification of and registration with all authorities, the cost of preparing, translating, printing and distributing the periodical publications and all other documents which are required by the relevant legislation or regulations, the cost of preparing and distributing notifications to Shareholders, the fees for the Company's auditors and legal advisers and all other similar expenses.

Expenses incurred in connection with the establishment of the Company and the creation of the initial Sub-Fund, including those incurred in the preparation and publication of the first Prospectus, the notary fees as well as the taxes, duties and any other publication expenses will be borne by the initial Sub-Fund and will be amortised over a maximum period of five years.

Expenses incurred in connection with the creation of any additional Sub-Fund will be borne by the relevant Sub-Fund and will be written off over a maximum period of five years.

Operational and administrative expenses are allocated among the Sub-Funds, the categories and the classes of Shares pro rata to their respective net assets (or in a fair and reasonable manner as determined by the Company).

8. DATA PROTECTION

For the purposes of this clause, the terms “Personal Data”, “Controller”, “Processor” and “Data Subject” shall all be defined as set out in the applicable Data Protection Laws. “Data Protection Laws” means the Luxembourg or any applicable national data protection legislation together with the protection of privacy in the electronic communications sector and the EU Regulation 2016/679 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data (hereby referred to as “GDPR”).

A. Categories of Personal Data and Data Subjects

The Company acting as data controller (the “Controller”) collects, stores and processes by electronic or other means personal data (i.e. any information relating to an identified or identifiable natural person, hereafter, the "Personal Data") supplied by the Investors at the time of their subscription and their representative(s) (including, without limitation, legal representatives and authorized signatories), employees, directors, officers and/or unitholders for, financial intermediaries and/or ultimate beneficial owner(s) (as applicable) (the “ Data Subjects”) for the purposes of fulfilling the services required by the Investors.

Personal Data may include, without limitation,

- identifying data and identifying electronic data (such as name, address, e-mail address, identity documents, specimen of signature);
- banking and financial data (such as identification of the bank account, payslip/proceeds of remuneration, account balance…);
- data concerning personal characteristics (such as age, sex, date of birth, criminal records,…);
- data concerning profession and employment (such as current employment data);
- data concerning source of wealth (such as assets of the data subject).
- and any other Personal Data that is necessary to Controller and Processors for the purposes described below.

Personal Data is collected directly from Data Subjects or may be collected through publicly accessible sources, social media, subscription services, or other third-party data sources.

B. Purpose of the processing of the Personal Data and the legal basis for the processing of the Personal Data

Personal Data may be processed for the purposes of (i) offering investment in Shares and performing the related services as contemplated under this Prospectus, the subscription agreement, the Depositary and Paying Agent Agreement, the Management Company Services Agreement, the Investment Management Agreements and, the Transfer and Registrar Agent Agreement, including, but not limited to, processing subscriptions and redemptions and providing financial and other information to Investors (ii) direct or indirect marketing activities and, (iii) other related services resulting from any agreement entered into between Controller and a service provider that is communicated or made available to the Investors (hereafter the “Investment Services”). Personal Data may also be processed to comply with legal or regulatory obligations including, but not limited to, legal obligations under applicable fund and company law (such as maintenance of the register of Investors and recording orders), prevention of terrorism financing law, anti-money laundering law (such as carrying out customer due diligence), prevention and detection of crime, and tax law (such as reporting under the FATCA and CRS Laws (as defined in the Tax section of this Prospectus).

Personal Data will be used by the Company as Controller, and by the Management Company, the Depositary and Paying Agent, the Sub-Registrar Agent for maintaining the Register, processing transactions for Shareholders or payment of dividends, and complying with legal and regulatory obligations and other service providers of the Company (including its information technology providers) and, any of the foregoing respective agents, delegates, affiliates, subcontractors and/or their successors and assigns, acting as data processor on behalf of the Company (i.e. the "Processors"). The Processors may act as data processor on behalf of the Controller or, in certain circumstances, as data controller, in particular for compliance with their legal obligations in accordance with applicable laws and regulations (such as anti-money laundering identification) and/or order of competent jurisdiction.

The Controller and Processors may collect, use, store, retain, transfer and/or otherwise process Personal Data: (i) on the basis of Investors’ consent and/or; (ii) for the Processors to perform their services rendered in connection with the Investment Services, (iii) as a result of the subscription of Investors to the subscription agreement where necessary to perform the Investment Services or to take steps at the request of Investors prior to such subscription, including the holding of Shares in general and/or; (iv) to comply with a legal or regulatory obligation of the Controller or the Processors and/or; (v) in the event the subscription agreement is not entered into directly by the concerned Data Subject, Personal Data may be processed for the purposes of the

legitimate interests pursued by Controller or by Processors, which mainly consist in the performance of the Investment Services, or direct or indirect marketing activities, or compliance with foreign laws and regulations and/or any order of a foreign court, government, supervisory, regulatory or tax authority, including when providing such Investment Services to any beneficial owner and any person holding shares directly or indirectly in the Company.

C. The recipients and categories of recipients of the Personal Data including transfer of Personal Data to third countries (including safeguards)

Personal Data may be disclosed to and/or transferred to and otherwise accessed or processed by Processors, auditors or accountants, as well as any (foreign) court, governmental or regulatory bodies including tax authorities (i.e. the "Authorised Recipients"). The Authorised Recipients may act as data processor on behalf of Controller or, in certain circumstances, as data controller for pursuing their own purposes, in particular for performing their services or for compliance with their legal obligations in accordance with applicable laws and regulations and/or order of court, government or regulatory body, including tax authority. Investors acknowledge that the Authorised Recipients, including the Processors, may be located outside of the European Economic Area ("EEA") in countries which do not ensure an adequate level of protection according to the European Commission and where data protection laws might not exist or be of a lower standard than in the EEA. In case personal data are transferred outside the EEA, necessary steps are undertaken to ensure that appropriate safeguards required by GDPR and other applicable laws and regulations, are put in place to protect the privacy and integrity of such personal data, such as the implementation of EU model contract clauses.

The Controller undertakes not to transfer Personal Data to any third parties other than the Authorised Recipients, except as disclosed to Investors from time to time or if required or permitted by applicable laws and regulations, including Data Protection Law, or by any order from a court, governmental, supervisory or regulatory body, including tax authorities.

By purchasing Shares in the Company, Investors acknowledge and accept that Personal Data may be processed for the purposes described above and in particular, that the transfer and disclosure of Personal Data may take place to countries which do not have equivalent data protection laws to those of the EEA, including the Data Protection Law, or that are not subject to an adequacy decision of the European Commission. The Controller may only transfer Personal Data for the purposes of performing the Investment Services, marketing purposes or for compliance with applicable laws and regulations as contemplated under this Prospectus.

The Controller or the Processors on behalf of the Controller shall transfer Personal Data to the Authorised Recipients located outside European Economic Area ("EEA") in countries which do not ensure an adequate level of protection according to the European Commission on the basis of appropriate safeguards according to Data Protection Law, such as standard contractual clauses, binding corporate rules, an approved code of conduct, or an approved certification mechanism.

D. Right of Data Subjects to withdraw consent

In the event the processing of Personal Data or transfer of Personal Data outside of the EEA take place on the basis of the consent of Investors, Data Subjects are entitled to withdraw their consent at any time without prejudice to the lawfulness of the processing and/or data transfers carried out before the withdrawal of such consent. In case of withdrawal of consent, Controller will accordingly cease such processing or transfers. However, Investors acknowledge that, notwithstanding any withdrawal of their consent, Controller may still continue to process and/or transfer Personal Data outside the EEA if permitted by Data Protection Law or if required by applicable laws and regulations. Any change to, or withdrawal of, Data Subjects' consent can be communicated in writing to the Company.

E. Source of the Personal Data

Insofar as Personal Data provided by Investors include Personal Data concerning Data Subjects. Investors represent that they have authority to provide Personal Data of Data Subjects to Controller. If Investors are not natural persons, they confirm that they have undertaken to (i) inform any Data Subject about the processing of their Personal Data and their rights as described under this Prospectus, in accordance with the information requirements under the Data Protection Law and (ii) where necessary and appropriate, obtained in advance any consent that may be required for the processing of Personal Data as described under this Prospectus in accordance with the requirement of Data Protection Law with regard to the validity of consent, in particular, for the transfer of Personal Data to the Authorised Recipients located outside of the EEA. The Controller may assume, where applicable, that Data Subjects have, where necessary, given such consent and have been informed of the processing and transfer of their Personal Data and of their rights as contemplated under this Prospectus.

