INFORMATION FOR PROSPECTIVE INVESTORS

This Offering Memorandum is valid only if accompanied by the last annual report.

This Offering Memorandum does not constitute an offer or solicitation to subscribe for Shares in the Company by anyone in any jurisdiction in which such offer or solicitation is not lawful or in which the person making such offer or solicitation is not qualified to do so or to anyone to whom it is unlawful to make such offer or solicitation. The Offering Memorandum is available at the registered office of the Company.

The Company's Shares have not been, and will not be, registered under the United States Securities Act of 1933 (the "1933 Act"), any of the securities laws of any of the states of the United States. The Company has not been and will not be registered under the United States Investment Company Act of 1940, as amended, nor under any other US federal laws. Therefore, the Shares in the Subfunds described in this Offering Memorandum may not be offered or sold directly or indirectly in the United States of America, except pursuant to an exemption from the registration requirements of the 1933 Act.

Further, the Board of Directors has decided that the Shares shall not be offered or sold, directly or indirectly, to any ultimate beneficial owner that constitutes a U.S. Person. As such, the Shares may not be directly or indirectly offered or sold to or for the benefit of a "U.S. Person", which shall be defined as and include (i) a "United States person" as described in section 7701(a)(30) of the U.S. Internal Revenue Code of 1986, as amended (the "Code"), (ii) a "U.S. person" as such term is defined in Regulation S of the 1933 Act, as amended, (iii) a person that is "in the United States" as defined in Rule 202(a)(30)-1 under the U.S. Investment Advisers Act of 1940, as amended, or (iv) a person that does not qualify as a "Non-United States Person" as such term is defined in U.S. Commodities Futures Trading Commission Rule 4.7.

Information, which is not contained in this Offering Memorandum, or in the documents mentioned herein which are available for inspection by the public, shall be deemed unauthorised and cannot be relied upon.

INFORMATION FOR INVESTORS

i. General information for Investors in Switzerland

Neither the Company nor any Subfund have been registered with the Swiss Financial Market Supervisory Authority FINMA ("**FINMA**") for the offering (the term offering also includes advertising for collective investment schemes pursuant to article 127a CISO) to non-qualified (i.e. retail) investors within the meaning of the Swiss Federal Act on Collective Investment Schemes of 23 June 2006 ("**CISA**") and the corresponding Collective Investment Schemes Ordinance ("**CISO**") and it cannot be expected that FINMA would approve a corresponding registration application.

As a result, no person or entity is authorized to offer the Shares in Switzerland other than to qualified investors as defined in article 10 para 3 CISA in conjunction with articles 4 and 5 of the Swiss Financial Services Act of 15 June 2018 and article 10 para 3ter CISA as well as any applicable regulation issued by FINMA (together "**Swiss Qualified Investor**").

UBS Fund Management (Switzerland) AG, Aeschenvorstadt 1, CH 4051 Basel has been appointed as the Swiss Representative. Swiss Qualified Investors may obtain copies of the Company Documents free of charge from the Swiss Representative. UBS Switzerland AG, Bahnhofstrasse 45, CH-8001 Zurich has been appointed as the Swiss Paying Agent.

With respect to Shares offered in Switzerland, the place of performance is at the registered office of the Swiss Representative. The place of jurisdiction is at the registered office of the Swiss Representative or at the registered office or domicile of the Shareholder.

ii. Information in relation to the distribution

The Company, the AIFM and their agents may, where permitted by applicable law, agree to pay or share with distributors, platforms, placing agents and other intermediaries (including affiliates), fees, commissions, retrocessions as remuneration and other monetary benefits out of the fees or other amounts they receive in respect of the Shares for offering. This remuneration may be one-off or recurring and may be calculated by reference to, inter alia, subscriptions amounts, asset under management, length of holding or other agreed parameters. These payments compensate distribution- and investor-servicing activities, including but not limited to:

- Stocking and distribution marketing and legal documents
- Forwarding and/or providing the publications required by law as well as other publications
- Complying to due diligence requirements delegated by the AIFM and pertaining to the Distributor
- Clarifying and answering specific investor queries regarding the investment product or the provider.

Retrocessions are not deemed to be rebates even if they are ultimately passed on, in full or in part, to the investors.

The disclosure of the receipt of retrocessions is governed in Switzerland by the relevant provisions of the Swiss Financial Services Act of 15 June 2018.

The Company, the AIFM and their agents may, upon request, grant rebates directly to investors. The purpose of rebates is to reduce the fees or costs incurred by the investor in question. Rebates are permitted provided that

- they are paid from fees received by the AIFM (or, as the case may be, the Portfolio Manager) and therefore do not represent an additional charge on the Company or any Subfund;
- they are granted on the basis of objective criteria;
- all investors who meet these objective criteria and demand rebates are also granted these within the same timeframe and to the same extent.

The objective criteria for the granting of rebates by the AIFM, in consultation with the Portfolio Manager, includes but not limited to:

- the volume subscribed by the investor or the total volume they hold in the collective investment scheme or, where applicable, in the product range of the promoter;
- the amount of the fees generated by the investor;
- the investment behaviour shown by the investor (e.g. expected investment period);
- the investor's willingness to provide support in the launch phase of a collective investment scheme.

All investors who satisfy the relevant objective criteria and request a Rebate will be treated within the same timeframe and to the same extent. At the request of the investor, the AIFM must disclose the amounts of such rebates free of charge.

iii. Possibility of forwarding the Portfolio Management Fee

The Portfolio Manager may, in its sole discretion, may agree to share or forward all or part of its Portfolio Management Fee to investors, distributors, affiliated parties or other recipients.

Potential investors should inform themselves as to the possible tax consequences, the legal requirements and any foreign exchange restrictions or exchange control requirements which they might encounter under the laws of the countries of their citizenship, residence or domicile and which might be relevant to the subscription, holding, conversion, redemption or disposal of Shares.

This Offering Memorandum and any other documents relating to the offer of the Shares are strictly confidential and may not be distributed to any person or entity other than the recipient hereof to whom this Offering Memorandum is personally addressed.

Potential investors who are in any doubt about the contents of this Offering Memorandum should consult their bank, broker, solicitor, accountant or other independent financial adviser.

This Offering Memorandum may be translated into other languages. To the extent that there is any inconsistency between the English-language Offering Memorandum and a version in another language, the English-language Offering Memorandum shall prevail.

NOTICE TO RESIDENTS IN GERMANY

This Offering Memorandum has been filed with the CSSF in order to be passported to the German Federal Financial Supervisory Authority (*Bundesanstalt für Finanzdienstleistungsaufsicht*, "**BaFin**"). The Shares of the Subfunds **Euler ILS SICAV-SIF Euler (Lux) ILS Balanced Fund** and **Euler ILS SICAV-SIF Euler (Lux) ILS Low Volatility Plus Fund** have been notified to BaFin and, therefore, may be distributed or offered to or within Germany within the meaning of applicable German laws towards professional investors ("**Professional Investors**") as set out in the Directive 2011/61/EU of the European Parliament and of the Council of 8 June 2011 on Alternative Investment Fund Managers and amending Directives 2003/41/EC and 2009/65/EC and Regulations (EC) No 1060/2009 and (EU) No 1095/2010 ("**AIFM Directive**").

In accordance with Article 43 of the AIFM Directive, the Shares of the Subfunds **Euler ILS SICAV-SIF – Euler (Lux) ILS Balanced Fund** and **Euler ILS SICAV-SIF – Euler (Lux) ILS Low Volatility Plus Fund** may also be distributed or offered to or within Germany to such retail investors qualifying as semi-professional investors as set out in Section 1 para. 19 no. 33 of the German Capital Investment Act (*Kapitalanlagegesetzbuch*, "**KAGB**") ("**Semi-Professional Investors**").

However, it must not be distributed or offered to retail investors not qualifying as Semi-Professional Investors.

In light of the above, this Offering Memorandum and any other document relating to the offer of Shares of the Subfunds **Euler ILS SICAV-SIF – Euler (Lux) ILS Balanced Fund** and **Euler ILS SICAV-SIF – Euler (Lux) ILS Low Volatility Plus Fund** as well as any information contained therein, must not be supplied to investors in Germany neither qualifying as Professional Investors nor as Semi-Professional Investors.

The receipt of this Offering Memorandum by any person not qualifying as Professional Investor or Semi-Professional Investor as well as any information contained herein or supplied herewith or subsequently communicated to any such investor in connection with any offer for subscription is not to be taken as constituting the giving of investment advice to such investor. Each such investor should make its own independent assessment of the merits or otherwise of acquiring the Shares and should take its own professional advice. No view on taxation is expressed. Prospective Investors in Germany are urged to consult their own tax advisers as to the tax consequences that may arise from an investment in the Shares.

General Chapter

The information in this General Chapter of this Offering Memorandum is valid for all Subfunds, unless the relevant Appendices contain differing rules applicable to the Subfunds.

Depositary Bank Agreement	has the meaning ascribed to it in Chapter 5.5
Director	means a member of the Board of Directors of the Company
Eligible Investor	has the meaning ascribed to it in Chapter 10.1 and the relevant Appendix
Equity Security	has the meaning ascribed to it in Chapter 8.7 under the heading "Potential Reporting Obligations"
Exchange Act	United States Securities Exchange Act of 1934, as amended
FATCA	has the meaning ascribed to it in Chapter 14
Financial Year	means the 12 months ending on 31 December of each calendar year and for the first time on 31 December 2017
FTT	has the meaning ascribed to it in Chapter 14
Deferral Level	means a percentage of Shares offered for redemption, calculated on the basis of the Total Net Assets of the Subfund as of such Redemption Day, above which redemption requests may be subject to a Deferral
General Chapter	means the general Chapter of this Offering Memorandum
Indemnitee	has the meaning ascribed to it in Chapter 18
Information	has the meaning ascribed to it in Chapter 14
Illiquid AIFs	has the meaning ascribed to it in Chapter 9
ILS	has the meaning ascribed to it in Chapter 6.1
Investment Objective	means the investment objective of the Company and of a Subfund, as set out in Chapter 6.1 and the relevant Appendix
Investment Policy	means the investment policy of the Company and of a Subfund, as set out in Chapter 6.2 and the relevant Appendix
Investment Restrictions	means the investment restrictions of the Company and of a Subfund, as set out in Chapter 7 and the relevant Appendix
Investment-Related Expenses	means costs and expenses incurred in relation to proposed and actual investments of a Subfund and in relation to proposed and actual disposals of investments of a Subfund, including inter alia standard brokerage, clearing account maintenance fees charged by clearing platforms, bank charges and costs related to continuous linked settlement (CLS) but also not limited to costs and expenses incurred by the Portfolio Manager and/or the

Subfund in connection with third-party risk modelling vendor models and services, third-party market data licenses, risk transformation related expenses, structuring and legal costs, calculation agent, valuation and reserving actuarial services.

Investor means an Eligible Investor, acting through its managing body or a legal representative, whose Subscription Form has been accepted by the Company or who has acquired any Shares from another Investor (for the avoidance of doubt, the term includes, where appropriate, any Shareholder)

Liquid AIFs has the meaning ascribed to it in Chapter 9

Main Portfolio has the meaning ascribed to it in Chapter 8.16 under the heading "All Shareholders and Prospective Investors"

Management Agreement means the management agreement between the Company and the AIFM

Management Fee has the meaning ascribed to it in Chapter 17.1

Net Asset Value means the net asset value of the Company, a given Subfund or Class as determined in accordance with the Articles of Incorporation and Chapter 15

Net Asset Value per Share means the net asset value per Share of a Class in a Subfund and Class, as determined in accordance with the with the Articles of Incorporation and Chapter 15

New Subfund has the meaning ascribed to it in Chapter 23.4

NFEs has the meaning ascribed to it in Chapter 8.2

Offering Memorandum means the offering memorandum of the Company as the same may be amended, supplemented and modified from time to time

Operation and Administration Expenses means:

(i) all costs and expenses incurred in relation to the production, printing and distribution of the reports and accounts in respect of a Subfund and the valuations and certifications required pursuant to the Articles of Incorporation and the Offering Memorandum for all government authorities and stock exchanges (including local securities dealers' associations) which are required in connection with the Company or with offering the Shares, the cost of notifications to Shareholders, the publication of prices for the Shareholders including the fees of the Auditor of the Company in connection therewith. The cost of advertising may also be charged;

all fees and expenses charged by lawyers, accountants and other professional advisors in relation to a Subfund, excluding the fees of the Portfolio Manager(s); and

all other fees, costs and expenses in relation to the operation and administration of a Subfund generally including licensed market data and modelling tools and hosting thereof, the fees and expenses incurred in respect of the provision of insurance required or permitted by the Articles of Incorporation; for the avoidance of doubt, the subscription tax is not included in the Operation and Administration Expenses

Organisational Expenses means costs and expenses incurred by the Company, the AIFM and any of its Affiliates for the purposes of structuring, establishing and obtaining regulatory approvals for the Company and the relevant Subfunds, including (without limitation) legal fees and tax advisor fees incurred in the structuring of the Subfunds

Participating Member States has the meaning ascribed to it in Chapter 8.2

Participating Shares means such Shares that are not Special Situation Preference Shares, and the holders of which participate in the profits and losses from all assets held in the Main Portfolio, as further described in Chapter 10.2 under the heading "General Information Concerning Shares"

Paying Agent means Northern Trust Global Services SE, in its capacity as paying agent, or such other person as may subsequently be appointed as paying agent of each Subfund by the Board of Directors

Performance Fee has the meaning as ascribed to it under Chapter 3 and in the relevant Appendix, where applicable

Portfolio Manager means Euler ILS Partners Ltd, any person or entity as may, subject to the prior approval of the CSSF, be appointed as Portfolio Manager(s) of one or more Subfunds by the AIFM as further described in Chapter 5.4 and in the relevant Appendix

Portfolio Management Agreement means any portfolio management agreement in respect of one or several Subfund(s) between the AIFM and a Portfolio Manager

Professional Investor means:

I. a professional investor pursuant to Annex II.I (1) of the Directive 2004/39/EC being:

(1) Entities which are required to be authorised or regulated to operate in the financial markets. The list below should be understood as including all authorised entities carrying out the characteristic activities of the entities mentioned – entities authorised by a member state under a European Community Directive, entities authorised or regulated by a Member State without reference to such European Community Directive, and entities authorised or regulated by a non-Member State:

(a) Credit institutions;

(b) Investment Firms;

(c) Other authorised or regulated financial institutions;

(d) Insurance undertakings;

(e) Collective investment schemes and management companies of such schemes;

(f) Pension funds and management companies of such funds;

(g) Commodity and commodity derivatives dealers;

(h) Locals; and

(i) Other institutional investors.

(2) Large undertakings meeting two of the following size requirements on a company basis:

- balance sheet total: EUR 20 000 000
- net turnover: EUR 40 000 000
- own funds: EUR 2 000 000

(3) National and regional governments, including public bodies that manage public debt at national or regional level, Central Banks, international and supranational institutions such as the World Bank, the IMF, the ECB, the EIB and other similar international organisations.

(4) Other institutional investors whose main activity is to invest in financial instruments, including entities dedicated to the securitisation of assets or other financing transactions.

II. Investors, other than those mentioned under point I above, who may be treated as professionals on request in accordance with Annex II.II of the Directive 2004/39/EC by satisfying minimum two of the following criteria:

(1) the investor has carried out transactions, in significant size, on the relevant market at an average frequency of 10 per quarter over the previous four quarters,

(2) the size of the investor's financial instrument portfolio, defined as including cash deposits and financial instruments exceeds EUR 500 000,

(3) the investor works or has worked in the financial sector for at least one year in a professional position, which requires knowledge of the transactions or services envisaged

Prohibited Person means any person, corporation, limited liability company, trust, partnership, estate or other corporate body, if in the sole opinion of the AIFM or the Portfolio Manager, the holding of Shares of the relevant Subfund may be detrimental to the interests of the existing Shareholders or of the relevant Subfund, if it may result in a breach of any law or regulation, whether Luxembourg or otherwise, or if as a result thereof the relevant Subfund or any subsidiary or investment structure (if any) may become exposed to tax or other legal, regulatory or administrative disadvantages, fines or penalties that it would not have otherwise incurred or, if as a result thereof the relevant Subfund or any subsidiary or investment structure (if any), the AIFM and/or the Company, may become required to comply with any registration or filing requirements in any jurisdiction with which it would not otherwise be required to comply. The term "Prohibited Person" includes (i) any investor which does not meet the definition of Eligible Investors as defined for the respective Subfund in the appendices to the Offering Memorandum – The Subfunds, (if any), (ii) any US Person or (iii) any person who has failed to provide any

	information or declaration required by the AIFM or the Company within one calendar month of being requested to do so. The term "Prohibited Person" moreover includes natural persons or entities acting, directly or indirectly, in contravention of any applicable AML/CTF Rules or who are the subject of sanctions, including those persons or entities that are included on any relevant lists maintained by the United Nations, the North Atlantic Treaty Organisation, the Organisation for Economic Cooperation and Development, the Financial Action Task Force, the U.S. Central Intelligence Agency, and the U.S. Internal Revenue Service, all as may be amended from time to time. The Company will not accept investments by or on behalf of Prohibited Persons. The subscriber represents and warrants that the proposed subscription for Shares, whether made on the subscriber's own behalf or, if applicable, as an agent, trustee, representative, intermediary, nominee, or in a similar capacity on behalf of any other beneficial owner), is not a Prohibited Person and further represents and warrants that the investor will promptly notify the Company of any change in its status or the status of any underlying beneficial owner(s) with respect to its representations and warranties regarding Prohibited Person.
Qualified Investor	has the meaning ascribed to it by Article 10 paras 3 and 4 of the Swiss Collective Investment Schemes Act ("CISA") in conjunction with Article 6 and 6a of the Swiss Collective Investment Schemes Ordinance ("CISO")
Ramp-Up Period	means a period of twelve (12) months as from a Subfund's first investment
Redemption Day	has the meaning ascribed to it in the relevant Appendix
Redemption Price	means the price at which a Share is redeemed, i.e. the Net Asset Value per Share calculated on the relevant Valuation Day minus the redemption fee, if any, as further described in Chapter 11 and the relevant Appendix
Reference Currency	means the currency in which the Net Asset Value of each Subfund or Class is denominated, as specified in Chapter 3
Registrar and Transfer Agent	means Northern Trust Global Services SE in its capacity as registrar and transfer agent, or such other person as may be appointed as registrar and transfer agent in respect of each Subfund by the AIFM
Regulated Market	means a regulated securities market which operates regularly and is recognized and open to the public
Regulation 1215/2012	means Regulation (EU) No 1215/2012 of the European Parliament and of the Council of 12 December 2012 on jurisdiction and the recognition and enforcement of judgments in civil and commercial matters (recast)
Reportable Persons	has the meaning ascribed to it in Chapter 14
RESA	means the *Recueil électronique des sociétés et associations*, the official gazette of Luxembourg
S&P	Standard & Poor's Corporation
Share(s)	means a share of any Class of any Subfund in the capital of the Company, the details of which are specified in the Appendices. For the avoidance of doubt, reference to "Share(s)" includes references to any Class(es) when reference to specific Class(es) is not required
Shareholder(s)	means the holder of one or more Shares of any Class of any Subfund of the Company
Standard	has the meaning ascribed to it in Chapter 8.2
Special Investments	has the meaning ascribed to it in Chapter 8.16
Special Situation Preference Shares	has the meaning ascribed to it in Chapter 10.4 under the heading "Issuance of Special Situation Preference Shares; Special Situation Preference SR Shares"
Subfund	means any Subfund of the Company, the details of which are specified in the relevant Appendix
Sub-Portfolio Manager	has the meaning ascribed to it in Chapter 5.4 and in the Appendix of the relevant Subfund
Subscription Day	has the meaning ascribed to it in the relevant Appendix
Subscription Form	means the form completed and signed by the (prospective) Investor by which the (prospective) Investor commits himself to subscribe for Shares of a Subfund for a certain maximum amount, which amount will be payable to the relevant Subfund against the issue of Shares of the relevant Subfund and Class

Swiss Paying Agent means UBS Switzerland AG, Bahnhofstrasse 45, CH-8001 Zurich

Swiss Representative means UBS Fund Management (Switzerland) AG Aeschenvorstadt 1, CH 4051 Basel

Total Assets means the aggregate value of the assets held from time to time by the Company respectively the Subfunds or Classes, determined in accordance with the Articles of Incorporation, and which does not take into account the liabilities

Transitional Period means the period defined in Chapter 7

UCI has the meaning ascribed to it in Chapter 6.2

US Person means, subject to such applicable law and to such changes as the Board of Directors or the AIFM shall notify to Shareholders and reflect in this Offering Memorandum, (a) a "United States person" as described in section 7701(a)(30) of the Code, (ii) a "U.S. person" as such term is defined in Regulation S of the Securities Act of 1933, as amended, (iii) a person that is "in the United States" as defined in Rule 202(a)(30)-1 under the U.S. Investment Advisers Act of 1940, as amended, or (iv) a person that is not a "Non-United States Person" as such term is defined in U.S. Commodities Futures Trading Commission Rule 4.7,

Valuation Day means the calendar day determined by the AIFM for the calculation of the Net Asset Value per Share of any Class of any of the Subfunds according to Chapter 15 and as specified in the relevant Appendix; a valuation must be carried out at least once per year

Well-Informed Investor means a well-informed investor within the meaning of article 2 of the 2007 Law, i.e.

i. institutional investors,

ii. professional investors, and

iii. any other type of investor, who has declared in writing that he is a well-informed investor, and either invests a minimum of EUR 100,000 or has an appraisal from a bank in the sense of the directive 2006/48/CE, another professional of the financial sector in the sense of the directive 2004/39/CE, or a management company in the sense of the directive 2009/65/CE certifying his ability to adequately understand the investment made in the Company

The afore-mentioned conditions do not apply to the managers of the Company and any other person intervening in the management of the Company

3. Euler ILS SICAV-SIF - Summary of Share Classes[1]

Subfund *(Reference Currency)*	Share Class	Currency	Minimum holding	Share Type[2]	Maximum Sales charge	Maximum Management fee (per annum)[3]	Performance fee[10]

(1) This Summary of Share Classes should not be relied upon as a substitute for reading the Offering Memorandum.

(2) ACC = accumulating share class / D = distributing share class.

(3) The management fee actually payable will be disclosed in the respective annual report.

(4) Class DA, DAH, DB and DBH Shares may only be acquired by investors under an approved discretionary asset management agreement with Euler ILS Partners Ltd or an Affiliate. Class DA, DAH, DB and DBH Shares may also be acquired by institutional investors under an approved agreement with Euler ILS Partners Ltd or an Affiliate.

The agreements that are eligible for these share classes are determined by Euler ILS Partners Ltd.

(5) Class DA, DAH, DB and DBH Shares are not subject to a management fee but only to a management service fee, payable by the Company to the AIFM covering all fees and expenses as described in Chapter 17, "Fees and Expenses", of not more than 0.35% p.a.

Additional fees will be charged directly to the investor, upon the conditions of the separate agreement entered into between the investor and Euler ILS Partners Ltd or an Affiliate.

(6) The AIFM in consultation with the Portfolio Management may decide on the issue of Class DAH, DBH, EAH, EBH, EBH-SP-III, EBH-SP-IV, IAH1, IAH5, IAH10, IAH25, IAH50, IAH100, IBH1, IBH5, IBH10, IBH25, IBH50, IBH100, QAH, QBH, SAH, SAH-SP-III, SAH-SP-IV, SAH-SP-V, SBH, SBH-SP-III, SBH-SP-IV, SBH-SP-V, SAH-II, SAH-II-SP-III, SAH-II-SP-IV, SAH-II-SP-V, SBH-II, SBH-II-SP-III,

SBH-II-SP-IV, SBH-II-SP-V, UAH and UBH Shares in any additional freely convertible currencies as well as on their initial offering price at any time. Shareholders have to check with the AIFM, the Central Administration or the relevant third party authorised by the AIFM to accept applications for the subscription or redemption of Shares, if Shares of Class DAH, DBH, EAH, EBH, EBH-SP-III, EBH-SP-IV, IAH1, IAH5, IAH10, IAH25, IAH50, IAH100, IBH1, IBH5, IBH10, IBH25, IBH50, IBH100, QAH, QBH, SAH, SAH-SP-III, SAH-SP-IV, SAH-SP-V, SBH, SBH-SP-III, SBH-SP-IV, SBH-SP-V, SAH-II, SAH-II-SP-III, SAH-II-SP-IV, SAH-II-SP-V, SBH-II, SBH-II-SP-III, SBH-II-SP-IV, SBH-II-SP-V, UAH and UBH have been issued in additional currencies in the meantime before submitting a subscription application.

With Share Class DAH, DBH, EAH, EBH, EBH-SP-III, EBH-SP-IV, IAH1, IAH5, IAH10, IAH25, IAH50, IAH100, IBH1, IBH5, IBH10, IBH25, IBH50, IBH100, QAH, QBH, SAH, SAH-SP-III, SAH-SP-IV, SAH-SP-V, SBH, SBH-SP-III, SBH-SP-IV, SBH-SP-V, SAH-II, SAH-II-SP-III, SAH-II-SP-IV, SAH-II-SP-V, SBH-II, SBH-II-SP-III, SBH-II-SP-IV, SBH-II-SP-V, UAH and UBH the risk of an overall depreciation of the Subfund's Reference Currency against the Alternate Currency of the Share Class is reduced significantly by hedging the Net Asset Value of the respective Share Class DAH, DBH, EAH, EBH, EBH-SP-III, EBH-SP-IV, IAH1, IAH5, IAH10, IAH25, IAH50, IAH100, IBH1, IBH5, IBH10, IBH25, IBH50, IBH100, QAH, QBH, SAH, SAH-SP-III, SAH-SP-IV, SAH-SP-V, SBH, SBH-SP-III, SBH-SP-IV, SBH-SP-V, SAH-II, SAH-II-SP-III, SAH-II-SP-IV, SAH-II-SP-V, SBH-II, SBH-II-SP-III, SBH-II-SP-IV, SBH-II-SP-V, UAH and UBH – calculated in the Subfund's Reference Currency – against the respective Alternate Currency by means of forward foreign exchange transactions.

The Net Asset Value of the Shares of these Alternate Currency Classes does not develop in the same way as that of the Share Classes issued in the Reference Currency.

(7) Class EA, EAH, EB and EBH Shares may only be acquired by institutional investors.

(8) Class UA, UAH, UB and UBH Shares are exclusively reserved for investors who subscribe Shares of this Class via a financial intermediary domiciled in the United Kingdom or the Netherlands, or who have concluded a written agreement with a financial intermediary which explicitly provides for the acquisition of trailer fee-free classes, or who subscribe for Shares of this Class pursuant to a written asset management agreement with an independent asset manager carrying on business in the European Economic Area, Latin America or the Middle East and whose conduct is regulated by a recognised financial services regulator in their place of business.

(9) Class SA, SAH, SB, SBH, SA-II, SAH-II, SB-II and SBH-II Shares may be created at the inception of a Subfund, subject to minimum raised volume set at the full discretion of the AIFM, which serve as seeding Share Classes.

(10) The calculation of the performance fee is set out in the Subfund's Appendix, where applicable.

(11) Class QA, QAH, QB and QBH Shares may only be acquired by well-informed investors, in accordance with Article 2(1) of the Law of February 13, 2007.

(12) Class EBH-SP-III, EBH-SP-IV, SA-SP-III, SA-SP-IV, SA-SP-V, SAH-SP-III, SAH-SP-IV, SAH-SP-V, SB-SP-III, SB-SP-IV, SB-SP-V, SBH-SP-III, SBH-SP-IV, SBH-SP-V, SA-II-SP-III, SA-II-SP-IV, SA-II-SP-V, SAH-II-SP-III, SAH-II-SP-IV, SAH-II-SP-V, SB-II-SP-III, SB-II-SP-IV, SB-II-SP-V, SBH-II-SP-III, SBH-II-SP-IV and SBH-II-SP-V Shares are Special Situation Preference Shares and cannot be subscribed for at the request of (potential) Shareholders but will be allocated by the Company in accordance with Chapter 10.4 of this Offering Memorandum.

4. The Company

The information set out under this Chapter is a summary of the principal features of the Company and should be read in conjunction with the full text of this Offering Memorandum.

The Company has been established on 17 May 2017 in the legal form of an investment company with variable capital (*société d'investissement à capital variable*, SICAV). The Company qualifies as an AIF under the 2013 Law and is therefore subject to the rules of Part II of the 2007 Law.

The Company has designated UBS Asset Management (Europe) S.A. to act as its AIFM. In accordance with Annex I of the 2013 Law, the AIFM performs investment management activities (i.e. portfolio and/or risk management). In addition, the AIFM performs administrative duties, marketing and other activities related to the assets of the Company, if applicable. The details of the AIFM's rights and duties are governed by the 2013 Law and the Management Agreement.

The AIFM has appointed the Portfolio Manager to manage the portfolio of the relevant Subfund as further detailed in Chapter 5.4 and the Appendices.

The AIFM has delegated the central administration duties to Northern Trust Global Services SE as Central Administration.

The Company is registered with the Luxembourg Trade and Companies Register ("*Registre de Commerce et des Sociétés*") under number B215013. Its Articles of Incorporation have been amended for the last time on 12 December 2019 and are published in the RESA. Whereas the initial capital of the Company amounted to EUR 30,000, it will thereafter correspond to the total Net Asset Value of the Company. The minimum capital of the Company shall be at least the equivalent of EUR 1,250,000 within a period of twelve months following the authorisation of the Company. As long as the Shares in one Subfund are held by another Subfund, their value shall not be taken into account for the calculation of the Company's net assets for the determination of such minimum share capital.

The Company has an umbrella structure and therefore consists of at least one Subfund.

Each Subfund represents a portfolio containing different assets and liabilities and is considered to be a separate entity in relation to the Shareholders and third parties. The rights of Shareholders and creditors concerning a Subfund or which have arisen in relation to the establishment, operation or liquidation of a Subfund are limited to the assets of that Subfund. No Subfund will be liable with its assets for the liabilities of another Subfund.

The Board of Directors may at any time establish new Subfunds with Shares having similar characteristics to the Shares in the existing Subfunds and create and issue new Classes or types of Shares within any Subfund.

The individual Subfunds shall be designated by the names given in the relevant Appendix. The Reference Currency in which the Net Asset Value of the corresponding Shares of a Subfund is expressed is given in the relevant Appendix.

5. Management and Administration

5.1 Board of Directors

The Board of Directors is responsible, while observing the principle of risk diversification, for laying down the Investment Policy of the Subfunds and for monitoring the business activity of the Company. It may carry out all acts of management and administration on behalf of the Company; in particular purchase, sell, subscribe or exchange any securities and exercise all rights directly or indirectly attached to the Company's portfolio of assets.

The Board of Directors may, under its supervision, delegate its functions to one or several agents whom it may consider appropriate.

The Board of Directors has appointed UBS Asset Management (Europe) S.A. as the Company's alternative investment fund manager pursuant to the Management Agreement to perform these management and administrative functions under the Board of Directors' supervision.

5.2 Alternative Investment Fund Manager

UBS Asset Management (Europe) S.A. was established in Luxembourg on 1 July 2010 as an *Aktiengesellschaft* (public limited company) for an indefinite period. Its registered office is located at 33A avenue J.F. Kennedy, L-1855 Luxembourg.

The articles of association of the AIFM were published on 16 August 2010 by way of a notice of deposit in the *Mémorial, Recueil des Sociétés et Associations* (the "*Mémorial*").

The consolidated version of the articles of association may be consulted at the Luxembourg Trade and Companies Register (*Registre de Commerce et des Sociétés*). The corporate purpose of the AIFM is to manage undertakings for collective investment pursuant to Luxembourg law and to issue/redeem units or shares in these products, among other activities. In addition to the Company, the AIFM currently also manages other undertakings for collective investment. The AIFM has fully paid-up equity capital of EUR 13,000,000.

The AIFM also acts as domiciliary agent for the Company.

The Company has appointed the AIFM as its alternative investment fund manager within the meaning of the 2013 Law. The rights and duties of the AIFM are governed by Part II of the 2007 Law, the 2013 Law and the Management Agreement. The Management Agreement may be terminated by either party upon three months' prior written notice. In addition to the Company, the AIFM also manages other undertakings for collective investment.

The AIFM will, under the supervision of the Board of Directors, administer and manage each Subfund in accordance with the Offering Memorandum, Articles of Incorporation, Luxembourg laws and regulations and the Management Agreement and in the exclusive interest of the Shareholders. It will be empowered, subject to the rules as further set out hereafter, to exercise all of the rights attached directly or indirectly to the assets of each Subfund. The AIFM will take the investment and divestment decisions for the Subfunds, to the extend the portfolio management functions have not been delegated.

In its function as the alternative investment fund manager of the Company, the AIFM shall in particular be responsible for the following duties towards the Company:

- management of the assets of the respective Subfund (including portfolio and/or risk management as regards these assets);
- administration of the Company (including, inter alia, the calculation of the net asset value), it being understood that the AIFM may appoint central administration agent(s) and external valuer(s) as further outlined under Chapter 5.6;

- marketing and distribution of the shares of the respective Subfund, it being understood that the AIFM may appoint distributor(s) and sub-distributors.

In accordance with applicable laws and regulations and with the prior consent of the CSSF, the AIFM is empowered to delegate, under its responsibility, part of its duties and powers to any person or entity, which it may consider appropriate and which disposes of the requisite expertise and resources, it being understood that in such case this Offering Memorandum shall be amended accordingly. Any such delegation will be performed in compliance with the provisions of Part II of the 2007 Law and the 2013 Law.

In order to cover potential liability risks resulting from professional negligence, the AIFM holds appropriate additional own funds in accordance with the provisions of the 2013 Law and the AIFM Regulation to cover any potential professional liability resulting from its activities as AIFM.

The duties of the central administrative agent, which include the registrar and transfer agency duties, have been delegated as further detailed under Chapter 5.6.

5.3 Conducting Officers of the AIFM

In compliance with the provisions of Part II of the 2007 Law and the 2013 Law, the AIFM has granted a mandate in order to effectively conduct its day-to-day business to two Conducting Officers.

The Conducting Officers shall ensure that, at all times, the tasks of the AIFM in regard of its function as the Alternative Investment Fund Manager, and of the different services providers are performed in compliance with the 2007 Law, the 2013 Law, the Articles of Incorporation and the present Offering Memorandum. The Conducting Officers shall also ensure compliance of the AIFM, concerning its function as the alternative investment fund manager of the Company, with the Investment Objective, Investment Policy and Investment Restrictions and oversee the implementation of the Investment Objective and Investment Policy as defined in this Offering Memorandum.

The Conducting Officers will also report to the AIFM Board on a regular basis and, if necessary, will advise the AIFM of any significant breaches or issues of non-compliance with the Investment Policy and Investment Restrictions.

5.4 Portfolio Manager

In order to implement the policy of each Subfund, the AIFM may delegate, under its permanent supervision and responsibility, the management of the assets of the Subfunds to one or more Portfolio Managers.

Pursuant to the Portfolio Management Agreement, the Portfolio Manager has discretion, on a day-to-day basis and subject to the overall control and ultimate responsibility of the AIFM, to purchase and sell securities and otherwise to manage the relevant Subfund's portfolios.

The Portfolio Manager may appoint in accordance with the Portfolio Management Agreement one or more sub-portfolio managers ("**Sub-Portfolio Manager**") for each Subfund to assist it in the management of the individual portfolios. The Portfolio Manager and Sub-Portfolio Manager(s) for the respective Subfunds (if any) are indicated in the relevant Appendix. The AIFM may at any time appoint a Portfolio Manager other than the one(s) named in the Appendices or may terminate the relation with any of the Portfolio Manager(s). The Investors of such Subfund will be informed and this Offering Memorandum will be modified accordingly.

The Portfolio Manager currently serves as the Portfolio Manager to other collective investment vehicles that have a similar investment objective and program and may serve as the Portfolio Manager to other collective investment vehicles including other Subfunds of the Company, in the future that have the same or different investment objectives and follow the same or different programs without the consent of the Shareholders.

5.5 Depositary Bank and Paying Agent

The Company has appointed Northern Trust Global Services SE as the depositary of all of the Company's assets, including its cash and securities, which will be held either directly by the Depositary Bank or through other financial institutions such as correspondent banks, subsidiaries or affiliates of the Depositary Bank, clearing systems or securities settlement systems.

Northern Trust Global Services SE's registered office is located at 10, rue du Château d'Eau, L-3364 Leudelange, Grand Duchy of Luxembourg. Northern Trust Global Services SE is registered with the CSSF as a credit institution, authorised in Luxembourg according to the Luxembourg law of 5 April 1993 on the financial sector as amended from time to time.

The rights and duties of the Depositary Bank are governed by the Depositary Bank Agreement.

Pursuant to the Depositary Bank Agreement, the Depositary Bank has been appointed to provide safe-keeping services, in the form of custody and/or other services in respect of the Company's assets in accordance with the provisions of the 2007 Law, the 2013 Law and the Depositary Bank Agreement and to ensure an effective and proper monitoring of the Company's cash flows. In addition, the Depositary Bank shall also ensure that:

- the sale, issue, re-purchase, redemption and cancellation of Shares are carried out in accordance with Luxembourg law and the Articles of Incorporation;
- the value of the Shares is calculated in accordance with Luxembourg law, the Articles of Incorporation and the procedures laid down in Article 19 of the 2013 Law;
- the instructions of the Company and/or the AIFM are carried out, unless they conflict with applicable Luxembourg law and/or the Articles of Incorporation;
- in transactions involving the Company's assets any consideration is remitted to the Company within the usual time limits;
- the Company's incomes are applied in accordance with Luxembourg law and the Articles of Incorporation.

In compliance with the provisions of the Depositary Bank Agreement and the 2013 Law, the Depositary Bank may, subject to certain conditions and in order to effectively conduct its duties, delegate part or all of its safe-keeping duties in relation to financial instruments, duly entrusted to the Depositary Bank for custody purposes, to one or more sub-custodian(s), as they are appointed by the Depositary Bank from time to time. When selecting and appointing a sub-custodian, the Depositary Bank exercises all due skill, care and diligence as required by the 2013 Law to ensure that it entrusts such financial instruments to a sub-custodian who may provide an adequate standard of protection. The Depositary Bank will

ensure that such financial instruments are held in a manner that it is readily apparent from the books and records of such sub-custodian that they are segregated from the Depositary Bank's own assets and/or assets belonging to the sub-custodian and that the segregation obligations according to the 2013 Law are complied with. The Depositary Bank's liability shall not be affected by any such delegation, unless otherwise stipulated in the 2013 Law and agreed between the Company and/or the AIFM acting on behalf of the Company, and the Depositary Bank as set forth below.

The Depositary Bank is liable to the Company or its Shareholders for the loss of a financial instrument held in custody by the Depositary Bank and/or a sub-custodian. In accordance with the provisions of the 2013 Law, the Depositary Bank will not be liable for the loss of a financial instrument, if such loss has arisen as a result of an external event beyond its reasonable control, the consequences of which would have been unavoidable despite all reasonable efforts to the contrary. The Depositary Bank will not be liable to the Company or its Shareholders for the loss of a financial instrument booked in a securities settlement system, including central securities' depositaries if such losses arise from the acts, omissions or insolvency of a securities settlement system, including central securities' depositaries.

Furthermore, where the law of a third country requires that certain financial instruments be held in custody by a local entity and there are no local entities that satisfy the delegation requirements under the 2013 Law, the Depositary Bank may discharge itself of liability with respect to the custody of such financial instruments to the extent that the Depositary Bank has been instructed by the Company or the AIFM to delegate the custody of such financial instruments to such local entity and provided that the applicable conditions of the 2013 Law are met. If so, the situation will be disclosed to the Shareholders in accordance with the 2013 Law.

The Depositary Bank shall not be liable to the Company or to the Shareholder(s), for all other losses suffered by them unless as a result of the Depositary Bank's negligence, fraud or intentional failure to properly fulfil its duties in accordance with the 2013 Law and the Depositary Bank Agreement.

The Company, the AIFM and the Depositary Bank may terminate the Depositary Bank Agreement on 6 months' written notice. The Depositary Bank Agreement may also be terminated on shorter notice in certain circumstances. However, the Depositary Bank shall continue to act as Depositary Bank for up to two months pending a replacement depositary being appointed and until such replacement, the Depositary Bank shall take all necessary steps to ensure the good preservation of the interests of the Shareholders of the Company and allow the transfer of all assets of the Company to the succeeding depositary.

5.6 Central Administration

The AIFM, under its supervision and responsibility, has delegated the administration and registrar and transfer agency functions of the Company to Northern Trust Global Services SE and has authorised it in turn to delegate tasks wholly or partly to one or more third parties under its supervision and responsibility.

Northern Trust Global Services SE is a credit institution authorised in Luxembourg under Chapter 1 of Part 1 of the Luxembourg law of 5 April 1993 on the financial sector, subject to the supervision by the European Central Bank and the CSSF.

The Central Administration's ultimate holding company is Northern Trust Corporation, a company which is incorporated in the State of Delaware, United States of America, with its headquarters at 50 South La Salle Street, Chicago, Illinois.

The Central Administration will perform all administrative duties that arise in connection with the administration of the Company as required by Luxembourg law, including the processing of all subscriptions, redemptions, conversions, and transfer requests of Shares, registering these transactions in the register of Shareholders, the calculation of the Shares' Net Asset Value, accounting and maintenance of the records of the Company and of the register of Shareholders.

For the avoidance of doubt, the Central Administration will not act as independent valuer within the meaning of the AIFM Directive.

The costs incurred by the Central Administration in connection with the due performance of its duties are borne by the Company.

In its role as Registrar and Transfer Agent, the Central Administration is responsible for handling the processing of subscriptions for Shares, complying with anti-money laundering provisions and dealing with any subscriptions, redemptions, conversions and transfers of Shares, in each case in accordance with the Articles of Incorporation, and in connection therewith accepting transfers of funds, safekeeping of the register of Shareholders, the mailing of statements, reports, notices and other documents to the Shareholders.

The Central Administration is not responsible for any investment decisions of the Company or the effect of such investment decisions on the performance of the Company.

The Central Administration Agreement has no fixed duration and each party may, in principle, terminate the agreement on not less than six months' prior written notice.

The Central Administration Agreement may be terminated by the AIFM with immediate effect if this is deemed by the AIFM to be in the best interest of the investors.

The Central Administration Agreement contains provisions exempting the Central Administration from liability and indemnifying the Central Administration in certain circumstances. However, the liability of the Central Administration towards the AIFM and the Company will not be affected by any delegation of functions by the Central Administration.

The AIFM reserves the right to change the administration arrangements described above by agreement with the Central Administration and/or to appoint another service provider in Luxembourg to carry out the functions of administration agent. Investors will be notified in due course.

5.7 Outsourcing and sharing of information by the Depositary Bank and Paying Agent and Central Administration

Northern Trust Global Services SE as Depositary Bank and Central Administration outsources certain operational and administrative activities (including but not limited to fund set-up, calculations and processing, static data changes, dealing, transaction processing, registration maintenance, financial and cash operations, reporting, risk management, legal and regulatory compliance, AML due diligence, monitoring and processing of overnight politically exposed persons, sanction and adverse media alerts, client/investor services, tasks

relating to group management and control functions, financial and operational management and reporting, client service management, business continuity management and product development, IT and other technical resources and support) to its affiliates or branches and third parties which may be located outside Luxembourg (and potentially outside the EEA) and in particular India, the Philippines, United Kingdom and the United States of America. Accordingly investor and beneficial owner information (including their representatives information) are disclosed to the affiliates and branches of Northern Trust Global Services SE in the EU, the EEA and outside the EEA (in particular in Ireland, India, the Philippines, United Kingdom and the United States of America) as long as the Depositary Bank Agreement and the Central Administration Agreement are in force and during three years thereafter to the extent necessary.

5.8 Independent Auditor of the Company

The Company has appointed PricewaterhouseCoopers, registered at 2, rue Gerhard Mercator, L-2182 Luxembourg as the Auditor of the Company.

The Auditor of the Company verifies that the annual accounts of the Company present a true and fair view of the Company's financial situation and that the management report is in agreement with the accounts.

6. Investment Objective and Policy

6.1 Investment Objective

The objective of the Company is to achieve an attractive return from capital invested in insurance-linked strategies ("**ILS**"), while aiming to reduce investment risks through risk diversification across regions, exposures and perils but also using various hedging strategies with the aim to minimize exposure around the occurrence or high probability of an occurrence of a catastrophic event.

Subject to applicable laws and regulations, unless otherwise stated in this Offering Memorandum or in the relevant Appendix, the Subfunds shall have maximum flexibility to invest directly or indirectly in a wide range of securities and financial instruments linked to insurance risks and other risk transfer assets and derivatives of such investments.

The Investment Objective of each Subfund, which can be more specific, is further detailed in the relevant Appendix.

The financial instruments are further selected according to sustainability criteria as described in the Euler ILS ESG Framework and defined in the SFDR Annex of this Offering Memorandum ("Euler ILS ESG Framework"). Furthermore, the Subfunds seek in principle to achieve a low correlation to the returns of traditional financial markets.

6.2 Investment Policy

Each Subfund may invest directly or indirectly through a wide range of financial instruments involving insurance exposures, risks and derivatives of such investments of any kind and nature, including but not limited to cat bonds, industry loss warranties, collateralized reinsurance transactions, quota shares, side cars and other reinsurance related transactions, parametric or index linked instruments listed and unlisted equity and equity related securities, shares, debt instruments, bonds, notes, currencies, other collective investment undertakings ("**UCI**") including but not limited to derivative instruments (together "**ILS Instruments**", each "**ILS Instrument**"), in each case as set forth for each Subfund separately in the relevant Appendix.

Each Subfund will typically be exposed to a wide range of financial ILS Instruments directly or indirectly involving insurance exposures and risks and derivatives of such investments such as futures, options, warrants, swaps and other derivative instruments. The main strategy of each Subfund is to create a portfolio of insurance risk exposures which are typically quantifiable and can be modelled mathematically. Each Subfund may also for risk management purposes use financial derivative instruments, within the limits laid down in Chapter 7, "Investment Restrictions".

The Subfunds may furthermore hold cash or cash equivalents, including *inter alia* money market instruments, investments in units of money market funds, fixed income instruments such as, *inter alia,* US treasuries or units in other ILS UCIs for distributions or redemptions and for cash management purposes, or as an intermediary investment prior to the investment of any balance not (yet) invested pursuant to the above.

The Subfunds may try to hedge and reduce risk around the potential or actual occurrence of catastrophic events using various hedging strategies such as but not limited to derivatives, equities, options, futures and other financial instruments and derivative thereof.

The Subfunds will seek to hedge the foreign currency exchange risk resulting out of investments denominated in a currency other than US Dollars where practical and commercial reasonable. The Subfunds will also seek to hedge the foreign currency exchange risk back to currencies of the respective currency share class where practical and commercially reasonable. However, there can be no assurance that any hedging activities will be effective.

Any gains or losses from such hedging transactions shall accrue to the relevant share class (in the case of share class hedging) or to the Subfund as a whole (in the case of portfolio level hedging), any may impact the net asset value of the relevant shares.

The Company may utilize a single trade execution venue for the purpose of hedging transactions. As a result, the Company cannot ensure or represent that best execution (in terms of price or execution conditions) will be consistently achieved in respect of such hedging activity. Investors should be aware that reliance on a sole execution counterparty or platform may result in less competitive pricing, reduced liquidity access, or sub-optimal execution outcomes in certain market conditions.

Sustainability Considerations

As of 1st January 2026, the Subfunds of the Company will qualify as financial products under Article 8 (1) of the Sustainable Finance Disclosure Regulation (Regulation (EU) 2019/2088) (the "**SFDR**") as further set out in the SFDR Annexes relevant to each Sub-Fund, of this Offering Memorandum. The Subfunds aim to integrate environmental and social characteristics through the selection of eligible ILS Instruments according to the Euler ILS ESG Framework.

Due to the currently limited availability of taxonomy-related data, none of the Subfunds has underlying investments that take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Regulation (EU) 2020/852.

The Subfunds of the Company do not consider principal adverse impacts on sustainability factors for the purpose of article 7 SFDR.

The core investment approach and process combines two building blocks, namely actuarial and financial analysis, in an attempt to construct a portfolio that delivers long-term performance in line with the identified targets and respects pre-defined risk limits, while at the same time integrating environmental and social characteristics as per the Euler ILS ESG Framework. In a first step, a fundamental bottom-up analysis is performed using actuarial analytical tools, in line with the specific characteristics of ILS instruments. The ILS Instruments are analysed according to pre-defined criteria such as the type of risk being transferred, the structure's specific features, the market conditions and the Sponsor's subject business, as well as the effect on the risk/return profile of the portfolio. Analysis of individual ILS Instruments is based on information gathered from sources such as rating agencies, risk modelling firms, sponsors, brokers, and consultants as well as internal actuarial models and the internal use of vendor risk models. The Portfolio Manager uses a combination of internal tools, and an insurance risk modelling software licensed from an independent vendor to model the underlying event risk. The findings are summarized in a due diligence report (deal memorandum) that defines the investable universe. In a second step, a top-down (financial) analysis is applied.

The Euler ILS ESG Framework defines how ESG Factors are taken into account by the Portfolio Manager to identify eligible ILS Instruments and to reach the Subfund's long-term investment objectives and principles while managing certain Sustainability Risks. Information about the environmental or social characteristics promoted by the relevant Subfund is available in the dedicated SFDR Annex of this Offering Memorandum.

Please note, Sustainable Investing is an on-going legislative act. Regulatory requirements are evolving and might change in the future. When there will be legislative changes, the Offering Memorandum will be updated accordingly. Additionally, new methods arise and availability of data is constantly improving. This might have an impact on the implementation, monitoring and reporting of ESG Factors as described in this Offering Memorandum. **Investors should read and consider the risk factors entitled "Sustainability Risk" and "Sustainable Investing Risks" in Chapter 8, "Risk Factors", before investing in Subfunds subject to Sustainable Investment Framework.**

Cross-investments between Subfunds of the Company

The Subfunds of the Company may, subject to the conditions provided for in the Law of 13 February 2007, subscribe, acquire and/or hold securities to be issued or issued by one or more Subfunds of the Company under the following conditions:

- the target Subfund does not, in turn, invest in the Subfund invested in this target Subfund; and
- no more than 10% of the assets of the target Subfund whose acquisition is contemplated may be invested in aggregate in shares of other target Subfunds of the Company; and
- voting rights, if any, attaching to the relevant securities are suspended for as long as they are held by the Subfund concerned and without prejudice to the appropriate processing in the accounts and the periodic reports; and
- in any event, for as long as these securities are held by the Company, their value will not be taken into consideration for the calculation of the net assets of the Company for the purposes of verifying the minimum threshold of the net assets imposed by the Law of 13 February 2007.

7. Investment Restrictions

Subject to the investment restrictions set out in CSSF Circular 07/309, each Subfund is managed in accordance with the following Investment Restrictions as well as in accordance with the additional Investment Restrictions specified in the relevant Appendix, if any:

(1) No Subfund will invest thirty per cent (30%) or more of its Total Assets in the securities or investment instruments of the same type issued by the same issuing body. This restriction does not apply to investments in securities issued or guaranteed by an OECD Member State or its regional or local authorities or by EU, regional or global supranational institutions and bodies. The same risk spreading threshold will apply in case of any other investments, e.g. cash or cash equivalent investments.

(2) This restriction does not apply to investments in target UCIs that are subject to risk-spreading requirements at least comparable to those applicable to specialised investment funds subject to the 2007 Law. For the purpose of the application of this restriction, every Subfund of a target umbrella UCI is to be considered as a separate issuer provided that the principle of segregation of liabilities among the various Subfunds vis-à-vis third parties is ensured.

(3) A Subfund may acquire up to one hundred per cent (100%) of the securities and derivatives issued by a single entity as long as the risk spreading requirements under (1) above are respected.

(4) After the Ramp-Up Period and subject to, where relevant, appropriate risk diversification at the level of their respective underlying exposures and consideration to any other relevant risk factors in accordance with CSSF Circular 07/309, each Subfund will at any time hold directly at least four (4) assets with different risk exposure, whereas the value of a single asset of the Subfund shall not exceed fifty per cent (50%) of the Total Assets of the Subfund. The fifty per cent (50%) limit shall not apply with respect to investments in target UCIs which satisfy the requirements under (2) above.

(5) Each Subfund may invest up to one hundred per cent (100%) of its Total Assets directly or indirectly in participations in undertakings irrespective of whether or not these participations qualify as securities and of whether or not these participations are listed at a stock exchange or other Regulated Market.

(6) Financial derivative instruments may be used for investment purposes, currency hedging or other risk management purposes, within the limits down in this Chapter. In order to protect its present and future assets and liabilities against the fluctuation of currencies and interest rates, any Subfund may enter into hedging transactions. Depending on the currencies involved it may also be necessary to enter into hedging and/or cross-hedging transactions.

Collateral provided by the Subfunds in relation to these transactions may be deposited on collateral accounts of entities other than the Depositary Bank and may be held in cash or be invested by such entities.

The Company will not enter into (a) securities financing transactions and/or use total return swaps within the meaning of Regulation (EU) 2015/2365 of the European Parliament and of the Council of 25 November 2015 on transparency of securities financing transactions and of reuse and amending Regulation (EU) No 648/2012, or (b) will not perform any short selling activities for investment purposes. The Company qualifies as financial counterparty and will comply with any applicable clearing and reporting duties and any risk mitigation techniques in accordance with Regulation (EU) No 648/2012 of the European Parliament and of the Council of 4 July 2012 on OTC derivatives, central counterparties and trade repositories.

(7) At Subfund level, each Subfund may borrow funds in accordance with the restrictions specified in the relevant Appendix, provided the terms of such additional borrowings are consistent with market standards.

(8) At Subfund level, each Subfund may from time to time enter into securities lending transactions for the purpose of efficient portfolio management. The decision to enter into securities lending transactions (or to stop securities lending transactions, temporarily or permanently) will be made on the basis of costs and benefits analysis carried out in the best interest of the shareholders of the relevant Subfunds (e.g., at the occasion of large subscriptions or redemptions).

(9) The maximum leverage, if any, for each Subfund and an appropriate justification are indicated in the Appendix of the relevant Subfund.

(10) A Subfund may, subject to the conditions set out in this Offering Memorandum, subscribe for, acquire and/or hold Shares to be issued or already issued by one or several other Subfunds, without the Company being subject to the requirements regarding the subscription, acquisition and/or holding by a company of its own shares set out in the 1915 Law, under the conditions however, that:

- the target Subfund does not, in turn, invest in the Subfund invested in this target Subfund; and
- the voting rights which are attached to the Shares concerned will be suspended for as long as they are held by the relevant Subfund and without prejudice to an appropriate treatment in accounting and in the periodical reports; and
- as long as the Shares in one Subfund are held by another Subfund, their value shall not be taken into account for the calculation of the Company's net assets for the determination of the minimum threshold of net assets imposed by the 2007 Law.

For the avoidance of doubt, one Subfund may serve as feeder into another Subfund. In this case, the details will be disclosed in the Appendix relating to the relevant feeder Subfund.

The above Investment Restrictions, except for the Investment Restrictions under (4) to (6) of this Chapter, which will apply as from a Subfund's first investment, may not be complied with during a transitional period of up to 24 months as from a Subfund's first investment, unless specified otherwise in the relevant Subfund's Appendix (the "Transitional Period"). During the Transitional Period, the assets of the Subfund may consist entirely or predominantly of cash or cash equivalents, including *inter alia* ILS theme UCIs. Should the Investment Restrictions set out in the present Chapter be breached solely as a result of passive reasons (such as redemptions), such a breach shall not be construed as a breach of investment rules within the meaning of the CSSF Circular 24/856 on the protection of investors in case of NAV calculation error, an instance of non-compliance with the investment rules applicable and other errors at UCI level ("**Circular 24/856**") and shall not be applied the disclosure and remedial processes set out therein. The Subfund will take corrective action in the best interests of the Investors. The AIFM shall be liable to the Subfund for the damage which would result from an active breach of the Investment Restrictions. The Subfund shall in turn be liable pursuant to the Circular 24/856 to the Investors who suffered a loss. The different steps of the procedure to be followed in the event of such breach pursuant to the Circular 24/856 include (i) the obligation for the Company to inform the CSSF, the AIFM, where applicable the Central Administration and the Depositary Bank of the breach, (ii) the identification of the origin of the error and immediately correct the source of the error, (iii) the determination of the financial impact of the loss for individual Investors and the measures to be taken for their indemnification, (iv) the identification of the categories of Investors which are affected because of the loss suffered by the Subfund as a result of this breach, (v) the notification of the Investors which have to be indemnified and (vi) the determination and implementation, where relevant, of a remedial action plan in order to avoid such errors in the future.

The Investment Restrictions set out in the present Chapter will not be breached in case the Subfund holds, for a reasonable timeframe, cash or cash equivalents pending reinvestment and/or to meet redemption requests from its Shareholders.

8. Risk Factors

An investment in any Subfund established by the Company is speculative and involves a high degree of risk. Although the Board of Directors and the AIFM will attempt to manage those risks through careful research and portfolio management for each Subfund, there can be no assurance that they will do so successfully.

An investment in any Subfund established by the Company should be made only after consultation with independent qualified sources of investment, tax, legal and other appropriate professional advice. In addition to the specific risk factors set forth in the Appendices in relation to each Subfund, a prospective investor should consider the following factors the description of which is neither detailed nor exhaustive:

8.1 General Risk Factors relating to an Investment in the Company

The value of an investment in any investment fund may go up as well as down and involves various risk factors and investment considerations, some of which are highlighted below. It should be remembered that the Net Asset Value per Share can go down as well as up. There is a possibility of a total or partial loss of the invested capital. Investors should not subscribe to or invest in the Company unless they can readily bear the consequences of such loss. No guarantee or representation is made that the Subfunds will reach their Investment Objective, and investment results may vary substantially over time In

particular, Investors should evaluate the risk factors discussed below which, individually or in aggregate, could have a material adverse effect on the Subfunds or their assets and may result in the loss of the Shareholders' invested capital or lower returns than those discussed herein.

Additionally, the Company is primarily designed as a long-term investment and not as a trading vehicle. The Company is not intended to be a complete investment program. Where the currency of the Subfund varies from the investor's home currency, or where the currency of the Subfund varies from the currencies of the markets in which the Company invests, there is the prospect of additional loss (or the prospect of additional gain) to the investor greater than the usual risks of investment.

8.1.1 Changes in Applicable Law

The Company must comply with legal requirements, including requirements imposed by the securities laws and company laws in various jurisdictions, including Luxembourg. Should any of these laws change over the duration of the Company, the legal requirements to which the Company and the Shareholders may be subject could differ substantially from current requirements.

8.1.2 Key Persons

The success of the Company or of its Subfunds will largely depend on the experience, relationships and expertise of the key persons within the Board of Directors and the Portfolio Manager, which have long-term experience in the respective area of investment. The performance of the Company or any Subfund may be negatively affected if any of the key persons involved in the management or investment process of the Company or particular Subfund would for any reason cease to be involved. Furthermore, the key persons might be involved in other businesses, including in similar projects or investment structures, and not be able to devote all of their time to the Company or the respective Subfund. In addition, the involvement in similar projects or investment structures may create a source for potential conflicts of interest.

8.1.3 Reliance on Service Providers

The Company and its Subfunds is also dependent upon its counterparties and the businesses that are not controlled by the Portfolio Manager that provide services to the Company and/or the AIFM (the "Service Providers"). Examples of Service Providers include the Administrator, the Custodian, Legal Counsel and the Auditors. Errors are inherent in the business and operations of any business, and although the Portfolio Manager will adopt measures to prevent and detect errors by, and misconduct of, counterparties and Service Providers, and transact with counterparties and Service Providers it believes to be reliable, such measures may not be effective in all cases. Errors or misconduct could have a material adverse effect on the Subfund and the Shareholders' investments therein. Each Shareholder's relationship in respect of its Shares is with the Subfund only. Accordingly, absent a direct contractual relationship between the investor and the relevant Service Provider, no Shareholder will have any contractual claim against any Service Provider for any reason related to its services to the Subfund.

8.1.4 System and Operational Risks Generally

The Subfund depends on the Service Providers such as but not limited to the Portfolio Manager to develop and implement appropriate systems for the Company's activities. The Subfund relies heavily and on a daily basis on financial, accounting and other data processing systems to execute, clear and settle transactions across numerous and diverse markets, to evaluate certain securities, to monitor its portfolio and capital, and to generate risk management and other reports that are critical to oversight of the Subfund's activities.

In addition, the Subfund relies on information systems to store sensitive information about the Subfund, its affiliates, the Portfolio Manager and the Shareholders. Certain of the Subfund's and the Portfolio Manager's activities will be dependent upon systems operated by third parties, including the Service Providers and other market counterparties, and the Portfolio Manager may not be in a position to verify the risks or reliability of such third-party systems. Failures in the systems could result in mistakes made in the confirmation or settlement of transactions, or in transactions not being properly booked, evaluated or accounted for. Disruptions in the Subfund's operations may cause the Subfund to suffer, among other things, financial loss, the disruption of its business, liability to third parties, regulatory intervention or reputational damage. Any of the foregoing failures or disruptions could have a material adverse effect on the Subfund and the Shareholders' investments therein.

8.1.5 Utilization of New Technologies

The Portfolio Manager may utilise new technologies such as artificial intelligence, machine learning algorithms and other forms of data-driven automation ("New Technologies") in its processes. While such technologies are intended to enhance analytical capabilities, identify patterns in large data sets, and improve efficiency, their use entails specific risks. These include, but are not limited to: programming errors, data inaccuracies, model overfitting, limited transparency (i.e., "black-box" models), and reliance on third-party systems that may not be subject to direct oversight. Additionally, the rapidly evolving regulatory landscape around New Technologies may impose new compliance obligations, operational burdens, or legal risks. The deployment of New Technologies may also raise novel conflict of interest scenarios—particularly where model outcomes influence discretionary investment decisions or create information asymmetries among clients. There can be no assurance that the use of New Technologies will improve investment performance or avoid losses. Investors should carefully consider these uncertainties when evaluating an investment in the Subfund.

8.1.6 Cybersecurity Risk

The Company, its service providers, and other market participants increasingly depend on complex information technology and communications systems to conduct business functions. These systems are subject to a number of different threats or risks that could adversely affect the Company and its Shareholders, despite the efforts of the Company and its service providers to adopt technologies, processes and practices intended to mitigate these risks and protect the security of their computer systems, software, networks and other technology assets, as well as the confidentiality, integrity and availability of Shareholders' information. For example, unauthorised third parties may attempt to improperly access, modify, disrupt the operations of, or prevent access to these systems of the AIFM, the Portfolio Manager, the Central Administrator, the Depositary or other service providers, counterparties or data within these systems. Third parties may also attempt to fraudulently induce employees, customers, third party service providers or other users of these systems to disclose sensitive information in order to gain access to

Shareholder/service provider data. A successful penetration or circumvention of the security of these systems could result in the loss or theft of a Shareholder's data or funds, the inability to access electronic systems, loss or theft of proprietary information or corporate data, physical damage to a computer or network system or costs associated with system repairs. Such incidents could cause the Company to incur regulatory penalties, reputational damage, additional compliance costs or financial loss. Similar types of operational and technology risks are also present for the companies in which the Subfunds may invest, counterparties with which the Company engages in transactions and various other parties, which may also give rise to material adverse consequences for the Company including a decrease in the value of Investments.

8.1.7 Valuation Risk

The portfolio of a Subfund will be composed of assets of different natures in terms of sectors, geographies, financial statements formats, reference currencies, accounting principles, types and liquidity of securities, coherence and comprehensiveness of data, exchange-traded assets and OTC assets. The lack of an active public market for certain securities and debt instruments as well as other investments held by the Company will render the Company's valuation process and Net Asset Value calculation more difficult and subjective, but also subject to material valuation uncertainties from time to time. Furthermore, the valuation of the relevant portfolio and the production of the Net Asset Value calculation will be a complex process which might in certain circumstances require the AIFM to make certain assumptions in order to produce the desired output. Such assumptions may subsequently prove incorrect and require the value of certain positions to be adjusted as more information becomes available. If an asset of the Company is incorrectly valued, the disposition opportunities available for that asset of the Company may, in the case of an undervaluation, be unattractive or, in the case of an overvaluation, be limited. The valuation of an asset of the Company could also be significantly adversely affected by inflation.

8.1.8 Interest Rate Risk

Shareholders must be aware that an investment in the Subfunds may be exposed to interest rate risks. These risks occur when there are fluctuations in the interest rates of the main currencies of each transferable security or of the Company.

8.1.9 Effect of Fees and Expenses on Returns

The Company will pay fees and expenses as further described in Chapter 17. Such fees are expected to reduce the actual returns to Investors. Most of the fees and expenses will be paid regardless of whether the Company produces positive investment returns. If the Company does not produce significant positive investment returns, these fees and expenses could reduce the amount of the investment recovered by a Shareholder to an amount less than the amount invested in the Company by such Shareholder.

The fees and expenses of the Subfund may be significant. The Subfund must generate sufficient income to offset such fees and expenses to avoid a decrease in the net asset value of the Subfund.

8.1.10 Payment of Redemption Proceeds to Shareholders Based on Unaudited Data

The calculation and payment of a Shareholder's redemption proceeds may be based on estimated and unaudited data. Accordingly, adjustments and revisions may be made to the Subfund's net asset value following the year-end audit of the Subfund. Once fully paid, no revision to a Shareholder's redemption proceeds will be made based upon audit adjustments. Thus, the Subfund will not seek reimbursement in the event of any overpayment and will not pay additional amounts in the event of an underpayment. As a result, a redeeming Shareholder may be positively or negatively affected by a revision to the Subfund's net asset value. To the extent that such revisions to net asset value decrease the net asset value of the Subfund, the non-redeeming Shareholders will be adversely affected by redemptions.

The Subfund's assets and liabilities are valued in accordance with the Company's Valuation Policy. The valuation of any asset or liability involves inherent uncertainty. The value of a security determined in accordance with the Valuation Policy may differ materially from the value that could have been realised in an actual sale or transfer for a variety of reasons, including the timing of the transaction and liquidity in the market. Uncertainties as to the valuation of portfolio positions could have an impact on the net asset value of the Subfund if the judgements regarding the appropriate valuation should prove to be incorrect.

8.1.11 Effects of Substantial Redemptions

In the event the Subfund experiences substantial redemption requests, actions taken to meet such redemption requests from the Subfund could result in prices of assets held by the Subfund decreasing and in Subfund expenses increasing (e.g., transaction costs and the costs of terminating agreements). The overall value of the Subfund also may decrease because the liquidation value of certain assets may be materially less than their cost or mark-to-market value. The Subfund may be forced to sell its more liquid positions, which may cause an imbalance in the portfolio that could have a material adverse effect on the remaining Shareholders. Substantial redemptions could also significantly restrict the Subfund's ability to obtain financing or transact with derivatives counterparties needed for its investment strategies, which would have a further material adverse effect on the Sunfund's performance. The Subfund and the Portfolio Manager generally will not disclose to Shareholders the amount of pending redemptions or redemption requests and are under no obligation to make any such disclosure.

8.1.12 Performance Fee Risk

The existence of a performance fee may create an incentive for the Portfolio Manager to select more speculative investments to the Company than it would otherwise make in the absence of such performance-based arrangements.

8.1.13 Counterparty risk of the Depositary Bank

According to the subscription process described in Chapter 10.5 and in the relevant Appendix, subscription monies paid by Shareholders are first received by the Depositary Bank and kept on its own collection accounts for a few days before being transferred as cleared funds to the relevant Subfund's bank account with the Depositary Bank. Shareholders must be aware that subscription monies will be exposed to the risk that the Depositary Bank may default on its obligation to transfer the funds to the relevant Subfund's bank account. In the event of a bankruptcy or insolvency of the Depositary Bank, the Company could experience significant losses, inability to make any payments during the period in which the Company seeks to

enforce its rights and incur significant fees and expenses in enforcing its rights.

8.1.14 Forward Looking Statements

Certain information contained in this Offering Memorandum constitutes "forward-looking statements", which can be identified by the use of forward-looking terminology such as "may", "will", "should", "expect", "anticipate", "project", "estimate", "intend", "continue", or "believe" or the negatives thereof or other variations thereon or comparable terminology. Due to various risks and uncertainties, actual events or results or the actual performance of the Company and/or a Subfund may differ materially from those reflected or contemplated in such forward-looking statements. No representation or warranty is made as to future performance or such forward-looking statements.

8.2 Tax risks

Tax laws are complex and quite often not completely clear, and the tax consequences of a particular structure chosen might be questioned or might be subject to challenge by the relevant tax authority in the country concerned. Furthermore, tax laws may change, so that the tax consequences of a particular investment may adversely change after it has been made. The Subfunds' Shareholders may be subject to income taxes or other taxes in multiple jurisdictions outside of their country. In addition, withholding tax or other taxes may be imposed on earnings of a Subfund from investments in such jurisdictions. Local tax incurred in various jurisdictions by a Subfund or entities through which it invests may not be creditable to or deductible by the Shareholders. The Company intends to take into account tax consequences at the level of the Subfund and the investment structures in which it invests at the time an investment is made, however, as the Subfunds do not control the investment structures in which they invest, it cannot be excluded that adverse tax consequences occur, e.g. as a result of a restructuring of an investment structure after the investment was made or subsequent changes in law. Furthermore, the Company will not be in a position to take into account the tax consequences at the level of Shareholders in the different Subfunds.

Shareholders are therefore advised to consult their own tax advisors with regard to their individual situation before they acquire Subfund Shares as well as during their investment in a Subfund. Shareholders should also refer to Chapter 14 dealing with certain regulatory and tax matters of particular interest.

Foreign Account Tax Compliance

The Company may be subject to regulations imposed by foreign regulators, in particular the Foreign Account Tax Compliance provisions of the Hiring Incentives to Restore Employment Act (commonly known as "**FATCA**"). FATCA provisions generally impose a reporting to the U.S. Internal Revenue Service of non-U.S. financial institutions that do not comply with FATCA and U.S. persons' (within the meaning of FATCA) direct and indirect ownership of non-U.S. accounts and non-U.S. entities. Failure to provide the requested information will lead to a 30% withholding tax applying to certain U.S. source income (including dividends and interest) and gross proceeds from the sale or other disposal of property that can produce U.S. source interest or dividends.

Under the terms of FATCA, the Company will be treated as a Foreign Financial Institution (within the meaning of FATCA). As such, the Company may require all Investors to provide documentary evidence of their tax residence and all other information deemed necessary to comply with the above mentioned regulations.

Should the Company become subject to a withholding tax as a result of FATCA, the value of the Shares held by all Shareholders may be materially affected.

The Company and/or its Shareholders may also be indirectly affected by the fact that a non U.S. financial entity does not comply with FATCA regulations even if the Company satisfies with its own FATCA obligations.

Despite anything else herein contained, the Company shall have the right to:

- withhold any taxes or similar charges that it is legally required to withhold by applicable laws and regulations in respect of any shareholding in the Company;
- require any Shareholder or beneficial owner of the Shares to promptly furnish such personal data as may be required by the Company in its discretion in order to comply with applicable laws and regulations and/or to promptly determine the amount of withholding to be retained;
- divulge any such personal information to any tax authority, as may be required by applicable laws or regulations or requested by such authority; and
- delay payments of any dividend or redemption proceeds to a Shareholder until the Company holds sufficient information to comply with applicable laws and regulations or determine the correct amount to be withheld.

Common Reporting Standard

The Company may be subject to the Standard for Automatic Exchange of Financial Account Information in Tax matters (the "**Standard**") and its Common Reporting Standard (the "**CRS**") as set out in the Luxembourg law dated 18 December 2015 implementing Council Directive 2014/107/EU of 9 December 2014 as regards mandatory automatic exchange of information in the field of taxation (the "**CRS-Law**").

Under the terms of the CRS-Law, the Company is to be treated as a Luxembourg Reporting Financial Institution. As such, as of 30 June 2017 and without prejudice to other applicable data protection provisions, the Company will be required to annually report to the Luxembourg tax authority personal and financial information related, inter alia, to the identification of, holdings by and payments made to (i) certain shareholders as per the CRS-Law (the "**Reportable Persons**") and (ii) Controlling Persons of certain non-financial entities ("**NFEs**") which are themselves Reportable Persons. This information, as exhaustively set out in Annex I of the CRS-Law (the "**Information**"), will include personal data related to the Reportable Persons.

The Company's ability to satisfy its reporting obligations under the CRS-Law will depend on each Shareholder providing the Company with the Information, along with the required supporting documentary evidence. In this context, the Shareholders are hereby informed that, as data controller, the Company will process the Information for the purposes as set out in the CRS-Law. The Shareholders undertake to inform their Controlling Persons, if applicable, of the processing of their Information by the Company.

The term "Controlling Person" means in the present context any natural persons who exercise control over an entity. In the case of a trust it means the settlor(s), the trustee(s), the

protector(s) (if any), the beneficiary(ies) or class(es) of beneficiaries, and any other natural person(s) exercising ultimate effective control over the trust, and in the case of a legal arrangement other than a trust, persons in equivalent or similar positions. The term ''Controlling Persons" must be interpreted in a manner consistent with the Financial Action Task Force Recommendations.

The Shareholders are further informed that the Information related to Reportable Persons within the meaning of the CRS-Law will be disclosed to the Luxembourg tax authority annually for the purposes set out in the CRS-Law. In particular, Reportable Persons are informed that certain operations performed by them will be reported to them through the issuance of statements, and that part of this information will serve as a basis for the annual disclosure to the Luxembourg tax authority.

Similarly, the Shareholders undertake to inform the Company within thirty (30) days of receipt of these statements should any included personal data be not accurate. The Shareholders further undertake to immediately inform the Company of, and to provide the Company with all supporting documentary evidence of any changes related to the Information after occurrence of such changes.

Any Shareholder that fails to comply with the Company's Information or documentation requests may be held liable for penalties imposed on the Company and attributable to such shareholder's failure to provide the Information.

The proposed financial transactions tax ("FTT")

The European Commission recently published a proposal for a Directive for a common financial transaction tax in Austria, Belgium, Estonia, France, Germany, Greece, Italy, Portugal, Slovenia, Slovakia and Spain (the "**Participating Member States**"). The implementation of the FTT by the Participating Member States is still pending.

The proposed FTT has very broad, potentially extraterritorial scope. It would apply to financial transactions where at least one party is a financial institution, and (a) one party is established in a Participating Member State or (b) the financial instrument which is subject to the transaction is issued in a Participating Member State. A financial institution may be, or be deemed to be, "established" in a Member State in a broad range of circumstances.

In relation to many secondary market transactions in bonds and shares, the FTT would be charged at a minimum rate of 0.1% on each financial institution which is party to the transaction. The issuance and subscription of the Shares should, however, be exempt. There are no broad exemptions for financial intermediaries or market makers. Therefore, the effective cumulative rate applicable to some dealings in bonds or shares (for instance, cleared transactions) could be greatly in excess of 0.1%.

A person transacting with a financial institution which fails to account for FTT would be jointly and severally liable for that tax.

The FTT proposal remains subject to negotiation between the Participating Member States, and may therefore be altered. Additional Member States may decide to participate. Prospective holders of the Shares are strongly advised to seek their own professional advice in relation to the FTT.

8.3 Specific Risk Factors relating to an Investment in a foreign country

Any investment of the Subfunds, in particular in a foreign country, involves the risk of adverse political developments, including nationalization, confiscation without fair compensation, and acts of terrorism or war and of changes in governmental policies. Furthermore, foreign jurisdictions may impose restrictions to prevent capital flight, which could make it difficult or impossible to exchange or repatriate foreign currency. In addition, laws and regulations of foreign countries may impose restrictions or approvals which would not exist in the Investor's country of origin and may require financing and structuring alternatives which differ significantly from those customarily used in the Investor's country of origin. No assurance can be given that a political or economic climate, or particular legal or regulatory risks, might not adversely affect an investment by the different Subfunds. It may be infeasible for the Subfunds to invest in certain investment structures as otherwise the Subfund or certain Investors or potential investors may be subject to adverse tax, regulatory or other detrimental consequences; this may limit the investment opportunities of the Subfunds.