F. Consequence of refusal to provide Personal Data processed under statutory obligation

Answering questions and requests with respect to (i) Data Subjects' identification, (ii) Shares hold in the Company and (iii) FATCA is mandatory. Investors acknowledge and accept that failure to provide relevant personal data requested by the Company, the Management Company, the Investment Manager, the Sub-Registrar Agent and/or the Sub-Administrative Agent in the course of their relationship with the Company may prevent them from maintaining their Shares in the Company and may be reported by the Company, the Management Company, the Investment Manager, the Sub-Registrar Agent and/or the Sub-Administrative Agent to the relevant Luxembourg authorities.

Investors acknowledge and accept that the Company, the Management Company, the Investment Manager, the Sub-Registrar Agent and/or the Sub-Administrative Agent will report any relevant information in relation to their investments in the Company to the Luxembourg tax authorities (*Administration des contributions directes*) which will exchange this information on an automatic basis with the competent authorities in the United States or other permitted jurisdictions as agreed in the FATCA Law, at OECD and EU levels or equivalent Luxembourg legislation.

G. Rights of Data Subjects

Each Data Subject may request (i) access to, rectification, or deletion of, any incorrect Personal Data concerning him, (ii) a restriction of processing of Personal Data concerning him and, (iii) to receive Personal Data concerning him in a structured, commonly used and machine readable format or to transmit those Personal Data to another controller in accordance with Data Protection Law and (iv) to obtain a copy of or access to the appropriate or suitable safeguards which have been implemented for transferring the Personal Data outside of the EEA, in the manner and subject to the limitations prescribed in accordance with Data Protection Law. In particular, Data Subjects may at any time object, on request and free of charge, to the processing of Personal Data concerning them for marketing purposes or for any other processing carried out on the basis of the legitimate interests of Controller or Processors. Each Data Subject should address such requests to the Company. For any additional information related to the processing of their Personal Data, Data Subjects can contact the Controller via post mail.

H. Right to lodge a complaint with the supervisory authority

Investors are entitled to address any claim relating to the processing of their Personal Data carried out by Controller and the Processors in relation with the Investment Services to the relevant data protection supervisory authority (i.e. in Luxembourg, the Commission Nationale pour la Protection des Données).

The Controller and Processors processing Personal Data on behalf of Controller will accept no liability with respect to any unauthorised third party receiving knowledge and/or having access to Personal Data, except in the event of proved negligence or willful misconduct of Controller or such Processors.

I. Storage limitation of the Personal Data

Personal Data of Data Subjects will not be retained for longer than necessary with regard to the Purposes and compliance obligations, in accordance with applicable laws and regulations, subject always to applicable legal minimum retention periods.

9. INFORMATION TO SHAREHOLDERS

A. Selling and holding restrictions

All Shares in the Company, except for debt Interests of less than USD 50,000.- may only be issued, sold or otherwise transferred to or held by or through exempt beneficial owners under the IGA, active non-financial foreign entities as defined by the IGA, US Persons that are not specified US Persons falling within the ambit of the FATCA provisions ("US person"), or financial institutions that are not nonparticipating financial institutions, as each defined by FATCA and the Luxembourg IGA (together "**FATCA Eligible Investors**").

In case the Company discovers that any Interest in the Company is not held by a Shareholder falling with one of the above-mentioned eligible categories, the Company may charge such Shareholder with any taxes or penalties imposed on the Company attributable to such Shareholder's non-compliance under the Luxembourg IGA and FATCA, and the Company may, in its sole discretion, redeem such Shares.

B. Regular reports and publications

An annual report will be prepared for each Sub-Fund and the Company as a whole as of 30 June of each year (using Lux GAAP accounting standard). The report contains a breakdown of each Sub-Fund and Share Class in the relevant account currency. The consolidated breakdown of assets for the Company as a whole is given in USD.

The Company shall further publish semi-annual unaudited reports, including, *inter alia*, a description of the investments underlying the portfolio of each Sub-Fund and the number of Shares issued and redeemed since the last publication.

The aforementioned reports will be published within four (4) months for the annual reports and two (2) months for the semi-annual reports of the date thereof and copies may be obtained free of charge by any person at the registered office of the Company and of the Depositary.

The issue and redemption price of the Shares of each Sub-Fund or Share Class is available free of charge in Luxembourg at the registered office of the Company and of the Depositary.

Notices to the registered Shareholders will be sent by post to the address of the Shareholders in the register of Shareholders. Insofar required by Luxembourg law, such notices will also be published in a Luxembourg daily newspaper and, if necessary, in foreign daily newspapers.

C. Documents available to the public

The following documents are lodged at the registered office of the Company, where they are available for inspection free of charge:

1. the Articles;
2. the latest annual reports and semi-annual reports of the Company;
3. the Investment Management agreement(s) (if any);
4. the Depositary and Paying Agent Agreement;
5. the administrative agreement;
6. the alternative investment fund management
7. the Management Company services agreement;
8. the Internal conduct of business rules and
9. the PRIIPS KIDs.

D. Fair treatment of Shareholders

The Management Company will ensure that investors in the Company are treated fairly. The participation of each Shareholder in the Company is represented by Shares. Each Share pertaining to same Share Class within the same Sub-Fund bears the same rights and obligations. Therefore, equal treatment of all Shareholders of the Company holding Shares of the same Share Class within the same Sub-Fund is ensured. The Management Company (or any of its delegate) will not enter into any side letter or side arrangement granting a preferential treatment to any investor which, in the reasonable opinion of the Management Company, could result in an overall material disadvantage to other investors.

Subject to compliance with the restrictions and conditions set out in the preceding paragraph, and without prejudice to the generality of the foregoing, will not be considered as resulting in an overall material disadvantage to other investors any Side Letter with one or several investors whereby the Management Company (or any of its delegates) would confirm in advance as to how the Management Company (or a delegate) will exercise vis-à-vis one or several investors discretion left to the Management Company (or a delegate) under this Prospectus and the Articles; surrender any right granted to the Management Company (or a delegate), for the benefit of one or several investors; add to the duties or obligations of the Management Company (or a delegate) under this Prospectus and the Articles, for the benefit of one or several investors; undertake to provide, or procure to provide, an investor with any information or confirmation as may be required by such investor with a view to comply with any statutory, regulatory or internal policies requirements applicable to it.

E. Amendments to the Prospectus

Subject to regulatory approval (if applicable), the provisions of this Prospectus (including the investment objective and policy or strategy of a Sub-Fund) may be amended as follows:

(a) if the change is determined by the Board of Directors to have a material adverse effect on investors only following the end of a one month prior free redemption notice period during which investors affected by the relevant amendment who disagree with the changes will have the right to request the redemption of their Shares without redemption fee (but provided that, for the avoidance of doubt, the terms governing redemptions as applicable in each relevant Sub-Fund will continue to govern such redemptions);

(b) without the consent of investors to make any change, so long as the changes do not materially adversely affect the rights and obligations of any existing investors, as the case may be, including, without prejudice to the generality of the foregoing:

   i. to take such action in light of changing legal or regulatory conditions as is necessary in order to permit the Company, as the case may be, to continue in existence, including, without limitation, to comply with the requirements of the Law of 2010;

   ii. to delete or add any provision of this Prospectus required to be so deleted or added by a regulatory authority, state securities commission or similar agency, which addition or deletion is deemed by such regulatory authority, commission or agency to be for the benefit or protection of the investors;

   iii. to correct any clerical mistake or to correct or supplement any immaterial provision herein that may be inconsistent with any other provision herein or therein, or correct any printing, typographical, stenographic or clerical errors or omissions, that will not be inconsistent with the provisions of the Prospectus.

For the avoidance of doubt, if a proposed change affects only the investors in one or more Sub-Fund(s) (the "**Affected Sub-Fund(s)**") but not the other Sub-Funds, the provisions under items a) and b) above applies only to the Affected Sub-Funds and separately in respect of each relevant Affected Sub-Fund.

F. Applicable law, place of performance and authoritative language

The Luxembourg District Court is the place of performance for all legal disputes between the Shareholders, the Company and the Depositary. Luxembourg law applies. However, in matters concerning the claims of investors from other countries, the Company and/or the Depositary can elect to make themselves and the Company subject to the jurisdiction of the countries in which the Shares were bought and sold.

The English version of this sales brochure is the authoritative version. However, in the case of Shares sold to investors from the other countries in which Shares can be bought and sold, the Company and the Depositary may recognize approved translations (i.e. approved by the Company) into the languages concerned as binding upon themselves and the Company.

In addition resp. deviation of the description of the Company the following restrictions are applicable for the Sub-Funds.

G. Rights of investors against the service providers of the Company

Without prejudice to any potential right of action in tort or any potential derivative action, investors in the Company may not have a direct right of recourse against any service providers appointed by the Company or the Management Company as such right of recourse will lie with the relevant contracting counterparty rather than the investors.