Issuers are generally subject to different accounting, auditing and financial reporting standards in different countries throughout the world. The volume of trading, the volatility of prices and the liquidity of issuers may vary in the markets of different countries. Hours of business, customs and access to these markets by outside investors may also vary. In addition, the level of government supervision and regulation of securities exchanges, securities dealers and listed and unlisted companies is different throughout the world. The laws of some countries may limit the Company's ability to invest in securities of certain issuers located in those countries. In addition, there may be a lack of adequate legal recourse for the redress of disputes and in some countries the pursuit of such disputes may be subject to a highly prejudiced legal system.

These risks may be greater in emerging markets.

8.3.1 Competitive Environment

Each Subfund will operate in a competitive environment in which there will be a significant degree of uncertainty in identifying and completing investment transactions. There may be other investment vehicles that have similar or identical objectives that will compete for similar assets.

8.3.2 Concentration and Diversification

There may be a concentration in a particular issuer, industry or country. If any Subfund elects to concentrate the Subfund's investments in a particular issuer, industry or country, the Subfund will become more susceptible to fluctuations in value resulting from adverse economic conditions affecting that particular issuer, industry or country.

8.3.3 Currency Risks and Foreign Exchange; Hedging Transactions

The Reference Currency of each Subfund is not necessarily the investment currency of the Subfund concerned. Investments are made in those currencies that best benefit the performance of the Subfunds in the view of the AIFM.

Changes in the rates of exchange between the Reference Currency and other currencies will have an effect, which could be adverse, on the performance of the relevant Subfund, on amounts available for distribution by the relevant Subfund and on the value of securities distributed by such Subfund.

Additionally, in response to large-scale currency speculation, a number of nations have been unable to sustain exchange rates and have devalued their currency or shifted to floating exchange rate regimes. Such devaluation could affect adversely the relevant Subfund.

A Subfund may utilize financial instruments for risk management purposes in order to hedge the currency exchange rate on any particular Subfund's assets and expected future income arising from those assets. The success of any such hedging operations will be subject to the Portfolio Manager's ability to assess correctly the degree of correlation between the performance of the instruments used in the hedging strategy and the performance of the investments in the portfolio being hedged and the Portfolio Manager's ability to recalculate, readjust and execute hedges continually in an efficient and timely manner.

Shareholders investing in a Subfund other than in its Reference Currency should be aware that exchange rate fluctuations could cause the value of their investment to diminish or increase.

8.3.4 Market Risk

The market price of securities owned by the Subfunds may go up or down, sometimes rapidly or unpredictably. Securities may decline in value due to factors affecting securities markets generally or particular industries represented in the securities markets. The value of a security may decline due to general market conditions which are not specifically related to a particular company, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates or adverse investor sentiment generally. They may also decline due to factors, which affect a particular industry or industries, such as labour shortages or increased production costs and competitive conditions within an industry. During a general downturn in the securities markets, multiple asset classes may decline in value simultaneously.

8.3.5 Issuer Risk

The value of a security may decline for a number of reasons, which directly relate to the issuer, such as management performance, financial leverage and reduced demand for the issuer's goods or services.

8.3.6 Investments in Target Funds

Investors should note that investments in shares or units of target ILS UCIs ("**Target Funds**") may incur costs both at the Subfund level and at the level of the Target Funds. Furthermore, the value of the units or shares in the Target Funds may be affected by currency fluctuations, currency exchange transactions, tax regulations (including the levying of withholding tax) and any other economic or political factors or changes in the countries in which the Target Fund is invested, along with the risks associated with exposure to the emerging markets.

The investment of the Subfunds' assets in units or shares of Target Funds entails a risk that the redemption of the units or shares may be subject to restrictions, with the consequence that such investments may be less liquid than other types of investment.

8.4 Financial Failure of Intermediaries

There is always the possibility that the institutions, including brokerage firms and banks, with which the Subfunds do business, or to which securities have been entrusted for custodial purposes, will encounter financial difficulties that may impair their operational capabilities or result in losses to the Company.

8.5 Hedged Share Class Risk

The hedging strategy applied to hedged Share Classes may vary from one Subfund to another. Each Subfund will apply a hedging strategy which aims to reduce currency risk between the Reference Currency of the respective Subfund and the nominal currency of the hedged Share Class while taking various practical considerations into account. The hedging strategy aims to reduce, however may not totally eliminate, currency exposure.

8.6 Segregated Liability between Subfunds

While the provisions of the Law provide for segregated liability between Subfunds, these provisions have yet to be tested in foreign courts, in particular, in satisfying local creditors' claims. Accordingly, it is not free from doubt that the assets of any Subfund of the Company may be exposed to the liabilities of other Subfunds of the Company.

Investors should note that there is no segregation of liabilities between the individual Share Classes with a Subfund. Hence, there is a risk that under certain circumstances, hedging transactions in relation to a hedged Share Class could result in liabilities affecting the Net Asset Value of the other Share Classes of the same Subfund. In such case assets of other Share Classes of such Subfund may be used to cover the liabilities incurred by the hedged Share Class.

8.7 Risks specific to certain financial instruments

8.7.1 Risks associated with ILS Instruments

Insurance-Linked Instruments and Derivatives

The Company primarily invests in insurance-linked instruments and derivatives; therefore, the performance of the Company is contingent on the occurrence or non-occurrence of a specific insurance events. There are many different types of insurance events, but they are generally characterised by frequency (how often the event happens) and severity (how costly the event is when it happens). The estimated severity and frequency of different insurance risks are based on historical data, risk models using simulation and stochastic calculations and actuarial analysis.

There is no guarantee that the actual insurance losses incurred will turn out to be in line with expectations or models. The result of the actual insurance losses incurred may have a material, adverse effect on the Subfunds. The Net Asset Value of the Subfunds can be expected to fluctuate among others (i) in the event of the insurance events or (ii) reflecting market expectations of insurance events that could potentially impact the insurance contracts to which the Subfunds have exposure. The occurrence of such insurance events (such as but not limited to major earthquakes, hurricanes or other natural and non-natural catastrophic events) is inherently unpredictable. The Company may invest in ILS Instruments related to the underlying risks covered by a single or few counterparties such as insurers and reinsurers. In addition, the Company may become significantly concentrated due to investment in instruments related to a single or series of catastrophic events. Therefore, the Company could be subject to significant losses, which may be disproportionate to market movements, if such investments decline in value or are otherwise adversely affected, including by default of the counterparty. At any given

time, the Company may only have exposure to a small number of underlying insurance contracts and if an insurance event were to happen with respect to an insurance contract, the losses for the Company or one of its Subfund may be substantial.

Catastrophes

The Company may have substantial exposure to loss resulting from natural or non-natural disasters, which can be caused by various events. Events which might result in an increase in the likelihood and/or severity of such events (for example, major earthquakes or hurricanes) are inherently unpredictable and could materially adversely affect the performance of the Subfunds. The impact of an event may be difficult to value for a long period of time and the determination of the Net Asset Value of the Subfunds may need to be suspended during such period. Further, it could have a material adverse effect on the Subfunds' ability to obtain or retain underlying investments. Although the Company may attempt to manage certain losses and certain risks it may not be successful in doing so.

Unusual Clustering of Independent Insurance Triggering Events

Whilst the Company intends to diversify the portfolios of the Subfunds among many independent insurance risks, an unusual clustering of independent insurance triggering events may be detrimental to the Subfunds' performance. An example of such unusual clustering of independent insurance triggering events occurred during the months of August and September of 2017, when three major hurricanes made landfall in the U.S. and U.S. territories.

Reinsurance contracts and quota share arrangements

The Portfolio may gain exposure to reinsurance contracts and other private reinsurance transactions through investment in preference shares, notes, swaps or other instruments related to (re)insurance companies or special purpose insurers. (Re)insurance companies may seek to reduce their risk by ceding all or a portion of their original risks through reinsurance transactions. The reduction of risk involves the transfer of insurance risk from the insurer (the cedant) to another entity (typically a reinsurer). In consideration for the premium paid by the cedant, the reinsurer agrees to indemnify the cedant for all or part of the losses attributable to the cedant's specific insurance policies. Risk may be further transferred from reinsurer to reinsurer in the retrocessional reinsurance market. Certain transactions may also require that a specified index or parameter trigger level condition be satisfied. Reinsurance contracts may be written on a rated basis by a rated reinsurance company or on a fully collateralized basis, whereby a reinsurer secures its obligation to the cedant by posting collateral to a trust account from which claims may be paid. In the latter case, following an insurance event, collateral may become "locked" for extended periods of time as determining losses under the reinsurance contract may be a difficult or protracted process. Such transactions are highly illiquid and the securities, if any, linked to such transactions are often privately issued and not traded on any exchange. A reinsurer in a reinsurance transaction will "follow the fortunes" of the ceding insurer with respect to the underlying policies and will therefore be subject to the underwriting and claims management operations of the ceding insurer. Reinsurance transactions may involve significant brokerage fees, risk transformation costs, fronting fees and other transaction related costs.

Risks Associated with Catastrophe Bonds

Catastrophe ("cat") bonds are a way for insurers, reinsurers, corporations and government entities that have risks associated with catastrophe events and disasters to transfer those risks to the capital market in securities format. A typical cat bond transaction involves the creation of a special purpose vehicle that provides protection to a ceding company or counterparty against the risk of specified natural or non-natural catastrophes or events and issues floating rate notes, the proceeds of which serve as collateral to secure the special purpose vehicles obligations. More specifically, the obligation of the special purpose vehicle to repay principal is contingent on the occurrence or non-occurrence of whatever catastrophic event or events are specified by the offering. Cat bonds can provide coverage for a broad array of perils utilising an indemnity, index, modeled loss or parametric trigger. An investment in cat bonds is subject to special risks, including the following:

- Limited Resources of Issuers: The issuers of cat bonds often are thinly capitalised, special-purpose entities that do not have ready access to additional capital. In the event of unanticipated expenses or liabilities, such entities may not have the resources available to pay such expenses or liabilities or the required interest and/or principal on their issued securities.
- Investments of Issuers: The ability of issuers of cat bonds to provide the expected investment returns on their issued securities is based in part on such entities' investments, which may be subject to credit default risk, interest rate risk and other risks.
- Regulation: Entities that issue cat bonds may be subject to substantial regulation of their insurance and other activities. Such regulation can lead to unanticipated expenses that may result in such an entity being unable to satisfy its obligations, including those related to its issued securities. Conversely, because such entities often are domiciled in non-US jurisdictions, such entities may not be subject to the same degree of regulatory oversight to which investors may be accustomed to seeing issuers and insurance companies subject in the US Similarly, because such entities often are subject only to the laws of non-US jurisdictions, it could be difficult for an investor in such an entity to make a claim or enforce a judgment against the entity or its directors or officers.
- Subordination; No Recourse: Cat bonds often are subordinated to other obligations of the issuer, such as those obligations to a ceding insurer. Consequently, if such an entity incurs unexpected expenses or liabilities in connection with its activities, the entity may be unable to pay the required interest and/or principal on its issued securities. In particular, cat bonds are issued without recourse. As a result, if an issuer of a cat bond defaulted on its obligations under the cat bond, an investor would have no recourse to recover any amount of the principal invested to purchase the cat bond.
- Lower or No Ratings: Cat bonds may receive low ratings or be unrated by rating agencies. Consequently, such securities may be relatively illiquid and subject to adverse publicity and investor perceptions, any of which may act to depress prices.

Unregulated ILS Instruments

ILS Instruments are not offered or traded on exchanges, and investors in such instruments do not benefit from the regulatory protections of such exchanges, the SEC or other governmental or regulatory authorities in any jurisdiction. The ILS Instruments purchased may be unrated, or be rated BBB or lower by Standard & Poor's Corporation ("**S&P**") or Baa or lower by Moody's. Securities rated BBB or Baa are generally regarded as having adequate capacity to pay interest and repay principal, but may have some speculative characteristics. Lower-rated securities (rated below Baa3 by Moody's or BBB- by S&P) may have speculative characteristics (including the possibility of default or bankruptcy of the issuers of such securities, market price volatility based upon interest rate sensitivity, questionable creditworthiness and relative liquidity of the secondary trading market).

Availability of Suitable Investment Opportunities

The activity of identifying, completing and realising an attractive investment opportunity is highly competitive and involves a high degree of uncertainty. The Subfund will compete for investment opportunities with many other investors as well as established reinsurance companies, some of which may have greater resources than the Fund. Such competitors may include other private investment funds, as well as individuals, insurance and reinsurance companies, financial institutions and other institutional investors. Additional funds with similar investment objectives may be formed in the future by other unrelated parties. In addition, the availability of investment opportunities generally will be subject to market conditions, as well as, in some cases, the prevailing regulatory or political climate. Therefore, identification of attractive investment opportunities (and in particular, given the Subfund's intention to invest primarily in a predefined universe) is difficult and involves a high degree of uncertainty, and competition for such opportunities may become more intense.

Credit Risk of the Collateral

When investing into reinsurance contracts, the invested capital will typically be deposited in a dedicated trust account, pursuant to a trust agreement, that serves to collateralise the limits of each relevant reinsurance contract. Assets in each trust account will be invested in permitted investments as per the trust account investment guidelines established and varied from time to time. Permitted investments normally exhibit restrictions in terms of credit quality and are often money market funds that invest in short-term money market securities backed by highly rated sovereign issuers (e.g., US Treasury Bills). However, the value of any collateral may decline in value or be insufficient to meet the issuer's obligations, which could lead to the Subfund being adversely affected.

Downgrade of the Ratings of Fronting Reinsurer

Ratings have become an increasingly important factor in establishing the competitive position of insurance and reinsurance companies. The objective of these rating systems is to provide an opinion of an insurer's or reinsurer's financial strength and ability to meet ongoing obligations to its policyholders. If a fronting reinsurers' financial strength ratings are reduced from their current levels by one or more of these agencies, such competitive position in the reinsurance industry could suffer and it would be more difficult to market its own products. A downgrade, therefore, could result in a substantial loss of business to a fronting reinsurer, as ceding companies and brokers move to other reinsurers with higher ratings. If a fronting reinsurer is unable to write and cede the volumes as contemplated by the relevant quota share agreement the Subfund's performance and overall liquidity may be adversely affected. The Portfolio Manager cannot give any assurance regarding whether or to what extent any of the rating agencies may downgrade any fronting reinsurer's ratings in the future.

Liquidity Risks

Investments that lack liquidity and/or a readily assessable market value will generally be carried on the books of the Subfund at fair value (which may be approximated by cost) as reasonably determined by the Central Administration under the responsibility of the AIFM. There is no guarantee that the fair value will represent the value that will be realised by the Subfund on the eventual disposition of the investment or that would, in fact, be realised upon an immediate disposition of the investment in connection with redemption requests, adverse market developments or other factors.

To mitigate the liquidity risk in relation to the mitigation of the redemption risk the AIFM has defined specific mechanism to cope with the lack of liquidity in the case of large redemptions. The different procedures are described in Chapter 11 'Redemption of Shares'.

Cyclical Fluctuations

The property catastrophe reinsurance business has historically been a cyclical industry, with significant fluctuations in operating results due to competition, catastrophic events, levels of reinsurance capacity, general economic, financial and social condition, legislative initiatives and other factors. This cyclicality has produced periods characterized by intense price competition due to excess underwriting capacity as well as periods when shortages of capacity permitted favorable premium levels. In addition, increases in the frequency and severity of losses suffered by reinsurers can significantly affect these cycles. It is difficult to predict the timing of such events with certainty or to estimate the amount of loss that any given event will generate. The Portfolio can be expected to be exposed to the effects of such cyclicality. The property reinsurance market may experience periods of declining risk-adjusted margins and expanding coverage terms. Reinsurance rates have and may in the future come under pressure due to availability of increased levels of capital and significant profits generated as a result of relatively low insurance losses. The direction of market conditions is difficult to predict. Adverse market conditions may lead to a significant reduction in property and casualty risk margins, less favorable policy terms and/or less premium volume.

Risks of Applicability of Insurance Laws

Many forms of ILS Instruments have features, and an investment return, based on the occurrence of events which traditionally are the subject of insurance. It is, therefore, possible that insurance regulatory authorities or courts in different jurisdictions could determine that the purchase or holding of such instruments constitutes the conduct of the business of insurance or reinsurance. This may require the Company to obtain and maintain various insurance licences or, in the event that the Company is not able to comply with such obligations, the Company may be subject to regulatory and legal action.

Limited Ability to Hedge

Hedging may not be possible for certain of the insurance contracts to which the Subfunds may be exposed because

there may not be "negatively correlated" risks. The principal means of controlling overall risk exposure in the risk linked market is by diversification. However, the Subfunds may indirectly be invested in concentrated insurance-linked event risks.

Unpredictability of Risk; Models and Data Risk

The type, frequency and severity of catastrophic and insurance-related events associated with ILS Instruments are difficult or impossible to predict. The Portfolio Manager will rely heavily on quantitative and systematic models (both those supplied by third parties and proprietary models developed by the Portfolio Manager) and information and data supplied by third parties ("**Models and Data**"). Models and Data can be used to construct sets of transactions and investments, to value underlying investments or potential underlying investments (whether for trading purposes, or for the purpose of determining the Net Asset Value of the Subfunds), to provide risk management insights, and to assist in hedging exposure.

When Models and Data prove to be incorrect, misleading or incomplete, any decisions made in reliance thereon expose the Subfunds to potential risks. For example, by relying on Models and Data, the Portfolio Manager may be induced to gain exposure to certain investments at prices that are too high, to reduce exposure to certain other investments at prices that are too low, or to miss favourable opportunities altogether. Similarly, any hedging based on faulty Models and Data may prove to be unsuccessful.

Long-Term Investments

The Portfolio Manager may pursue investment opportunities for the Subfunds that seek to maximise asset value or create market opportunities on a long-term basis. In pursuing such long-term strategies, the Subfunds may forego value in the short term or temporary investments in order to be able to avail the Subfunds of additional and/or longer-term opportunities in the future. Consequently, the Subfunds may not capture maximum available value in the short term, which may be disadvantageous, for example, for Shareholders who redeem all or a portion of their Shares before such long-term value may be realised by the relevant Subfund.

Illiquidity of Investments and Risk Associated with Cedant's Control Over Collateral and Loss Reserves

Investments in insurance-linked instruments can be difficult to sell quickly, which may affect the value of the Subfund and, under extreme market conditions, its ability to meet redemption requests upon demand. The secondary market for insurance-linked instruments may experience limited liquidity. In situations where a large catastrophe has occurred or appears likely to occur, liquidity for potentially affected insurance-linked instruments may be diminished or completely eliminated.

In addition, in connection with collateralised reinsurance contracts, funds from the Subfund may be deposited directly or indirectly in trust for the benefit of the Ceding Reinsurer or the front reinsurer to collateralise obligations under the reinsurance contract. At the expiration of a reinsurance contract, the release of collateral is governed by an obligations or collateral release clause contained within the reinsurance contract. Where there have been losses, collateral may be required to continue to be held in the relevant trust account as a reserve. In addition, even if there are no incurred losses under the reinsurance contract, the obligations or collateral release clause may call for the retaining of all or part of the collateral to serve as a buffer against the deterioration of claims events that are reserved below the attachment point of the reinsurance contract at the expiration date. There may be unforeseen delays in allowing funds released from a trust account to be used to collateralise trust accounts for subsequent periods.

Loss Development and Run-off Risk

Despite the Portfolio Manager's efforts, it is possible that losses could manifest for the Subfund in ways that the Portfolio Manager does not anticipate and that the Portolio Manager's risk mitigation strategies are not designed to effectively address. Various provisions in the transactions conducted on behalf of the Subfund, negotiated to limit the insurance related risks the Subfund is exposed to, such as limitations or exclusions from coverage, may not be enforceable in the manner that the Portfolio Manager intends, as it is possible that a court or regulatory authority could nullify or void an exclusion or limitation, or legislation could be enacted modifying or barring the use of these exclusions and limitations.

The principal costs associated with insurance-linked instruments are claims and associated reserves. It may take years before all claims that have occurred will be reported by trading counterparties and settled directly or indirectly by the Subfund Some of these liabilities and claims might be subject to dispute, arbitrage, contentious administrative proceedings with cedants. Such matters are subject to many uncertainties, and the outcome and the timing of resolution are often difficult to predict, particularly in the earlier stages of a case. There are also situations where the Subfund or one of its trading counterparties (incl. risk transformers) may directly or indirecty enter into a settlement agreement. This may occur in order to avoid the expense, management distraction or reputational implications of continuing to contest liability, even for those matters for which the Subfund believes it should be exonerated. The uncertainties inherent in all such matters may affect the amount and timing of any potential outflows with respect to which provisions have been established and other contingent liabilities. The Subfund may make provisions for such matters brought against it when, in the opinion of the Board of Directors, after seeking for example legal advice, it is more likely than not that the Subfund has a present legal or constructive obligation as a result of past events, it is possible that an outflow of resources will be required, and the amount can be reliably estimated. Where these factors are otherwise satisfied, a provision may be established for claims and associated costs that have not yet been asserted against the Subfund, but are nevertheless expected to be, based on the Subfund's experience with similar asserted claims. If any of those conditions is not met, such matters result in contingent liabilities. If the amount of an obligation cannot be reliably estimated, a liability exists that is not recognised even if an outflow of resources is possible. Accordingly, no provision is established even if the potential losses with respect to such matters could be significant. Significant developments relating to a matter that occurs after the relevant annual reporting period, but prior to the issuance of the Subfund's audited annual financial statements, which affect the Subfund's assessment of the provision for such matter (because, for example, the developments provide evidence of conditions that existed at the end of the reporting period), are adjusting events after the reporting period and typically reported in the Fund's annual financial statements for the reporting period under "Significant Events".

Although the Portfolio Manager believes that liabilities (incl. reserves defined by the independent reserving actuary) reported in the Subfund's monthly statements relating to the

determination of the Net Asset Value or the Subfund's audited annual financial statements of the Subfund for unpaid losses are adequate and prudent, the Portfolio Manager will not know whether collateral and cash buffers to cover these liabilities (incl. contingent liabilities off-balance sheet) are sufficient until well after the end of the applicable monthly or annual financial reporting period. Estimating insurance claim costs and potential adverse development is inherently imprecise. It is possible that significant claims and related costs may emerge or develop in the future from investments made on behalf of the Subfund in the past. As industry practices and legal, social, and other environmental conditions change, unexpected and unintended issues related to claims and coverage may emerge, including new or expanded theories of liability. The Subfund will also incur directly or indirectly continued associated costs for positions in run-off during the run-off phase until contracts are fully terminated, commuted, novated and/or settled and special purpose vehicles, companies and segregated accounts and alike associated with the Subfund are fully wound-down and liquidated. These run-off and liquidation costs may include risk transformation costs, legal costs, independent reserving actuarial consulting costs, etc.

These or other changes could lead to incremental costs, reserves and liabilities as well as may impose new financial obligations on the Subfund by extending coverage beyond the initial investment intent. In some instances, these changes may not become apparent until sometime after the Subfund has invested in an insurance-linked instrument. In certain instances, the Subfund may state in its financial statements that the Subfund has established a provision, and in other instances, the Subfund makes no such statement. In some cases, the Subfund might be subject to confidentiality obligations that preclude such disclosure. With respect to the matters for which the Company does not state whether the Subfund has established a provision, either: (a) the Subfund has not established a provision, in which case the matter is treated as a contingent liability under the applicable accounting standard; or (b) the Subfund d has established a provision but expects disclosure of that fact to seriously prejudice its position with other parties in the matter as such disclosure would reveal what the Subfund believes to be the probable and reliably estimable outflow of resources.

As a result, the full extent of liability under contracts that the Subfund is exposed to may not be known for many years after an investment is made. It may take years until trading counterparties are willing to commute outstanding insurance-linked contracts and to release remaining locked collateral. These inherent factors have a significant impact on the run-off of insurance-linked transactions, wind-down of portfolios and funds which may take years. As a result, thereof, inherent to the illiquid nature of certain insurance-linked instruments, the liquidation proceeds following redemptions may be distributed at the full and sole discretion of the Directors in tranches over years as cash become available.

Uncertain Exit Strategies

Due to the less liquid nature of certain of the positions which the Subfunds are expected to acquire, the Portfolio Manager may be unable to predict with confidence what the exit strategy will ultimately be for any of such given positions, or that one will definitely be available. Exit strategies, which appear to be viable when an investment is initiated, may be precluded by the time the investment is ready to be realised due to liquidity, economic, legal or other factors, including issuer-specific factors.

Risk of unforeseen losses due to unforeseen claims

The Company may be exposed to additional losses if the policies underlying ILS Instruments become subject to claims that are typically not covered, or contemplated to be covered, by the policies. As industry practices and legal, judicial, social and other environmental conditions change, unexpected issues related to claims and coverage may emerge, particularly in response to certain insurance events. These issues may adversely affect reinsured business by either creating or extending coverage beyond the cedant's underwriting intent or by increasing the number or size of claims thereunder. The effects of unforeseen emerging claim and coverage issues are extremely hard to predict and could have material effects on the reinsured business and, as a result, increase the likelihood and the size of the loss payments under the reinsurance agreements. The above risk may be illustrated by the legal and regulatory actions that emerged in the aftermath of Hurricane Katrina and Superstorm Sandy. Certain property insurance coverages provided by cedants include coverage for wind-driven water damage and have generally excluded flood damage. However, court decisions in certain U.S. states have differed in their interpretation of the type of water damage covered by typical property insurance policies, drawing distinctions between water damage resulting from flooding and water damage resulting from wind-driven water surges or the ingress of water subsequent to wind damage. These decisions have raised issues concerning causation and apportionment between covered and non-covered damages. In the event that legal or regulatory interpretations override either the industry standard flood exclusion clauses in homeowner policies or the specific flood exclusions included in insurance policies underlying reinsured business, the cedant could experience additional claims and losses than it otherwise would have experienced had the courts or regulators interpreted the policies consistently with the cedant's and its clients' underwriting intent. Changes in other legal theories of liability relating to the reinsured business could also adversely impact the cedant's loss experiences. Such adverse developments in claims could result in negative performance impact for the Subfund. In addition, there can be no assurance that various provisions of policies will be enforceable as written or in the manner intended. Disputes relating to coverage and legal forum under certain insurance-linked agreements and underlying policies may arise, and one or more provisions may be interpreted in a way that is unfavourable to the Company and it Subfunds. Legal action over different interpretations of legal wording and coverages could lead to delays in claim settlements.

Reliance on certain loss-related information

The determination of losses under certain ILS Instruments is often based on reports and may be based upon information provided by the issuer of such instruments or by an independent source (such as an index). Where an ILS Instrument is based on an index, the source providing such index may be under no obligation to correct or update the index in the event of errors or subsequently discovered information. As a result, information provided by third party indices or similar sources may differ materially from the final industry losses or industry loss estimates reported by state commissioners or other authorities. In light of the foregoing, there can be no assurance that relevant information provided by outside sources will be accurate, and it may not be economically feasible or efficient for the Portfolio Manager to verify or challenge such information.

Potential Reporting Obligations

In connection with beneficial ownership by the Company or by a group that includes the Company of more than 5% of (i) the equity securities of a class that is registered pursuant to Section 12 of the United States Securities Exchange Act of 1934, as amended (the "**Exchange Act**"), (ii) any equity security of an insurance company that would have been required to be registered pursuant to section 12 of the Exchange Act except for the exemption contained in the Exchange Act and (iii) any equity security issued by a closed-end investment company registered under the United States Investment Company Act of 1940 (the "**Equity Securities**"), equity security of a class which is registered pursuant to section 12 of the Exchange Act, or any equity security of an insurance company which would have been required to be so registered except for the exemption contained in section 12(g)(2)(G) of the Exchange Act, or any equity security issued by a closed-end investment, the Company may be required to make certain filings with the SEC. These filings may require disclosure of the identity and background of the purchasers, the source and amount of funds used to acquire the Equity Securities, the purpose of the transaction, the purchaser's interest in the Equity Securities and any contracts, arrangements, understandings or relationships regarding the Equity Securities. In certain circumstances, the Company may be required to aggregate its investment position in certain Equity Securities with the beneficial ownership of such Equity Securities held by a collective investment scheme or other investment vehicle in which the Company has invested, or on behalf of, members of a group that includes the Company, which could require the Company, together with such other parties, to make certain disclosure filings or otherwise restrict the Company's activities with respect to such underlying collective investment scheme's or other investment vehicle's Equity Securities.

In addition, the Company may be obliged to comply with similar reporting obligations in other jurisdictions from time to time.

Hedging Transactions

The Subfunds may utilise financial instruments both for investment purposes and for risk management purposes in order to (i) protect against possible changes in the market value of the Subfunds' investment portfolios resulting from fluctuations in the markets and changes in interest rates; (ii) protect the Subfunds' unrealised appreciation in the value of its investment portfolio; (iii) facilitate the sale of any such investments; (iv) enhance or preserve returns, spreads or appreciation on any investment in the Subfunds' portfolios; (v) hedge against a directional trade; (vi) hedge the interest rate, credit or currency exchange rate on any of the Subfunds' investments; (vii) protect against any increase in the price of any investments the Subfunds anticipates purchasing at a later date; or (viii) act for any other reason that the Portfolio Manager deems appropriate. The Subfunds will not be required to hedge any particular risk in connection with a particular transaction or its portfolios generally. While the Subfunds may enter into hedging transactions to seek to reduce risk, such transactions may result in a poorer overall performance for the Company than if it had not engaged in any such hedging transaction. Moreover, it should be noted that the portfolio will always be exposed to certain risks that may not be hedged.

Moreover, Company will not be required to hedge any particular risk in connection with a particular transaction or its portfolios generally. Moreover, it should be noted that the Subfunds will always be exposed to certain risks that may not be hedged.

Each Subfund may invest in financial instruments denominated in non-US currencies, the prices of which are determined with reference to currencies other than the US Dollar. Each Subfund, however, values its financial instruments in US Dollars unless otherwise stated in the Appendix of the Subfund. The Subfund may or may not seek to hedge its non-US currency exposure by entering into currency hedging transactions, such as treasury locks, forward contracts, futures contracts and cross-currency swaps. There can be no guarantee that financial instruments suitable for hedging currency or market shifts will be available at the time when the Subfund wishes to use them, or that hedging techniques employed by the Subfund will be effective. Furthermore, certain currency market risks may not be fully hedged or hedged at all. To the extent unhedged, the value of the Subfund's positions denominated in currencies other than US Dollars will fluctuate with US Dollar exchange rates as well as with the price changes of the investments in the various local markets and currencies. In such cases, an increase in the value of the US Dollar compared to the other currencies in which the Subfund makes investments will reduce the effect of any increases and magnify the effect of any decreases in the prices of the Subfund's investments in their local markets and may result in a loss to the Fund. Conversely, a decrease in the value of the US Dollar will have the opposite effect on the Subfund's non-US Dollar investments.

Reliance Upon Information and Analyses Provided by Other Parties

The Portfolio Manager may rely for some of its analyses on information, in particular, actuarial information, provided by other parties. This could be either in an offering memorandum (listed securities) or via submission data or direct due diligence with the counterparty (privately negotiated transactions). These analyses, due diligence and data may be supported by the use of third-party firms of actuarial consultants. Both the vendor and the actuarial consultants are required to provide information that they believe to be accurate and to provide opinions that are true and fair. Nevertheless, there is no guarantee that this will be the case and the relevant Subfunds' performance may suffer as a result.

Supplemental information regarding Risk transformers

The Company may, and generally expects to, gain exposure to certain ILS Instruments through fronting arrangements with Related Ceding Reinsurers through risk transformers such as Bernina Re Ltd ("Bernina Re"), a Bermuda-domiciled Class 3A licensed reinsurer regulated by the Bermuda Monetary Authority. These arrangements allow the Company to access reinsurance risks which are ordinarily only accessible to rated and/or regulated (re)insurers. Bernina Re is wholly owned by Bernina Re Holding Ltd. Bernina Re Holding Ltd. has been capitalized by various investment funds managed by the Portfolio Manager. Any profits earned by Bernina Re for risk transformation and other services on behalf of the Portfolio and other funds managed by the Portfolio Manager are for the ultimate benefit of these funds. Such risk transformers operate independently from the Portfolio Manager and its employees, except senior members of the Portfolio Manager may hold professional directorship in these risk transformers and act as member of the Board of Directors as for example Niklaus Hilti who is a member of the Board of Directors of Bernina Re Ltd and Bernina Re Holding Ltd. The Portfolio Manager does not provide investment advice to Bernina Re, but may presents

reinsurance risk opportunities to Bernina Re which are then independently assessed by Bernina Re. Bernina Re performs the sourcing, underwriting, risk pricing and modelling of certain transactions for the Company and other funds managed by the Portfolio Manager. In doing so, Bernina Re cooperates very closely with the Portfolio Manager including its Investment team. In connection with any such transaction and negotiating the terms thereof, Bernina Re will act in its own interests and not necessarily in the best interests of the Company. Transactions with risk transformers such as Bernina Re may give rise to certain conflicts of interest. The costs associated with such risk transformation are generally borne by the Company's Subfunds.

Alignment of Interest

In a transaction for an insurance-linked instrument or derivative, the interests of the seller and the buyer may not be aligned, and the seller may wish to sell for reasons unknown to the buyer. Although considerable due diligence will be conducted and the seller has certain legal responsibilities, the relevant Subfund may be adversely selected against. There may be situations where the historical data or actuarial analyses do not fully reflect a development that the seller suspects may be or may at some point in the future turn out to be unfavourable. Although the Portfolio Manager will conduct what it believes to be appropriate due diligence, there is a risk of adverse selection.

Allocation of Broken Deal Expenses

A Subfund may be required to bear fees, costs and expenses related to potential investments that are considered for the Subfund by the AIFM and/or the Portfolio Manager or Euler Affiliates but not consummated, such as breakup fees or expenses in connection with a potential investment that is expected to be made by the Subfund but is abandoned before it is made ("Broken Deal Expenses").

Although the AIFM and/or the Portfolio Manager will endeavour to allocate such fees, costs and expenses on a fair and reasonable basis, there can be no assurance that such fees, costs and expenses will in all cases be allocated appropriately.

Risk of Post Disposition Contingent Liabilities

In connection with the disposition of an Investment, a Subfund may be required to make certain representations about such Investment. The Subfund also may be required to indemnify the purchasers of such Investment to the extent that any such representations are inaccurate. These arrangements may result in the incurrence of contingent liabilities for which the Subfund may or may not establish reserves or escrow accounts. Investors may be required to return amounts distributed to them to fund obligations of the Subfund, including indemnity obligations, subject to certain limitations.

In addition, at the time of disposition of an individual asset, a potential buyer may claim that it should have been afforded the opportunity to purchase the asset or alternatively that such buyer should be awarded due diligence expenses incurred or statutory damages for misrepresentation relating to disclosures made, if such buyer is passed over in favour of another as part of a Subfund's efforts to maximize sale proceeds. Similarly, buyers of a Subfund's assets may later bring a claim against the Subfund under various damage theories, including those sounding in tort, for losses associated with latent defects or other problems not uncovered in due diligence.

Credit Facilities

A Subfund may obtain one or more credit facilities in order to (i) facilitate investments by the Subfund, (ii) fund establishment and operating costs, or other obligations of the Subfund or Investments or (iii) otherwise carry out the business of the Subfund. If the Subfund obtains a credit facility, it is generally expected that the Subfund's interim capital needs would be satisfied through borrowings by the Subfund under the credit facility, including those used to pay interest on credit facilities, would generally be expected to be "batched" together into larger, less frequent capital calls (although actual timing and amounts may vary). The interest expense and other fees, costs and expenses of or related to any such borrowings will be expenses of the Subfund and, accordingly, will decrease net returns of the Subfund. Moreover, it is possible that a counterparty, lender or other unaffiliated participant in credit facilities (or otherwise in connection with portfolio investments) requires or desires facing only one fund entity or group of entities, which may result in the Subfund, or an alternative investment vehicle being jointly and severally liable for the full amount of such applicable obligation or the Subfund being solely liable with respect to its own and such alternative investment vehicle's share of the applicable obligation (or vice versa). In addition, although the AIFM and/or the Portfolio Manager will, in good faith, allocate the related repayment obligations and other related liabilities arising out of such credit facilities among the Subfund and the alternative investment vehicles of the Subfund such entities will, in such circumstance, be subject to each other's credit risk. Tax-exempt prospective investors should note that the entry into, or the use of, the financing arrangements by the Subfund may create "unrelated business taxable income". In addition, the AIFM and/or the Portfolio Manager may be subject to conflicts of interest in allocating such repayment obligations and other related liabilities. A credit facility may be secured by the assets of a Subfund.

8.7.2 Use of Derivative Contracts

The Subfunds may invest in any kind of derivatives permissible under Luxembourg laws and regulations. Investments in derivatives may take place in order to match the Subfund's risk return profile or for investment purposes. In order to match the long-term risk return profile, Subfunds may enter into any kind of derivatives, such as *inter alia* inflation linked derivatives or interest rate derivatives either directly or indirectly. *Inter alia*, in order to protect its present and future assets and liabilities against the fluctuation of currencies, each of the Subfunds may enter into transactions the object of which is the purchase or the sale of forward foreign exchange contracts, the purchase or the sale of call options or put options in respect of currencies, the purchase or the sale of currencies forward or the exchange of currencies on a mutual agreement basis.

Generally, derivatives are financial contracts whose value depends upon, or is derived from, the value of an underlying asset, reference rate or index, and may relate to stocks, bonds, interest rates, currencies or currency exchange rates, commodities, and related indexes.

The Company may decide not to employ any of these strategies and there is no assurance that any derivatives strategy used by any Subfund will succeed. The Subfunds' use of derivative instruments involves risks different from, or possibly greater than, the risks associated with investing directly in securities and other more traditional investments. Particular derivative instruments such as without limitation put

options, call options and forward contracts may be associated with specific risks, which are not discussed below. The following provides a general discussion of important risk factors relating to all derivative instruments that may be used by the Subfunds.