10. LIQUIDATION AND MERGING OF THE COMPANY AND ITS SUB-FUNDS

A. Liquidation and dissolution of the Company

The Company may at any time be dissolved by a resolution of the general meeting of Shareholders subject to the quorum and majority requirements applicable for amendments to the Articles.

Whenever the share capital falls below two-thirds of the minimum capital indicated in Article 5 of the Articles, the question of the dissolution of the Company shall be referred to a general meeting of Shareholders by the Board of Directors. The general meeting, for which no quorum shall be required, shall decide by the simple majority of the Shares represented at the meeting.

Whenever the share capital falls below one quarter of the minimum capital indicated in Article 5 of the Articles, the question of the dissolution of the Company shall be referred to a general meeting of Shareholders by the Board of Directors. The general meeting, for which no quorum shall be required, shall decide by one quarter of the Shares represented at the meeting.

The meeting must be convened so that it is held within a period of forty days as from ascertainment that the net assets have fallen below two-thirds or one-fourth of the legal minimum, as the case may be.

Liquidation shall be carried out by one or several liquidators, who may be physical persons or legal entities, duly approved by the regulatory authority and appointed by the general meeting of Shareholders, which shall determine their powers and their compensation.

The net proceeds of liquidation corresponding to each class within each Sub-Fund shall be distributed by the liquidators to the holders of Shares of the relevant class in the relevant Sub-Fund in proportion to their holding of such Shares in such class.

Should the Company be voluntarily or compulsorily liquidated, its liquidation will be carried out in accordance with the provisions of the Law. Such Law specifies the steps to be taken to enable Shareholders to participate in the distribution(s) of the liquidation proceeds and provides for a deposit in escrow at the "*Caisse de Consignation*" at the time of the close of liquidation. Amounts not claimed from escrow within the statute of limitation period shall be liable to be forfeited in accordance with the provisions of Luxembourg law.

B. Termination of Sub-Funds / classes of Shares

In the event that for any reason the value of the total net assets in any Sub-Fund or class has decreased to, or has not reached, an amount determined by the Board of Directors to be the minimum level for such Sub-Fund or class to be operated in an economically efficient manner (which amount is currently fixed at 1,250,000.- EUR) or in case of a substantial modification in the political, economic or monetary situation or as a matter of economic rationalization, the Board of Directors may decide to redeem all the Shares of the relevant Sub-Fund or class at the Net Asset Value per Share (taking into account actual realization prices of investments and realization expenses) calculated on the Valuation Day at which such decision shall take effect. The Company shall serve a notice to the holders of the relevant Shares prior to the effective date for the compulsory redemption, which will indicate the reasons of and the procedure for the redemption operations: registered Shareholders shall be notified in writing. Unless it is otherwise decided in the interests of, or to keep equal treatment between, the Shareholders, the Shareholders of the Sub-Fund or class concerned may continue to request redemption of their Shares free of charge (but taking into account actual realization prices of investments and realization expenses) prior to the date effective for the compulsory redemption.

Notwithstanding the powers conferred to the Board of Directors by the preceding paragraph, the general meeting of Shareholders of any class or of any Sub-Fund will, in any other circumstances, have the power, upon proposal from the Board of Directors, to redeem all the Shares of the relevant Sub-Fund or class and refund to the Shareholders the Net Asset Value of their Shares (taking into account actual realization prices of investments and realization expenses) calculated on the Valuation Day, at which such decision shall take effect. There shall be no quorum requirements for such general meeting of shareholders, which shall decide by resolution taken by simple majority of those present or represented and voting at such meeting.

Assets which may not be distributed to their beneficiaries upon the implementation of the redemption will be deposited with the Caisse de Consignation on behalf of the persons entitled thereto. Should such amounts not be claimed within the prescription period, then they may be forfeited. All redeemed Shares shall be cancelled.

C. Merger of Sub-Funds or one Sub-Fund with another undertaking for collective investment (UCI)

If the total value of a Sub-Fund's or Share Classes' net assets remains at or falls to a level that no longer allows the Sub-Fund or Share Class to be managed in an economically reasonable way, or if the economic, legal or political environment changes as well as in the course of a rationalisation, the Board of Directors can decide to cancel Shares of the corresponding Sub-Fund and to allocate the corresponding Shareholders Shares in another class, Sub-Fund or in another UCI. In the event of such a decision by the Board of Directors, the merger shall be binding for all Shareholders of the concerned Sub-Fund after expiry of a one-month period commencing on the date the decision is published.

During this one-month period, Shareholders can submit their Shares for redemption without any fees or administration costs being charged except for transaction costs in favour of the Company.

The decision to merge Share Classes, Sub-Funds or one single Sub-Fund with another UCI established in accordance with the above law will be announced in a Luxembourg daily newspaper, and, if necessary, in the official publications specified for the countries in which Shares are sold as listed in this Prospectus.

Appendix I

The Company's investments shall be subject to the following restrictions:

1. Investment instruments

(A) In line with the investment policy of each Sub-Fund, the assets of each Sub-Fund may consist of:

(a) transferable securities and money market instruments admitted to or dealt in on a Regulated Market;

(b) transferable securities and money market instruments traded on another market of a Member State that operates regularly and is recognised and open to the public;

(c) transferable securities and money market instruments admitted to official listing on a stock exchange in a non-member state of the European Union (the "**EU**") or dealt in on another Regulated Market in a non-member state of the EU which operates regularly and is recognised and open to the public, provided that the choice of the stock exchange or the market are situated in Europe, America, Asia, Africa, Australasian or Oceania;

(d) recently issued transferable securities and money market instruments, provided that:

- the terms of issue include an undertaking that application will be made for admission to official listing on a stock exchange or to another Regulated Market, provided that the choice of the stock exchange or the market is effectuated on a Regulated Market as described under paragraphs a) and c) here above;
- such admission is secured within one year of issue;

(e) deposits with credit institutions which are repayable on demand or have the right to be withdrawn, and maturing in no more than twelve months, provided that the credit institution has its registered office in a Member State or, if the registered office of the credit institution is situated in a non-member state, provided that it is subject to prudential rules considered by the *Commission de Surveillance du Secteur Financier* as equivalent to those laid down in Community law;

(f) derivative financial instruments, including similar instruments allowing cash settlements, that are traded on Regulated Markets of the kind specified in points a), b) and c) above, and/ OTC derivative financial instruments, provided that:

- the use of derivatives is in accordance with the investment purpose and investment policy of the respective Sub-Fund, and is suited towards achieving these;
- the underlying consists of instruments covered by Article 41(1) of the 2010 Law, financial indices, interest rates, foreign exchange rates or currencies, in which the Company may invest according to its investment objectives as stated in the Company's instruments of association;
- the Sub-Funds ensure, through adequate diversification of the underlying assets, that the diversification requirements applicable to them and listed in the section entitled "Risk diversification" are adhered to;
- the counterparties to OTC derivative transactions are institutions subject to prudential supervision, and belonging to the categories approved by the CSSF and have been specifically approved by the Board of Directors;
- the OTC derivatives are subject to reliable and verifiable valuation on a daily basis and can be sold, liquidated or closed by an offsetting transaction at any time at their fair market value at the Company's initiative; and
- the respective counterparty is not granted discretion regarding the composition of the portfolio managed by the respective Sub-Fund (e.g. in the case of a total return Swap or a derivative financial instrument with similar characteristics) or the underlying of the respective OTC derivative.

(g) money market instruments other than those dealt in on a Regulated Market and referred to in Article 1 of the 2010 Law, if the issue or issuer of such instruments is itself regulated for the purpose of protecting investors and savings, and provided that they are:

- issued or guaranteed by a central, regional or local administration, by a central bank of a Member State, by the European Central Bank, by the EU or by the European Investment Bank, by a non-member state, or, in the case of a federal state, by one of the members composing the federation, or by an international public organisation to which one or more Member States belong; or
- issued by an undertaking whose securities are dealt in on Regulated Markets referred to in points a), b) or c) above; or
- issued or guaranteed by an establishment subject to prudential supervision, in accordance with criteria defined by Community law, or by an establishment which is subject to and complies with prudential rules considered by the CSSF authority to be at least as stringent as those laid down by Community law, or
- issued by other bodies belonging to the categories approved by the CSSF provided that investments in such instruments are subject to investor protection equivalent to that laid down in the first, the second or the third indent and provided that the issuer is a company whose capital and reserves amount at least

to ten million euros (EUR 10,000,000.-) and which presents and publishes its annual accounts in accordance with Fourth Directive 78/660/EEC, is an entity which, within a group of companies which includes one or several listed companies, is dedicated to the financing of the group or is an entity which is dedicated to the financing of securitisation vehicles which benefits from a banking liquidity line;

(h) units of UCITS authorised under Directive 2009/65/EC and/or other UCIs within the meaning of the Article 1(2), points a) and b) of Directive 2009/65/EC, whether or not established in a Member State or not, provided that:
- these other UCIs are approved in conformity with legislation stipulating that the entities are subject to supervision that the CSSF considers to be equivalent to that intended by Community legislation and that the cooperation between the authorities is adequately guaranteed;
- the level of protection guaranteed to shareholders of these other UCIs is equivalent to that intended for shareholders of a UCITS and, in particular, that the rules relating to the division of assets, borrowings, loans, short sales of transferable securities and money market instruments is equivalent to the requirements of Directive 2009/65/EC;
- the business of the other UCI is reported in semi-annual and annual reports to enable an assessment to be made of the assets and liabilities, income and operations over the reporting period;
- the proportion of assets of the UCITS or of these other UCIs whose acquisition is planned, which in conformity with their formation documents can be wholly invested in units of other UCITS or other UCIs, does not exceed 10%.