(a) Management Risk

Derivative products are highly specialized instruments that require investment techniques and risk analyses different from those associated with stocks or bonds. The use of a derivative requires an understanding not only of the underlying instrument but also of the derivative itself, without the benefit of observing the performance of the derivative under all possible market conditions.

(b) Credit Risk

The use of a derivative instrument involves the risk that a loss may be sustained as a result of the failure of the counterparty to make required payments or otherwise comply with the contract's terms. Additionally, credit default swaps could result in losses if the respective Subfund does not correctly evaluate the creditworthiness of the company on which the credit default swap is based.

(c) Liquidity Risk

Liquidity risk exists when a particular derivative instrument is difficult to purchase or sell. If a derivative transaction is particularly large or if the relevant market is illiquid (as is the case with many privately negotiated derivatives), it may not be possible to initiate a transaction or liquidate a position at an advantageous time or price.

(d) Leverage Risk

Because many derivatives have a leverage component, adverse changes in the value or level of the underlying asset, reference rate or index can result in a loss substantially greater than the amount invested in the derivative itself. Certain derivatives have the potential for unlimited loss, regardless of the size of the initial investment. When the Subfunds use derivatives for leverage, investments in the Subfunds will tend to be more volatile, resulting in larger gains or losses in response to market changes.

(e) Lack of Availability

Because the markets for certain derivative instruments (including markets located in foreign countries) are relatively new and still developing, suitable derivatives transactions may not be available in all circumstances for risk management or other purposes. Upon the expiration of a particular contract, the Board of Directors and/or the AIFM (as the case may be) may wish to retain the respective Subfund's position in the derivative instrument by entering into a similar contract, but may be unable to do so if the counterparty to the original contract is unwilling to enter into the new contract and no other suitable counterparty can be found. There is no assurance that the Subfunds will engage in derivatives transactions at any time or from time to time. The Subfunds' ability to use derivatives may also be limited by certain regulatory and tax considerations.

(f) Market and Other Risks

Like most other investments, derivative instruments are subject to the risk that the market value of the instrument will change in a way detrimental to the Subfunds' interest. If the Board of Directors and/or the AIFM (as the case may be) incorrectly forecasts the values of securities, currencies or interest rates or other economic factors in using derivatives for the Subfunds, the Subfunds might have been in a better position if they had not entered into the transaction at all. While some strategies involving derivative instruments can reduce the risk of loss, they can also reduce the opportunity for gain or even result in losses by offsetting favourable price movements in other Subfunds' investments. The respective Subfund may also have to buy or sell a security at a disadvantageous time or price because the Subfund is legally required to maintain offsetting positions or asset coverage in connection with certain derivatives transactions.

(g) Other Derivative Risks

Other risks in using derivatives include the risk of mispricing or improper valuation of derivatives and the inability of derivatives to correlate perfectly with underlying assets, rates and indexes. Many derivatives, in particular privately negotiated derivatives, are complex and often valued subjectively. Improper valuations can result in increased cash payment requirements to counterparts or a loss of value to the respective Subfund. Also, the value of derivatives may not correlate perfectly, or at all, with the value of the assets, reference rates or indexes they are designed to closely track. In addition, the Subfunds' use of derivatives may cause the Subfunds to realise higher amounts of short-term capital gains than if the Subfunds had not used such instruments.

8.7.3 Over the Counter Transactions

Certain markets in which the Subfunds and/or investment structures held by the Subfunds may affect their transactions are "over-the-counter" or "interdealer" markets. The participants in such markets are typically not subject to credit evaluation and regulatory oversight as are members of "exchange-based" markets. To the extent a Subfund invests in swaps, derivative or synthetic instruments, or other over-the-counter transactions, on these markets, such Subfund may take credit risk with regard to parties with whom it trades and may also bear the risk of settlement default.

8.7.4 Equities

The risks associated with investments in equity (and equity-type) securities include significant fluctuations in market prices, adverse issuer or market information and the subordinate status of equity in relation to debt paper issued by the same company. Potential investors should also consider the risk attached to fluctuations in exchange rates, possible imposition of exchange controls and other restrictions.

8.7.5 Borrowings and Securities Lending

At Subfund level, each Subfund may from time to time enter into securities lending transactions for the purpose of efficient portfolio management. The decision to enter into securities lending transactions (or to stop securities lending transactions, temporarily or permanently) will be made on the basis of costs and benefits analysis carried out in the best interest of the shareholders of the relevant Subfunds (e.g., at the occasion of large subscriptions or redemptions).

The Subfunds may also borrow funds in accordance with the restrictions specified in the relevant Appendix, provided the terms of such additional borrowings are consistent with market standards. The Subfunds will therefore become subject to the risks associated with debt financing. These include the risk that a Subfund's available funds will be insufficient to meet required payments, interest rate risk and the risk that existing indebtedness will not be able to be refinanced or that the terms

of such refinancing will not be as favourable as the terms of existing indebtedness.

The use of borrowings introduces a number of risks to the Subfund. These include, but are not limited to, the risk that the Subfund may be unable to meet its repayment or interest obligations when due, particularly in adverse market conditions; interest rate risk, where rising rates may increase the cost of borrowing; and refinancing risk, whereby the Subfund may be unable to extend or replace existing borrowing on commercially acceptable terms or at all. If a Subfund is required to repay indebtedness under unfavourable market conditions, it may be forced to dispose of assets at depressed values, which could result in losses and have a material adverse effect on the Net Asset Value of the Subfund.

While securities lending can provide incremental returns, it also entails certain risks. These include counterparty credit risk—i.e., the risk that the borrower may fail to return the securities on the agreed terms or at all—as well as operational and legal risks. Although the lending arrangements will typically require the provision of collateral, there can be no assurance that such collateral will be sufficient to cover losses in the event of counterparty default. In stressed market conditions, liquidity constraints or market dislocations may also impair the ability of a Subfund to recall loaned securities in a timely manner, which may affect the Subfund's ability to meet redemption requests or execute investment decisions.

8.7.6 Emerging Markets

Potential investors should be aware that investment in emerging markets may involve, due to the economic and political development process which some of these countries are undergoing, a higher degree of risk which could adversely affect the value of the investments. Among other things, investment in emerging markets involves risks such as the restriction on foreign investment, counterparty risk, higher market volatility and the illiquidity of the companies' assets depending on the market conditions in certain emerging markets. Moreover, companies may be subject to considerably less state supervision and less differentiated legislation. Their accounting and auditing do not always match the standards utilised in developed markets.

Investments in some emerging countries are also exposed to higher risks in respect of the possession and custody of securities. Ownership of companies is for the most part determined by registration in the books of the company or its registrar (who is not, however, an agent of the Depositary Bank nor liable to the latter). Certificates evidencing the ownership of companies are frequently not held by the Depositary Bank, any of its correspondents or an efficient central depositary. As a result, and due to lack of efficient regulation by government bodies, the Company may lose the possession of or the registration of shares in companies through fraud, serious fault or negligence.

8.7.7 Money Market Instruments

The term "money market instruments" refers to a variety of short-term, liquid investments. Some common types are government bills and notes, which are securities issued by a government; commercial paper, which are promissory notes issued by large companies or financial firms; banker's acceptances, which are credit instruments guaranteed by banks; and negotiable certificates of deposit, which are issued by banks in large denominations. Money market securities can pay fixed, variable, or floating rates of interest. The Subfunds are subject to income risk, where the respective Subfund's income will decline because of falling interest rates. A fund's income declines when interest rates fall, because the fund then must invest in lower-yielding instruments. Because the Subfunds' income is based at least partially on short-term interest rate – which can fluctuate significantly over short periods – income risk is expected to be high.

8.8 Sustainability Risks

Pursuant to the SFDR, the Subfunds are required to disclose the manner in which Sustainability Risks (as defined hereafter) are integrated into the investment decision and the results of the assessment of the likely impacts of Sustainability Risks on the returns of the Subfunds.

Sustainability Risks means an environmental, social or governance event or condition that, if it occurs, could have a material negative impact on the value of the investment. The materiality of Sustainability Risks is determined by the likelihood, magnitude and time-horizon of the risk materializing.

Environmental events or conditions that could result in a sustainability risk generally include climate-related risks due to, for example, global warming and changing weather patterns and extreme weather events such as heatwaves, droughts, floods, storms, hail and forest fires. Those events or conditions can lead to direct loss of production facilities, workforce and parts of the supply chain as well as to increased operating cost from capital expenditure, insurance costs and faster asset depreciation (the risk of such events occurring is often referred to as physical risks). Environmental risks furthermore include risks related to the change to a low-carbon economy. Risk from political measures with respect to fossil fuels or emissions certificates can result in them becoming more expensive or scarce or the substitution of existing products and services with lower emissions options. These risks are generally referred to transition risks.

As regards social events or conditions that could result in a sustainability risk, those include generally but are not limited to health and safety of tenants and employees, human rights violation, poor labour standards, supply chain management issues, deficient employee welfare, data & privacy concerns as well as increasing technological regulation and reliance on new technology infrastructures.

Governance events or conditions that could result in a sustainability risk generally include but are not limited to bribery, corruption, tax fraud, tax evasion, high management incentives, board composition and effectiveness as well as management quality and alignment of management with shareholders.

Sustainability Risks can be understood as a sub-category of traditional risk types (e.g. credit-, market-, liquidity-, operational-, and strategy risk) and are identified and managed in the context of risk management processes of the AIFM.

As Sustainability Risks differ between asset classes and investment styles, they are defined at Subfund level. The Portfolio Manager identifies Sustainability Risks by considering sector, industry and company exposure of the portfolio either in absolute terms or relative to the benchmark. Proprietary analysis may be supported by specific frameworks which define industry-specific ESG factors material to a company.

The impacts following the occurrence of a Sustainability Risk may be numerous and vary depending on the specific risk, region and asset class. For all Subfunds, Sustainability Risks may result in a negative impact on the returns of the Subfund. Generally, acute and chronic physical risks, new carbon taxes and changing consumer behavior have been identified as being highly relevant. These risks may lead to increased default risks for the investments. Further information is provided in the section "Specific Risk Factors" in the Appendix of the relevant Subfund.

Sustainability risks can adversely affect the Subfunds' returns. The effective management of such risks is crucial for mitigating downside risks on the portfolio's returns as well as the negative impact on the society and the environment at large.

Further information is provided in the section "Specific Risk Factors" of Chapters 26 "Appendices to the Offering Memorandum – The Subfunds " and 27 "SFDR RTS Annexes ".

8.9 Sustainable Investing Risks

Subfunds which consider ESG Factors in their investment decision process and apply the Euler ILS ESG Framework (as defined in the relevant Subfund SFDR Annex, in Chapter 27 "SFDR RTS Annexes") are exposed to specific risks linked to their sustainable investing strategy. In this context and given the nascent nature of ESG /sustainability regulations and guidelines, the AIFM and the Portfolio Managers may need to review the representations that are made in this Offering Memorandum regarding the ESG classifications and descriptions in response to evolving statutory, regulatory or internal guidance or changes in industry approach to classification. As such, any ESG classification mentioned in this Offering Memorandum is therefore subject to change. Since sustainability-related practices differ by region, industry and issue and are evolving accordingly, the practice or the assessment of such sustainability-related practice by the Subfunds, respectively their Portfolio Managers and the AIFM may change over time. Similarly, new sustainability requirements imposed by jurisdictions in which the Portfolio Managers do business and/or in which the Subfunds are marketed may result in additional compliance costs, disclosure obligations or other implications or restrictions on the Subfunds or on their Portfolio Managers and the AIFM. Under such requirements, the Portfolio Managers and the AIFM may be required to classify the Subfunds against certain criteria, some of which can be open to subjective interpretation. Especially their views on the appropriate classification may develop over time, including in response to statutory or regulatory guidance or changes in industry approach and this may include making a change to the classification of the Subfunds. Such change to the relevant classification may require certain actions to be taken, including new investments and disinvestments or new processes to be set up to meet the corresponding classification requirements and capture data about the Subfunds' investments, which may lead to additional cost, disclosure and reporting obligations.

Furthermore, investors shall note that the AIFM and the Portfolio Managers are, wholly or in part, reliant on public and third-party sources of information as well as potentially information produced by the issuer itself. Further, the ability of the AIFM and the Portfolio Managers to verify such data may be limited by the integrity of the data available in respect of the underlying constituents at the relevant point in time and the status and evolution of global laws, guidelines and regulations in relation to the tracking and provision of such ESG data. ESG data derived from private, public and third-party sources of information may be incorrect, unavailable, or not fully updated. Updates may also be subject of a time lag. ESG classification/scoring also reflects the opinion of the assessing party (including external parties, such as rating agencies or other financial institutions). In the absence of a standardized ESG scoring system, each assessing party has therefore its own research and analysis framework. Therefore, ESG scoring or risk levels given by different assessing parties to the same investment can vary greatly. This also applies for certain investments for which the AIFM and the Portfolio Managers may only have limited access to data from external parties in respect of the underlying constituents of an investment, due to, e.g. absence of look-through data. In such cases, the AIFM and the Portfolio Managers will attempt to assess such information on a best-effort basis. Such data gaps could also result in the incorrect assessment of a sustainability practice and/or related sustainability risks and opportunities.

Investors shall also note that the non-financial- / ESG-performance of a portfolio might differ from its financial performance and the AIFM and the Portfolio Managers cannot give any representation as to the correlation of financial and ESG performance. Adhering to a new ESG classification, respectively a change of ESG classification may also lead to transactional costs to reposition the underlying portfolio as well as new disclosure, reporting, compliance and risk management related costs. Following ESG objectives does not necessarily imply suitability for meeting the investor's or client's overall investment objectives, nor any investor/client specific sustainability preferences.

The selection of ILS Instruments according to the pre-defined ESG Factors as per the Euler ILS Framework is subject to certain limitations and raises additional risks that can be described as follows:

Residual ESG risk exposure

While certain reinsurance lines of business are excluded entirely from the relevant Subfund's investment universe, others are limited and/or accepted up to a certain threshold on ILS Instrument level or on Subfund's portfolio level as per the Euler ILS ESG Framework. As a consequence, the relevant Subfund could have an exposure to a line of business that is considered as controversial or not aligned with the Portfolio Manager's ESG principles. Accordingly, it cannot be completely excluded that the Company is exposed to and thereby covers a risk that is controversial or not aligned with the Portfolio Manager's ESG principles and which, if the trigger event attached to such ILS Instruments occurs, could have a negative impact on sustainability factors. In addition, the Company may suffer an economic loss caused by the occurrence of an insurance event that is considered controversial or not aligned with the Portfolio Manager's ESG principles. Investors should be aware that due to limitations to the scope of the information provided as part of the submission and/or offering documentation, a Sponsor that derives directly or indirectly a portion of its revenue from a business line that is not aligned with the Portfolio Manager's ESG principles may nevertheless form part of the Company's investment universe.

Holistic Approach

There are certain key areas to consider when evaluating sustainability performance and policies but also the SDGs. It takes sometimes numerous years, even decades, for climate change efforts by companies to bear fruit, which does not sync with the typical lifetime of ILS Instruments. It is more about

taking a holistic approach toward the evaluation of ILS Instruments and Sponsors and progressively raising the bar for their underwriting criteria and having an open dialogue about sustainability policies and expectations, rather than being fixated solely on specific measures or performance indicators as they may evolve. The insurance linked strategies industry together with other participants in the financial industry is in a unique position to motivate Sponsors and Issuers of ILS Instruments to adopt more transparent, sustainable practices and support their clients in their green transition. As such, the scope and the extent of the ESG-aligned investment process, but also related ESG Factors, exclusions, limitations and related scoring, may be dynamic and/or change and aims to evolve over time.

Lack of common definition and credentials

The absence of a common definition of what constitutes an "ESG" for funds following an insurance linked strategy, and a lack of verification may create undesired risks for the Company. There is a lack of consistency over the completeness and accuracy of ESG data quality and impact which may lead to incremental risks. The Portfolio Manager may face challenges in gathering the data required to ensure that the ESG Factors outlined in the ESG aligned investment process are met. It may also impact the ability of the Company to understand, select and monitor the ESG Factors and Sustainability Risks.

Limitation to Sponsor evaluation

While the Company aims to ensure that the Sponsors of ILS Instruments apply sound governance practices through analyses, engagement and monitoring, such measures are not extended to further stakeholders of the Sponsors such as their business partners, clients, or suppliers, not to other parties involved in the structure of the ILS Instruments (e.g. SPI, bookrunner, structuring agent, modelling firm, actuarial firms and their business parties, clients or suppliers, etc.). It can also not be excluded that sustainability related issues may arise at the level of the Sponsors' stakeholders, which are not evaluated by the Subfunds or the Subfunds have not direct control over.

Beneficiaries of loss pay-outs

The Subfunds generally have no look-through on (re)insurance covers beyond the ILS Instrument and its Sponsor, meaning that for example clients of the respective Sponsor cannot be identified by the Subfunds. As a result, in particular in the case of commercial and industrial reinsurance lines of business, the Subfunds cannot identify the client of the Sponsor who may receive an insurance payment as result of a loss event. Accordingly, the Subfunds cannot guarantee that the principal value of the ILS Instrument is ultimately paid to direct or indirect client(s) of the Sponsor suffering a loss following an insurance event. Accordingly, it is not possible to assess on a look-through basis the Sponsor's clients, business partners, or suppliers for example against the specific ESG Factors applied by the Euler ILS ESG Framework. Investors should note that certain exposure limits are applied on ILS Instrument level or on Subfund's portfolio level.

Use of pay-out proceeds

In addition to the above, because the Subfunds typically cannot assess on a look-through basis the beneficiaries of ILS Instruments beyond the Sponsor against the ESG standards and criteria applied by the Euler ILS ESG Framework, the Subfunds have no control over the use of the ILS Instrument payout proceeds and can thus not, and has no responsibility to, ensure that the payout proceeds of ILS Instruments are used for the benefit of a sustainable purpose. The ultimate use of the ILS Instrument payout proceeds has no impact on the compliance of the Subfunds with the Euler ILS ESG Framework.

No look-through of collateral investments

Although the use of collateral investments in ILS Instrument is assessed as part of the Euler ILS ESG Framework, the Portfolio Manager has no control over the ultimate use of the collateral investment chosen by the Sponsor. The ultimate use of collateral investments has no impact on the compliance of the Subfunds with the Euler ILS ESG Framework.

ESG performance of Sponsors

Although Sponsors are screened and assessed against the Euler ILS ESG Framework and monitored on an ongoing basis, the Subfunds cannot guarantee or commit to the ESG performance of the Sponsors, nor can they represent them in this respect.

Non-compliance with the Euler ILS ESG Framework

As part of the Euler ILS ESG Framework and in particular the ongoing monitoring process, the Subfund commits to disinvest from ILS Instrument transactions where possible that have been assessed as no longer meeting the set ESG criteria. However, investors should be aware that disinvestment may not always be possible due to an inopportune time or due to unfavourable terms or due to the illiquid nature of the ILS Instrument, or for example due to the lack of liquidity in the Cat bond secondary market further to the occurrence of an insurance event relevant to the Company. As a consequence, the Company may for a certain period of time hold an investment that no longer meets the criteria of the Euler ILS ESG Framework, and it can thus not be guaranteed that the relevant Subfund's investments will at all times be fully compliant with the Euler ILS ESG Framework. Such transaction may also result in lower net assets for the investors and possible adverse effects on the Subfund's risk diversification and optimal portfolio composition. Furthermore, the development of ESG scoring in the course of the lifetime of an ILS Instrument is difficult or impossible to predict. The evaluation and the periodic reassessment of ESG Factors for specific ILS Instruments or specific Sponsors will often be based on reports and information provided by the Issuer or Sponsor of such ILS Instrument or by an independent source. The Issuer of the ILS Instrument or the independent source may be under no obligation to correct or update the information provided to the Subfunds and/or the Portfolio Manager in the event of errors or subsequently discovered information. The Portfolio Manager will rely heavily on information supplied by third parties and proprietary evaluation developed by the Portfolio Manager. These ESG scorings may prove to be incorrect, misleading or incomplete, any decisions made in reliance thereof expose the relevant Subfund to potential risks. There can be no assurance that third party information provided to the Company and/or the Portfolio Manager will be accurate, and it may not be economically feasible or efficient for the Subfunds or the Portfolio Manager to verify or challenge such information.

ESG scoring calculation error risk

Although controls and monitoring measures are in place to ensure that the relevant ESG standards as per the Euler ILS ESG Framework are met on an ongoing basis, based in particular on the active monitoring of Sponsors' ESG scores, such monitoring is subject to the risk of human error. As a consequence, flawed monitoring may lead to inaccuracies in

Sponsors' ESG scores, which in turn may lead to inaccurate ESG scoring of the relevant Subfund's overall portfolio. The ESG scoring of the relevant Subfund's overall portfolio may further be impaired by the inaccurate consideration of underlying exposures when no look-through is available at the level of the Sponsor, transaction or collateral. The Portfolio Manager also relies on obtaining relevant information in the offering documentation of ILS Instruments and any other relevant information provided by the Sponsor.

Constrains linked to a limited investment universe

The Euler ILS ESG Framework forms a binding element of the Subfunds' investment strategies which shapes the outlines of the Subfunds' investable universe. As such, the Subfunds' investment universe may be significantly reduced due to the application of additional investment guidelines formulated by the Euler ILS ESG Framework over time and the Subfund may miss out on investment opportunities in the future it could have seized without the application of the Euler ILS ESG Framework. However, it is expected that the ESG standards set by the Euler ILS ESG Framework will increasingly be met by potential ILS Instruments and Sponsors over time, thus eventually increasing the Subfund's investment universe.

Tax compliance risk

The Subfund cannot guarantee proper taxation conduct by the Sponsors and the SPVs. Extreme tax risk considerations could even lead to disinvestments or winding-up the Subfund.

Reputational risk

The regulatory framework around sustainable investing is evolving. Uncertainties remain around the guidelines and best practices to adopt in terms of sustainable investing and of the corresponding disclosure requirements. While the Subfunds seek to be as transparent as possible towards investors as regards their implementation of ESG-aligned investment process, there is a risk that the disclosures do not always correspond to the regulatory requirements or may be misunderstood by investors.

8.10 Nominee Risks

Any Investor shall fully exercise his investor rights directly against the Company only in the case where the Investor appears himself and on his behalf in the register of Shareholders of the Company.

In the case where an Investor invests in the Company through an intermediary (i.e. nominee) investing in the Company in his name but on behalf of the Investor, certain rights attached to the quality of Shareholder shall only be exercised through this intermediary.

8.11 Liquidation Risk

The duration of the liquidation of the Company or a Subfund will depend on the ability of the liquidator to sell the assets. Given the largely illiquid nature of the assets, the liquidation procedure may take longer than expected and there is no legal maximum of the duration of the liquidation. It may therefore take longer than expected until all liquidation proceeds have been distributed to Investors.

8.12 EU Bank Recovery and Resolution Directive

Directive 2014/59/EU establishing a framework for the recovery and resolution of credit institutions and investment firms (the "**BRRD**") was published in the Official Journal of the European Union on June 12, 2014 and entered into force on July 2, 2014. The stated aim of the BRRD is to provide resolution authorities, including the relevant Luxembourg resolution authority, with common tools and powers to address banking crises pre-emptively in order to safeguard financial stability and minimize taxpayers' exposure to losses.

In accordance with the BRRD and relevant implementing laws, national prudential supervisory authorities can assert certain powers over credit institutions and certain investment firms which are failing or are likely to fail and where normal insolvency would cause financial instability. These powers comprise write-down, conversion, transfer, modification, or suspension powers existing from time to time under, and exercised in compliance with any laws, regulations, rules or requirements in effect in the relevant EU Member State relating to the implementation of BRRD (the "**Bank Resolution Tools**").

The use of any such Bank Resolution Tools may affect or restrain the ability of counterparties subject to BRRD to honour their obligations towards the Subfunds, thereby exposing the Subfunds to potential losses.

The exercise of Bank Resolution Tools against Investors of a Subfund may also lead to the mandatory sale of part of the assets of these Investors, including their shares/units in that Subfund. Accordingly, there is a risk that a Subfund may experience reduced or even insufficient liquidity because of such an unusually high volume of redemption requests. In such case the Subfund may not be able to pay redemption proceeds within the time period stated in this Offering Memorandum.

Furthermore, exercising certain Bank Resolution Tools in respect of a particular type of securities may, under certain circumstances, trigger a drying-up of liquidity in specific securities markets, thereby causing potential liquidity problems for the Subfunds.

8.13 Legal, Regulatory, Political and Tax Risk

The AIFM and the Company must at all times comply with applicable laws and regulations in each of the various jurisdictions where it is active, or where the Company makes its investments or holds its assets. Legal or regulatory constraints or changes to applicable laws and regulations may affect the AIFM or the Company, as well as the assets and liabilities of any of its Subfunds and may require a change in the investment objectives and policy of a Subfund. Substantive changes in applicable laws and regulations may make the investment objectives and policy of a Subfund more difficult or even impossible to achieve or implement, which may prompt the AIFM to take appropriate action, which may include the discontinuation of a Subfund.

The assets and liabilities of a Subfund, including but not limited to the financial derivative instruments used by the AIFM to implement the Subfund's investment objectives and policy may also be subject to change in laws or regulations and/or regulatory action which may affect their value or enforceability. In the implementation of a Subfund's investment objectives and policy, the AIFM may have to rely on complex legal agreements, including but not limited to master agreements for financial derivatives agreements, confirmations and collateral arrangements and securities lending agreements. Such agreements may be drawn up by industry bodies established outside of the Grand Duchy of Luxembourg and subject to foreign laws, which may imply an additional element of legal risk. Whilst the AIFM will ensure that it receives appropriate advice from reputable legal counsel, it cannot be excluded that such complex legal agreements, whether

governed by domestic or foreign laws, may be held unenforceable by a competent court due to legal or regulatory developments or for any other reason.

Recently, the global economic environment has been characterised by an increase in political risk in both developed and developing countries. The performance of the Subfunds or an investor's possibility to purchase, sell or redeem Shares may be adversely affected by disruption due in particular to changes in general economic conditions and uncertainties caused by political developments such as the results of popular votes or referenda, changes in economic policy, the rescinding of free trade agreements, adverse developments in diplomatic relations, increased military tension, active armed conflict, changes in government agencies or policies, the imposition of restrictions on the transfer of capital and changes in the industrial and financial outlook in general.

Changes in tax laws or fiscal policy in any country where the AIFM or the Company is active, or where a Subfund is invested or holds assets, may adversely affect the performance of a Subfund or any of its Share Classes. Investors are invited to consider the relevant risk warning on Taxation, and to consult with their professional advisers to assess their individual tax position.

8.14 Armed Conflict Risk

At a future date following its investments, a Subfund may find itself in a situation where it has exposure to issuers that are based or have business operations or assets in a region where an armed conflict, caused either by state actors or by non-state actors, is occurring. As a consequence of such armed conflict, trade, payment infrastructure, control over investments and business operations may be significantly impeded, and, as such, investments in such region may suffer extensive losses. Such Subfund may suffer losses because of the adverse impact of such armed conflict on the Subfund's investments in such a region or in an issuer with either business operations or assets in such a region.

8.15 Sanctions

Certain countries or designated persons or entities may, from time to time, be subject to sanctions and other restrictive measures imposed by states or supranational authorities (for example, but not limited to, the European Union or the United Nations), or their agencies (collectively, "**Sanctions**").

Sanctions may be imposed among others on foreign governments, state-owned enterprises, sovereign wealth funds, specified companies or economic sectors, as well as non-state actors or designated persons associated with any of the foregoing. Sanctions may take different forms, including but not limited to trade embargoes, prohibitions or restrictions to conduct trade or provide services to targeted countries or entities, as well as seizures, asset freezes and/or the prohibition to provide or receive funds, goods or services to or from designated persons.

Sanctions may adversely affect companies or economic sectors in which the Company, or any of its Subfunds, may from time to time invest. The Company could experience, among others, a decrease in value of securities of any issuer due to the imposition of Sanctions, whether directed towards such issuer, an economic sector in which such issuer is active, other companies or entities with which such issuer conducts business, or towards the financial system of a certain country. Because of Sanctions, the Company may be forced to sell certain securities at unattractive prices, at inopportune moments and/or in unfavourable circumstances where it may not have done so in the absence of Sanctions. Even though the Company will make reasonable efforts, acting in the best interest of the investors, to sell such securities under optimal conditions, such forced sales could potentially result in losses for the Subfunds concerned. Depending on the circumstances, such losses could be considerable. The Company may also experience adverse consequences due to an asset freeze or other restrictive measures directed at other companies, including but not limited to any entity that serves as a counterparty to derivatives, or as a sub-custodian, paying agent or other service provider to the Company or any of its Subfunds. The imposition of Sanctions may require the Company to sell securities, terminate ongoing agreements, lose access to certain markets or essential market infrastructure, cause some or all of a Subfund's assets to become unavailable, freeze cash or other assets belonging to the Company and/or adversely affect the cash flows associated with any investment or transaction.

The Company, the AIFM, the Depositary Bank, the Portfolio Manager and any other members from the UBS Group (collectively, the "**Fund Parties**") are required to comply with all applicable sanctions laws and regulations in the countries in which the Fund Parties conduct business (recognizing that certain of the sanctions regimes have implications for cross-border or foreign activities) and will implement the necessary policies and procedures to this effect (collectively, "**Sanctions Policies**"). The Shareholders should note that these Sanctions Policies will be developed by the Fund Parties in their discretion and best judgment and may involve protective or preventive measures that go beyond the strict requirements of applicable laws and regulations imposing any Sanctions, which may further negatively impact the investments of the Company.

8.16 Special Investments

All Shareholders and Prospective Investors

All holders of Participating Shares and any prospective investors should be aware that they participate in the profits and losses from all assets held for the benefit of a Subfund other than Special Investments from time to time, irrespective of when such asset was acquired and irrespective of when any relevant insurance event occurred (the "**Main Portfolio**"). The Main Portfolio may include assets previously (but no longer) designated as Special Investments. There is no guarantee that any asset in the Main Portfolio (including an asset previously, but no longer, designated as a Special Investment) may not subsequently become impacted by adverse developments. Such an asset may also be designated (or re-designated) as a Special Investment if such asset becomes subject to valuation uncertainty due, for example, to (subsequent) adverse developments of an event or series of events.

New investors will not be affected by the value fluctuations (whether positive or negative) of Special Investments and such investors will not participate in the returns from the realisation or deemed realisation of Special Investments designated as such prior to their admission as Shareholders. Special Situation Preference Shares (including Special Situation Preference SR Shares) are not available for subscription and will only be issued in exchange for Participating Shares. Notwithstanding the foregoing, holders of Special Situation Preference Shares (including Special Situation Preference SR Shares) may transfer their Special Situation Preference Shares (including Special Situation Preference SR Shares) to Eligible Investors. Further details to the transfer of Special Situation Preference Shares

(including Special Situation Preference SR Shares) are set out in Chapter 8.17 "Special Investments – Additional Risk Factors" under the heading "Transfer of Special Situation Preference Shares (including Special Situation Preference SR Shares)" and in Chapter 10.4 "Special Situation Preference Shares".

As set out above, all Shareholders at the time an investment is designated as a Special Investment (including Shareholders who have submitted redemption requests in respect of some or all of their Participating Shares) will participate in the Special Investment pro rata to the Net Asset Value of the relevant class of Participating Shares.

8.17 Special Investments - Additional Risk Factors

Risk Profile

The designation of certain investments as Special Investments and their removal from the Main Portfolio could result in the Main Portfolio temporarily deviating from the target risk-return profile of a Subfund (e.g., resulting for example in greater exposure to a particular peril/region) and such deviation may be significant. Consequently, the risk/return profile of the Participating Shares may temporarily differ from the overall strategy of a Subfund.

Impact of Events

Following the designation of an investment as a Special Investment, the Special Investment may continue to be impacted (both positively and negatively) by the circumstances that caused such investment to be designated a Special Investment and may be impacted (both positively and negatively) by new events. In addition, events that occurred prior to the designation of an investment as a Special Investment may have an impact (both positive and negative) on such Special Investment, notwithstanding that the occurrence of such event did not form all or part of the AIFM's decision-making process in designating such investment as a Special Investment.

Liquidity

A portion of a Subfund's assets may indirectly be invested in investments that the Portfolio Manager believes either lack a readily assessable market value or should be held until the resolution of a special event or circumstances (i.e., Special Investments). The Subfund may not be able to readily dispose of Special Investments and, in some cases, may be contractually prohibited from disposing of such investments for a specified period of time.

Fair value

Special Investments and other assets and liabilities for which no such market prices are available will generally be carried on the books of the Subfunds at fair value (which may be cost) as reasonably determined by the AIFM in consultation with the Portfolio Manager. There is no guarantee that fair value will represent the value that will be realised by the Subfunds on the eventual disposition of the investment or that would, in fact, be realised upon an immediate disposition of the investment. A redeeming Shareholder with an interest in a Special Investment will not receive any amount in respect of such interest until the related Special Investment is realised or deemed realised.

Redesignation of a Special Investment

There can be no certainty that the determination of the AIFM, in consultation with the Portfolio Manager, to redesignate all or a portion of a Special Investment and return all or a portion of such investment to the Main Portfolio will always be in the best interests of all Shareholders of a Subfund, including those that were not participating in such Special Investments.

Redemptions

A redeeming Shareholder with an interest in a Special Investment will not receive any amount in respect of such interest until such Special Investment is realised or deemed realised.

Transfer of Special Situation Preference Shares (including Special Situation Preference SR Shares)

Prospective investors and existing Shareholders wishing to acquire Special Situation Preference Shares (including Special Situation Preference SR Shares) from an existing Shareholder by way of transfer of such Shares must be aware that Special Situation Preference Shares (including Special Situation Preference SR Shares) are issued in respect of Special Investments. The attention of such prospective investors and existing Shareholders is drawn to Chapter 10 "Investment in the Company", and in particular to Chapter 10.4 "Special Situation Preference Shares" and the disclosures under the heading "Redesignation of Special Investments", as well as to Chapter 8.16 "Special Investments".

Prospective investors and existing Shareholders wishing to acquire Special Situation Preference Shares (including Special Situation Preference SR Shares) by way of transfer must be aware that Special Investments are generally designated as such because of the valuation uncertainty attached to the corresponding investment.

Prospective investors and existing Shareholders wishing to acquire Special Situation Preference Shares (including Special Situation Preference SR Shares) by way of transfer must also be aware that such Shares are not redeemable at the request of Shareholders.

Valuation

The designation of one or more Special Investments for a Valuation Day may result in delays in the finalisation of the calculation of a Subfund's Net Asset Value for the relevant Valuation Day and subsequent Valuation Days.

Liability of Separate Share Classes

The Subfunds may issue Shares in Classes and in series, as further specified below in Chapter 10.3. The Articles of Incorporation provide for the manner in which the liabilities are to be attributed across the various Share Classes and Series Shares. In particular, liabilities are to be attributed to the specific Share Classes or Series Shares in respect of which the liability was incurred. However, there is no limited recourse protection for any Share Class or Series Shares (including, for the avoidance of doubt, a series of Special Situation Preference Shares (including Special Situation Preference SR Shares)) and as such the accounting and report segregation between Share Classes and Series Shares may not be recognized. All assets of a Subfund may be available to meet all liabilities of that Subfund even if the liability relates to a particular Share Class or Series Shares of that Subfund (e.g., a particular Special Investment). Thus, for example, in the event that the assets and related appreciation and depreciation attributable to a series of Special Situation Preference Shares (including Special Situation Preference SR Shares) participating in a Special Investment were completely depleted by losses or liabilities, a creditor of a Subfund will generally not be bound to satisfy its claims from a particular Share Class or Series Shares. Rather, such creditor generally may seek to satisfy its claims from the

assets of the Subfund as a whole. Hence, such creditor could enforce a claim against the assets of a Subfund which would be borne by the other Shares even if such Shares did not participate in the Special Investment in question. Further, if the losses attributable to a particular Share Class or Series Shares exceed its value, then such losses could negatively impact the value of the other Share Classes or Series Shares.

The above should not be considered to be an exhaustive list of the risks which potential investors should consider before investing into the Subfunds. Potential investors should be aware that an investment in a Subfund may be exposed to other risks of an exceptional nature from time to time.

9. Risk and Liquidity Management

The AIFM has established and maintains a dedicated risk management function that implements effective risk management policies and procedures in order to identify, measure, manage and monitor on an ongoing basis all risks relevant to each Subfund's Investment Objective including in particular market, credit, liquidity, counterparty, operational and all other relevant risks. Furthermore, the risk management process ensures an independent review of the valuation policies and procedures as per Article 70 (3) AIFM Regulation.

The risk profile of each Subfund shall correspond to the size, portfolio structure and Investment Objective as specified for each Subfund in the Appendices.

The AIFM applies a comprehensive process based on qualitative and quantitative risk measures to assess the risks of each Subfund. It thereby differentiates between Subfunds investing mostly in liquid or sufficiently liquid securities and derivatives ("**Liquid AIFs**") and Subfunds mainly investing in limited liquidity assets ("**Illiquid AIFs**").

Illiquid AIFs are typically subject to a dedicated risk management setup entailing the establishment of a dedicated monitoring map and a customized monitoring process which consists of dedicated monitoring items and cycles aligned with the Subfund's requirements.

The global exposure of the Illiquid AIF is calculated through the commitment approach taking into account the current value of the underlying assets, the counterparty risk, future market movements and the time available to liquidate the positions. The risk assessment will be performed via a combination of quantitative and qualitative risk measures.

The risk management personnel within the AIFM supervises the compliance of these provisions in accordance with the requirements of applicable circulars or regulation issued by the CSSF or any European authority authorised to issue related regulation or technical standards which are applicable to the Company.

For the avoidance of doubt, in accordance with applicable laws and regulations, as described above, the AIFM shall implement detailed policies and procedures for the activation and deactivation of any selected liquidity management tool, including Special Investment, as well as the operational and administrative arrangements for the use of such tool. The primary responsibility for liquidity risk management shall remain with the AIFM. However, the decision to activate a liquidity management tool, including Special Investment, lies with the Board of Directors, based on input from the AIFM and in line with its applicable policies.