(B) However, each Sub-Fund may:

(a) invest no more than 10% of its net assets in transferable securities and money market instruments other than those referred to in point (A) above; or

(b) invest no more than 10% of its net assets in debt instruments which are treated, because of their characteristics, as equivalent to transferable securities and money market instruments, and which are, inter alia, transferable, liquid and have a value which can be accurately determined on each Valuation Day;

The total of investments referred to (a) and (b) may not under any circumstances exceed 10% of each Sub-Fund's net assets.

The Company and/or each Sub-Fund:

(a) may acquire securities and real estate necessary for the exercise of its activity;

(b) may not acquire either precious metals or certificates representing them;

(c) is authorised to invest up to 10% of the net assets of each Sub-Fund in the following structured products:
- structured products that have a precious metal as their underlying and that satisfy the requirements of Article 2 of Council Directive 2007/16/EC on transferable securities;
- structured products that have a commodity or a commodities index as their underlying and that satisfy the requirements of Article 2 of Council Directive 2007/16/EC on transferable securities.

(d) may hold ancillary liquid assets. Ancillary liquid assets are limited to bank deposits at sight, such as cash held in current accounts with a bank accessible at any time, in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets provided under Article 41(1) of the 2010 Law or for a period of time strictly necessary in case of unfavourable market conditions. The holding of such ancillary liquid assets is limited to 20% of the net assets of a UCITS.
The above mentioned 20% limit shall only be temporarily breached for a period of time strictly necessary when, because of exceptionally unfavourable market conditions, circumstances so require and where such breach is justified having regard to the interests of the investors, for instance in highly serious circumstances such as the September 11 attacks or the bankruptcy of Lehman Brothers in 2008;

(e) may not invest more than 20% of its assets in deposits made with the same body.

2. <u>Risk diversification</u>

(A) In accordance with the principle of risk diversification, each Sub-Fund is not permitted to invest more than 10% of its assets in transferable securities or money market instruments issued by a single issuer. The counterparty risk of the Company in an OTC derivative transaction may not exceed 10% of its assets when the counterparty is a credit institution referred to in paragraph (1) (A) f), or 5% of its assets in the other cases.
In addition, the total value of the transferable securities and money market instruments held by a Sub-Fund in the issuing bodies in each of which it invests more than 5% of its assets must not exceed 40% of the value of its assets. This limitation does not apply to deposits and OTC derivative transactions made with financial institutions subject to prudential supervision.

Notwithstanding the individual limits laid down in the first paragraph of (A), the Company shall not combine, where this would lead to investing more than 20% of its assets in a single entity, any of the following:

- investments in transferable securities or money market instruments issued by that single entity,
- deposits made with that single entity, or
- risks arising from OTC derivative transactions undertaken with that single entity.

(B) The following exceptions are possible:

i. The aforementioned limit of 10% can be raised to a maximum of 25% for various debt securities issued by credit institutions whose registered office is situated in a Member State and is subject by law to special public supervision for the purpose of protecting the holders of such debt securities. In particular, the amounts originating from the issue of the bonds must be invested, in accordance with the Law of 2010, in assets that adequately cover, for the entire duration of the validity of the bonds, the resulting liabilities and that benefit from preferential right in the payment of interest incurred in the event of default by the issuer. If the Company invests more than 5% of its assets in these bonds issued by a single issuer, the total value of these investments may not exceed 80% of the assets of the corresponding Sub-Fund.

ii. The aforementioned limit of 10% can be raised to a maximum of 35% for transferable securities or money market instruments issued or guaranteed by a Member State, by its local authorities, by a non-EU member state or by public international bodies of which one or more Member States are members.

The transferable securities referred to in exceptions (a) and (b) shall not be taken into account for the purpose of applying the limit of 40% laid down above in the second paragraph of point (A).

The limits stated under (A) and (B), above, may not be aggregated and, accordingly, investments in transferable securities issued by a single issuer made in accordance with (A) and (B), may not, in any case, exceed a total of 35% of the Sub-Fund's assets.
Companies which are included in the same group for the purposes of consolidated accounts, as defined in accordance with Directive 83/349/EEC or in accordance with recognised international accounting rules, are regarded as a single entity for the purpose of calculating the limits contained in this point 2).

The Company may invest cumulatively up to 20% of its assets in the transferable securities or money market instruments of a single group.

(C) In derogation of the provisions of points (A) and (B) above, where the Sub-Fund has invested in accordance with the principle of risk spreading in transferable securities issued or guaranteed by a Member State, by its local authorities, by a member state of the Organisation for Economic Cooperation and Development or by public international bodies of which one or more Member States are members, the Sub-Fund is authorised to invest up to 100% of its assets in such securities, provided that the Sub-Fund holds securities from at least six different issues and securities from one issue do not account for more than 30% of its total assets.

(D) Each Sub-Fund may also subscribe for, acquire and/or hold shares issued or to be issued by one or more other Sub-Funds of the Company subject to additional requirements, if:

(i) the target Sub-Fund does not, in turn, invest in the Sub-Fund invested in this target Sub-Fund; and
(ii) no more than 10% of the assets of the target Sub-Funds whose acquisition is contemplated may be invested in aggregate in shares of other Sub-Funds of the Company; and
(iii) voting rights, if any, attaching to the relevant securities are suspended for as long as they are held by the Sub-Fund concerned; and
(iv) in any event, for as long as these securities are held by the relevant Sub-Fund, their value will not be taken into consideration for the purposes of verifying the minimum threshold of the net assets imposed by the 2010 Law; and

3. <u>Investment limits</u>

(A) The Company may acquire the units of UCITS and/or other UCIs referred to in points (1) A) h) above provided that no more than 20% of its assets are invested in a single UCITS or other UCI.

For the purpose of this investment limit, each sub-fund of a UCI with multiple sub-funds, within the meaning of Article 181 of the Law of 2010, shall be considered to be a separate issuer, provided that the principle of segregation of liabilities of the different sub-funds is ensured in relation to third parties.
(a) Investments made in units of UCIs other than UCITS may not exceed, in aggregate, 30% of the assets of the Company.
(b) When the Company invests in the units of other UCITS and/or other UCIs that are managed, directly or by delegation,

by the same management company or by any other company to which the Management Company is linked by common management or control or by a direct or indirect holding of more than 10% of the capital or voting rights, that management company or other company may not charge either a portfolio management or subscription or redemption fees on account of the investment by the Company in the units of other UCITS and/or other UCIs.

(B) The Company may not acquire shares carrying voting rights which would enable it to exercise significant influence over the management of the issuer.

(C) The Company may not acquire more than 10% of the non-voting shares of the same issuer, more than 10% of the bonds issued by the same issuer or more than 10% of money market instruments issued by the same issuer or more than 25% of the units of UCITS and/or other UCI. The limits laid down in the second, third and fourth indents may be disregarded at the time of acquisition if at that time the gross amount of the debt securities or of the money market instruments, or the net amount of the securities in issue cannot be calculated. The limits under (B) and (C) may be waived for:
(a) transferable securities and money market instruments issued or guaranteed by a Member State or its local authorities,
(b) transferable securities and money market instruments issued or guaranteed by a non-member state of the EU,
(c) transferable securities and money market instruments issued by public international bodies of which one or more Member States are members;
(d) shares held by the Company in the capital of a company incorporated in a non EU member state and investing its assets primarily in securities of issuers having their registered office in that State, if under the legislation of that State such a holding represents the only way in which the Company can invest in the securities of the issuers of that State. This derogation only applies if the company has an investment policy complying with the points 2(A) and (B) and 3(A) to (B) mentioned above. If the limits stated in points 2(A), 2(B) and 3(A) mentioned above are exceeded, the limit under (G) shall apply mutatis mutandis;
(e) Shares held by the Company in the capital of a subsidiary carrying on the business of management, advice or marketing in the country where the subsidiary is established, in regard to the repurchase of units at the request of unitholders exclusively on its or their behalf.