Leverage

In accordance with the 2013 Law, the AIFM will for each Subfund provide to competent authorities and Investors the level of leverage of the AIF both on a gross basis in accordance with the gross method as set out in Article 7 and on a commitment basis in accordance with the commitment method as set out in Article 8 of the AIFM Regulation. The Subfunds will set a maximum level of leverage which may be employed as indicated for the respective Subfunds in the Appendices.

Liquidity Management

The AIFM employs appropriate liquidity management methods and adopts procedures which enable it to monitor the liquidity risk of each Subfund. The AIFM ensures that, for each Subfund it manages, the investment and financing strategy, the liquidity profile, the distribution policy and the redemption policy are consistent with liquidity needs.

In accordance with Article 15 (1) of the 2013 Law, the liquidity management provisions described in the preceding paragraph will not apply to unleveraged closed-ended Subfunds.

10. Investment in the Company

10.1 Eligible Investors

Unless more restrictive conditions as specified in the relevant Appendix, the Shares of the Company are reserved to Well-Informed Investors, as defined in Chapter 2 "Definitions".

10.2 General Information Concerning Shares

Each Subfund will issue fully paid-up Shares, each Share being linked to one of the Subfunds.

Shares are issued in registered form only and are not available as physical certificates.

The Board of Directors may split or merge the Shares in the interest of the Shareholders.

Upon issue, Shares are entitled to participate equally in the profits and dividends attributable to the relevant Class, as well as in the liquidation proceeds of the relevant Class or Subfund.

The Shares do not carry any preferential or pre-emptive rights. Fractions of Shares may be issued to the nearest one ten-thousandth of a Share and are entitled to participate pro rata in the distributions and the allocation of the liquidation proceeds.

Shares that are not Special Situation Preference Shares (including Special Situation Preference SR Shares), as defined in Chapter 10.4 under the heading "Special Situation Preference Shares", are generally referred to in this Offering Memorandum as participating shares (the "Participating Shares"). Holders of Participating Shares participate in the profits and losses from all assets held in the Main Portfolio, as defined in Chapter under the heading "All Shareholders and Prospective Investors". Unless the context otherwise requires, references in this Offering Memorandum to Shares shall be understood as including Participating Shares and Special Situation Preference Shares (including Special Situation Preference SR Shares).

10.3 Classes of Shares and Series

The Company may offer different Classes in each Subfund, which may carry different rights and obligations, inter alia, with regard to their denomination, distribution policy, hedging policy, fee structure, minimum initial subscription and holding amounts or target investors.

Each Subfund may issue Shares of Classes DA, DAH, DB, DBH, EA, EAH, EB, EBH, EBH-SP-III, EBH-SP-IV, IA1, IAH1, IA5, IAH5, IA10, IAH10, IA25, IAH25, IA50, IAH50, IA100, IAH100, IB1, IBH1, IB5, IBH5, IB10, IBH10, IB25, IBH25, IB50, IBH50, IB100, IBH100, QA, QAH, QB, QBH, SA, SA-SP-III, SA-SP-IV, SA-SP-V, SAH, SAH-SP-III, SAH-SP-IV, SAH-SP-V, SB, SB-SP-III, SB-SP-IV, SB-SP-V, SBH, SBH-SP-III, SBH-SP-IV, SBH-SP-V, SA-II, SA-II-SP-III, SA-II-SP-IV, SA-II-SP-V, SAH-II, SAH-II-SP-III, SAH-II-SP-IV, SAH-II-SP-V, SB-II, SB-II-SP-III, SB-II-SP-IV, SB-II-SP-V, SBH-II, SBH-II-SP-III, SBH-II-SP-IV, SBH-II-SP-V, UA, UAH, UB and UBH. The Share Classes which are issued within each Subfund, together with the related fees and sales charges as well as the Reference Currency are set out in Chapter 3.

In addition, certain other fees, charges and expenses shall be paid out of the assets of the Subfunds. For further information, see Chapter 17.

The Shares which make up each such Share Class will be either accumulating Shares or distributing Shares.

The Board of Directors may, at any time and in its discretion, decide to launch additional Classes and this Offering Memorandum will then be updated accordingly.

Series Shares

In addition, the Board of Directors may at any time and at its discretion decide to issue different series of Shares within the same Class of Shares (including but not limited to facilitate the calculation of the Management Fee and, where applicable, the Performance Fee, or to facilitate the handling of distributions, as the case may be), as specified in the relevant Appendix.

Accordingly, any new subscriptions for Share Classes may be issued in series (together, the "**Series Shares**"). Shares other than the Series Shares will be issued in a single series (which may be an existing series) at the prevailing Net Asset Value per Share.

Notwithstanding the generality of the foregoing, the Board of Directors may issue Shares in series in the future and/or establish new series including in connection with the designation of investments as Special Investments and the issue of Special Situation Preference Shares (including Special Situation Preference SR Shares). If and to the extent that shares of the Company of any Class or type (it being understood that this applies to Participating Shares and Special Situation Preference Shares (including Special Situation Preference SR Shares)) are issued in series, any such series may be re-designated and converted into any other series within such Class or type ("**Rollup Series**"). Such conversion will be effected at the prevailing Net Asset Value per Share of the relevant Rollup Series.

A new series of Series Shares will be issued on each date that such shares are purchased. The Board of Directors intends to declare and pay dividends in respect of the Series Shares.

Accumulating Shares

Class DB, DBH, EB, EBH, EBH-SP-III, EBH-SP-IV, IB1, IBH1, IB5, IBH5, IB10, IBH10, IB25, IBH25, IB50, IBH50, IB100, IBH100, QB, QBH, SB, SB-SP-III, SB-SP-IV, SB-SP-V, SBH, SBH-SP-III, SBH-SP-IV, SBH-SP-V, SB-II, SB-II-SP-III, SB-II-SP-IV, SB-II-SP-V, SBH-II, SBH-II-SP-III, SBH-II-SP-IV, SBH-II-SP-V, UB and UBH Shares are accumulating Shares. Details of the characteristics of accumulating Shares are included in Chapter 16.

Distributing Shares

Class DA, DAH, EA, EAH, IA1, IAH1, IA5, IAH5, IA10, IAH10, IA25, IAH25, IA50, IAH50, IA100, IAH100, QA, QAH, SA, SA-SP-III, SA-SP-IV, SA-SP-V, SAH, SAH-SP-III, SAH-SP-IV, SAH-SP-V, SA-II, SA-II-SP-III, SA-II-SP-IV, SA-II-SP-V, SAH-II, SAH-II-SP-III, SAH-II-SP-IV, SAH-II-SP-V, UA and UAH Shares are distributing Shares. Details of the characteristics of distributing Shares are included in Chapter 16.

Share Classes dedicated to a specific type of Investors

Class DA, DAH, DB and DBH Shares may only be acquired by investors under an approved discretionary asset management agreement with Euler ILS Partners Ltd or an Affiliate. Class DA, DAH, DB and DBH Shares may also be acquired by institutional investors (according to Article 174 (2) c) of the Law of December 17, 2010) under an approved agreement with Euler ILS Partners Ltd or an Affiliate.

The agreements that are eligible for these share classes are determined by the AIFM.

Where such approved discretionary asset management agreement or other approved agreement, as determined by the AIFM, has been terminated, Class DA, DAH, DB and DBH Shares held by the investor at that time shall be either compulsorily redeemed or, according to the request of investor, converted into another Share Class.

Moreover, Class DA, DAH, DB and DBH Shares are not transferable without the Company's approval. Class DA, DAH, DB and DBH Shares are not subject to a management fee, but only to a management service fee, payable by the Company to the AIFM covering all fees and expenses as described in Chapter 17, "Fees and Expenses".

Class EA, EAH, EB and EBH Shares may only be acquired by institutional investors according to Article 174 (2) c) of the Law of December 17, 2010. Class EA, EAH, EB and EBH Shares benefit from the reduced management fee and sales charge as specified in Chapter 3.

Class QA, QAH, QB and QBH Shares may only be acquired by well-informed investors, in accordance with Article 2(1) of the Law of February 13, 2007.

Class SA, SAH, SB, SBH, SA-II, SAH-II, SB-II and SBH-II Shares may be created at the inception of a Subfund, subject to a minimum raised volume set at discretion of the AIFM, which serve as seeding Share Classes. Class SA, SAH, SB, SBH, SA-II, SAH-II, SB-II and SBH-II Shares benefit from a reduced management fee and sales charge as specified in Chapter 3. The Share Class remains open to subscriptions until any of the following events occurs: (i) certain period of time set by the AIFM has elapsed, (ii) the Subfund has reached a critical size in terms of assets under management determined by the AIFM or (iii) the AIFM decides on the basis of reasonable grounds to cease the offering of the Share Class. Notice on the closing of the seeding Share Classes shall be published as described in Chapter 22.4.

Class UA, UAH, UB and UBH Shares are exclusively reserved for investors who subscribe Shares of this Class via a financial intermediary domiciled in the United Kingdom or the Netherlands, or who have concluded a written agreement with a financial intermediary which explicitly provides for the acquisition of trailer fee-free classes or who subscribe for Shares of this Class pursuant to a written asset management agreement with an independent asset manager carrying on business in the European Economic Area, Latin America or the Middle East and whose conduct is regulated by a recognised

financial services regulator in their place of business. Class UA, UAH, UB and UBH Shares are subject to a sales charge and shall benefit from a reduced Management Fee as specified in Chapter 3.

Class EBH-SP-III, EBH-SP-IV, SA-SP-III, SA-SP-IV, SA-SP-V, SA-II-SP-III, SA-II-SP-IV, SA-II-SP-V, SAH-SP-III, SAH-SP-IV, SAH-SP-V, SB-SP-III, SB-SP-IV, SB-SP-V, SBH-SP-III, SBH-SP-IV, SBH-SP-V, SAH-II-SP-III, SAH-II-SP-IV, SAH-II-SP-V, SB-II-SP-III, SB-II-SP-IV, SB-II-SP-V, SBH-II-SP-III, SBH-II-SP-IV and SBH-II-SP-V Shares cannot be subscribed for at the request of (potential) Shareholders but will be allocated by the Company in accordance with Chapter 11.3 of this Offering Memorandum. These types of Share Classes are subject to a Management Fee as specified in Chapter 3.

Minimum Holding

Class IA1, IAH1, IA5, IAH5, IA10, IAH10, IA25, IAH25, IA50, IAH50, IA100, IAH100, IB1, IBH1, IB5, IBH5, IB10, IBH10, IB25, IBH25, IB50, IBH50, IB100, IBH100 Shares are subject to an initial minimum investment and holding amount, taking into account the respective holdings in this particular share and the respective holdings in the seeding Share Class SA, SAH, SB, SBH, SA-II, SAH-II, SB-II and SBH-II (if applicable), and benefit from reduced Management Fees and sales charges (if applicable) as specified in Chapter 3.

Such minimum holding requirement may be waived in any particular case at the sole discretion of the AIFM.

Hedged Share Classes

Depending on the Subfund, Class DAH, DBH, EAH, EBH, EBH-SP-III, EBH-SP-IV, IAH1, IAH5, IAH10, IAH25, IAH50, IAH100, IBH1, IBH5, IBH10, IBH25, IBH50, IBH100, QAH, QBH, SAH, SAH-SP-III, SAH-SP-IV, SAH-SP-V, SBH, SBH-SP-III, SBH-SP-IV, SBH-SP-V, SAH-II, SAH-II-SP-III, SAH-II-SP-IV, SAH-II-SP-V, SBH-II, SBH-II-SP-III, SBH-II-SP-IV, SBH-II-SP-V, UAH and UBH Shares are issued in one or more alternate currencies, as set out in Chapter 3. In order to reduce the risk of an overall depreciation of the Subfund's Reference Currency against the alternate currency of the Share Classes DAH, DBH, EAH, EBH, EBH-SP-III, EBH-SP-IV, IAH1, IAH5, IAH10, IAH25, IAH50, IAH100, IBH1, IBH5, IBH10, IBH25, IBH50, IBH100, QAH, QBH, SAH, SAH-SP-III, SAH-SP-IV, SAH-SP-V, SBH, SBH-SP-III, SBH-SP-IV, SBH-SP-V, SAH-II, SAH-II-SP-III, SAH-II-SP-IV, SAH-II-SP-IV, SBH-II, SBH-II-SP-III, SBH-II-SP-IV, SBH-II-SP-V, UAH and UBH the net asset value of the respective Share Classes DAH, DBH, EAH, EBH, EBH-SP-III, EBH-SP-IV, IAH1, IAH5, IAH10, IAH25, IAH50, IAH100, IBH1, IBH5, IBH10, IBH25, IBH50, IBH100, QAH, QBH, SAH, SAH-SP-III, SAH-SP-IV, SAH-SP-V, SBH, SBH-SP-III, SBH-SP-IV, SBH-SP-V, SAH-II, SAH-II-SP-III, SAH-II-SP-IV, SAH-II-SP-V, SBH-II, SBH-II-SP-III, SBH-II-SP-IV, SBH-II-SP-V, UAH and UBH as calculated in the Subfund's Reference Currency, will be hedged against the respective alternate currency of Share Classes DAH, DBH, EAH, EBH, EBH-SP-III, EBH-SP-IV, IAH1, IAH5, IAH10, IAH25, IAH50, IAH100, IBH1, IBH5, IBH10, IBH25, IBH50, IBH100, QAH, QBH, SAH, SAH-SP-III, SAH-SP-IV, SAH-SP-V, SBH, SBH-SP-III, SBH-SP-IV, SBH-SP-V, SAH-II, SAH-II-SP-III, SAH-II-SP-IV, SAH-II-SP-V, SBH-II, SBH-II-SP-III, SBH-II-SP-IV, SBH-II-SP-V, UAH, UBH and UBH through the use of forward foreign exchange transactions. The aim of this approach is, as far as possible, to mirror the performance of the Share Class in the Subfund's Reference Currency minus any hedge costs.

Within this approach, the currency risk of the investment currencies (except for the Reference Currency) versus the alternate currency will not be hedged or will only be partially hedged. Investors are made aware that currency hedging is never perfect – it aims to reduce the effects of currency movements on a share class but it cannot eliminate them entirely.

There is an additional cost to Hedged Share Classes. Hedged Share Classes are subject to mark-up fees as set out in Chapter 17.

Class DAH, DBH, EAH, EBH, EBH-SP-III, EBH-SP-IV, IAH1, IAH5, IAH10, IAH25, IAH50, IAH100, IBH1, IBH5, IBH10, IBH25, IBH50, IBH100, QAH, QBH, SAH, SAH-SP-III, SAH-SP-IV, SAH-SP-V, SBH, SBH-SP-III, SBH-SP-IV, SBH-SP-V, SAH-II, SAH-II-SP-III, SAH-II-SP-IV, SAH-II-SP-V, SBH-II, SBH-II-SP-III, SBH-II-SP-IV, SBH-II-SP-V, UAH and UBH Shares are subject to the management fee and sales charge as set out in Chapter 3. Subscription of IAH1, IAH5, IAH10, IAH25, IAH50, IAH100, IBH1, IBH5, IBH10, IBH25, IBH50 and IBH100 Shares is subject to the minimum initial investment and holding requirements as set out in Chapter 3. The net asset value of the Shares of this alternate currency class ("**Alternate Currency Class**") does not develop in the same way as that of the Share Classes issued in the Reference Currency.

Issue Price

Unless otherwise determined by the Company, the initial issue price of Share Classes DA, DAH, DB, DBH, EA, EAH, EB, EBH, IA1, IAH1, IA5, IAH5, IA10, IAH10, IA25, IAH25, IA50, IAH50, IA100, IAH100, IB1, IBH1, IB5, IBH5, IB10, IBH10, IB25, IBH25, IB50, IBH50, IB100, IBH100, QA, QAH, QB, QBH, SA, SAH, SB, SBH, SA-II, SAH-II, SB-II, SBH-II, UA, UAH, UB and UBH amounts to EUR 1,000, CHF 1,000, USD 1,000, GBP 1,000, SEK 10,000 depending on the currency denomination of the Share Class in the respective Subfund and its characteristics.

After the initial offering, Shares may be subscribed at the applicable Net Asset Value.

The Company may, at any time, decide on the issue of Share Classes in any additional freely convertible currencies at an initial issue price to be determined by the Company.

Except in case of Alternate Currency Share Classes, Share Classes shall be denominated in the Reference Currency of the Subfund to which they relate (as specified in Chapter 3).

Investors may, at the discretion of the Central Administration, pay the subscription monies for Shares in a convertible currency other than the currency in which the relevant Share Class is denominated. As soon as the receipt is determined by the Depositary Bank, such subscription monies shall be automatically converted by the Depositary Bank into the currency in which the relevant Shares are denominated. Further details are set out in Chapter 10.5.

The Company may at any time issue, within a Subfund, one or more Share Classes denominated in a currency other than the Subfund's Reference Currency. The issue of each further Alternate Currency Class is specified in Chapter 3.

The Company may enter into forward currency contracts for, and at the expense of, this Alternate Currency Class in order to minimize the effect of price fluctuations in this alternate currency.

However, no assurance can be given that the hedging objective will be achieved.

The Net Asset Value of the Shares of these Alternate Currency Classes does not develop in the same way as that of the Share Classes issued in the Reference Currency.

In the case of Subfunds with Alternate Currency Classes, the currency hedging transactions for one Share Class may, in exceptional cases, adversely affect the Net Asset Value of the other Share Classes.

10.4 Special Situation Preference Shares

Designation of Special Investments

The AIFM has designated certain assets of the Subfunds as Special Investments, as further described in Chapter 11.3. Further information regarding assets designated as Special Investments, and the Special Situation Preference Shares (including Special Situation Preference SR Shares) issued in respect thereof, is available upon request from the Portfolio Manager of the Company.

The AIFM may determine, after consultation with the Portfolio Manager, that an investment (or portion thereof) of a Subfund (i) lacks a readily assessable market value or (ii) should be held until the occurrence of a special event or special circumstances and therefore designate such investment as a special investment (the "**Special Investment**"). Special Investments may include (in addition to the assets or securities being so designated) any illiquid positions but also Special Investment related hedging positions designated as such and cash and/or amounts posted or earmarked as collateral or margin in support of such positions.

The occurrence of an insurance event, such as a hurricane, does not necessarily mean that investments exposed to such insurance event will be designated as Special Investments. Investments are generally designated as Special Investments only if there is illiquidity and/or valuation uncertainty in respect of such investment(s). An insurance event (or a series of events which may have been in respect of different perils or regions or which may have occurred at different times) may, but does not necessarily, give rise to valuation uncertainty.

In addition, the AIFM, in consultation with the Portfolio Manager, may take into account the size of the relevant investment(s) and the materiality of the valuation uncertainty (by reference to the Net Asset Value of a Subfund (excluding, for this purpose, the Net Asset Value attributable to existing Special Investments)) when determining whether to designate an investment as a Special Investment. Consequently, investments may not be designated as Special Investments at all or until a period of time (which may be an extended period of time) after the occurrence of an event which ultimately led to illiquidity and/or valuation uncertainty. Further, such illiquidity and/or valuation uncertainty may only occur a certain period of time after the relevant event (or series of events).

The AIFM, in consultation with the Portfolio Manager, may determine that one or more investments be designated as a Special Investment as a result of illiquidity and/or valuation uncertainty arising due to the occurrence of certain events (which may have been a series of events and which may have been in respect of different perils or regions or which may have occurred at different times) but that another investment, which may be exposed to the same events, not be designated a Special Investment. This could be, for example, if such other investment only has a relatively small exposure to the relevant events relative to all the insured risks to which such investment is exposed.

Investments designated as Special Investments may remain at risk and be impacted by events occurring after their designation as Special Investments and/or by events (whether occurring before or after such designation) other than the events (or series of events) which created the illiquidity and/or valuation uncertainty leading them to be so designated.

Issuance of Special Situation Preference Shares; Special Situation Preference SR Shares

If an investment is designated as a Special Investment, the Subfund may issue shares with respect to such Special Investment ("**Special Situation Preference Shares**"), commonly named Side Pockets. For the avoidance of doubt, each issuance of Special Situation Preference Shares may comprise of more than one investment designated as a Special Investment but each class of Special Situation Preference Shares comprises only investments designated as Special Investments as of the same date.

Special Situation Preference Shares are designated by reference to the relevant Special Investment in respect of which they are issued. More than one class and/or series of Special Situation Preference Shares may be in issue at any one time.

Each Shareholder in the Subfund at the dealing day in respect of which an investment is designated as a Special Investment (including Shareholders who have submitted redemption requests in respect of some or all of their Participating Shares) will participate in the Special Investment pro rata to the Net Asset Value of the relevant class or series of Participating Shares. To facilitate such participation, each Shareholder will have an amount of Participating Shares automatically cancelled (using the Net Asset Value of the relevant class or series of Participating Shares at the most recent Valuation Day) and will be issued Special Situation Preference Shares at a Net Asset Value per Special Situation Preference Share equal to the Net Asset Value per Share of the class or series of Participating Shares from which it was exchanged. No Contract Notes (in respect of the exchange of Participating Shares for Special Situation Preference Shares) will be issued until after the designation of the Special Investment and the Net Asset Value for the relevant Valuation Day has been finalised, which may not be for an extended period.

Special Situation Preference SR Shares ("**Special Situation Preference SR Shares**") are Special Situation Preference Shares that upon a realisation of the relevant Special Investments (or part thereof) will be redeemed and paid out to the holder (subject to any restrictions on distributions that may exist at the time), whereas regular Special Situation Preference Shares will be exchanged for Participating Shares (see below Redesignation of Special Investments section for more details). Special Situation Preference SR Shares may be issued to Shareholders who have submitted a valid redemption for effect on the dealing day in respect of which the relevant Special Investment is designated. To the extent that a Shareholder submits a redemption for effect on any such day, the Subfund will satisfy such redemption request to the fullest extent possible in respect of the Shareholder's remaining Participating Shares after the designation of the Special Investment. To the extent the redemption request cannot be satisfied, the relevant Shareholder will receive Special Situation Preference SR Shares in respect of the balance. Shareholders will receive regular Special Situation Preference Shares for such part of their investment that is not subject to the partial redemption request.

By way of example, a Shareholder holds 100 Participating Shares and submits a redemption request in respect of 50 of them. For the day the redemption request is effective, a Special Investment of 30 is designated and thus that Shareholder holds 70 Participating Shares and 30 Special Situation Preference

Shares. As there are sufficient remaining Participating Shares to meet the partial redemption, it will be satisfied in full and the Shareholder will retain 20 Participating Shares and 30 regular Special Situation Preference Shares. If, however, that same Shareholder had submitted a partial redemption request for 80 Participating Shares, there would have been insufficient Participating Shares, meaning that all 70 of the remaining Participating Shares will be redeemed and the Shareholder will receive 10 Special Situation Preference SR Shares (in respect of the balance of the redemption request) and 20 regular Special Situation Preference Shares.

If a Shareholder submits a redemption request for all of its Participating Shares at a time such Shareholder also holds regular Special Situation Preference Shares, such Special Situation Preference Shares may be converted to Special Situation Preference SR Shares effective on the dealing day as of which the Shareholder's Participating Shares are redeemed.

In order to facilitate the calculation of the Management Fee and, where applicable, the Performance Fee, or to facilitate the handling of distributions, as the case may be, more than one class and/or series of Special Situation Preference Shares (including Special Situation Preference SR Shares) may be issued with respect to a particular Special Investment or group of Special Investments. Special Situation Preference Shares (including Special Situation Preference SR Shares) participate only in gains and losses arising from the applicable Special Investments (in which the Participating Shares will not participate).

No Redemption Rights

Special Situation Preference Shares (including Special Situation Preference SR Shares) are not redeemable at the request of Shareholders.

Notwithstanding the foregoing, and subject to Chapter 12 "Transfer of Shares" and to Chapter 10.6 "Restriction to Subscription and Holding of Shares" below, Special Situation Preference Shares (including Special Situation Preference SR Shares) may be transferred to Eligible Investors.

Transfer of Special Situation Preference Shares (including Special Situation Preference SR Shares)

Shareholders holding Special Situation Preference Shares (including Special Situation Preference SR Shares) may transfer their Special Situation Preference Shares (including Special Situation Preference SR Shares) to Eligible Investors.

The Company shall accept the transferee to the extent it is an Eligible Investor and subject to all the information required by the Central Administration, included but not limited to know your customer and anti-money laundering checks, being received.

Unless stated otherwise in the Appendix of the relevant Subfund, transfer applications must be completed and received in the same manner (including as to deadlines for acceptance) as for subscription of Shares. The registration of the transferee in the Company's share register shall be made based on the then current Net Asset Value, calculated in the manner described in Chapter 15.

Transferees holding regular Special Situation Preference Shares will, upon the Redesignation of a Special Investment, receive the corresponding class of Participating Shares held by the Shareholder from which the Special Situation Preference Shares were acquired. Consequently, such transferees will become holders of Participating Shares and participate in the profits and losses from all assets held for the benefit of a Subfund other than Special Investments and thus participate in the Main Portfolio pro rata to the Net Asset Value of the Special Situation Preference Shares. Therefore, existing Shareholders who wish to transfer their regular Special Situation Preference Shares must be aware that, upon the Redesignation of the Special Investment corresponding to such regular Special Situation Preference Shares, the transferee will receive the corresponding Participating Shares from which the transferred Special Situation Preference Shares were exchanged.

Transferees holding Special Situation Preference SR Shares should note that, upon the Redesignation of a Special Investment, generally the Special Situation Preference SR Shares (or a pro rata portion thereof) relating to such Special Investment will be compulsorily redeemed and the redemption proceeds will be paid to the holder thereof, subject to any restrictions on distributions that may exist at the time.

General

Information regarding Special Situation Preference Shares (including Special Situation Preference SR Shares) in issue from time to time is available upon request from the Portfolio Manager of the Subfund.

Redesignation of Special Investments

The AIFM, in consultation with the Portfolio Manager and based on advice, where appropriate, from an independent reserving actuarial firm and other third party sources, may determine that an investment (and any related hedging positions, cash and/or amounts posted or earmarked as collateral) no longer should be designated as a Special Investment (the "**Redesignation of Special Investments**"), for example if new information from market and counterparty sources becomes available which reduces materially the valuation uncertainty for such Special Investment. For the avoidance of doubt, the AIFM may determine that only a portion of an investment or only certain investments should no longer be designated as a Special Investment.

Holders of regular Special Situation Preference Shares

Upon the Redesignation of a Special Investment, generally each Special Situation Preference Share (or a pro rata portion thereof) relating to such Special Investment will be exchanged into the class of Participating Shares held by the Shareholder from which they were exchanged. Such exchange will be effected by reference to the prevailing Net Asset Value.

Holders of Special Situation Preference SR Shares

Upon the Redesignation of a Special Investment, generally the Special Situation Preference SR Shares (or a pro rata portion thereof) relating to such Special Investment will be compulsorily redeemed and the redemption proceeds (after deducting any outstanding amounts (including any accrued Fund expenses or any Management Fees and accounting for any Performance Fee, where applicable)) will be paid to the holder thereof, subject to any restrictions on distributions that may exist at the time.

General

No Contract Notes (in respect of the exchange of Special Situation Preference Shares for Participating Shares or of the compulsory redemption of Special Situation Preference SR Shares, as the case may be) will be issued and no redemption proceeds will be paid until after the Net Asset Value (including the split between the Main Portfolio and the portion

designated as a Special Investment) for the relevant Valuation Day has been finalised, which may not be for an extended period.

The Redesignation of a Special Investment by the AIFM does not mean the AIFM, in consultation with the Portfolio Manager, no longer considers such investment to be subject to risks and such investment may continue to be impacted (both positively and negatively) by events and loss developments once it forms part of the Main Portfolio.

10.5 Subscription of Shares

Shares may only be subscribed for by Eligible Investors investing for their own account or for and on behalf of a third party that qualifies as an Eligible Investor as further specified in Chapter 3 and in the Appendix of the relevant Subfund.

Shares may be subscribed for on any Subscription Day specified as such in the Appendix of the relevant Subfund at the Net Asset Value per Share of the relevant Class of Shares of the Subfund as of the applicable valuation day ("**Valuation Day**") of the calendar month in which the subscription application has been made (based on the method of calculating the "Net Asset Value" as described in Chapter 15), plus the applicable sales charges and any taxes.

Written subscription applications must be submitted by fax, email or post mail to the Central Administration or a third party authorised by the AIFM to accept applications for the subscription or redemption of Shares by delivering to the account of the Subfund with the Depositary Bank cleared funds for the full amount of the subscription price of Shares subscribed pursuant to the subscription application as further described for each Subfund in the relevant Appendix.

Subscription applications must be received before the cut-off-time as specified in the Appendix of the relevant Subfund. Applications received after the relevant cut-off-time on a Subscription Day shall be deemed to have been received prior to the cut-off-time on the following Subscription Day.

Payment must be received within the time period specified in the Appendix of the relevant Subfund.

Sales charges on Shares shall accrue to the banks and other financial institutions engaged in the marketing of the Shares. Any taxes incurred on the issue of Shares shall also be charged to the investor. Subscription monies shall be paid in the currency in which the relevant Shares are denominated or, if requested by the Investor and at the sole discretion of the Central Administration, in another convertible currency. Payment shall be effected by bank transfer to the bank accounts of the Depositary Bank, details of which are given on the Subscription Form.

Investors may, at the discretion of the Central Administration, pay the subscription monies for Shares in a convertible currency other than the currency in which the relevant Class of Shares is denominated. Such subscription monies which are received by the Depositary Bank as cleared funds shall be converted by the Depositary Bank into the currency in which the relevant Shares are denominated. The proceeds of conversion from the currency of payment to the currency of denomination less fees and exchange commission shall be allocated to the purchase of Shares.

Shares are issued within 5 (five) Business Days after the Calculation Day which is subsequent to the relevant Valuation Date.

Investors subscribing for Shares via Clearstream require a Vestima Prime account. Investors are therefore advised to contact their relationship manager at Clearstream to facilitate subscription for Shares.

Subscriptions and redemptions of fractional Shares shall be permitted up to four decimal places. Fractional shares have no voting-rights. A holding of fractional Shares shall entitle the Shareholder to proportional rights in relation to such Shares. It may be the case that clearing institutions will be unable to process holdings of fractional Shares. Investors should verify whether that is the case.

The Company is entitled to refuse at its own discretion subscription applications and temporarily or permanently suspend or limit the sale of Shares. The Central Administration is entitled to refuse any subscription, transfer or conversion application in whole or in part for any reason, and may in particular prohibit or limit the sale, transfer or conversion of Shares to individuals or corporate bodies in certain countries if such transaction might be detrimental to the Company or result in the Shares being held directly or indirectly by a Prohibited Person (included but not limited to any U.S. Person) or if such subscription, transfer or conversion in the relevant country is in contravention of the local applicable laws. The subscription, transfer or conversion for Shares and any future transactions shall not be processed until the information required by the Central Administration, included but not limited to know your customer and anti-money laundering checks, is received.

The Board of Directors may from time to time accept subscriptions for Shares in consideration of a contribution in kind of assets, which could be acquired by the relevant Subfund pursuant to its Investment Objective, Investment Policy and Investment Restrictions. Any such contribution in kind will be valued in a report established by an auditor qualifying as a *réviseur d'entreprises agréé* and drawn up in accordance with the requirements of Luxembourg law, the costs of which report will be borne by the incoming Investor.

10.6 Restriction to Subscription and Holding of Shares

Shares of each Subfund are issued to Eligible Investors only.

The Board of Directors shall restrict or prevent the ownership of Shares in any Subfund by a Prohibited Person.

The Board of Directors may restrict or prevent the ownership of Shares in the Company by any person, firm or corporate body, if in the sole opinion of the Board of Directors or the AIFM, the holding of Shares in any Subfund or any Class may be detrimental to the Company, its Shareholders or any given Subfund or Class, if it may result in a breach of any law or regulation, whether Luxembourg or foreign, or if as a result thereof the Company or any given Subfund or Class may become exposed to tax or other legal , regulatory or administrative or financial disadvantages that it would not have otherwise incurred or, if as a result thereof the Company, any given Subfund or Class or the AIFM may become required to comply with any registration or filing requirements in any jurisdiction with which it would not otherwise be required to comply.

The Board of Directors may require any subscriber to provide it with any information that it may consider necessary for the purpose of deciding whether or not he is, or will be, a Prohibited Person.

The Board of Directors retains the right to offer only one or more Classes for subscription in any particular jurisdiction in

order to conform to local law, custom, business practice or the Company's commercial objectives.

10.7 Suspension of Subscriptions

No Shares will be issued by any Subfund during any period in which the determination of the Net Asset Value per Share of the Subfund is suspended pursuant to the powers contained in the Articles of Incorporation and as indicated in Chapter 15.2.

10.8 Market Timing

The Company does not allow "Market Timing" (the unfair taking advantage of differences in value of investment funds by short term and systematic dealing in fund Shares). Therefore, the Board of Directors or the AIFM reserves the right to refuse those subscription and conversion applications that, in the sole opinion of the Company, are suspicious and to take appropriate measures for the protection of the other investors.

10.9 Measures to Combat Money Laundering

Pursuant to the applicable provisions of Luxembourg laws and regulations in relation to the fight against money laundering and terrorist financing ("AML/CTF"), obligations have been imposed on the Company as well as on all other professionals of the financial sector to prevent the use of funds for money laundering and financing of terrorism purposes.

The Company and the AIFM will ensure their compliance with the applicable provisions of the relevant Luxembourg laws and regulations, including but not limited to the Luxembourg law of 12 November 2004 on the fight against money laundering and terrorist financing (the "2004 AML/CTF Law"), the Grand-Ducal Regulation of 10 February 2010 providing detail on certain provisions of the 2004 AML/CFT Law (the "2010 AML/CTF Regulation"), CSSF Regulation N°12-02 of 14 December 2012 on the fight against money laundering and terrorist financing ("CSSF Regulation 12-02") and relevant CSSF Circulars in the field of AML/CFT, including but not limited to CSSF Circular 18/698 on the authorization and organization of investment fund managers incorporated under Luxembourg law ("CSSF Circular 18/698", and the above, all as amended from time to time, collectively referred to as the "AML/CTF Rules").

In accordance with the AML/CTF Rules, the Company and the AIFM are required to apply due diligence measures on the investors (including on their ultimate beneficial owner(s)), their delegates and the assets of the Company in accordance with their respective policies and procedures put in place from time to time, and to apply enhanced customer due diligence measures on intermediaries acting on behalf of investors, if required by applicable Law and Regulations.

Among others, the AML/CTF Rules require a detailed verification of a prospective investor's identity. In this context, the Company and the AIFM, or the Central Administration or any Distributor, nominee or any other type of intermediary (as the case may be), acting under the responsibility and supervision of the Company and the AIFM will require prospective investors to provide them with any information, confirmation and documentation deemed necessary in their reasonable judgment, applying a risk-based approach, to proceed such identification.

The Company and the AIFM reserve the right to request such information as is necessary to verify the identity of a prospective or current investor. In the event of delay or failure by a prospective investor to produce any information required for verification purposes, the Company and the AIFM are entitled to refuse the application and will not be liable for any interest, costs or compensation. Similarly, when Shares are issued, they cannot be redeemed or converted until full details of registration and anti-money laundering documents have been completed.

The Company and the AIFM moreover reserve the right to reject an application, for any reason, in whole or in part in which event the application monies (if any) or any balance thereof will, to the extent permissible, be returned without unnecessary delay to the prospective investor by transfer to the prospective investor's designated account or by post at the prospective investor's risk, provided the identity of the prospective investor can be properly verified pursuant to the AML/CTF Rules. In such event, the Company and the AIFM will not be liable for any interest, costs or compensation.

In addition, the Company and the AIFM, or the Central Administration or any Distributor, nominee or any other type of intermediary (as the case may be), acting under the responsibility and supervision of the Company and the AIFM, may request investors to provide additional or updated identification documents from time to time pursuant to on-going client due diligence requirements under the AML/CTF Rules, and investors shall be required and accept to comply with such requests.

Failure to provide proper information, confirmation or documentation may, among others, result in (i) the rejection of subscriptions, (ii) the withholding of redemption proceeds by the Company or (iii) the withholding of outstanding dividend payments. Moreover, prospective or current investors who fail to comply with the above requirements may be subject to additional administrative or criminal sanctions under applicable laws, including but not limited to the laws of the Grand Duchy of Luxembourg. None of the Company, the AIFM, the Central Administration or any Distributor, nominee or any other type of intermediary (as the case may be) has any liability to an investor for delays or failure to process subscriptions, redemptions or dividend payments as a result of the investor providing no or only incomplete documentation. The Company and the AIFM moreover reserve all rights and remedies available under applicable law to ensure their compliance with the AML/CTF Rules.

Pursuant to the Luxembourg law of 13 January 2019 on the register of beneficial owners (the "RBO Law"), the Company is required to collect and make available certain information on its beneficial owner(s) (as defined in the AML/CTF Rules). Such information includes, among others, first and last name, nationality, country of residence, personal or professional address, national identification number and information on the nature and the scope of the beneficial ownership interest held by each beneficial owner in the Company. The Company is further required, among others, (i) to make such information available upon request to certain Luxembourg national authorities (including the Commission de Surveillance du Secteur Financier, the Commissariat aux Assurances, the Cellule de Renseignement Financier, Luxembourg tax and other national authorities as defined in the RBO Law) and upon motivated request of other professionals of the financial sector subject to the AML/CTF Rules, and (ii) to register such information in a publicly available central register of beneficial owners (the "RBO").

That being said, the Company or a beneficial owner may however, on a case by case basis and in accordance with the provisions of the RBO Law, formulate a motivated request with

the administrator of the RBO to limit the access to the information relating to them, e.g. in cases where such access could cause a disproportionate risk to the beneficial owner, a risk of fraud, kidnapping, blackmail, extorsion, harassment or intimidation towards the beneficial owner, or where the beneficial owner is a minor or otherwise incapacitated. The decision to restrict access to the RBO does, however, not apply to the Luxembourg national authorities, nor to credit instructions, financial institutions, bailiffs and notaries acting in their capacity as public officers, which can thus always consult the RBO.

In light of the above RBO Law requirements, any persons willing to invest in the Company and any beneficial owner(s) of such persons (i) are required to provide, and agree to provide, the Company and the case being the AIFM, the Central Administration or their Distributor, nominee or any other type of intermediary (as the case may be), with the necessary information in order to allow the Company to comply with its obligations in terms of beneficial owner identification, registration and publication under the RBO Law (regardless of applicable rules regarding professional secrecy, banking secrecy, confidentiality or other similar rules or arrangements), and (ii) accept that such information will be made available among others to Luxembourg national authorities and other professionals of the financial sector as well as to the public, with certain limitations, through the RBO.

Under the RBO Law, criminal sanctions may be imposed on the Company in case of its failure to comply with the obligations to collect and make available the required information, but also on any beneficial owner(s) that fail to make all relevant necessary information available to the Company.

10.10 Tax Related Information

Each Shareholder shall provide from time to time such information to the Company as may be reasonably requested by the Board of Directors, the AIFM, or the Central Administration.

11. Redemption of Shares

Shares shall generally be redeemed at the unilateral request of a Shareholder, unless the relevant Appendix for a certain Subfund contains differing rules applicable to such Subfund. Detailed redemption rules are contained in the Appendices for each Subfund separately.

11.1 General Redemption Procedure

The Company shall in principle redeem Shares on any Redemption Day specified as such in the Appendix of the relevant Subfund at the Net Asset Value per Share of the relevant Class of Shares of the Subfund as of the applicable Valuation Day for the relevant Subfund (based on the method of calculating the "Net Asset Value" as described in Chapter 15) minus the applicable redemption fee and any taxes.

Whether and to what extent the redemption price is lower or higher than the purchase price paid depends on the development of the net asset value of each Class of Shares.

Shareholders wishing to have all or some of their Shares redeemed by the Subfund may apply to do so by fax, email or post mail to the Central Administration. Redemption applications must be received before the cut-off time specified in the Appendix of the relevant Subfund. Applications received after the relevant cut-off time on a Redemption Day shall be deemed to have been received prior to the cut-off time on the following Redemption Day, unless, in accordance with the CSSF Circular 04/146, expressly waived by the Company in its sole and absolute discretion and without liability (and in the reasonable opinion that to do so is in the best interests of the remaining Shareholders).

Shares which are subject to a request for redemption shall be redeemed within 5 Business Days after the Calculation Day which is subsequent to the relevant Valuation Day.

The application for redemption of any Shares must include:

- Either (i) the monetary amount the Shareholder wishes to redeem after deduction of any applicable redemption fee and charge; or (ii) the number of Shares the Shareholder wishes to redeem, and
- The Class(es) and Subfund(s) from which such Shares are to be redeemed.

Redemption applications are irrevocable unless the Board of Directors accepts the request for a partial or full withdrawal of the redemption request of the Shareholder in its absolute discretion.

The proceeds of the redemption will be remitted to the account indicated in the Redemption Application.

In addition, the application for redemption must include the Shareholder's personal details. Failure to provide any of the aforementioned information may result in delay of such application for redemption whilst verification is being sought from the Shareholder.

Applications for redemption must be duly signed by the respective registered Shareholders.

If the execution of a redemption application would result in the relevant investor's holding in a particular Class of Shares falling below the minimum holding requirement for that Class as set out in Chapter 3, the Company may, without further notice to the investor, treat such redemption application as though it were an application for the redemption of all Shares of that Class held by the investor.

Equally, Shares of Classes, which may only be purchased by certain investors shall automatically be redeemed or, subject to prior consultation with the investor, converted into another Share Class if the investor does not satisfy the requirements for that Class anymore.

Class DA, DAH, DB and DBH Shares, which may only be purchased by investors under an approved discretionary asset management or other approved agreement, as determined by the Portfolio Manager with Euler ILS Partners Ltd or an Affiliate , shall be either compulsorily redeemed or, according to the request of investor, converted into another Share Class if the corresponding discretionary asset management agreement, advisory agreement or any similar agreement, as defined by the AIFM, has been terminated.

Since provision must be made for an adequate proportion of liquidity in the Subfunds' assets, payment of the redemption price of the Shares shall be made within a reasonable delay following calculation of the redemption price (see, however, 0 hereunder). This delay is specified in the Appendix of the relevant Subfund, but shall not apply where specific statutory provisions, such as foreign exchange or other transfer restrictions or other circumstances beyond the Depositary Bank's control make it impossible to transfer the redemption amount.

During the period between the Valuation Day and the Calculation Day on which the Shares are redeemed, the Shareholder will continue to hold the Shares which are subject to the redemption request. Since the redemption proceeds are determined by reference to the Net Asset Value per Share on the Valuation Day, the amount which the Shareholder receives upon redemption of the Shares will not reflect any increase (or decrease) between the Valuation Day and the Calculation Day in the Net Asset Value of the Shares which are redeemed.

In the case of large redemption applications, the Company may decide to defer payment until it has sold corresponding assets without undue delay. Where such a measure is necessary, all redemption applications received on the same day shall be settled at the same price.

Furthermore, the Company may apply tools and arrangements necessary to handle illiquid assets in order to respond to redemption requests. In particular, the Company may apply deferrals ("**deferred redemptions**") and may issue **'Special Situation Preference Shares'** as described hereafter under Chapter 11.3.

For the avoidance of doubt, in accordance with applicable laws, regulations and the AIFM's internal policies, the AIFM is responsible for the liquidity risk management of the relevant Subfund, while the decision to activate or deactivate a liquidity management tool (including for Special Investments) rests with the Board of Directors, acting on input from the AIFM and in line with its policies.

Whether such arrangements may be applied is specified in the Appendix of the relevant Subfund. However, under exceptional circumstances and if in the interest of the relevant Subfund and its Shareholders, the Board of Directors may decide to apply deferrals and issue Special Situation Preference Shares on an ad-hoc basis, although the possibility to use such arrangements is not provided for in the Appendix of the relevant Subfund. Should the Company consider it necessary to apply any such tool or arrangement, Investors applying for or who have already applied for redemption of Shares in the respective Subfund shall be notified, in accordance with Chapter 22.4, of the application without delay so that they are given the opportunity to withdraw their application.

Payment shall be made by means of remittance to a bank account in the currency that is legal tender in the country where payment is to be made, after conversion of the sum in question. If, at the sole discretion of the Depositary Bank, payment is to be made in a currency other than that in which the relevant Shares are denominated, the amount to be paid shall be the proceeds of conversion from the currency of denomination to the currency of payment less all fees and exchange commission.

Upon payment of the redemption price, the corresponding Share shall cease to be valid.

The Company is entitled to compulsory redeem all Shares held by a Prohibited Person, as set out hereafter.

11.2 Deferred redemptions

If in relation to any redemption day, the value of the aggregate number of shares to be redeemed exceeds a pre-defined number of the total number of shares ("Deferral Level"), the AIFM may, (i) satisfy all such redemption requests, or (ii) reduce all such redemption requests so that only the amount of Shares not exceeding the Deferral Level (or more, in the sole discretion of the Board of Directors) is redeemed on such Redemption Day for the respective Valuation Day.

11.3 Special Situation Preference Shares

The AIFM may determine, after consultation with the Portfolio Manager, that an investment (or portion thereof) of a Subfund (i) lacks a readily assessable market value or (ii) should be held until the occurrence of a special event or special circumstances and therefore designate such investment as a Special Investment. Special Investments may include (in addition to the assets or securities being so designated) any related hedging positions designated as such and cash or the amounts posted or earmarked as collateral or margin in support of such positions. If an investment is designated as a Special Investment, the Company may issue, upon the decision of the Board of Directors and with the prior approval of the CSSF, Special Situation Preference Shares (including Special Situation Preference SR Shares) with respect to such Special Investment (as defined in Chapter 10.4). In this event, each Subfund may issue Shares of Class EBH-SP-III, EBH-SP-IV, SA-SP-III, SA-SP-IV, SA-SP-V, SA-II-SP-III, SA-II-SP-IV, SA-II-SP-V, SAH-SP-III, SAH-SP-IV, SAH-SP-V, SB-SP-III, SB-SP-IV, SB-SP-V, SBH-SP-III, SBH-SP-IV, SBH-SP-V, SAH-II-SP-III, SAH-II-SP-IV, SAH-II-SP-V, SB-II-SP-III, SB-II-SP-IV, SB-II-SP-V, SBH-II-SP-III, SBH-II-SP-IV and SBH-II-SP-V.

Each Shareholder in the Subfund at the dealing day in respect of which an investment is designated as a Special Investment (including Shareholders who have submitted redemption requests in respect of some or all of their Participating Shares) will participate in the Special Investment pro rata to the Net Asset Value of the relevant class of Participating Shares. To facilitate such participation, each Shareholder will have an amount of Participating Shares automatically cancelled (using the Net Asset Value of the relevant class or series of Participating Shares at the most recent Valuation Day) and will be issued a series of Special Situation Preference Shares at a Net Asset Value per Special Situation Preference Share equal to the Net Asset Value per Share of the class or series of Participating Shares from which it was exchanged.

Special Situation Preference Shares (including Special Situation Preference SR Shares) issued in connection with any single Special Investment will generally constitute a separate class and/or series of Special Situation Preference Shares; provided, however, that more than one class and/or series may be issued with respect to a particular Special Investment or group of Special Investments (including but not limited to facilitate the calculation of the Management Fee and, where applicable, the Performance Fee, or to facilitate the handling of distributions, as the case may be). Special Situation Preference Shares (including Special Situation Preference SR Shares) participate only in gains and losses arising from the applicable Special Investments (in which the Participating Shares will not participate).

The Special Situation Preference Shares (including Special Situation Preference SR Shares) of any Subfund will be subject to the same management fee and other expenses as the other Shares as outlined in this Offering Memorandum, unless otherwise specified in the Subfund's Appendix.

Unless otherwise specified in the Subfund's Appendix, Performance Fees will not be charged on the Special Investments while they remain in the Special Situation Preference Shares (including Special Situation Preference SR Shares). However, Shareholders who hold their investment from before the issue of Special Situation Preference Shares

(including Special Situation Preference SR Shares) to after the relevant Special Situation Preference Shares (or Special Situation Preference SR Shares) have been realized will be charged the same amount of Performance Fees as if Special Situation Preference Shares (or Special Situation Preference SR Shares) had never been issued with respect to the same investment. This method also ensures that Shareholders subscribing after the issue of Special Situation Preference Shares (or Special Situation Preference SR Shares) will be unaffected by the performance of the Special Situation Preference Shares (or Special Situation Preference SR Shares) and not be subject to high watermark adjustments caused by these events.

Special Situation Preference Shares (including Special Situation Preference SR Shares) are not redeemable at the request of Shareholders.

In the event that the AIFM, in consultation with the Portfolio Manager, determines that an investment no longer should be designated as a Special Investment (Redesignation of Special Investments, as further described in Chapter 10.4), then generally each Special Situation Preference Share (or a pro rata portion thereof) relating to such Special Investment will be exchanged into the same class of Participating Shares held by the Shareholder from which it was exchanged.

In the event that there is a change to any special arrangements with respect to certain assets of the Subfund arising from their illiquid nature, the AIFM or the Portfolio Manager will inform all Shareholders of such change, including, without limitation, a change in the percentage of the Subfund's assets that are subject to such special arrangements, such as any Deferral (as defined herein) or Special Investments, through appropriate investor disclosure at least annually or sooner if required by applicable law.

In the event Special Situation Preference Shares (including Special Situation Preference SR Shares) are issued, prospective investors investing after such issuance should be aware they would only be exposed to the Main Portfolio, i.e. to the investments in the Subfund which are not Special Investments, upon subscription for Participating Shares. It is not anticipated that such investors would be affected by the value fluctuations (whether positive or negative) of Special Situation Preference Shares (including Special Situation Preference SR Shares) or that such investors would participate in the returns from the realisation or deemed realisation of the Special Investments related to the events. For the avoidance of doubt, unless otherwise determined by the AIFM in its sole discretion, no Shareholder may elect to subscribe to Special Situation Preference Shares (including Special Situation Preference SR Shares) or have all or part of such Shareholder's Shares converted into Special Situation Preference Shares (or Special Situation Preference SR Shares).

However, due to the fact that the investment objective and policy of the Subfunds are applied and monitored by the Portfolio Manager at the Subfund level with respect to both the Main Portfolio and Special Investments, the Main Portfolio, may, from time to time, in accordance with a Subfund's investment objective and policy, temporarily deviate from the target allocation of the Subfund (e.g., less well-balanced than under normal conditions and potential geographical overweight), and such deviation may be significant.

11.4 Compulsory Redemption with regard to Prohibited Persons

If the Board of Directors discovers at any time that any beneficial owner of the Shares is a Prohibited Person, either alone or in conjunction with any other person, whether directly or indirectly, the Board of Directors may, at its discretion and without liability, compulsorily redeem the Shares in accordance with the rules set out in the Articles of Incorporation, and upon redemption, the Prohibited Person will cease to be the owner of those Shares.

The Board of Directors may require any Shareholder to provide it with any information that it may consider necessary for the purpose of determining whether or not such owner of Shares is or will be a Prohibited Person.

Further, Shareholders shall have the obligation to immediately inform the Company to the extent the ultimate beneficial owner of the Shares held by such Shareholders becomes or will become a Prohibited Person.

11.5 Redemption with the consent of the relevant Shareholder

The Board of Directors may, with the consent of a Shareholder and subject to the principle of equal treatment of Shareholders, fully or partially redeem the Shares owned by such Shareholder at the relevant Redemption Price.

11.6 Proportional compulsory redemption for distribution purposes

Subject to the minimum capital requirement provided for by the 2007 Law, the Board of Directors may decide, at its discretion, to redeem Shares for distribution purposes. If the Board of Directors resolves to redeem Shares, Shares of all Investors of the Class or Subfund concerned have to be redeemed proportionately unless all Investors of the relevant Subfund or Class give their consent to a deviating procedure.

All redemptions as described under this Chapter 11 will be carried out in accordance with the procedures set out in the Articles of Incorporation. The redeemed Shares shall be cancelled in the Company's books. The Redemption Price shall be paid out at a time as determined by the Board of Directors.

12. Transfer of Shares

The Board of Directors has the right to refuse any transfer, assignment or sale of Shares in its sole discretion if the Board of Directors reasonably determines that it would result in a Prohibited Person holding Shares, either as an immediate consequence or in the future.

Any transfer of Shares may be rejected by the Central Administration and the transfer shall not become effective until the transferee has provided the required information under the applicable know your customer and anti-money laundering rules.

For the avoidance of doubt, references in this section to Shares shall be understood as including Special Situation Preference Shares and Special Situation Preference SR Shares.

13. Conversion of Shares

Unless stated otherwise in the Appendix of the relevant Subfund, holders of a particular Class of Shares of a Subfund may at any time convert some or all of their Shares into Shares of the same Class in another Subfund or into another Class in the same or another Subfund (based on the method of calculating the "Net Asset Value" as described in Chapter 15),

provided this satisfies the requirements for the Class of Shares into which such Shares are converted. The fee charged for such conversions shall not exceed half the initial sales charge of the Class into which the Shares are converted. Conversion charges on Shares shall accrue to the banks and other financial institutions engaged in the distribution of the Shares.

Conversions of other Share Classes into Share Classes SA, SAH, SB and SBH are not permitted.

Unless stated otherwise in the Appendix of the relevant Subfund, conversion applications must be completed and received in the same manner (including as to deadlines for acceptance) as for subscription of Shares.

Where processing an application for the conversion of Shares would result in the relevant investor's holding in a particular Class of Shares falling below the minimum holding requirement for that Class set out in Chapter 3, the AIFM may, without further notice to the investor, treat such conversion application as though it were an application for the conversion of all Shares held by the Investor in that Class of Shares.

Where Shares denominated in one currency are converted into Shares denominated in another currency, the fees and exchange commission incurred are taken into consideration and deducted.

14. Certain Regulatory and Tax Matters

Foreign Account Tax Compliance

Capitalized terms used in this section should have the meaning as set forth in the Luxembourg amended law dated 24 July 2015 (the "**FATCA Law**"), unless provided otherwise herein.

The Foreign Account Tax Compliance provisions of the Hiring Incentives to Restore Employment Act (commonly known as "**FATCA**") generally impose a new reporting regime and potentially a 30% withholding tax with respect to (i) certain US source income (including dividends and interest) and gross proceeds from the sale or other disposal of property that can produce US source interest or dividends ("**Withholdable Payments**") and (ii) a portion of certain non-US source payments from non-US entities that have entered into FFI Agreements (as defined below) to the extent attributable to Withholdable Payments ("**Passthru Payments**"). As a general matter, the new rules are designed to require US persons' direct and indirect ownership of non-US accounts and non-US entities to be reported to the US Internal Revenue Service (the "**IRS**"). The 30% withholding tax regime applies if there is a failure to provide required information regarding US ownership.

Generally, the FATCA rules subject all Withholdable Payments and Passthru Payments received by the Company to 30% withholding tax (including the share that is allocable to Non-US Investors) unless the Company enters into an agreement (a "**FFI Agreement**") with the IRS to provide information, representations and waivers of non-US law (including any information notice relating to data protection) as may be required to comply with the provisions of the new rules, including, information regarding its direct and indirect US accountholders, or otherwise qualifies for an exemption, including an exemption under an intergovernmental agreement (or "**IGA**") between the United States and a country in which the non-US entity is resident or otherwise has a relevant presence.

The governments of Luxembourg and the United States have entered into an IGA regarding FATCA, implemented by the FATCA Law. Provided the Company adheres to any applicable terms of the FATCA Law, the Company will not be subject to withholding or generally required to withhold amounts on payments it makes under FATCA. Additionally, the Company will not have to enter into an FFI agreement with the IRS and instead will be required to obtain information regarding its Shareholders and to report such information to the Luxembourg tax authority, which, in turn, will report such information to the IRS.

Any tax caused by an Investor's failure to comply with FATCA will be borne by such Investor.

Each prospective Investor and each Shareholder should consult its own tax advisors regarding the requirements under FATCA with respect to its own situation.

Each Shareholder and each transferee of a Shareholder's interest in any Subfund shall furnish (including by way of updates) to the AIFM, or any third party designated by the AIFM (a "**Designated Third Party**"), in such form and at such time as is reasonably requested by the AIFM (including by way of electronic certification) any information, representations, waivers and forms relating to the Shareholder (or the Shareholder's direct or indirect owners or account holders) as shall reasonably be requested by the AIFM or the Designated Third Party to assist it in obtaining any exemption, reduction or refund of any withholding or other taxes imposed by any taxing authority or other governmental agency (including withholding taxes imposed pursuant to the Hiring Incentives to Restore Employment Act of 2010, or any similar or successor legislation or intergovernmental agreement, or any agreement entered into pursuant to any such legislation or intergovernmental agreement) upon the Company, amounts paid to the Company, or amounts allocable or distributable by the Company to such Shareholder or transferee. In the event that any Shareholder or transferee of a Shareholder's interest fails to furnish such information, representations, waivers or forms to the AIFM or the Designated Third Party, the AIFM or the Designated Third Party shall have full authority to take any and all of the following actions: (i) withhold any taxes required to be withheld pursuant to any applicable legislation, regulations, rules or agreements; (ii) redeem the Shareholder's or transferee's interest in any Subfund, and (iii) form and operate an investment vehicle organized in the United States that is treated as a "domestic partnership" for purposes of section 7701 of the Internal Revenue Code of 1986, as amended and transfer such Shareholder's or transferee's interest in any Subfund or interest in such Subfund assets and liabilities to such investment vehicle. If requested by the AIFM or the Designated Third Party, the Shareholder or transferee shall execute any and all documents, opinions, instruments and certificates as the AIFM or the Designated Third Party shall have reasonably requested or that are otherwise required to effectuate the foregoing. Each Shareholder hereby grants to the AIFM or the Designated Third Party a power of attorney, coupled with an interest, to execute any such documents, opinions, instruments or certificates on behalf of the Shareholder, if the Shareholder fails to do so.

Data protection information in the context of FATCA processing

In accordance with the FATCA Law, Luxembourg Financial Institutions ("**FI**") are required to report to the Luxembourg tax authority (i.e. *Administration des Contributions Directes*, the "**Luxembourg Tax Authority**") information regarding reportable persons such as defined in the FATCA Law.

The Company is considered a sponsored entity and as such as a non-reporting Luxembourg financial institution and shall be treated as deemed compliant foreign FI as foreseen by FATCA. The Company is the data controller and processes personal data of Shareholders and Controlling Persons as reportable persons for FATCA purposes.

The Company processes personal data concerning Shareholders or their Controlling Persons for the purpose of complying with the Company's legal obligations under the FATCA Law. These personal data include the name, date and place of birth, address, U.S. tax identification number, the country of tax residence and residence address, the phone number, the account number (or functional equivalent), the account balance or value, the total gross amount of interest, the total gross amount of dividends, the total gross amount of other income generated with respect to the assets held in the account, the total gross proceeds from the sale or redemption of property paid or credited to the account, the total gross amount of interest paid or credited to the account, the total gross amount paid or credited to the Shareholder with respect to the account, standing instructions to transfer funds to an account maintained in the United States, and any other relevant information in relation to the Unitholders or their Controlling Persons for the purposes of the FATCA Law (the "**FATCA Personal Data**").

The FATCA Personal Data will be reported by the AIFM or the Central Administration, as applicable, to the Luxembourg Tax Authority. The Luxembourg Tax Authority, under its own responsibility, will in turn pass on the FATCA Personal Data to the IRS in application of the FATCA Law.

In particular, Shareholders and Controlling Persons are informed that certain operations performed by them will be reported to them through the issuance of statements, and that part of this information will serve as a basis for the annual disclosure to the Luxembourg Tax Authority.

FATCA Personal Data may also be processed by the Company's data processors ("**Processors**") which, in the context of FATCA processing, may include the AIFM of the Company and the Central Administration of the Company.

The Company's ability to satisfy its reporting obligations under the FATCA Law will depend on each Shareholder or Controlling Person providing the Company with the FATCA Personal Data, including information regarding direct or indirect owners of each Shareholder, along with the required supporting documentary evidence. Upon request of the Company, each Shareholder or Controlling Person must provide the Company with such information. Failure to do so within the prescribed timeframe may trigger a notification of the account to the Luxembourg Tax Authority.

Although the Company will attempt to satisfy any obligation imposed on it to avoid any taxes or penalties imposed by the FATCA Law, no assurance can be given that the Company will be able to satisfy these obligations. If the Company becomes subject to a tax or penalty as result of the FATCA Law, the value of the Shares may suffer material losses.

Any Shareholder or Controlling Person that fails to comply with the Company's documentation requests may be charged with any taxes and penalties of the FATCA law imposed on the Company (inter alia: withholding under section 1471 of the U.S. Internal Revenue Code, a fine of up to 250.000 euros or a fine of up to 0,5 per cent of the amounts that should have been reported and which may not be less than 1.500 euros) attributable to such Shareholder's or Controlling Person's failure to provide the information and the Company may, in its sole discretion, redeem the Shares of such Shareholders.

Shareholders and Controlling Persons should consult their own tax advisor or otherwise seek professional advice regarding the impact of the FATCA-Law on their investment.

FATCA Personal Data will be processed in accordance with the provisions of the data protection notice which will be made available in the application form issued by the Company to the investors.

Automatic Exchange of Information - Common Reporting Standard

Capitalized terms used in this section should have the meaning as set forth in the Luxembourg law dated 18 December 2015 (the "**CRS Law**"), unless provided otherwise herein.

On 9 December 2014, the Council of the European Union adopted the Directive 2014/107/EU amending the Directive 2011/16/EU of 15 February 2011 on administrative cooperation in the field of taxation which now provides for an automatic exchange of financial account information between EU Member States ("**DAC Directive**"). The adoption of the aforementioned directive implements the OECD's CRS and generalizes the automatic exchange of information within the European Union as of 1 January 2016.

In addition, Luxembourg signed the OECD's multilateral competent authority agreement ("**Multilateral Agreement**") to automatically exchange information between financial authorities. Under this Multilateral Agreement, Luxembourg will automatically exchange financial account information with other participating jurisdictions as of 1 January 2016. The CRS-Law implements this Multilateral Agreement, jointly with the DAC Directive introducing the CRS in Luxembourg law.

Under the terms of the CRS-Law, the Company may be required to annually report to the Luxembourg tax authority the name, address, state(s) of residence, TIN(s), as well as the date and place of birth of i) each Reportable Person that is an account holder, ii) and, in the case of a Passive NFE within the meaning of the CRS-Law, of each Controlling Person(s) that is a Reportable Person. Such information may be disclosed by the Luxembourg tax authority to foreign tax authorities.

The Company's ability to satisfy its reporting obligations under the CRS Law will depend on each Shareholder providing the Company with the Information, including information regarding direct or indirect owners of each Shareholder, along with the required supporting documentary evidence. Upon request of the Company, each Shareholder shall agree to provide the Company such information.

Although the Company will attempt to satisfy any obligation imposed on it to avoid any taxes or penalties imposed by the CRS-Law, no assurance can be given that the Company will be able to satisfy these obligations. If the Company becomes subject to a tax or penalty as result of the CRS-Law, the value of the Shares may suffer material losses.

Any Shareholder that fails to comply with the Company's documentation requests may be charged with any taxes and penalties imposed on the Company attributable to such Shareholder's failure to provide the information and the Company may, in its sole discretion, redeem the Shares of such Shareholder.

Shareholders should consult their own tax advisor or otherwise seek professional advice regarding the impact of the CRS-Law on their investment.

Data protection information in the context of CRS processing

In accordance with the CRS-Law, Luxembourg Financial Institutions ("**FI**") are required to report to the Luxembourg Tax Authority information regarding Reportable Persons such as defined in the CRS-Law.

As Luxembourg Reporting FI, the Company is the data controller and processes personal data of Shareholders and Controlling Persons as Reportable Persons for the purposes set out in the CRS-Law.

In this context, the Company may be required to report to the Luxembourg Tax Authority the name, residence address, TIN(s), the date and place of birth, the country of tax residence(s), the phone number, the account number (or functional equivalent), standing instructions to transfer funds to an account maintained in a foreign jurisdiction, the account balance or value, the total gross amount of interest, the total gross amount of dividends, the total gross amount of other income generated with respect to the assets held in the account, the total gross proceeds from the sale or redemption of property paid or credited to the account, the total gross amount of interest paid or credited to the account, the total gross amount paid or credited to the Shareholder with respect to the account, as well as any other information required by applicable laws of i) each Reportable Person that is an account holder, ii) and, in the case of a Passive NFE within the meaning of the CRS-Law, of each Controlling Person that is a Reportable Person (the "**CRS Personal Data**").

CRS Personal Data regarding the Shareholders or the Controlling Persons will be reported by the Reporting FI to the Luxembourg Tax Authority. The Luxembourg Tax Authority, under its own responsibility, will in turn pass on the CRS Personal Data to the competent tax authorities of one or more Reportable Jurisdiction(s). The Company processes the CRS Personal Data regarding the Shareholders or the Controlling Persons only for the purpose of complying with the Company's legal obligations under the CRS Law.

In particular, Shareholders and Controlling Persons are informed that certain operations performed by them will be reported to them through the issuance of statements, and that part of this information will serve as a basis for the annual disclosure to the Luxembourg Tax Authority.

CRS Personal Data may also be processed by the Company's data processors ("**Processors**") which, in the context of CRS processing, may include the AIFM of the Company and the Central Administration of the Company.

The Company's ability to satisfy its reporting obligations under the CRS-Law will depend on each Shareholder or Controlling Person providing the Company with the CRS Personal Data, including information regarding direct or indirect owners of each Shareholder, along with the required supporting documentary evidence. Upon request of the Company, each Shareholder or Controlling Person must provide the Company with such information. Failure to do so within the prescribed timeframe may trigger a notification of the account to the Luxembourg Tax Authority.

Although the Company will attempt to satisfy any obligation imposed on it to avoid any taxes or penalties imposed by the CRS-Law, no assurance can be given that the Company will be able to satisfy these obligations. If the Company becomes subject to a tax or penalty as result of the CRS-Law, the value of the Shares may suffer material losses.

Any Shareholder or Controlling Person that fails to comply with the Company's documentation requests may be charged with any taxes and penalties of the CRS-Law imposed on the Company (inter alia: a fine of up to 250.000 euros or a fine of up to 0,5 per cent of the amounts that should have been reported and which may not be less than 1.500 euros) attributable to such Shareholder's or Controlling Person's failure to provide the information and the Company may, in its sole discretion, redeem the Shares of such Shareholder.

Shareholders should consult their own tax advisor or otherwise seek professional advice regarding the impact of the CRS-Law on their investment.

CRS Personal Data will be processed in accordance with the provisions of the data protection notice which will be made available in the application form issued by the Company to the investors.

15. Net Asset Value

15.1 Calculation of Net Asset Value per Share

15.1.1 To the extent required by and within the limits laid down under Luxembourg laws and regulations, the Net Asset Value per Share will be determined by the Central Administration, under the responsibility of the AIFM, on each Valuation Day, in accordance with the rules set forth below, Luxembourg law and Luxembourg IFRS.

15.1.2 In compliance with the provisions of Part II of the 2007 Law and the 2013 Law, the Central Administration has been appointed by the AIFM under the terms of the Central Administration Agreement for the proper and independent calculation of the Net Asset Value. The Central Administration shall perform its functions impartially and with the requested due skill, care and diligence.

15.1.3 The AIFM's liability towards the Company and its Investors shall not be affected by any such delegation. Notwithstanding the above and irrespective of any contractual arrangements providing otherwise, the Central Administration shall be liable to the AIFM for any losses suffered by the AIFM as a result of its negligence, fraud or wilful default to perform its tasks.

15.1.4 The Net Asset Value per Share of each Class in each Subfund shall be expressed in the Reference Currency of that Class or Subfund, as specified for each Class or Subfund in the relevant Appendix, and shall be determined by the Central Administration under the supervision of the AIFM as at each Valuation Day by dividing (i) the net assets of that Subfund attributable to such Class, being the value of the portion of the Subfund's gross assets less the portion of the Subfund's liabilities attributable to such Class, on such Valuation Day, by (ii) the number of Shares of such Class then outstanding in such Subfund.

15.1.5 The Net Asset Value per Share shall be rounded down to four decimal places. If, since the time of determination of the Net Asset Value per Share of any Subfund there has been a material change in relation to (i) a substantial part of the assets of the relevant Subfund or (ii) the quotations in the markets on which a substantial portion of the investments of the relevant Subfund are dealt in or quoted, the AIFM may, in order to safeguard the interests of the Shareholders and the Subfund,

cancel the first determination and carry out a second determination of the Net Asset Value per Share of that Subfund with prudence and in good faith.

15.1.6 The AIFMs is responsible for proper and independent valuation of the assets and liabilities of the Subfunds in accordance with its valuation policies and procedures, the applicable laws and regulations and the Articles of Incorporation. The AIFM and or the Central Administration may consult with the relevant Portfolio Manager in connection with the determination of Net Asset Value of each Class and/or each Subfund. Unless otherwise specified in the Appendix of the Subfund, the value of the Company's assets shall be determined as follows:

(a) Securities that are listed on a stock exchange or dealt in on another Regulated Market will be valued on the basis of the last available publicised stock exchange or market value.

(b) In the case of securities for which trading on a stock exchange is not significant but which are traded on a secondary market with regulated trading among securities dealers (with the effect that the price reflects market conditions), the valuation may be based on this secondary market.

(c) Securities traded on a regulated market shall be valued in the same way as those listed on a stock exchange.

(d) Any security which is not listed or quoted on any securities exchange or similar electronic system or if, being so listed or quoted, is not regularly traded thereon or in respect of which no prices as described above are available, will be valued at its fair value as determined by the AIFM, having regard to its cost price, the price at which any recent transaction in the security may have been effected, the size of the holding, having regard to the total amount of such security in issue, and such other factors as the AIFM in their sole discretion deems relevant in considering a positive or negative adjustment to the valuation.

(e) Shares and units in undertakings for collective investments ("**UCI**") shall be valued on the basis of their most recently calculated Net Asset Value, where necessary by taking due account of the redemption fee. Where no Net Asset Value and only buy and sell prices are available, the shares or units in such UCIs may be valued at the mean of such buy and sell prices.

(f) Derivatives shall be treated in accordance with the above. OTC swap transactions will be valued on a consistent basis based on bid, offer or mid prices as determined in good faith pursuant to procedures established by the AIFM Board. When deciding whether to use the bid, offer or mid prices the AIFM Board will take into consideration the anticipated subscription or redemption flows, among other parameters. If, in the opinion of the AIFM Board, such values do not reflect the fair market value of the relevant OTC swap transactions, the value of such OTC swap transactions will be determined in good faith by the AIFM Board or by such other method as it deems in its discretion appropriate.

(g) Fixed-term deposits and similar assets shall be valued at their respective nominal value plus accrued interest.

(h) Catastrophe bonds will generally be priced at the average of dealer and vendor quotes. There can be no assurance that the price feed is in place for all trades in which case the valuation committee of the AIFM will undertake measures to mitigate arising pricing issues.

(i) Catastrophe and insurance linked swaps and derivatives as well as collateralized reinsurance contracts will be priced at fair value and (where reasonably available) based on predetermined accrual patterns as well as loss estimates, actual claims and counterparty information and statements. Any value in which there is no other source (e.g. reserves, loss estimates, and insurance claims) the issue will be addressed by the valuation committee of the AIFM which will determine the price based on available information in good faith and under best efforts.

(j) Insurance related claims with impact on the assets of the Subfunds will be priced at fair value.

(k) The valuation price of a money-market investment, which has a maturity or remaining term to maturity of less than twelve (12) months and does not have any specific sensitivity to market parameters, including credit risk, shall, based on the net acquisition price or on the price at the time when the investment's remaining term to maturity falls below twelve (12) months, be progressively adjusted to the repayment price while keeping the resulting investment return constant. In the event of a significant change in market conditions, the basis for the valuation of different investments shall be brought into line with the new market yields. The amounts resulting from such valuations shall be converted into the Reference Currency of each Subfund at the prevailing mid-market rate. Foreign exchange transactions conducted for the purpose of hedging currency risks shall be taken into consideration when carrying out this conversion.

(l) The value of any other asset not specifically referenced above will be valued at fair value determined with due care and in good faith as per the applicable valuation policy established by the AIFM.

15.1.7 The value of all assets and liabilities not expressed in the Subfund's Reference Currency will be converted into its Reference Currency at the relevant rates of exchange prevailing on the relevant Valuation Day. If such quotations are not available, the rate of exchange will be determined with prudence and in good faith by or under procedures established by the AIFM.

15.1.8 The AIFM has put in place and applies internal rules to protect the investors in case of a Net Asset Value calculation error and against consequences resulting from non-compliance with the investment rules applicable to a Subfund. Investors may obtain more information on such internal rules at the registered office of the Company during normal business hours.

15.1.9 The assets and liabilities shall be allocated as follows:

(a) the issue price received by the Company on the issue of Shares, and reductions in the value of the Company as a consequence of the redemption of Shares, shall be attributed to the Subfund and within that Subfund, to the relevant Class to which these Shares belong;

(b) assets acquired by the Company upon the investment of the issue proceeds and income and capital appreciation in relation to such investments which relate to a specific Subfund shall be attributed to such Subfund;

(c) assets disposed of by the Company as a consequence of the redemption of Shares and liabilities, expenses and capital depreciation relating to investments made by the Company and other operations of the Company, which relate to a specific Subfund shall be attributed to such Subfund;

(d) where the use of foreign exchange transactions, instruments or financial techniques relates to a specific Subfund and/or within a Subfund, to a specific Class the consequences of their use shall be attributed to such Subfund and/or Class of Shares in such Subfund;

(e) where assets, income, capital appreciations, liabilities, expenses, capital depreciations or the use of foreign exchange transactions, instruments or techniques cannot be attributed to a particular Subfund they shall be divided equally between all Subfunds or, in so far as is justified by the amounts, shall be attributed in proportion to the relative Net Asset Value of the Subfunds or Classes of Shares in the Subfunds if the AIFM, in its sole discretion, determines that this is the most appropriate method of attribution; and

(f) any distributions resolved by the Board of Directors in accordance with Chapter 16 hereof to the Shareholders of a Subfund or specific Class in a Subfund shall reduce the net assets of this Subfund or Class in the Subfund by the amount of such distribution.

15.1.10 For the purpose of Chapter 15.1.6 and 15.1.7:

(a) Shares to be issued by the Company shall be treated as being in issue as from the time specified by the AIFM on the relevant Valuation Day on which such valuation is made and from such time and until received by the Company the price therefore shall be deemed to be an asset of the Company;

(b) Shares of the Company to be redeemed (if any) shall be treated as existing and taken into account until the date fixed for redemption, and from such time and until paid by the Company the price therefore shall be deemed to be a liability of the Company; and

(c) where on any Valuation Day the Company has contracted to:

(i) purchase any asset, the value of the consideration to be paid for such asset shall be shown as a liability of the Company and the value of the asset to be acquired shall be shown as an asset of the Company;

(ii) sell any asset, the value of the consideration to be received for such asset shall be shown as an asset of the Company and the asset to be delivered by the Company shall not be included in the assets of the Company;

provided, however, that if the exact value or nature of such consideration or such asset is not known on such Valuation Day, then its value shall be estimated by the AIFM.

15.1.11 For the avoidance of doubt, the provisions of this Chapter 15.1, including in particular Chapter 15.1.10, are rules for determining Net Asset Value per Share of each Class in each Subfund and are not intended to affect the treatment for accounting or legal purposes of the assets and liabilities of the Share or any Shares issued by the Company.