(D) Each Sub-Fund may not borrow more than 10% of its total net assets, and then only from banks and as a temporary measure. However, each Sub-Fund may acquire foreign currency by means of a back-to-back loan. Each Sub-Fund may not purchase securities while borrowings are outstanding in relation to it, except to fulfil prior commitments and/or exercise subscription rights. However, each Sub-Fund can borrow up to 10% of its net assets to make possible the acquisition of real estate essential for the direct pursuit of its business. In this case, these borrowings and those referred to above (temporary borrowings) may not in any case in total exceed 15% of the Sub-Funds' net assets.

(E) The Company may not grant credits or act as guarantor on behalf of third parties. This restriction does not prevent the Management Company from purchasing securities that are not fully paid up, nor to lend securities as described below. This restriction does not apply to margin calls on Options transactions and other similar transactions made in conformity with established market practices.

(F) Each Sub-Fund may not purchase any transferable securities or money market securities as hedges (unless the Sub-Fund may obtain such short-term credit as may be necessary for the hedging of purchases and sales of transferable securities or money market securities) or make short sales of securities or maintain a short position. Deposits on other accounts in connection with Options, forwards or OTC contracts, are, however, permitted within the limits provided for below.

(G) The Board of Directors is authorised to introduce further investment limits at any time in the interests of the shareholders, provided these are necessary to ensure compliance with the laws and regulations of those countries in which the Company's shares are offered and sold.

(H) If any of the above limits are exceeded for reasons beyond the control of the Company and/or each Sub-Fund or as a result of the exercise of subscription rights, the Company and/or each Sub-Fund may adopt, as a priority objective, sales transactions in order to rectify that situation, taking due account of the interests of the shareholders.

4. <u>EPM techniques and instruments</u>

Under the conditions and within the limits laid down by the CSSF, the Company is also authorised to employ techniques and instruments relating to transferable securities and money market instruments provided that such techniques (the "**techniques**") and instruments are used for the purpose of EPM. If these operations concern the use of derivative products, these conditions and limits shall conform to the provisions laid down by the Law of 2010. The use of these techniques and instruments

must be in accordance with the best interests of the investors.
In no case may these operations result in the Company departing from its investment objectives. Equally, the use of these techniques may not cause the risk level of the Sub-Fund in question to increase significantly with regard to its original risk level (i.e. without the use of these techniques).

The risks inherent to the use of these techniques are essentially comparable to the risks associated with the use of derivatives (in particular, counterparty risk). For this reason, reference is made here to the information contained in the above section entitled "Use of derivatives". The Company ensures that it or its appointed service providers will monitor and manage the risks incurred through the use of these techniques, particularly counterparty risk, as part of the risk management procedure. The monitoring of potential conflicts of interest arising from transactions with companies associated with the Company is primarily carried out through reviewing contracts and corresponding processes on a regular basis.

The Company also ensures that, at any time, it can cancel any contract entered into within the framework of the use of the techniques and instruments for the efficient management of the portfolio and that the securities and/or liquid funds to the respective counterparty can be reclaimed by the Company. In addition, the liquid funds should include the interest incurred up to the time of being reclaimed.

Furthermore, the Company ensures that, despite the use of these techniques and instruments, the investors' redemption applications can be processed at any time.

The Company will not engage in securities lending transactions.

5. Total Return Swaps and other Financial Derivative instruments with similar characteristics

Total Return Swaps ("TRS") are derivative contracts in which one counterparty transfers the total economic performance, including income from dividends, coupons, interest and fees, gains and losses from price movements, and credit losses, of a reference obligation to another counterparty.
The Company intends to use TRS or other financial derivative instruments with similar characteristics (at the time of this Prospectus, “CFD”, the “TRS/CFD”) in accordance with the provisions on the use of financial derivative instruments set forth in their investment policy and within the maximum and expected levels disclosed in the relevant Sub-Fund particular.

Whenever the Company will be using TRS/CFD Transactions the following will apply:
a) the TRS/CFD Transactions will be undertaken on single name equity and fixed income instruments or financial indices all of which are eligible assets for UCITS under EU law and regulation;
b) each trading counterparty to the TRS/CFD Transactions will be subject to prudential supervision rules considered by the CSSF as equivalent to those prescribed by EU law and specialised in such TRS/CFD Transactions;
c) risks borne by the respective Sub-Fund and Shareholders are described in section 2.A ‘Use of Derivatives’ of the Prospectus;
d) the TRS/CFD Transactions will be undertaken in accordance with the requirements and detailed detailed above;
e) no trading counterparty will assume discretion over the composition or management of the relevant Sub-Fund’s investment portfolio or over the underlying of the financial derivative instruments; and
f) none of the Sub-Fund’s investment portfolio transactions will require approval by third party.

The following type of assets can be subject to TRS/CFD: single name equity and fixed income instruments or financial indices.

With regards to TRS/CFD, 100% of the revenues (or losses) generated by their execution are allocated to the funds. The Investment Manager do not charge any additional costs or fees or receive any additional revenues in connection with these transactions. Whilst additional costs may be inherent in certain products (e.g. the financing leg on a CFD), these are imposed by the counterparty based on market pricing, form part of the revenues or losses generated by the relevant product, and are allocated 100% to the funds. Details on the actual return and cost for each type of SFT and TRS/CFD (in absolute terms and as a percentage of overall returns generated by that type of STF or TRS/CFD) are published in the Company’s annual reports and accounts.

In addition, the semi-annual and annual reports of the Company will express the amount of a Sub-Fund's assets subject to SFT and TRS, the maximum proportion of assets under management that can be subject to them as well as the expected proportion of assets under management that will be subject to each of them.

6. Collateral Policy and Management

In the context of OTC financial derivative transactions and EPM techniques, the Company may receive collateral with a view to reduce its counterparty risk. This section sets out the collateral policy applied by the Company in such case. All assets received by the Company in the context of EPM techniques shall be considered as collateral for the purpose of this section.

If the Company enters into OTC transactions, it may be exposed to risks related to the creditworthiness of the OTC counterparties: when the Company enters into Futures contracts or Options or uses other derivative techniques it is subject to the risk that an OTC counterparty may not meet (or cannot meet) its obligations under a specific or multiple contracts. Counterparty risk can be reduced by depositing a security (collateral) (see above).

Eligible Collateral

Collateral received by the Company may be used to reduce its counterparty risk exposure if it complies with the criteria set out in applicable laws, regulations and CSSF-Circulars issued from time to time notably in terms of liquidity, valuation, issuer credit quality, correlation, risks linked to the management of collateral and enforceability. In particular, collateral should comply with the following conditions:

(i) Any collateral received other than cash should be of high quality, highly liquid and traded on a Regulated Market or multilateral trading facility with transparent pricing in order that it can be sold quickly at a price that is close to pre-sale valuation;
(ii) It should be valued on at least a daily basis and assets that exhibit high price volatility should not be accepted as collateral unless suitably conservative haircuts are in place;
(iii) It should be issued by an entity that is independent from the counterparty and is expected not to display a high correlation with the performance of the counterparty;
(iv) It should be sufficiently diversified in terms of country, markets and issuers with a maximum exposure of 20% of the respective Sub-Fund's Net Asset Value to any single issuer on an aggregate basis, taking into account all collateral received.
(v) It should be capable of being fully enforced by the Company at any time without reference to or approval from the counterparty.

Subject to the abovementioned conditions, collateral received by the Company may consist of:

(i) Cash and cash equivalents, including short-term bank certificates and money market instruments;
(ii) Bonds issued or guaranteed by a member state of the OECD or by their local public authorities or by supranational institutions and undertakings with EU, regional or worldwide scope;
(iii) Shares or units issued by money market UCIs calculating a daily net asset value and being assigned a rating of AAA or its equivalent;
(iv) Shares or units issued by UCITS investing mainly in bonds/shares;
(v) Bonds issued or guaranteed by first class issuers offering adequate liquidity;
(vi) Shares admitted to or dealt in on a Regulated Market of a Member State or on a stock exchange of a member state of the OECD, on the condition that these shares are included in a main index.