15.2 Temporary Suspension of Calculation of Net Asset Value per Share and Issue/Redemption of Shares

The Company may suspend calculation of the net asset value and/or the issue, redemption and conversion of Shares of a Subfund:

(a) where a substantial proportion of the assets cannot be valued because a stock exchange or market is closed on a day other than a normal public holiday, or when trading on such stock exchange or market is restricted or suspended; or

(b) where a substantial proportion of the assets is not freely accessible because a political, economic, military, monetary or other event beyond the control of the Company does not permit the disposal of the Subfund's assets, or such disposal would be detrimental to the interests of Shareholders; or

(c) where a substantial proportion of the assets cannot be valued because of disruption to the communications network or any other factor makes a valuation impossible; or

(d) where for any reason the value of the assets of the Subfund cannot be promptly or accurately ascertained; or

(e) where a substantial proportion of the assets is not available for transactions because limitations on foreign exchange or other types of restrictions make asset transfers impracticable or if pursuant to objective verifiable measures transactions cannot be effected at normal foreign exchange transaction rates; or

(f) where the Company or a Subfund is being or may be wound-up, on or following the date on which such decision is taken by the Board of Directors or on which notice is given to the Shareholders of a general meeting of Shareholders at which a decision to wind-up the Company or a Subfund is to be proposed; or in the case of a merger of the Company or a Subfund, where the Board of Directors considers this justified for the protection of the Shareholders; or

(g) where the net asset value of one or more investment funds in which the Subfund a substantial part of its assets invests is suspended; or

(h) in any other circumstance or circumstances beyond the control and responsibility of the Board of Directors, where a failure to do so might result in the Company or its Shareholders incurring any liability to taxation or suffering other pecuniary disadvantages or other detriment which the Company or its Shareholders might not otherwise have suffered.

Investors applying for, or who have already applied for, the subscription, redemption or conversion of Shares in the respective Subfund shall be notified of the suspension without delay. Notice of the suspension shall be published as described in Chapter 22.4 if, in the opinion of the Board of Directors of the Company, the suspension is likely to last for longer than one week.

Suspension of the calculation of the net asset value of one Subfund shall not affect the calculation of the net asset value of the other Subfunds if none of the above conditions apply to such other Subfunds.

15.3 Series Accounting

In respect of each Class of Shares (except for the Series Shares), a separate Class account (a "**Class Account**") will be established in the books of the Subfunds. An amount equal to the proceeds of issue of the Class of Shares will be credited to the relevant Class Account. Any increase or decrease in the Net Asset Value of the portfolio of assets of the relevant Subfund (disregarding for these purposes any increases in the Net Asset Value of the portfolio due to new subscriptions or decreases due to redemptions or any costs, pre-paid expenses, losses, dividends, profits, gains and income which the Board of Directors determines relate to a specific Class of Shares (for example those items relating to the foreign exchange transactions in respect of each Class of Shares) ("**Adjustments**")) will be allocated to the relevant separate Class Accounts based on the previous relative Net Asset Values of each such separate Class Account. The Adjustments will then be allocated to each Class Account.

In respect of each series of Series Shares, a separate series account (a "**Series Account**") will be established in the books of the Subfunds. An amount equal to the proceeds of issue of each Share of the relevant series will be credited to the relevant Series Account. Any increase or decrease in the Net Asset Value of the portfolio of assets of the relevant Subfund (disregarding for these purposes any increase in the Net Asset Value due to new subscriptions or decreases due to redemptions or any Adjustments) will be allocated to the relevant Series Account based on the previous relative Net Asset Value of such Series Account. The Adjustments will then be allocated to each Series Account.

A new series of Series Shares of the relevant Class of Shares will be issued on each Subscription Day and the Net Asset Value per Share will be different between each series. Any Management Fees calculated in respect of a series of Series Shares will be deducted from the Net Asset Value of that series of Series Shares. Fees and expenses that relate to a particular series of Series Shares will be charged against that series when computing its Net Asset Value. Other fees and expenses will be allocated pro rata between the series in accordance with their respective Net Asset Values, or otherwise at the discretion of the Board of Directors.

15.4 Accounting Currency

The Accounting Currency of the Company is US Dollar ("**USD**"). The Subfunds will be denominated in the Reference Currency specified for each Subfund in the relevant Appendix.

16. Distribution

Accumulating Shares

No distribution is envisaged for accumulating Share Classes of the Subfunds (see Chapter 10) and the income generated shall be used to increase the Net Asset Value of the Shares after deduction of general costs. However, the Company may distribute within the limits provided by law from time to time, in whole or in part, net income and/or realised capital gains, after deduction of realised capital losses.

Distributing Shares

The Board of Directors is entitled to determine the payment of dividends and decides to what extent the distributions are to be made from the net investment income attributable to each distributing Class of the respective Subfund in question (see Chapter 10).

In addition, gains made on the sale of assets may be distributed to Investors. Further distributions from the Subfund's assets may be carried out in order to achieve an appropriate distribution ratio.

In the event of a distribution, this may take place on an annual basis or at any intervals to be specified by the Board of Directors, unless otherwise specified in the Appendix of the relevant Subfund.

Appropriation of the annual result as well as other distributions are proposed by the Board of Directors to the general meeting and are determined by the latter.

Distributions may not cause that the Company's capital falls below the minimum amount prescribed by law.

General Information

Payment of income distributions shall be made in the manner described in Chapter 10.

Claims for distributions which are not made within five years of maturity shall lapse and the assets involved shall revert to the respective Subfund.

In any case, distributions may only be made provided that after the distribution the net assets of the Company total more than EUR 1,250,000.

Distributions will be made in cash.

All distributions will be made net of any income, withholding and similar taxes payable by the Company, including, for example, any withholding taxes on interest or dividends received by the Company and capital gains taxes.

Dividends remaining unclaimed for five (5) years after their declaration will be forfeited and revert to the relevant Subfund or Class.

For the avoidance of doubt distributions can also be made by way of compulsory redemption as described in Chapter 11.4.

17. Fees and Expenses

The below mentioned fees, expenses and indemnifications may, if they are not attributable to a specific Class or Subfund, be charged as between the various Subfunds and Classes of Shares, on the basis of their respective net assets, within such a period, on such terms and in such a manner as the AIFM thinks fair and reasonable, provided that each Class of Shares of a Subfund and/or each Subfund will bear its own fees, expenses and indemnifications which are directly and exclusively attributable to it. A new Subfund will bear its own set-up costs. To the extent that expenses to be borne by the Subfund are paid by the Portfolio Manager, the Company will reimburse such party for such expenses.

17.1 Management Fee

General

A monthly Management Fee will be accrued and paid to the AIFM for each of the Subfunds on a monthly basis. The Portfolio Manager(s) and the distributors shall be paid out of this fee on a monthly basis. In case, the AIFM requires the Company to pay such fees directly to the Portfolio Manager(s) or the distributors, the management fee shall be reduced accordingly. The management fee may be charged at different rates for individual Subfunds and Share Classes within a Subfund or may be waived in full as specified in Chapter 3 and in the Appendices of the Subfunds.

Special Situation Preference Shares

A monthly Management Fee is accrued and paid on a monthly basis to the AIFM for each of the Subfunds with respect to any Special Situation Preference Shares (including Special Situation Preference SR Shares) at the rate agreed between the AIFM and the Portfolio Manager which will generally be at the same rate as the rate applicable to the corresponding Participating Shares held by Shareholders having an interest in such issuance of Special Situation Preference Shares (including Special Situation Preference SR Shares).

17.2 Performance Fee

General

In addition to the fees paid to the Portfolio Manager out of the Management Fee, a performance fee may be paid to the Portfolio Manager as specified, where applicable, in Chapter 3, and in the Appendix of the relevant Subfund.

Special Investments

Upon the establishment of a new class or series of Special Situation Preference Shares (including Special Situation Preference SR Shares), the Net Asset Value of a class or series of Participating Shares exchanged for such Special Situation Preference Shares (including Special Situation Preference SR Shares) will be proportionately reduced. Such reduction will generally be reversed in the amount necessary to reflect the gain or loss inherent to such Special Investment upon the realisation or Redesignation of the Special Investment related to such Special Situation Preference Shares (including Special Situation Preference SR Shares).

If a Shareholder owns Special Situation Preference Shares (including Special Situation Preference SR Shares) where the Shareholder no longer holds the corresponding Participating Shares, the Performance Fee, if any, in respect of such Special Situation Preference Shares (including Special Situation Preference SR Shares) will be paid (together with the accrued Management Fee and the interest thereon) upon the realisation or Redesignation of the Special Investment attributable to each class or series of such Shareholder's Special Situation Preference Shares (including Special Situation Preference SR Shares).

17.3 Depositary Bank and Service Provider Fees

The Depositary Bank, the Central Administration, the Paying Agent and the Registrar and Transfer Agent as well as other service providers shall each be entitled to be paid directly or indirectly out of the Company's asset. Such fees shall be determined from time to time by agreement between the Company and/or the AIFM, as applicable, and such service providers, provided that such fees are in accordance with customary banking practice and at normal commercial rates in Luxembourg.

The fees of the Depositary Bank, the Central Administration, the Paying Agent and the Registrar and Transfer Agent shall, in aggregate, not exceed 0.25% per annum of the Total Net Assets.

The Company shall bear the mark-up fees which may be charged by the counterparty for Share-Class Hedging. Share-Class Hedging is executed in the best interest of the Shareholders and applicable to the Share Classes that are issued in one or more alternate currencies, as set out in Chapter 3 and Chapter 10.

17.4 Organisational Expenses

The Company shall reimburse the AIFM and any of its Affiliates and the Portfolio Manager for all Organisational Expenses incurred by them in relation to the setting up of the Company and the Subfunds.

17.5 Operation and Administration Expenses

The Company shall bear all Operation and Administration Expenses and shall reimburse the AIFM and the Portfolio Manager for all Operation and Administration Expenses as well as all other liabilities of the Company of whatsoever kind and nature incurred by them in relation to the Company. Such expenses may include but are not limited to the fees payable to the authorized representatives in the countries of registration and fees relating to the maintenance of such registrations including translation costs and other expenses due to supervisory authorities and local representatives (including for the avoidance of doubt, any regulatory reporting requirements to the CSSF); company secretarial fees, costs and expenses for middle office services, any costs incurred in respect of meetings of shareholders; all other charges incurred for sales activities such as but not limited to out of pocket expenses related to investor reporting activities, financial reporting activities, AML related and KYC costs (including for background screening and enhanced due diligence) and other services rendered to the Company but not mentioned in the present section; for certain Share Classes these fees may be borne in full or in part by the AIFM: the remuneration of the Directors and their reasonable and documented travel and out-of-pocket expenses, fees and reasonable insurance coverage (including director/manager insurance), reasonable and documented travelling costs in connection with board meetings.

All reasonable travel and other out of pocket expenses incurred by the AIFM and the Portfolio Manager may be charged to the Company.

The AIFM and the Portfolio Manager will not be reimbursed for any of their internal administrative costs such as salaries, office space or office equipment.

Where any operational, financing or administrative services are performed by the Portfolio Manager, the fees and costs paid by the Company in relation to such services shall not be higher than those charged for comparable services by other service providers.

17.6 Investment-Related Expenses

The AIFM and the Portfolio Manager shall be reimbursed by the Company in respect of all Investment-Related Expenses in relation to the Company incurred by them.

Furthermore, the Company shall bear fees incurred for acquiring, holding, or disposing investment whether or not such investments are consummated (such as taxes which may be payable on the assets, income and expenses chargeable to the Company, brokerage commissions, legal fees, structuring costs, expenses relating to short sales, clearing and settlement charges, clearing account maintenance fees, fees charged by clearing platforms, custodial fees, bank service fees and interest expenses), costs related to continuous linked settlement (CLS); collateralisation and collateral management expenses (such as trust account and letter of credit costs); third-party professional fees (including, without limitation, expenses of consultants, investment bankers, attorneys, accountants, valuation agents, reserving actuaries and other experts)

relating to investments; and other trading-related expenses. This includes expenses comprising the risk transformer fees and expenses but also not limited to, fees and expenses in respect of their investment related activities; risk transformer administrative fees and expenses; risk transformer accounting and valuation expenses; risk transformer indemnification expenses; risk transformer legal expenses; expenses associated with risk management and risk modelling software licences; third party index and market data provider or trading index provider fees and expenses and as from 1 January 2020, any fees payable to providers of risk management systems or providers of data for those risk management systems being used by the AIFM and/or the Portfolio Manager.

17.7 Value Added Tax

All fees and expenses pursuant to the above are exclusive of value added taxes or other chargeables thereon, which shall be paid by the Company as required.

17.8 Realization and Dissolution Expenses

Without prejudice to the aforesaid, any costs and expenses incurred with respect to the realization of assets or otherwise related to the liquidation of a Subfund shall be borne by the relevant Subfund in liquidation.

18. Indemnification

The Company will indemnify, within the limits set forth by Luxembourg law, the Board of Directors, the AIFM, the Portfolio Manager and their respective officers, directors, managers, employees and associates and all persons serving on the AIFM Board (each an "Indemnitee") against all claims, liabilities, cost and expenses incurred in connection with their role as such, other than for negligence, fraud or wilful misconduct. Shareholders will not be individually obligated with respect to such indemnification beyond the amount of their investments in the Company.

The Indemnitees shall have no liability for any loss incurred by the Company or any Shareholder howsoever arising in connection with the service provided by them in accordance with the Company Documents, and each Indemnitee shall be, within the limits set forth by Luxembourg law, indemnified and held harmless out of the assets of the Company against all actions, proceedings, reasonable costs, charges, expenses, losses, damages or liabilities incurred or sustained by an Indemnitee in or about the conduct of the Company's business affairs or in the execution or discharge of his duties, powers, authorities or discretions in accordance with the terms of the appointment of the Indemnitee, including without prejudice to the generality of the foregoing, any costs, expenses, losses or liabilities incurred by him in defending (whether successfully or otherwise) any civil proceedings concerning the Company or its affairs in any court whether in Luxembourg or elsewhere, unless such actions, proceedings, costs, charges, expenses, losses, damages or liabilities resulted from his gross negligence, wilful misconduct or fraud.

19. Regulatory Disclosure

19.1 Conflicts of Interests

General

The Board of Directors, the AIFM, the Portfolio Manager and the other service providers of the Company, and/or their respective affiliates, associates, employees or any person connected with them may be subject to various conflicts of interest in their relationships with the Company. The AIFM, the Company and the Portfolio Manager have adopted and implemented a policy on conflicts of interest. They have taken suitable organisational and administrative measures to identify and manage conflicts of interest so as to minimise the risk of the Company's interests being prejudiced, as well as to ensure that the Company's shareholders are treated fairly in the event that a conflict of interest cannot be prevented. The AIFM, is part of UBS Group and is a global, full-service private banking, investment banking, asset management and financial services organisation that is a major player in the global financial markets. The AIFM, UBS Group, and the Portfolio Manager (as well as their subsidiaries and branches or Affiliates) are engaged in various business activities and may have other direct or indirect interests in the financial markets in which the Company invests. They may serve as the counterparty in financial derivative contracts entered into with the Company. Conflicts of interest may also potentially arise if the Depositary is closely associated with a legally independent entity of UBS Group that provides other products or services to the Company. In the conduct of their business, the AIFM, UBS Group and the Portfolio Manager shall endeavour to identify, manage and where necessary prohibit any action or transaction that may lead to a conflict of interest between the various business activities and the Company or its shareholders. The Affiliated Person endeavours to manage any conflicts in a manner consistent with the highest standards of integrity and fair dealing. To this end, the Company, the AIFM and the Portfolio Manager have implemented procedures to ensure that any business activities giving rise to a conflict that could harm the interests of the Company or its shareholders are carried out with an appropriate level of independence and that any conflicts are resolved fairly. Investors may obtain additional information on the AIFM and/or the Company's policy on conflicts of interest free of charge by addressing a written request to the AIFM. Despite the AIFM's best efforts and due care, there remains the risk that the organisational or administrative measures taken by the AIFM for the management of conflicts of interest may not be sufficient to ensure, with reasonable confidence, that all risks of damage to the interests of the Company or its shareholders are eliminated. If this should be the case, any non-mitigated conflicts of interest and any decisions taken in relation thereto will be notified to investors on the following website of the AIFM: http://www.ubs.com/lu/en/asset_management/investor_information.html. This information is also available free of charge at registered office of the AIFM.

19.2 Handling complaints, strategy for exercising voting rights and best execution

In accordance with Luxembourg laws and regulations, the AIFM provides additional information on procedures for handling complaints, the strategy for exercising voting rights as well as best execution on the following website:

http://www.ubs.com/lu/en/asset_management/investor_information.html

19.3 Remuneration

The Board of Directors of the AIFM has adopted a remuneration policy that aims to ensure remuneration complies with the applicable regulations – in particular the provisions defined under (i) UCITS Directive 2014/91/EU, the ESMA final report on sound remuneration policies under the UCITS Directive and AIFMD published on 31 March 2016, (ii) the Alternative Investment Fund Managers (AIFM) Directive 2011/61/EU, enacted into Luxembourg national law by the

AIFM Law of 12 July 2013, as amended, the ESMA guidelines on sound remuneration policies under the AIFMD, published on 11 February 2013 and (iii) the CSSF Circular 10/437 on Guidelines concerning the remuneration policies in the financial sector, issued on 1 February 2010 – as well as the guidelines of the UBS Group AG remuneration policy. This remuneration policy is reviewed at least annually. The remuneration policy promotes a solid and effective risk management framework, is aligned with the interests of investors, and prevents risks from being taken that do not comply with the risk profiles, the Management Regulations, or the Articles of Incorporation, as applicable. The remuneration policy also ensures compliance with the strategies, objectives, values and interests of the AIFM and the Company, including measures to prevent conflicts of interest.

Furthermore, this approach aims to:

- Evaluate performance over a multi-year period that is suitable to the recommended holding period of investors in the Subfund, in order to ensure that the evaluation process is based on the Company's long-term performance and investment risks, and that performance-related remuneration is actually paid out over the same period;

- Provide employees with remuneration that comprises a balanced mix of fixed and variable elements. The fixed remuneration component represents a sufficiently large portion of the total remuneration amount, which allows for a flexible bonus strategy. This includes the option not to pay any variable remuneration. This fixed remuneration is determined according to the individual employee's role, which includes their responsibilities and the complexity of their work, their performance, and the local market conditions. Furthermore, it should be noted that the AIFM may, at its own discretion, offer benefits to employees. These form an integral part of the fixed remuneration.

More details about the current remuneration policy, including, but not limited to, the description of how remuneration and benefits are calculated, the identity of persons responsible for awarding the remuneration and benefits, including the composition of the remuneration committee (if any), are available at http://www.ubs.com/lu/en/asset_management/investor_information.html.

19.4 Inducements

Third parties, including Affiliates of the AIFM, may be remunerated or compensated in monetary form for distribution activities performed in relation to the Subfunds on terms the Company/AIFM has agreed with such parties. Such remuneration or compensation, if applicable, is generally expressed as a percentage of the annual management fee levied on the Subfunds calculated on the Investor's average monthly holdings in the Subfunds' Shares. With reference to his transactions, an Investor may receive further details of such remuneration or compensation arrangements or any amount received by or shared with such parties on request. Third parties involved in portfolio management activities of the Subfunds, including Affiliates of the AIFM, whether they receive a service from another party or perform a service for the benefit of another party, may also receive from or grant benefits to these other parties in monetary or other form (including, but not limited to, soft dollar commissions, rebates or any other advantages). Such benefits, in monetary or other form, shall be used in the best interest of the Company, the relevant Subfund(s) and the Investors and shall be disclosed to the AIFM. The Company, the AIFM and the third parties take reasonable steps to ensure that such benefits are not likely to conflict with any duty that the Company, the AIFM and the third parties is subject to under any relevant legal or regulatory provision.

19.5 Fair Treatment

Investors participate in the Subfunds by subscribing into, and holding, Shares of individual Share Classes. Individual Shares of a single Share Class bear the same rights and obligations in order to ensure equal treatment of all Investors within the same Share Class of a Subfund.

The Company and/or its AIFM may enter into arrangements with individual Investors or a group of Investors providing for special rights and entitlements for those Investors that deviate from the rights, entitlements and obligations pertaining to a Share Class as disclosed in this Offering Memorandum.

Such rights or entitlements predominantly comprise, but are not limited to, rebates on fees charged to the Share Class, or specific disclosures, and will be granted solely based on objective criteria determined by the AIFM.

Objective criteria include, but are not limited to (alternatively, or cumulatively):

- the current or anticipated volume subscribed or to be subscribed by an Investor;
- the total volume held by an Investor in a Subfund or in any other UBS sponsored product;
- the expected holding period for an investment in a Subfund;
- the Investor's willingness to invest during the launch phase of a Subfund;
- the type of the Investor (e.g. repackager, wholesaler, fund management company, asset manager, other institutional investor, or private individual);
- the fee volume or revenues generated by the Investor with a group of, or all UBS group affiliates;
- a legitimate purpose to obtain specific disclosures, which includes primarily legal, regulatory or tax obligations.

Any Investor or prospect investor may obtain additional information on the existence and nature of such specific arrangements upon request addressed to the AIFM's registered office.

Whenever an Investor obtains preferential treatment or the right to obtain preferential treatment, which would differ from the criteria indicated above, the Company or the AIFM will inform the eligible existing Shareholders, as well as any new investors before they invest in a Subfund, of the existence and nature of such preferential treatment.

Certain Investors may be other Funds managed/advised by the Portfolio Manager. Such Investor may have transparency over the Fund's investments and such information may influence these Funds' investment decisions, including without limitation making additional subscriptions, redemptions or entering into transactions intended to hedge its exposure. These Funds may be required to redeem their Participating Shares, in whole or in part, in order to be in compliance with certain rules and regulations including investment restrictions and limits as relevant.

20. Taxation

The following Chapter is a short summary of certain important Luxembourg tax principles in relation to the Company. The summary is based on the laws and practice currently in force and applied in Luxembourg at the date of this Offering Memorandum. Provisions may change at short-term notice, possibly with retroactive effect.

The Chapter does not purport to be a complete summary of tax law and practice currently applicable in Luxembourg and does not contain any statement with respect to the tax treatment of an investment in the Company in any other jurisdiction. Furthermore, this Chapter does not address the taxation of the Company in any other jurisdiction or the taxation of any subsidiaries or intermediary companies of the Company or of any investment structure in which the Company holds an interest in any jurisdiction.

Prospective investors should inform themselves of, and where appropriate take advice on, the laws and regulations (such as those relating to taxation, foreign exchange controls and being a Prohibited Person) applicable to the subscription, purchase, holding, and redemption of Shares in the country of their citizenship, residence or domicile, and of the current tax status of the Company in Luxembourg. This Chapter should be read in conjunction with the tax related risk Chapter.

20.1 The Company

At the date of this Offering Memorandum, under current law and practice, the Company is not liable for any Luxembourg direct tax other than an annual subscription tax (taxe d'abonnement) of 0.01% per annum of the Total Net Assets, calculated and payable at the end of each quarter.

The income and gains of the Company will not be subject to corporate income tax, municipal business tax and net worth tax in Luxembourg.

No duty or other tax will be paid in Luxembourg on the issue of Shares of the Company except for a fixed registration duty of EUR 75 paid by the Company upon incorporation and upon future modification (if any) of the Articles of Incorporation of the Company.

Dividends and interest, if any, received by the Company from investments may be liable to taxes and/or withholding taxes in the countries concerned at varying rates, such (withholding) taxes usually not being recoverable.

20.2 Shareholders

At the date of this Offering Memorandum, based on present law and administrative practice and subject to any amendment thereof, Shareholders are not liable to any taxation in Luxembourg in relation to the holding, transfer, sale, redemption, assignment, purchase or repurchase of the Shares (except for Shareholders who are domiciled, resident or have a permanent establishment in Luxembourg).

21. General Meetings

The annual general meeting of Shareholders of the Company will be held at the registered office of the Company or at such other place in Luxembourg. The annual general meeting shall offer Shareholders the opportunity to approve the annual accounts of the Company, to approve the appointment of the Auditor of the Company, as the case may be, and approve the report of the Board of Directors.

The general meeting shall be convened in accordance with the 1915 Law. The requirements as to attendance, quorum and majorities at all general meetings will be those laid down in the 1915 Law and in the Articles of Incorporation. Shareholders have, as set out in more detail in the Articles of Incorporation, *inter alia* the right to vote on amendments of the Articles of Incorporation.

Each entire Share is entitled to one vote.

Resolutions of meetings of Shareholders will apply to the Company as a whole and to all Shareholders of the Company, provided that any amendment affecting the rights attached to the Shares of any Subfund(s) and the rights of the holders of such Shares may further be submitted to a prior vote of the Shareholders of the relevant Subfund(s) as far as the Shareholders of the Subfund(s)) in question are present or represented.

Except as otherwise required by the 1915 Law or as otherwise provided in the Articles of Incorporation, resolutions at a meeting of Shareholders duly convened will be passed by a simple majority of the votes cast regardless of the proportion of the capital represented.

The Directors may determine all other conditions that must be fulfilled by Shareholders for them to take part in any meeting of Shareholders.

The Articles of Incorporation provide that the Shareholders of a Subfund or Class issued in respect of any Subfund may hold, at any time, general meetings to decide on any matters, which relate exclusively to such Subfund or Class.

Resolutions at a general meeting of Shareholders of a Subfund or Class are passed in accordance with the 1915 Law and the Articles of Incorporation. Moreover, any resolution of the general meeting of Shareholders of the Company, affecting the rights of the Shareholders of any Subfund or Class vis-à-vis the rights of the Shareholders of any other Subfund or Class shall be subject to a resolution of the general meeting of Shareholders of such Subfund or Class in compliance with article 68 of the 1915 Law.

22. Company Documents, Amendments, Reporting and Notices

22.1 Company Documents

The Company Documents are available for inspection by the Shareholders at the registered office of the Company.

22.2 Amendments to the Company Documents

The Articles of Incorporation may be amended from time to time in accordance with the quorum and majority requirements laid down by Luxembourg law and the Articles of Incorporation.

The Offering Memorandum, including the details of the Subfunds in the Appendices, and including particularly the Investment Objective and/or Investment Policy, may be amended from time to time by the Board of Directors with the prior approval of the CSSF in accordance with Luxembourg law and regulations.

22.3 Reporting and Investors Relation

In respect of each Financial Year, the Company will distribute to each Shareholder an annual report, which will be established in accordance with IFRS, including audited financial statements for the Company, within one hundred and eighty (180) days after the end of such Financial Year.

The Company's Financial Year ends on 31 December of each year and the first Financial Year of the Company shall begin on the creation of the Company and shall end on 31 December 2017. The Company's first annual report will be published for this first Financial Year.

The Board of Directors may, in its sole discretion, decide to provide Investors with additional unaudited reports at a higher frequency.

Any other financial information concerning the Company, including the Net Asset Value per Share and the issue prices of Shares will be made available at the registered office of the Company. Furthermore, the Company will make available to each Shareholder information with regard to the relevant Subfund as of each Valuation Date, including the Net Asset Value per Share and the composition of the portfolio held by the Subfund.

The following disclosures will be made in the annual report or in another appropriate periodic reporting, and where necessary on an ad hoc basis:

- Where available, the historical performance of each Subfund.
- Changes to the Depositary Bank's liability.
- The loss of a financial instrument.
- Any changes to the maximum level of leverage which the AIFM may employ on behalf of each Subfund as well as any right of the re-use of collateral or any guarantee granted under the leveraging arrangement.
- The total amount of leverage employed by each Subfund.
- Any new arrangements for managing the liquidity of each Subfund.
- The percentage of each Subfund's assets which are subject to special arrangements arising from their illiquid nature.
- The current risk profile of each Subfund and the risk management systems employed by the AIFM to manage those risks.
- Any changes to risk management systems employed by the AIFM in accordance with article 21(4) c) of the 2013 Law as well as its anticipated impact on each Subfund and their Investors.
- Information on the acquisition pursuant to Article 29 (2) of the AIFM Directive when a Subfund acquires control of a non-listed company pursuant to Article 26(1) in conjunction with (5) of the AIFM Directive.

22.4 Notices

All notices and notifications to Shareholders will be published as required under Luxembourg law and regulations and as the Board of Directors shall decide.

23. Lifetime, Liquidation and Merger

23.1 Dissolution and Liquidation of the Company

The Company has been established for an unlimited period of time. Unless stated otherwise in the relevant Appendix, the Subfunds have been established for an unlimited period.

The Company may at any time be dissolved by a resolution taken by the general meeting of Shareholders subject to the quorum and majority requirements as defined in the Articles of Incorporation of the Company.

Whenever the capital falls below two thirds of the legal minimum capital, the Board of Directors must submit the question of the dissolution of the Company to the general meeting of Shareholders. The general meeting, for which no quorum shall be required, shall decide on simple majority of the votes of the Shares present and represented at the meeting.

The question of the dissolution of the Company shall also be referred to the general meeting of Shareholders whenever the capital falls below one quarter of the minimum capital. In such event, the general meeting shall be held without quorum requirements, and the dissolution may be decided by the Shareholders holding one quarter of the votes present and represented at that meeting.

The meeting must be convened so that it is held within a period of forty (40) days from when it is ascertained that the net assets of the Company have fallen below two thirds or one quarter of the legal minimum as the case may be.

The issue of new Shares and redemptions by the Company shall cease on the date of publication of the notice of the general meeting of Shareholders, to which the dissolution and liquidation of the Company shall be proposed. One or more liquidators shall be appointed by the general meeting of Shareholders to realise the assets of the Company, subject to the supervision of the relevant supervisory authority in the best interests of the Shareholders. The proceeds of the liquidation of each Subfund, net of all liabilities and liquidation expenses, shall be distributed by the liquidators among the holders of Shares in each Class in accordance with their respective rights. The amounts not claimed by Shareholders at the end of the liquidation process shall be deposited, in accordance with Luxembourg law, with the Caisse de Consignations in Luxembourg until the statutory limitation period has lapsed.

23.2 Termination of a Subfund or Class

The Board of Directors may from time to time decide to terminate, merge or divide any Class or any Subfund of the Company and to compulsory redeem and cancel all the Shares of the relevant Subfund or Class at their Net Asset Value per Share (taking into account actual realisation prices of investments and realisation expenses) as calculated on the Valuation Day at which such decision shall take effect.

The redemption and cancellation of all the Shares of a Class may, in the discretion of the Board of Directors, result either in the termination or the deactivation of that Class. A deactivated Class no longer has any Shareholders and stops being offered. As a result, its Net Asset Value stops being calculated. A deactivated Class can be reopened for subscription at any moment upon decision of the Board of Directors at an initial issue price determined by the Board of Directors.

The redemption and cancellation of all the Shares of a Subfund results in its termination.

Shareholders shall be informed in writing or by any other means of communication individually accepted by the Shareholders of the reasons for, and the procedure of, the redemption operations. Any order for subscription and any redemptions shall be suspended as from the moment of the announcement of the termination, the merger or the transfer of the relevant Subfund or Class.

Notwithstanding the powers conferred to the Board of Directors by the preceding paragraphs, the general meeting of Shareholders of any Subfund or Class, upon proposal from the Board of Directors, resolve to redeem all the Shares of the relevant Subfund or Class and to refund to the Shareholders the Net Asset Value of their Shares (taking into account actual realisation prices of investments and realisation expenses) determined with respect to the Valuation Day on which such decision shall take effect. There shall be no quorum requirements for such general meeting of Shareholders, which shall resolve at the simple majority of those present and represented.

Assets which could not be distributed to their owners upon the implementation of the redemption will be deposited with the Depositary Bank for the period determined by Luxembourg law and regulation; after such period, the assets will be deposited with the Caisse de Consignations on behalf of the persons entitled thereto.

All redeemed Shares shall be cancelled by the Company.

In addition, Subfunds may be liquidated in accordance with the liquidation procedure as described in Chapter 23.1, and in the Articles of Incorporation, as applied mutatis mutandis.

23.3 Dissolution of a Subfund - FX Hedging transactions

During the dissolution of a Subfund, and unless otherwise decided by the Board of Directors of the Company, the Portfolio Manager shall continue to manage the Subfund's assets with the main purpose of realizing the assets in the best interest of the Shareholders. During such period, the Portfolio Manager may decide, in its discretion and irrespective of any investment restrictions applicable to a given Subfund during its lifecycle, to suspend or cease all or part of the foreign exchange transactions in relation to Share Class hedging or portfolio hedging. Such suspension or cessation can be decided, for example, if such FX Hedging transactions are deemed to no longer be in the best interests of the Shareholders (e.g. the costs of hedging outweigh the benefits for Shareholders).

23.4 Merger, Division or Transfer of Subfunds or Classes

The Board of Directors may decide to divide or merge the Shares of any Class in any Subfund.

The Board of Directors may decide to allocate the assets of any Subfund or Class to those of another existing Subfund or Class within the Company or to another Luxembourg undertaking for collective investment or to another Subfund or Class within such other Luxembourg undertaking for collective investment (the "**New Subfund**") and to redesignate the Shares of the relevant Subfund or Class as Shares of another Subfund or Class (following a split or consolidation, if necessary, and the payment of the amount corresponding to any fractional entitlement to Shareholders). Such decision will be published in the same manner as described above in Chapter 23.2 (and, in addition, the publication will contain information in relation to the New Subfund), minimum one month before the date on which the merger becomes effective in order to enable Shareholders to request redemption of their Shares, free of charge, during such period, if required by the CSSF.

Under the same circumstances as provided above in the Chapter 23.2, the Board of Directors may decide to reorganise a Subfund or Class by means of a division into two or more Subfunds or Classes. Such decision will be published in the same manner as in Chapter 23.2 (and, in addition, the publication will contain information about the two or more New Subfunds) minimum one month before the date on which the division becomes effective, in order to enable the Shareholders to request redemption of their Shares free of charge during such period, if required by the CSSF.

Notwithstanding the powers conferred to the Board of Directors by the preceding paragraphs, such a reorganisation of a Subfund or Class within the Company (by way of a merger or division) may be decided upon by a general meeting of the Shareholders of the relevant Subfund or Class. There shall be no quorum requirements for such general meeting and it will decide upon such a merger or division by resolution taken at the simple majority of those present or represented.

A contribution of the assets of any Subfund or Class to another undertaking for collective investment referred to in the first paragraph of this Chapter 23.4 or to another Subfund or Class within such other undertaking for collective investment shall require a resolution of the Shareholders of the Subfund or Class concerned, taken with a fifty per cent (50%) quorum requirement of the Shares in issue and adopted at a 2/3 majority of the Shares present or represented at such meeting, except when such an merger is to be implemented with a Luxembourg undertaking for collective investment of the contractual type (*fonds commun de placement*) or a foreign based undertaking for collective investment, in which case resolutions shall be binding only upon such Shareholders who will have voted in favour of such merger.

24. Data Protection Policy

In accordance with the provisions of the Luxembourg Law of 1 August 2018 on the organisation of the National Data Protection Commission and the general data protection framework, as amended, and Regulation (EU) 2016/679 of 27 April 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data (the "data protection legislation"), the Company acts as a data controller and collects, stores and processes, by electronic or other means, the data provided by investors for the purpose of performing the services required by investors and in order to meet the Company's legal and supervisory obligations.

The data processed includes in particular the investor's name, contact details (including their postal or email address), bank account details, the amount and the nature of the investments in the Company (and if the investor is a legal entity, the data of natural persons connected with this legal entity, such as its contact person(s) and/or beneficial owner(s)) ("personal data").

Investors may decline to transfer personal data to the Company at their own discretion. However, in this case the Company is entitled to reject orders to subscribe shares.

Investors' personal data is processed when they enter into a relationship with the Company and in order to carry out the subscription of shares (i.e. to fulfil a contract), to safeguard the Company's legitimate interests and to meet the Company's legal obligations. Personal data is processed for the following purposes in particular: (i) to carry out subscriptions, redemptions and conversions of shares, pay dividends to investors and administer client accounts; (ii) to manage client relationships; (iii) to carry out checks relating to excess trading and market timing practices and for tax identification that may be mandated by Luxembourg or foreign legislation and regulations (including laws and regulations relating to FATCA and the CRS); (iv) to comply with applicable anti-money

laundering regulations. Data provided by shareholders is also processed (v) to administer the Company's register of shareholders. In addition, personal data may be used (vi) for marketing purposes.

The above-mentioned legitimate interests include:

- the purposes listed in points (ii) and (vi) of the previous paragraph of this data protection section for which data may be processed;
- meeting the accounting and supervisory obligations of the Company in general;
- carrying out the Company's business in accordance with appropriate market standards.

For this purpose and in accordance with the provisions of the data protection legislation, the Company may transfer personal data to its data recipients (the "recipients"), who may be affiliated or external companies that assist the Company in its activities in relation to the above-mentioned purposes. These include in particular the AIFM, the administrative agent, the distributors, the depositary, the paying agent, the Portfolio Manager, the domiciliary agent, the global distributor, the auditor and the legal advisor of the Company.

The recipients may pass on the personal data on their own responsibility to their representatives and/or agents (the "sub-recipients"), who may process the personal data solely for the purpose of assisting the recipients in performing their services for the Company and/or in meeting their legal obligations.

The recipients and sub-recipients may be located in countries inside or outside the European Economic Area (EEA) where data protection legislation may not provide an appropriate level of protection.

When transferring personal data to recipients and/or sub-recipients located in a country outside the EEA which does not have appropriate data protection standards, the Company shall establish contractual safeguards to ensure that investors' personal data is afforded the same protection as that provided by the data protection legislation and may use the model clauses approved by the European Commission to do so. Investors are entitled to request copies of the relevant documents that enable the transfer of personal data to these countries by sending a written request to the Company's address listed above.

When subscribing to shares, every investor is explicitly reminded that their personal data may be transferred to and processed by the above-mentioned recipients and sub-recipients, including companies located outside the EEA and in particular in countries that may not offer an appropriate level of protection.

The recipients and sub-recipients may process the personal data as processors when handling the data on the Company's instructions, or as controllers in their own right when processing the personal data for their own purposes, i.e. to meet their own legal obligations. The Company may also transfer personal data to third parties in accordance with the applicable legislation and regulations, such as government and supervisory authorities, including tax authorities inside or outside the EEA. In particular, personal data may be passed on to the Luxembourg tax authorities which in turn act as controllers and can forward this data to foreign tax authorities.

In accordance with the provisions of the data protection legislation, every investor has the right, by sending a written request to the Company's address listed above, to the following:

- Access to his or her personal data (i.e. the right to obtain confirmation from the Company as to whether his or her personal data is being processed, the right to obtain certain information as to how the fund processes his or her personal data, the right of access to such data and the right to obtain a copy of the personal data processed (subject to any statutory exemptions));
- Rectification of their personal data if it is inaccurate or incomplete (i.e. the right to oblige the Company to update or correct inaccurate or incomplete personal data or factual errors accordingly);
- Restriction of the use of their personal data (i.e. the right to request that the processing of their personal data is restricted to the storage of such data in certain circumstances until they give consent);
- Objecting to the processing of their personal data, including to the processing of their personal data for marketing purposes (i.e. the right to object, on grounds relating to the specific situation of the investor, to the processing of personal data based on the performance of a task carried out in the public interest or the legitimate interests of the Company; the Company terminates such processing unless it can prove that there are compelling legitimate grounds for the processing which override the interests, rights and freedoms of the investor or that they need to process the data for the establishment, exercise or defence of legal claims);
- Deletion of their personal data (i.e. the right to request the erasure of personal data under certain conditions, including when processing of such data by the Company is no longer necessary in relation to the purposes for which it was collected or processed);
- Data portability (i.e. the right, where technically feasible, to request the transfer of data to the investor or another data controller in a structured, shared and machine-readable format).

Investors also have the right to lodge a complaint with the National Data Protection Commission at 1, Avenue du Rock'n'Roll, L-4361 Esch-sur-Alzette, Grand Duchy of Luxembourg, or with another national data protection authority if they are resident in another Member State of the European Union.

Personal data will not be stored for longer than required for the purpose for which the data is being processed. The relevant statutory time limits for data storage shall apply.

25. Legal Rules, Applicable Law, Jurisdiction

Investors are legally bound by the Articles of Incorporation, the terms of their Subscription Form and the terms of this Offering Memorandum.

The relationship between the Investors and the Company shall be governed and construed in all respects in accordance with the laws of the Grand Duchy of Luxembourg. Any dispute or controversy between an Investor and the Company shall be submitted to the exclusive jurisdiction of the District Court of Luxembourg City.

Investors shall note that judgments falling within the scope of Regulation 1215/2012 and which are given and enforceable in a Member State shall be enforceable in another Member State

without a declaration of enforceability being required, upon production of a copy of the judgment which satisfies the conditions necessary to establish its authenticity and a certificate to be issued by the court of origin. The recognition and enforcement of such judgments may be refused by the Luxembourg court only in the event of an application for refusal of recognition or enforcement and in accordance with the specific provisions contained in Regulation 1215/2012. In particular, recognition and enforcement shall be refused if the judgment issued by the court of origin is contrary to the Luxembourg public order (*ordre public*).

26. Appendices to the Offering Memorandum – The Subfunds

The information contained in each Appendix is supplemental to the information provided for in the general Chapter of the Offering Memorandum and should always be read together with the general Chapter.

At the date of this Offering Memorandum, the Company offers Shares for subscription in the following Subfund(s):

- Euler ILS SICAV-SIF - Euler (Lux) ILS Balanced Fund
- Euler ILS SICAV-SIF – Euler (Lux) ILS Low Volatility Plus Fund

Name of the Subfund	Euler ILS SICAV-SIF – Euler (Lux) ILS Balanced Fund
Investment Objective	The investment objective of the Subfund is to provide investors with a return over the short-term interest rate over a longer period of time, while keeping performance above short term interest rate low correlated to traditional financial markets. The objective is to invest in average into a broad range of insurance linked investments commonly referred to as low to medium risk investments. This particular Subfund pursues a medium risk ILS strategy with meaningful portfolio diversification across a number of dimensions as indicated hereafter under the section "Investment Policy" in order to reduce the maximum drawdown potential from any single event such as mega or very large insurance events. The Subfund mainly focuses on ILS Instruments such as but not limited to collateralised reinsurance contracts, securitised insurance linked instruments (e.g. catastrophe bonds) and derivatives thereof in order to achieve the given liquidity profile. The investment objective is to minimize exposure by using financial instruments and reduce exposure if possible. The goal is to implement these risk reduction measures typically around the occurrence of high probability of an occurrence of a catastrophic event. The Subfund qualifies as a financial product under Art. 8 of SFDR.
Investment Policy	The Subfund seeks to achieve its Investment Objective by directly or indirectly purchasing or selling various types of securities and financial instruments, the return or performance of which are linked to natural and non-natural catastrophe risks through a wide range of financial instruments as per Chapter 6.2**.** of the Offering Memorandum. In case of securities (e.g. catastrophe bonds), such instruments may be issued by (re)insurance companies or special purpose vehicles assuming mainly insurance risks from insurance companies, reinsurance companies, corporations or governments. In case of financial contracts, OTC derivatives or otherwise, such instruments include collateralized reinsurance contracts, industry loss warranties ("**ILWs**"), ISDA-based derivative contracts and other insurance linked derivatives (e.g. weather futures). The exposure of the Subfund to ILS is mainly but not limited achieved through the following investment categories; in particular (i) catastrophe bonds issued by special purpose vehicles, (ii) collateralized reinsurance contracts, (iii) insurance-linked swaps and derivatives, (iv) ILS theme UCIs. In order to efficiently manage the assets of the Subfund held as collateral, said portion of the portfolio may consist of cash and collateral, such as money market funds and government and corporate bonds. In order to minimize currency effects for the Subfund foreign exchange hedging instruments such as foreign exchange spot and foreign exchange forwards are used. All investments will be made and all investment techniques will be used in accordance with the Investment Restrictions as laid down in Chapter 7. The Portfolio Manager seeks to achieve risk diversification through a portfolio that is diversified across a number of dimensions, such as • geographical regions (e.g. Texas, Florida, Mexico, Germany), • peril (e.g. quake, wind, flood),

	• trigger type (industry loss, indemnity), • trigger sequence (first event, second event, etc.), • trigger level (loss amount, layers etc.). The Portfolio Manager aims to reduce the loss exposure of the portfolio to a single event risk and the probability of default of the liabilities exposed to a single event risk. The Portfolio Manager will seek to select exposure from, but not limited to, the following risk universe: • natural catastrophe (e.g., earthquake, hurricane, windstorm, cyclone, typhoon, flood), • transportation (e.g., aviation, marine), • industrial insurance (e.g., energy, satellite). • Other non-natural catastophes (e.g. cyber, life)
Specific Risk Profile	Investors should read, be aware of and consider Chapter 8 of this Offering Memorandum.
Reference Currency	USD
Valuation Day	The last calendar day of each month and such other day or days as the AIFM may from time to time determine.
Calculation Day	Calculation Day is expected to be on or around the 20th Business Day after the relevant Valuation Day.
Business Day	A full day on which banks are open for business in Luxembourg, London, Dublin and Zurich.
Portfolio Manager	Euler ILS Partners Ltd, Zurich has been appointed as the Portfolio Manager of this Subfund.
Eligible Investors	Well-Informed Investors pursuant to Chapter 2 "Definitions".
Investors Profile	The Subfund is suitable for Investors seeking exposure to the ILS market with an investment horizon of at least three to five years.
Classes	The Classes of Shares available in this Subfund are set out in Chapter 3.
Subscriptions	Except for the Class EBH-SP-III, EBH-SP-IV, SA-SP-III, SA-SP-IV, SA-SP-V, SAH-SP-III, SAH-SP-IV, SAH-SP-V, SB-SP-III, SB-SP-IV, SB-SP-V, SBH-SP-III, SBH-SP-IV, SBH-SP-V, SA-II-SP-III, SA-II-SP-IV, SA-II-SP-V, SAH-II-SP-III, SAH-II-SP-IV, SAH-II-SP-V, SB-II-SP-III, SB-II-SP-IV, SB-II-SP-V, SBH-II-SP-III, SBH-II-SP-IV and SBH-II-SP-V Shares, which are Special Situation Preference Shares (including Special Situation Preference SR Shares), the Shares may be subscribed for as of the first calendar day of each calendar month or at such other times as the AIFM may determine in its discretion (such date being referred to as the "**Subscription Day**") at the Net Asset Value per Share Class as per the Valuation Day (based on the method of calculating the Net Asset Value as described in Chapter 15) plus the applicable sales charges and any taxes. Written subscription applications must be submitted to the Central Administration or the relevant third party authorised by the AIFM to accept applications for the subscription or redemption of Shares of the Subfund by 3 p.m. (Central European Time) five Business Days prior to the relevant Subscription Day, with cleared funds received in the Subfund's account with the Depositary Bank three Business Days prior to the relevant Subscription Day.

	Subscription applications received after this deadline shall be deemed to be an application to subscribe Shares on the following Subscription Day. Subscription applications shall be settled within five Business Days following the Calculation Day if receipt of the subscription application is confirmed by the Central Administration or the relevant third party authorised by the Company to accept applications for the subscription or redemption of Shares on the Valuation Day, at the latest.
Leverage	Under AIFMD, 'leverage' is defined as being any method by which the AIFM increases the exposure of the Subfund whether through borrowing of cash or securities, leverage embedded in derivative positions or by any other means. The leverage creates risks for the Subfund. A leverage (as defined by the AIMFD) of 100% means a leverage-free portfolio. AIFMD uses two distinct definitions of leverage, both of which are calculated on a regular basis by the AIFM: • Under the 'gross method' (as defined by the AIFMD), the leverage is calculated as the ratio between the Subfund's investment exposure (calculated by adding the absolute values of all portfolio positions, including the sum of notionals of the derivative instruments used but excluding cash and cash equivalents) and the Net Asset Value. Such leverage shall not exceed 500% for the Subfund; and • alternatively, the 'commitment method' (as defined by the AIFMD) takes into account netting and hedging arrangements and is defined as the ratio between the Subfund's net investment exposure (not excluding cash and cash equivalents) and the Net Asset Value. Such leverage shall not exceed 450% for the Subfund. Due to the characteristics of ILS as the underlying asset class, both leverage calculation methods mentioned above, result in a higher presumption of the indicated value. Within non-securitized ILS Instruments, the collateralized amount is added to the underlying contract itself for leverage calculation purposes, creating indirect leverage without resulting in actual "financial" leverage. As a general rule, the underlying contract which is fully collateralized represents the "notional" amount which is at the same time the maximum exposure (i.e. maximum possible loss). In addition, in case of the occurrence of an insured event related to the ILS investment, posted collateral is not released back into the Subfund for a considerable amount of time, causing Net Asset Value fluctuations during that period which may further lead to a higher perceived calculated leverage. Lastly, foreign exchange forward instruments used to hedge both the portfolio as well as various share classes also raise the leverage value indicated above. For the avoidance of doubt, fully collateralized first to default transactions are not considered leverage.
Borrowing (applicable as of 1st January 2026)	The Subfund may, from time to time, borrow cash for temporary liquidity purposes, including but not limited to facilitating timely settlement of investment obligations, managing redemptions, or covering operational expenses. The maximum amount of such borrowings shall not exceed 30% of the Total Assets of the Subfund, unless otherwise provided in the relevant Appendix. Borrowings may take the form of unsecured revolving credit facilities, overdraft lines, or other financing arrangements on terms consistent with prevailing market standards and subject to the oversight of the AIFM and, where appropriate, the Board of Directors.

The use of such borrowings shall be disclosed in the annual reports of the Company and monitored as part of the AIFM's risk and liquidity management framework in accordance with Article 16 of the AIFMD and CSSF Circular 18/698.

Securities financial transactions and total return swaps (applicable as of 1st January 2026)

The Subfund may, in accordance with its investment objectives and applicable regulatory limitations, enter into securities financial transactions ("**SFTs**") as well as total return swaps ("**TRS**") for efficient portfolio management and risk management purposes, including, without limitation, to manage liquidity needs arising from locked collateral, cat bond extensions, large or unexpected redemption requests, to meet settlement obligations, margin calls, or to avoid the premature or forced liquidation of portfolio assets under unfavourable market conditions. SFTs includes, without limitation, securities lending, repurchase agreements and reverse repurchase agreements.

Subject to applicable laws and regulations and the risk management framework of the AIFM, the Subfund may, at any time, enter into SFTs and TRS whose aggregate net exposure, measured on a mark-to-market basis, shall not exceed 20% of the Subfund's NAV. For the avoidance of doubt, this 20% limit applies on a combined basis across SFTs and TRS. Temporary breaches arising from market movements or operational reasons will be remedied in the best interests of investors.

At the current date of this Offering Memorandum, the Subfund does not engage SFTs or TRS. The expected proportion of assets subject to SFTs and TRS is therefore 0% of the Subfund's NAV.

SFTs		**TRS**	
Expected	**Maximum**	**Expected**	**Maximum**
0-10%	20%	0-10%	20%

The Offering Memorandum nevertheless authorises SFTs and TRS to be activated in the future for efficient portfolio management, subject to the AIFM's approval and the Depositary's oversight, in accordance with Regulation (EU) 2015/2365 ("SFTR") and applicable CSSF requirements.

Counterparties to borrowing, SFTs and TRS will be institutions subject to prudential supervision and of appropriate financial standing (or are otherwise deemed acceptable by the AIFM's risk management). Transactions will be executed on an arm's-length basis. The AIFM will manage counterparty exposure with due regard to concentration, credit quality and correlation, and may diversify counterparties where appropriate. Conflicts of interest will be identified, escalated and managed in accordance with the AIFM's conflicts of interest policy; affiliated counterparties may be used where permitted, provided that terms are no less favourable to the Sub-Fund than those available from independent third parties.

Securities lending arrangements will provide the Subfund with the contractual right to recall securities and to terminate any loan at any time (or within standard settlement periods). Repurchase and reverse repurchase agreements will be entered into on terms that afford the Subfund the ability to call for the return of securities and/or cash on either an open basis or at agreed maturities consistent with the Subfund's liquidity profile. For TRS, the Subfund will retain the ability to terminate transactions on customary notice periods as provided for in the relevant master and confirmation agreements. In general, the following applies to TRS:

i. One-hundred percent (100%) of the gross return generated by total return swaps, net of direct and indirect operational costs/fees, will be returned to the Sub-Fund.

	ii. Any direct and indirect operational costs/fees arising from total return swaps, will be paid to the entities outlined in the annual and semi-annual report of the Fund. iii. There are no fee sharing arrangements on total return swaps. All direct revenues and other economic benefits arising from SFTs and TRS, net of direct operational costs and fees (including, where applicable, fees or revenue shares payable to an agent lender or securities lending platform), will accrue to the Subfund. Any such costs and fees will be transparent, at arm's length and reflect services rendered. Details of the Subfund's gross and net revenues from SFTs and TRS, together with related direct costs and fees, will be disclosed in the Subfund's periodic reports in accordance with applicable regulation. The use of borrowing, SFTs and TRS may increase the Subfund's leverage, counterparty exposure and liquidity risk, and may give rise to operational, legal and custody risks. The AIFM's risk management process integrates these risks into the Subfund's global exposure and leverage calculations and ensures on-going monitoring of asset encumbrance, settlement profiles and collateral sufficiency. The Subfund will comply with applicable transparency and reporting requirements relating to SFTs and TRS. Investors should note that while these techniques are intended to be used for efficient portfolio management and risk management, they may not achieve their desired results and may adversely affect the Subfund's performance. Further information on the risk management, collateral eligibility, haircut policy, counterparty selection, leverage and valuation methodologies applied to borrowing, SFTs and TRS is available from the AIFM upon request. The use of SFTs and TRS is not expected to affect the Subfund's overall risk profile.
Performance Fee	No Performance Fee is payable to the Portfolio Manager in respect of any of the shares of the Company issued in respect of the Subfund.
Management Fee in respect of Special Situation Preference Shares (including Special Situation Preference SR Shares)	A maximum Management Fee is payable on a monthly basis with respect to any Special Situation Preference Shares (including Special Situation Preference SR Shares) at the rate agreed between the AIFM and the Portfolio Manager which will generally be at the same rate as the rate applicable to the corresponding Participating Shares held by Shareholders having an interest in such issuance of Special Situation Preference Shares (including Special Situation Preference SR Shares); provided, however, that the Management Fee rate with respect to any Special Situation Preference Shares (including Special Situation Preference SR Shares), of which the maximum Management Fee rate is set out in Chapter 3. Euler ILS SICAV-SIF - Summary of Share Classes", shall be reduced as of the 19th month following the issuance of such Special Situation Preference Shares (including Special Situation Preference SR Shares) by an amount representing an aggregate 30% discount and as of the 37th month by an amount representing an aggregate 60% discount. Any portion of the Management Fee attributable to a class of Special Situation Preference Shares (including Special Situation Preference SR Shares) will in general be paid from the corresponding Participating Shares held by Shareholders having an interest in such Special Situation Preference Shares (including Special Situation Preference SR Shares). For the avoidance of doubt, if the respective Special Situation Preference Shares (including Special Situation Preference SR Shares) have been in issue for longer than 18 or 36 months (as the case may be) as at 1st August 2021, the above-mentioned fee reduction will only be applied as from 1st August 2021.

Specific Procedure	**Redemption**	Each Shareholder will have the right to redeem any or all of its Shares as of each Redemption Day applicable to the relevant Class of Shares (as specified below) upon prior written notice by fax, email or post mail to the Central Administration or the relevant third party authorised by the Company to accept applications for the subscription or redemption of Shares of the Subfund by 3 p.m. (Central European Time) subject to the following conditions: • 45 calendar days prior to the relevant Redemption Day in respect of Classes DB/DBH, DA/DAH, QB/QBH, QA/QAH, UB/UBH, UA/UAH, SB/SBH, SA/SAH, SB-II/SBH-II, SA-II/SAH-II, EB/EBH, EA/EAH, IB1/IBH1, IA1/IAH1, IB5/IBH5, IA5/IAH5, IB10/IBH10, IA10/IAH10, or • 90 calendar days prior to the relevant Redemption Day in respect of Classes IB25/IBH25, IA25/IAH25, IB50/IBH50, IA50/IAH50, IB100/IBH100, IA100/IAH100, provided, however, that a Shareholder who seeks to redeem all, or any portion, of its Shares prior to the first Redemption Day occurring not less than: • one year after the date such Shares were acquired, in respect of Classes QB/QBH, QA/QAH, UB/UBH, UA/UAH, SB/SBH, SA/SAH, SB-II/SBH-II, SA-II/SAH-II, IB1/IBH1, IA1/IAH1, IB10/IBH10, IA10/IAH10, IB5/IBH5, IA5/IAH5, EB/EBH, EA/EAH, DB/DBH, DA/DAH, or • two years after the date such Shares were acquired, in respect of Classes IB25/IBH25, IA25/IAH25, IB50/IBH50, IA50/IAH50, IB100/IBH100, IA100/IAH100, will be subject to a redemption fee retained by the Subfund equal to 2% of the amount redeemed. Class EBH-SP-III, EBH-SP-IV, SA-SP-III, SA-SP-IV, SA-SP-V, SA-II-SP-III, SA-II-SP-IV, SA-II-SP-V, SAH-SP-III, SAH-SP-IV, SAH-SP-V, SB-SP-III, SB-SP-IV, SB-SP-V, SBH-SP-III, SBH-SP-IV, SBH-SP-V, SAH-II-SP-III, SAH-II-SP-IV, SAH-II-SP-V, SB-II-SP-III, SB-II-SP-IV, SB-II-SP-V, SBH-II-SP-III, SBH-II-SP-IV and SBH-II-SP-V Shares are Special Situation Preference Shares (including Special Situation Preference SR Shares) and are not redeemable at the request of Shareholders. <u>Redemption Days</u>: • first calendar day in January, April, July and October of each year for the Class QA, QAH, QB, QBH, DA, DAH, DB, DBH, EA, EAH, EB, EBH, IA1, IAH1, IB1, IBH1, IA5, IAH5, IB5, IBH5, IA10, IAH10, IB10, IBH10, UA, UAH, UB, UBH, SA, SAH, SB, SBH, SA-II, SAH-II, SB-II and SBH-II Shares; • first calendar day in January and July of each year for Class IA25, IAH25, IB25, IBH25, IA50, IAH50, IB50, IBH50, IA100, IAH100, IB100, IBH100; or • in respect of any Class, such other day or days as the Board of Directors may determine either generally or in respect of that Class. Redemption applications received by the Central Administration without sufficient notice will be deemed to be a request to redeem Shares as at the next available Redemption Day applicable to the relevant Class of Shares, and such Shares will be redeemed at the Redemption Price applicable as of the relevant Valuation Day. The application for redemption of any Shares must be sent by fax, email or post mail to the Central Administration and must include: • the number of shares the Shareholder wishes to redeem or the monetary amount the Shareholder wishes to redeem respectively, after deduction of any applicable redemption fee; and

	• The Class(es) from which such Shares are to be redeemed. In addition, the application for redemption must include the Shareholder's personal details. Failure to provide any of the aforementioned information may result in delay of such application for redemption whilst verification is being sought from the Shareholder. Applications for redemption must be duly signed by the respective registered Shareholders. A redemption request is irrevocable, unless the Board of Directors accepts the request for a partial or full withdrawal of the redemption request of the Shareholder in its absolute discretion. The Shares will be redeemed at the Redemption Price as of the relevant Redemption Day. The Shares will be redeemed in the order of their issuance, starting with the Shares that have been issued first. Without prejudice to any Deferral, payment of the Redemption Price will be effected within five Business Days after the Calculation Day which is subsequent to the relevant Valuation Day, provided that all the documents necessary in connection with the redemption have been received by the Board of Directors. A confirmation statement will be sent by the Central Administration or a third party authorised by the AIFM to accept applications for redemption of Shares to the redeeming Shareholder detailing the redemption proceeds due thereto as soon as reasonably practicable after determination of the Redemption Price of the Shares being redeemed. The redeeming Shareholder should check this statement to ensure that the transaction has been accurately recorded. On payment of the Redemption Price, the corresponding Shares will be cancelled immediately in the Company's share register. Any taxes, commissions and other fees incurred in the respective countries in which the Shares are sold will be charged to the redeeming Shareholder. As from the relevant Redemption Day and with respect to their Shares subject to a redemption request, such redeeming Shareholders will lose their rights as Shareholders, except the right to receive their redemption proceeds and any dividend which has been declared in respect of their Shares prior to the relevant Redemption Day, and in particular, will not have the right to receive notice of, attend or vote at any class or general meetings.
Deferral Level	Deferred Redemptions for all Classes of Participating Shares In the event that the Subfund receives redemption requests in respect of the Subfund as of any Redemption Day and the redemption amounts pursuant to such requests exceed, in the aggregate, the Deferral Level applicable to the relevant Redemption Day, the Board of Directors may, in its sole discretion, (i) satisfy all such redemption requests, or (ii) reduce all such redemption requests so that only the amount of Shares not exceeding the Deferral Level (or more, in the sole discretion of the Board of Directors) is redeemed on such Redemption Day for the respective Valuation Day (a "**Deferral**"). Deferral Level: • in respect of the Redemption Day of January: 40% of the Net Asset Value of the Subfund; • in respect of the Redemption Day of April: 25% of the Net Asset Value of the Subfund;

	• in respect of the Redemption Day of July: 25% of the Net Asset Value of the Subfund; • in respect of the Redemption Day of October: 10% of the Net Asset Value of the Subfund. Shareholders whose redemption amounts are reduced pursuant to a Deferral will participate in the aggregate amount available for redemption *pro rata* in accordance with the amount of each redemption request. To the extent that a Shareholder's requested redemption amount has been reduced by restrictions imposed by a Deferral, a request for the remaining portion of the original redemption amount will be deemed made (unless thereafter rescinded) as of the next quarterly Redemption Day (regardless of the Redemption Day typically applicable to such Class of Shares), and such remaining portion will be satisfied as of the next quarterly Redemption Day and thereafter to successive quarterly Redemption Days at the Redemption Price applicable as of the respective Valuation Day until fully redeemed, each time subject to the Deferral. Any such redemption request will be fully satisfied before satisfying any later redemption requests.
Suspension of Redemptions	The Board of Directors may suspend the redemption of Shares if (i) the calculation of the Net Asset Value per Share has been suspended in accordance with Chapter 15.2 or (ii) in the extraordinary circumstances in which redemptions would, in the opinion of the Board of Directors, materially adversely affect the interests of the Shareholders remaining in the Subfund. The Board of Directors will notify the CSSF and the Shareholders in writing in the event of a suspension of redemptions and will give written notice once the suspension period has been terminated. Any redemption requests made during a suspension period will be processed after the termination of the suspension period. In the event of a suspension of redemptions, a redemption request submitted in an earlier redemption request period will be treated in priority to a redemption request submitted in a later redemption request period.
Costs Associated with Investments in Target Funds	Investors should note that in general when investing in shares or units of other ILS theme UCIs ("**Target Funds**"), costs may be incurred at the level of the Subfund as well as the Target Funds. If the Subfund acquires shares/units of Target Funds that are managed, directly or by delegation, by the AIFM or by any other company with which the AIFM is linked by common management or control, or by a direct or indirect holding of more than 10% of the capital or votes ("**Affiliated Funds**"), the AIFM or the other company may not charge subscription or redemption fees on account of the Subfund's investment in the shares/units of such Affiliated Funds. Besides the expenses incurred by the AIFM in managing the Subfund, a management fee may also be charged for investments in Target Funds considered to be Affiliated Funds and be indirectly charged from the assets of the Subfund in respect of the Target Funds contained therein. In addition to such management fee, a performance fee may be indirectly charged from the assets of the Subfund in respect of the Target Funds contained therein. The cumulative management fee (excluding performance fees, if applicable) at Subfund and Target Fund level shall not exceed 3.00%.
Specific Risk Factors	**Investors should read, be aware of and consider Chapter 8, "Risk Factors" of this Offering Memorandum. Potential investors should focus more specifically but not only, on the risks associated with ILS described in section**

0. Moreover, the attention of potential investors is drawn to the fact that the Subfund may be predominantly invested during the Transitional Period as referred to in Chapter 7, "Investment Restrictions" in an ILS theme UCI which has an investment objective and policy similar with the Subfund's Investment Objective and Policy.

Sustainability Risks

Sustainability risks may result in a negative impact on the returns of the Subfund. The main sustainability risks are identified and managed in the context of the overall risk management process and may change over time.

Potential investors are also referred to the risks set out in Chapter 8, "Risk Factors" under section 8.8. "Sustainability Risks".

Name of the Subfund	Euler ILS SICAV-SIF – Euler (Lux) ILS Low Volatility Plus Fund
Investment Objective	The investment objective of the Subfund is to provide investors with a return over the short-term interest rate over a longer period of time, while keeping performance above short-term interest rate low correlated to traditional financial markets. The objective is to invest in average into a broad range of insurance linked investments commonly referred to as low to medium risk investments. This particular Subfund pursues a low to mid risk ILS strategy with meaningful portfolio diversification across a number of dimensions as indicated hereafter under the section "Investment Policy" in order to reduce the maximum drawdown potential from any single event such as mega or very large insurance events. The Subfund mainly focuses on ILS Instruments such as but not limited to collateralised reinsurance contracts, securitised insurance linked instruments (e.g. catastrophe bonds) and derivatives thereof in order to achieve the given liquidity profile. The investment objective is to minimize exposure by using financial instruments and reduce exposure if possible. The goal is to implement these risk reduction measures typically around the occurrence of high probability of an occurrence of a catastrophic event. The Subfund qualifies as a financial product under Art. 8 of SFDR.
Investment Policy	The Subfund seeks to achieve its Investment Objective by directly or indirectly purchasing or selling various types of securities and financial instruments, the return or performance of which are linked to natural and non-natural catastrophe risks through a wide range of financial instruments as per Chapter 6.2. of the Offering Memorandum. In case of securities (e.g. catastrophe bonds), such instruments may be issued by (re)insurance companies or special purpose vehicles assuming mainly insurance risks from insurance companies, reinsurance companies, corporations or governments. In case of financial contracts, OTC derivatives or otherwise, such instruments include collateralized reinsurance contracts, industry loss warranties ("**ILWs**"), ISDA-based derivative contracts and other insurance linked derivatives (e.g. weather futures). The exposure of the Subfund to ILS is mainly but not limited achieved through the following investment categories; in particular: (i) catastrophe bonds issued by special purpose vehicles, (ii) collateralized reinsurance contracts, (iii) insurance-linked swaps and derivatives, (iv) ILS theme UCIs. In order to efficiently manage the assets of the Subfund held as collateral, said portion of the portfolio may consist of cash and collateral, money market funds and government and corporate bonds. In order to minimize currency effects for the Subfund foreign exchange hedging instruments such as foreign exchange spot and foreign exchange forwards are used. All investments will be made and all investment techniques will be used in accordance with the Investment Restrictions as laid down in Chapter 7. The Portfolio Manager seeks to achieve risk diversification through a portfolio that is diversified across a number of dimensions, such as • geographical regions (e.g. Texas, Florida, Mexico, Germany), • peril (e.g. quake, wind, flood),

	• trigger type (industry loss, indemnity), • trigger sequence (first event, second event, etc.), • trigger level (loss amount, layers etc.). The Portfolio Manager aims to reduce the loss exposure of the portfolio to a single event risk and the probability of default of the liabilities exposed to a single event risk. The Portfolio Manager will seek to select exposure from, but not limited to, the following risk universe: • natural catastrophe (e.g., earthquake, hurricane, windstorm, cyclone, typhoon, flood), • transportation (e.g. aviation, marine), • industrial insurance (e.g., energy, satellite) • other non-natural catastrophes (e.g. cyber, life).
Specific Risk Profile	Investors should read, be aware of and consider Chapter 8 of this Offering Memorandum.
Reference Currency	USD
Valuation Day	The last calendar day of each month and such other day or days as the AIFM may from time to time determine.
Calculation Day	Calculation Day is expected to be on or around the 20th Business Day after the relevant Valuation Day.
Business Day	A full day on which banks are open for business in Luxembourg, London, Dublin and Zurich.
Portfolio Manager	Euler ILS Partners Ltd, Zurich has been appointed as the Portfolio Manager of this Subfund.
Eligible Investors	Well-Informed Investors pursuant to Chapter 2 "Definitions".
Investors Profile	The Subfund is suitable for Investors seeking exposure to the ILS market with an investment horizon of at least three to five years. The strategy is in particular well suited for investors seeking stable, floating returns by being exposed to a low to mid risk investment universe.
Classes	The Classes of Shares available in this Subfund are set out in Chapter 3.
Subscriptions	Except for Shares which are Special Situation Preference Shares (including Special Situation Preference SR Shares), the Shares may be subscribed for as of the first calendar day of each calendar month or at such other times as the AIFM may determine in its discretion (such date being referred to as the "**Subscription Day**") at the Net Asset Value per Share Class as per the Valuation Day (based on the method of calculating the Net Asset Value as described in Chapter 15 plus the applicable sales charges and any taxes. Written subscription applications must be submitted by fax, email or post mail to the Central Administration or the relevant third party authorised by the AIFM to accept applications for the subscription or redemption of Shares of the Subfund by 3 p.m. (Central European Time) five Business Days prior to the relevant Subscription Day, with cleared funds received in the Subfund's account with the Depositary Bank three Business Days prior to the relevant Subscription Day. Subscription applications received after this deadline shall be deemed to be an application to subscribe Shares on the following Subscription Day.

	Subscription applications shall be settled within five Business Days following the Calculation Day if receipt of the subscription application is confirmed by the Central Administration or the relevant third party authorised by the Company to accept applications for the subscription or redemption of Shares on the Valuation Day, at the latest.
Leverage	Under AIFMD, 'leverage' is defined as being any method by which the AIFM increases the exposure of the Subfund whether through borrowing of cash or securities, leverage embedded in derivative positions or by any other means. The leverage creates risks for the Subfund. A leverage (as defined by the AIMFD) of 100% means a leverage-free portfolio. AIFMD uses two distinct definitions of leverage, both of which are calculated on a regular basis by the AIFM: • under the 'gross method' (as defined by the AIFMD), the leverage is calculated as the ratio between the Subfund's investment exposure (calculated by adding the absolute values of all portfolio positions, including the sum of notionals of the derivative instruments used but excluding cash and cash equivalents) and the Net Asset Value. Such leverage shall not exceed 500% for the Subfund; and • alternatively, the 'commitment method' (as defined by the AIFMD) takes into account netting and hedging arrangements and is defined as the ratio between the Subfund's net investment exposure (not excluding cash and cash equivalents) and the Net Asset Value. Such leverage shall not exceed 450% for the Subfund. Due to the characteristics of ILS as the underlying asset class, both leverage calculation methods mentioned above, result in a higher presumption of the indicated value. Within non-securitized ILS Instruments, the collateralized amount is added to the underlying contract itself for leverage calculation purposes, creating indirect leverage without resulting in actual "financial" leverage. As a general rule, the underlying contract which is fully collateralized represents the "notional" amount which is at the same time the maximum exposure (i.e. maximum possible loss). In addition, in case of the occurrence of an insured event related to the ILS investment, posted collateral is not released back into the Subfund for a considerable amount of time, causing Net Asset Value fluctuations during that period which may further lead to a higher perceived calculated leverage. Lastly, foreign exchange forward instruments used to hedge both the portfolio as well as various share classes also raise the leverage value indicated above. For the avoidance of doubt, fully collateralized first to default transactions are not considered leverage.
Borrowing (applicable as of 1st January 2026)	The Subfund may, from time to time, borrow cash for temporary liquidity purposes, including but not limited to facilitating timely settlement of investment obligations, managing redemptions, or covering operational expenses. The maximum amount of such borrowings shall not exceed 30% of the Total Assets of the Subfund, unless otherwise provided in the relevant Appendix. Borrowings may take the form of unsecured revolving credit facilities, overdraft lines, or other financing arrangements on terms consistent with prevailing market standards and subject to the oversight of the AIFM and, where appropriate, the Board of Directors. The use of such borrowings shall be disclosed in the annual reports of the Company and monitored as part of the AIFM's risk and liquidity management framework in accordance with Article 16 of the AIFMD and CSSF Circular 18/698.

Securities financial transactions and total return swaps (applicable as of 1st January 2026)

The Subfund may, in accordance with its investment objectives and applicable regulatory limitations, enter into securities financial transactions ("**SFTs**") as well as total return swaps ("**TRS**") for efficient portfolio management and risk management purposes, including, without limitation, to manage liquidity needs arising from locked collateral, cat bond extensions, large or unexpected redemption requests, to meet settlement obligations, margin calls, or to avoid the premature or forced liquidation of portfolio assets under unfavourable market conditions. SFTs includes, without limitation, securities lending, repurchase agreements and reverse repurchase agreements.

Subject to applicable laws and regulations and the risk management framework of the AIFM, the Subfund may, at any time, enter into SFTs and TRS whose aggregate net exposure, measured on a mark-to-market basis, shall not exceed 20% of the Subfund's NAV. For the avoidance of doubt, this 20% limit applies on a combined basis across SFTs and TRS. Temporary breaches arising from market movements or operational reasons will be remedied in the best interests of investors.

At the current date of this Offering Memorandum, the Subfund does not engage SFTs or TRS. The expected proportion of assets subject to SFTs and TRS is therefore 0% of the Subfund's NAV.

SFTs		**TRS**	
Expected	**Maximum**	**Expected**	**Maximum**
0-10%	20%	0-10%	20%

The Offering Memorandum nevertheless authorises SFTs and TRS to be activated in the future for efficient portfolio management, subject to the AIFM's approval and the Depositary's oversight, in accordance with Regulation (EU) 2015/2365 ("SFTR") and applicable CSSF requirements.

Counterparties to borrowing, SFTs and TRS will be institutions subject to prudential supervision and of appropriate financial standing (or are otherwise deemed acceptable by the AIFM's risk management). Transactions will be executed on an arm's-length basis. The AIFM will manage counterparty exposure with due regard to concentration, credit quality and correlation, and may diversify counterparties where appropriate. Conflicts of interest will be identified, escalated and managed in accordance with the AIFM's conflicts of interest policy; affiliated counterparties may be used where permitted, provided that terms are no less favourable to the Sub-Fund than those available from independent third parties.

Securities lending arrangements will provide the Subfund with the contractual right to recall securities and to terminate any loan at any time (or within standard settlement periods). Repurchase and reverse repurchase agreements will be entered into on terms that afford the Subfund the ability to call for the return of securities and/or cash on either an open basis or at agreed maturities consistent with the Subfund's liquidity profile. For TRS, the Subfund will retain the ability to terminate transactions on customary notice periods as provided for in the relevant master and confirmation agreements. In general, the following applies to TRS:

iv. One-hundred percent (100%) of the gross return generated by total return swaps, net of direct and indirect operational costs/fees, will be returned to the Sub-Fund.

v. Any direct and indirect operational costs/fees arising from total return swaps, will be paid to the entities outlined in the annual and semi-annual report of the Fund.

vi. There are no fee sharing arrangements on total return swaps.

All direct revenues and other economic benefits arising from SFTs and TRS, net of direct operational costs and fees (including, where applicable, fees or revenue

	shares payable to an agent lender or securities lending platform), will accrue to the Subfund. Any such costs and fees will be transparent, at arm's length and reflect services rendered. Details of the Subfund's gross and net revenues from SFTs and TRS, together with related direct costs and fees, will be disclosed in the Subfund's periodic reports in accordance with applicable regulation. The use of borrowing, SFTs and TRS may increase the Subfund's leverage, counterparty exposure and liquidity risk, and may give rise to operational, legal and custody risks. The AIFM's risk management process integrates these risks into the Subfund's global exposure and leverage calculations and ensures on-going monitoring of asset encumbrance, settlement profiles and collateral sufficiency. The Subfund will comply with applicable transparency and reporting requirements relating to SFTs and TRS. Investors should note that while these techniques are intended to be used for efficient portfolio management and risk management, they may not achieve their desired results and may adversely affect the Subfund's performance. Further information on the risk management, collateral eligibility, haircut policy, counterparty selection, leverage and valuation methodologies applied to borrowing, SFTs and TRS is available from the AIFM upon request. The use of SFTs and TRS is not expected to affect the Subfund's overall risk profile.
Performance Fee	No Performance Fee is payable to the Portfolio Manager in respect of any of the shares of the Company issued in respect of the Subfund.
Management Fee in respect of Special Situation Preference Shares (including Special Situation Preference SR Shares)	A Management Fee is payable on a monthly basis with respect to any Special Situation Preference Shares (including Special Situation Preference SR Shares) at the rate agreed between the Company and the Portfolio Manager which will generally be at the same rate as the rate applicable to the corresponding