The Company will only accept such financial instruments as collateral that would allow it (after objective and appropriate valuation) to liquidate these within an appropriate time period. The Company, or a service provider appointed by the Company, must assess the collateral's value at least once a day. The collateral's value must be higher than the value of the position of the respective OTC counterparty. However, this value may fluctuate between two consecutive valuations. After each valuation, however, it is ensured (where appropriate, by requesting additional collateral) that the collateral is increased by the desired amount to meet the value of the respective OTC counterparty's position (mark-to-market). In order to adequately take into account the risks related to the collateral in question, the Company determines whether the value of the collateral to be requested should be increased, or whether this value should be depreciated by an appropriate, conservatively measured amount (haircut). The larger the collateral's value may fluctuate, the higher the markdown. The markdown is highest for equities. Securities deposited as collateral may not have been issued by the corresponding OTC counterparty or have a high correlation with this OTC counterparty. For this reason, shares from the finance sector are not accepted as collateral. Securities deposited as collateral are held by the Depositary in favour of the Company and may not be sold, invested or pledged by the Company.

The Company shall ensure that the collateral transferred to it is adequately diversified, particularly regarding geographic dispersal, diversification across different markets and diversification of the concentration risk. The latter is considered to be sufficiently diversified if securities and money market instruments held as collateral and issued by a single issuer do not exceed 20% of the Company's net assets.

Collateral that is deposited in the form of cash may be invested by the Company. Re-investments may only be made in: sight deposits or deposits at notice; high-quality government bonds; repurchase, provided that the counterparty to this transaction is a credit institute within the meaning of point Section II point 13 (1) "Investment Instruments" and the Company has the right to cancel the transaction at any time and to request the back transfer of the amount invested (incl. accrued interest); short-term money-market instruments within the meaning of CESR Guidelines 10-049 regarding the definition of European money-

market instruments. The restrictions listed in the previous paragraph also apply to the diversification of the concentration risk.

If the Company owes a security pursuant to an applicable agreement, such security shall be held in custody by the Depositary in favour of the Company. Bankruptcy and insolvency events or other credit events with the Depositary or within its sub-custodian/correspondent bank network may result in the rights of the Company in connection with the security to be delayed or restricted in other ways. If the Company is owed a security pursuant to an applicable agreement, then any such security is to be transferred to the OTC counterparty as agreed between the Company and the OTC counterparty. Bankruptcy and insolvency events or other credit events with the OTC counterparty, the Depositary or within its sub-custodian/correspondent bank network may result in the rights or recognition of the Company in connection with the security to be delayed, restricted or even eliminated, which would go so far as to force the Company to fulfil its obligations in the framework of the OTC transaction, in spite of any security that had previously been made available to cover any such obligation. The Board of Directors shall decide on an internal framework agreement that determines the details of the above-mentioned requirements and values, particularly regarding the types of collateral accepted the amounts to be added to and subtracted from the respective collateral, as well as the investment policy for liquid funds that are deposited as collateral. This framework agreement is reviewed and adapted where appropriate by the Board of Directors on a regular basis.

By way of derogation from the above paragraph, the Company may be fully collateralised in different transferable securities and money market instruments issued or guaranteed by a Member State, one or more of its local authorities, a third country or a public international body to which one or more Member States belong. In this case the Company should receive securities from at least six different issues, but securities from any single issue should not account for more than 30% of the net assets of the Company. The Company has decided to make use of the aforementioned derogation and to accept collateral for more than 20% of the net asset value of the respective Sub-Fund in form of transferable securities and money market instruments issued or guaranteed by a Member State or by their local public authorities or by supranational institutions to which one or more Member States belong.

Level of Collateral

The Company will determine the required level of collateral for OTC financial derivatives transactions and EPM techniques by reference to the applicable counterparty risk limits set out in this Prospectus and taking into account the nature and characteristics of transactions, the creditworthiness and identity of counterparties and prevailing market conditions.

Haircut Policy

Collateral will be valued, on a daily basis, using available market prices and taking into account appropriate discounts which will be determined by the Company for each asset class based on its haircut policy. The policy takes into account a variety of factors, depending on the nature of the collateral received, such as the issuer's credit standing, the maturity, currency, price volatility of the assets and, where applicable, the outcome of liquidity stress tests carried out by the Company under normal and exceptional liquidity conditions. No haircut will generally be applied to cash collateral.

According to the Company´s haircut policy the following discounts will be made:

Asset classes eligible for collateral	Minimum Haircut (% deducted from the market value)
Cash	0%
Bonds	10%
Equities and Investment Fund Units	30%

Reinvestment of Collateral

The collateral received is not reinvested.

Appendix II

Pursuit of the investment policy and objective of any Feeder Sub-Fund must be in compliance with the limits and restrictions set forth in article 77 of the 2010 Law.

The investment policy of each Sub-Fund is based upon the principle of risk spreading and shall, except to the extent that more restrictive rules are provided for in connection with a specific Sub-Fund under the relevant Sub-Fund Particular, comply with the rules and restrictions laid down in article 77 of the 2010 Law.

Each Sub-Fund has been approved to invest according to article 77 of the 2010 Law, by way of derogation from Article 2(2) first indent, articles 41, 43 and 46, and Article 48(2) third indent of the 2010 Law, at least 85 % of its assets in Shares in a Master Funds.

Such Sub-Fund which is a feeder Sub-Fund may hold up to 15 % of its assets in one or more of the following:

(a) ancillary liquid assets in accordance with the Article 41(2) second sub-paragraph of the 2010 Law;

(b) financial derivative instruments, which may be used only for hedging purposes, in accordance with Article 41(1)(g) and Article 42(2) and (3) of the 2010 Law;

(c) movable and immovable property which is essential for the direct pursuit of its business.

For the purposes of compliance with Article 42(3), each Feeder Sub-Fund will calculate its global exposure related to financial derivative instruments by combining its own direct exposure under point (b) of the first subparagraph with either:

(a) the master fund actual exposure to financial derivative instruments in proportion to the feeder sub-fund investment into the master sub-fund; or

(b) the master sub-fund potential maximum global exposure to financial derivative instruments provided for in the master sub-fund management regulations or instruments of incorporation in proportion to the feeder sub-fund investment into the master sub-fund.

Appendix III

Additional information for investors in Switzerland

1.1 Representative
The representative in Switzerland is LLB Swiss Investment AG, Bahnhofstrasse 74, CH-8001 Zürich.

1.2 Paying agent
The paying agent in Switzerland is NPB Neue Privatbank AG, Limmatquai / am Bellevue 1, 8001 Zurich.

1.3 Place where the relevant documents may be obtained
The prospectus, the Key Investor Information Document, Management Regulations, as well as the annual and semi-annual reports may be obtained free of charge from the representative in Switzerland.

1.4 Publications
Publications in respect of the foreign collective investment scheme must be made in Switzerland on the electronic platform www.fundinfo.com.
Issue and redemption prices or the net asset value for all unit classes together with a note stating “excluding commissions” will be published daily electronically on www.fundinfo.com.

1.5 Payment of retrocessions
The Management Company and its agents may pay retrocessions as remuneration for distribution activity in respect of fund units in or from Switzerland. This remuneration may be deemed payment for any services which aim to sell units of this fund in particular:

- organization of roadshows,
- participation on fairs and other events
- preparation of marketing material
- training of sales partners, etc.

Retrocessions are not deemed to be rebates even if they are ultimately passed on, in full or in part, to the investors.
The disclosure of the receipt of retrocessions is governed by the relevant provisions of the FinSA.

1.6 Payment of rebates
The Management Company and its agents may pay rebates directly to investors upon request when distributing in Switzerland. Re-bates serve to reduce the fees and/or costs incurred by the investors concerned. Rebates are permitted provided that:

- they are paid from fees of the Management Company and therefore do not place an additional charge on the fund assets;
- they are granted on the basis of objective criteria;
- all investors who fulfil the objective criteria and request rebates are also granted these within the same timefame and to the same extent.

The objective criteria for the granting of rebates by the management company are as follows:

- the volume subscribed by the investor or the total volume held by the investor in the collective investment scheme or, where applicable, in the promoter's product range;
- the amount of fees generated by the investor;
- the investment behaviour practised by the investor (e.g. expected investment period);
- the investor's willingness to provide support during the launch phase of a collective investment scheme.

At the investor's request, the management company must disclose the corresponding amount of the rebates free of charge.

1.7 Place of performance and jurisdiction
In respect of the units distributed in and from Switzerland, the place of performance and jurisdiction is at the registered office of the representative.

All share classes are accumulating and registered Shares are issued.

Share classes CHF, EUR and SEK will not be hedged against USD.

Upon the discretion of the Board of Directors, respective minimum investment amounts as being disclosed under respective Share Classes may be waived on a case by case basis.

Investment Objective and Investment Policy

This Sub-Fund is classified under Article 9 of the SFDR. It pursues a sustainability objective to contribute to greenhouse gas emission reduction and to achieve the objectives of the Paris Climate Agreement.

This Sub-Fund's investment objective is to seek long term capital appreciation by:

(i) mainly investing in emerging equity markets directly or through equity related UCITS or other UCIs or ETF's;
(ii) utilizing financial derivative instruments which may include Forward Contracts, Futures, Options or Swaps;
(iii) investing 30% of its net assets in money market instruments including but not limited to money market funds and money market ETFs; and
(iv) holding cash in both the base currency and any foreign currency.

In order to achieve its investment objective, the Sub-Fund will mainly invest in publicly listed individual equities globally with a focus on equities from emerging countries. The Sub-Fund invests mainly in companies with a market capitalization above 500 million USD. To maintain the Sub-Fund's investment objective the market capitalization range may change over time and also be different amongst markets. Although the Sub-Fund may hold cash positions without limitation, the target is to be fully invested at all times. The group of countries that are termed "Emerging Markets" may change in the course of time and the line dividing them from industrialized/developed countries tends to be flexible.

The Sub-Fund may not engage in short selling single securities. Neither may the Sub-Fund borrow for investment purposes. However, on a temporary basis, borrowing of up to 10% of the Sub-Fund's Net Asset Value is allowed within the limits fixed in Appendix I, point D and Article 50. (2) of the 2010 Law.

The Sub-Fund may use financial derivative instruments predominantly for efficient exposure management, risk management

and exploiting investment opportunities (e.g. covered call/yield enhancement strategies). The use of derivatives may not, however, cause a leverage to the portfolio.

No more than 10% of the assets of the Sub-Fund can in aggregate be invested in units of other UCITS or other UCIs.

The Sub-Fund will neither make use of securities financing transactions (i.e. (i) repurchase transactions, (ii) securities or commodities lending and securities or commodities borrowing, (iii) buy-sell back transactions or sell-buy back transactions, and (iv) margin lending transactions) nor of TRS.

The Sub-Fund will at all times be invested minimum 51% in equities (direct holdings, which are admitted to official trading on a stock exchange or admitted to or included in another organised market) or in other shares in other investment (sub-) funds that invest at least 51% of their value in the aforementioned equities in accordance with their investment restrictions. The Sub-Fund will in addition ensure (on a target fund look-through basis) that the sum of all aforementioned equities across all direct or indirect holdings is at all times minimum 51%.

The investment restrictions set out in Appendix I apply to the Sub-Fund.

Global exposure
The sub-fund will use the commitment approach to monitor its global exposure and calculate its actual exposure.

The Sub-Fund does not employ leverage.

Profile of the Typical Investor

The Sub-Fund is marketable to all eligible investors provided they can meet the minimum subscription requirements (if any). The Sub-Fund may be suitable for investors who see collective investment schemes as a convenient way of participating in investment markets.

It may be suitable for investors wishing to seek to achieve defined investment objectives. Such investors must have experience with, or understand, products where the capital is at risk. Investors must be able to accept some risk to their capital, as further listed in section 2 of the Prospectus and in this Sub-Fund particular.

Thus the Sub-Fund may be suitable for investors who are looking to set aside the capital for a minimum of 8 years. If you are uncertain whether these products are suitable for you, please contact your professional adviser.

Subscriptions and Redemptions

Subscription applications have to be notified in written to the Administrative Agent until 13:00 CET ("**cut-off time**") on the Business Day preceding the Dealing Day.

Potential investors and Shareholders have the right to seek for subscribing Shares on each Business Day. Requests received on a Business Day before the cut-off time (D-1) will be dealt with on the immediately following Dealing Day (D). Requests received after the cut-off time are considered received on the following Business Day (D) and will be dealt with on the following Dealing Day (D+1).

Subscription payments are made under normal circumstances within one Business Days after the applicable Dealing Day.

Redemption applications have to be notified in writing to the Administrative Agent until 13:00 CET ("**cut-off time"**) on the Business Day immediately preceding each Dealing Day (D-1) accompanied by any certificates which might have been issued. The Shareholders have the right to ask for the redemption of any or all of their Shares on each Business Day. Requests received on a Business Day before the cut-off time (D-1) will be dealt with on the immediately following Dealing Day (D). Requests received after the cut-off time are considered received on the following Business Days (D) and will be dealt with on the following Dealing Day (D+1).

Redemption payments are made under normal circumstances within two Business Days after the applicable Dealing Day subject to the Company's ability to make redemptions in the underlying funds.

An investor may request a redemption in kind on any Business Day.

Conversion

Shareholders may have the right to convert on any Dealing Day Shares of any Share Class into Shares of any other Share Class. The rate at which Shares of the classes in the Sub-Fund shall be converted will be determined by reference to the respective Net Asset Values of the relevant Shares calculated as on the same Dealing Day of both classes concerned. A conversion fee will not be charged.

If, as a result of any request for conversion, the aggregate Net Asset Value of the Shares held by the converting Shareholder in a class of Shares falls below the minimum holding requirement, the Company may treat such request as a request to convert the entire shareholding of such Shareholder in such class.

At the discretion of the Board of Directors, the Company reserves the right to transfer any existing Shareholder of Share Class XL who falls below the minimum shareholding requirement for Share Class XL into Share Class USD without charge.

The frequency and calendar of the Net Asset Value calculation of the Sub-Fund coincides with the Net Asset Value calculation and calendar of SAMCO SICAV – Artico Sustainable Dynamic Emerging Market. The Company has taken appropriate measures to coordinate the timing of the two Net Asset Value calculation and publication in order to avoid market timing, preventing arbitrage opportunities. The value of the holding in the SAMCO SICAV – Artico Sustainable Dynamic Emerging Market will be based on the same Valuation Day as for SAMCO SICAV – Artico Sustainable Emerging Market.

Fees and information on the target funds

Target funds of the Sub-Fund can be UCIs initiated and/or being managed by AWEA Fonds AG but also UCIs being initiated and/or investment managed by other fund providers. The investment in target funds can lead to double charging of fees. Investors are explicitly made aware that certain commission payments and expenses may occur more than once when investing in UCI (for example, commission for the Depositary and the Central Administrative Agency, management/advisory fees and issuing/redemption commission of the UCI and/or UCITS in which an investment is made). Such commission payments and expenses are charged at the level of the target fund as well as of the Company.

Tax

Due to the fact that class (USD) XL Shares and class (USD) X Shares are reserved for institutional investors, such class of Shares is subject to a reduced tax of 0.01% p.a.

Pre-contractual disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name:
SAMCO SICAV - Artico Sustainable Emerging Markets

Legal entity identifier:
5299005I6GPV60CVXX63

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainable investment objective

Does this financial product have a sustainable investment objective?

●● ☒ **Yes**

- [X] It will make a minimum of **sustainable investments with an environmental objective:** 85%
  - [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [X] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [ ] It will make a minimum of **sustainable investments with a social objective:** ___%

●○ ☐ **No**

- [ ] It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of ___% of sustainable investments
  - [ ] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [ ] with a social objective
- [ ] It promotes E/S characteristics, but **will not make any sustainable investments**

What is the sustainable investment objective of this financial product?

The Fund's sustainable investment objective is to contribute to keeping the maximum global temperature rise well-below 2°C by reducing its weighted carbon emission intensity.

For carbon footprint benchmarking a decarbonization pathway is calculated based on relevant guidelines and minimum standards set out in the Commission Delegated Regulation (EU) 2020/1818. The decarbonization pathway is defined with starting date on June 2020 and an initial reduction in carbon emissions intensity against a broad market index of 50% and an annual decarbonization rate of 7% thereafter at portfolio level. Carbon emissions intensity is defined as Scope 1+2+3 carbon emissions (in metric tonnes CO2e) scaled by Enterprise Value including Cash (EVIC, in million USD). The decarbonization methodology can be found at .

For carbon footprint comparison the MSCI EM Climate Paris Aligned Index is used as reference benchmark that qualifies as an EU Paris-aligned Benchmark under Title III of Regulation (EU) 2016/1011. The benchmark calculation methodology can be found at .

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

What sustainability indicators are used to measure the attainment of the sustainable investment objective of this financial product?

1. The Fund's weighted carbon emissions intensity (scope 1,2 and 3 versus EVIC).
2. The Implied Temperature Rise of the portfolio as per MSCI methodology.
3. The weight of investments active in fossil fuel industries.
4. The weight of investments with a severe or very severe Environmental controversy score or a very severe Social or Governance controversy score.
5. The weight of investments that are in violation of ILO standards, UNGC or OECD Guidelines for Multinational Enterprises.

How do sustainable investments not cause significant harm to any environmental or social sustainable investment objective?

The do not significant harm principle is embedded in the Fund's investment process through its norm and value-based exclusion list, its filters related to environmental and social controversies, its carbon emission and portfolio temperature targets at portfolio level and its integration of ESG as investment selection criteria.

How have the indicators for adverse impacts on sustainability factors been taken into account?

Climate-related indicators are directly used in the investment decision consideration and portfolio construction to achieve the sustainable investment objective. Other environmental and social indicators are partly embedded in the investment process through the integrated assessment of ESG factors and norm and controversy-based exclusions. All principle adverse impact indicators are monitored on a regular basis and assessed by the Investment Committee.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The Fund avoids investments in companies that are in breach of the OECD Guidelines for Multinational Enterprises and the UN Global Principles on Business and Human Rights. Compliance for every single investment is monitored on a continuous basis.

Does this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

X Yes, principal adverse impact is monitored and assessed on a regular basis by the Investment Committee. If needed necessary action is decided by the committee and implemented into the investment process.

Information on principal adverse impact on sustainability factors will be made available on pursuant to SDFR Article 11(2).

What investment strategy does this financial product follow?

This Fund is an actively managed fund investing in fundamentally good companies. To that end the Fund evaluates the attractiveness of investments along five dimensions: financial growth, valuation, profitability, health and sustainability, with the additional sustainable investment objective on portfolio level of a Paris-aligned decarbonization towards Net Zero.

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

What are the binding elements of the investment strategy used to select the investments to attain the sustainable investment objective?

1. The Fund's weighted carbon emissions intensity is in line with or better than that of the decarbonization pathway or the relevant Paris-aligned benchmark where available.
2. Full compliance with the activity-based exclusions, such as excluding thermal coal or oil and gas producers.
3. The Fund avoids investments in companies that are in breach of the ILO standards, UNGC or OECD Guidelines for Multinational Enterprises.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

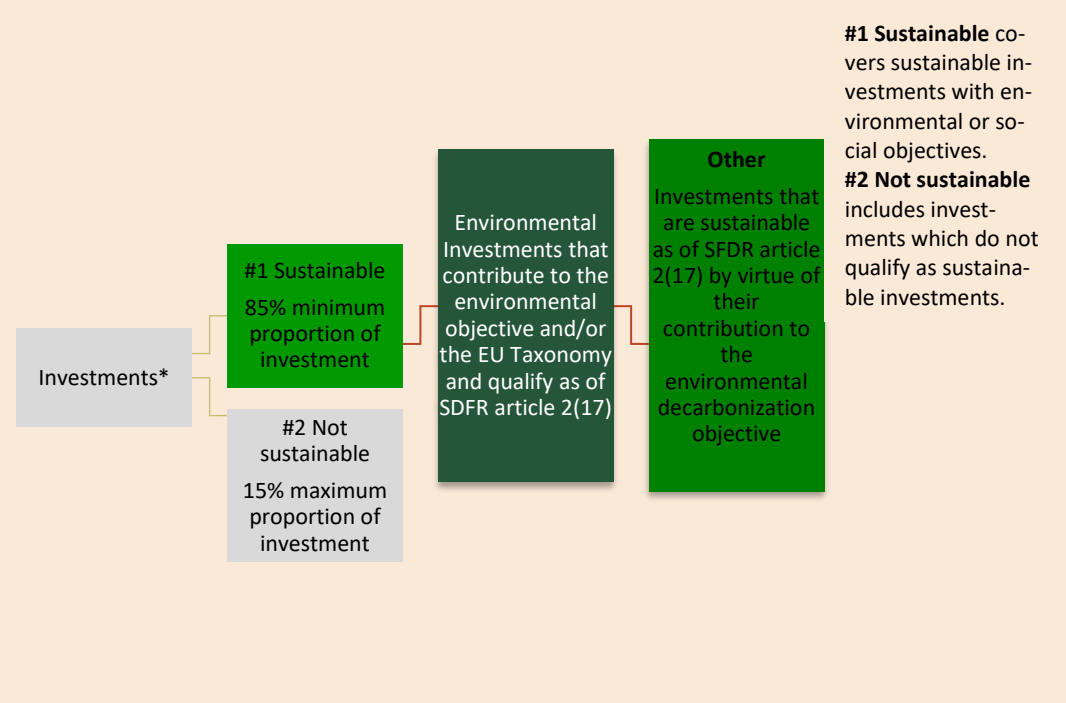
What is the policy to assess good governance practices of the investee companies?

Good governance practices of investee companies is addressed on the layer of security selection process through the evaluation of ESG scores. Governance safeguards are ensured through norms-based screening as well as the evaluation of minimum social controversy criteria.

What is the asset allocation and the minimum share of sustainable investments?

The minimum proportion of investment to meet the environmental objective in accordance with the binding elements is 85%. However, the actual target allocation is 100% and will normally only fall short of this for liquidity management reasons, margin requirements or regulatory requirements. As for the equity allocation, the entire investment is intended to serve the purpose of meeting the environmental objective.

Asset allocation describes the share of investments in specific assets.



* Investments means the Fund's total market value (net asset value)

- **How does the use of derivatives attain the sustainable investment objective?**

  Derivatives are not intended to be used to achieve the environmental objective.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

Based on the current state of reported EU Taxonomy data a minimum of 0% can be classified as aligned with EU Taxonomy. Mandatory alignment reporting for EU companies starts in 2023. Coverage for companies outside the EU may continue to be limited. A conservative approach was chosen to assess the portfolio alignment and actual proportions of EU Taxonomy-aligned activities may be higher.

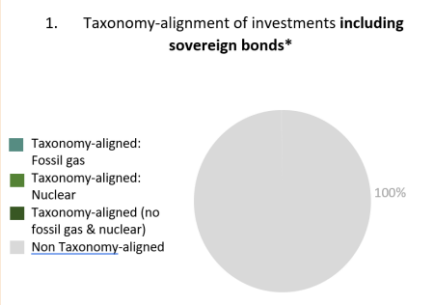
Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?

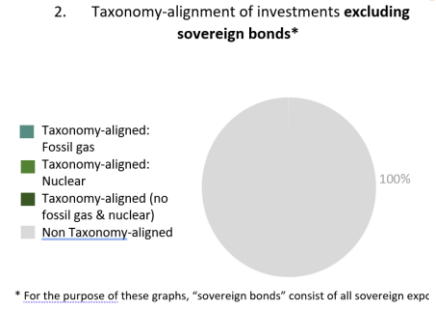
☐ Yes:
☐ in fossil gas ☐ in nuclear energy

☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.
Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.
Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.





[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What is the minimum share of investments in transitional and enabling activities?

There is no commitment to a minimum proportion of investment in transitional and enabling activities.

are environmentally sustainable investments that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The Fund may invest 100% in economic activities that are not aligned with the EU Taxonomy as reported company data is not yet widely available. Key criterion for achieving the sustainable investment objective is the carbon emissions intensity of a company and its contribution to the carbon footprint at portfolio level.

What is the minimum share of sustainable investments with a social objective?

The Fund has no social investment objective. However, as social factors are considered in the investment criteria by the ESG scores the portfolio will normally also be tilted towards investments with good social scores.

What investments are included under "#2 Not sustainable", what is their purpose and are there any minimum environmental or social safeguards?

The Fund holds cash for liquidity management and operational purposes. The Fund may utilize derivative instruments as stated in the respective prospectus section and therefore may hold collateral or margin positions. These asset classes inherently fulfill minimum environmental or social safeguards.

Is a specific index designated as a reference benchmark to meet the sustainable investment objective?

The MSCI EM Climate Paris Aligned Index is used as benchmark to monitor the sustainable objective performance.

How does the reference benchmark take into account sustainability factors in a way that is continuously aligned with the sustainable investment objective?

Reference benchmarks are indexes to measure whether the financial product attains the sustainable investment objective.

The Paris-aligned reference benchmark qualifies – where available – as an EU Paris-aligned Benchmark under Title III of Regulation (EU) 2016/1011.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

  The decarbonization methodology used for the Fund applies the same key principles as the Delegated Regulation (EU) 2016/1011 with regards to minimum standards set out for EU Paris-aligned Benchmarks (i.e. initial reduction at start date, annual decarbonization rate, inflation-adjustment).

- ***How does the designated index differ from a relevant broad market index*****?**

  Paris-aligned benchmarks follow a decarbonization path to Net Zero and exclude or underweight certain fossil fuel related industries and have a higher aggregated weight in companies with lower carbon emissions intensity.

- ***Where can the methodology used for the calculation of the designated index be found?***

  The benchmark calculation methodology can be found at

Where can I find more product specific information online?
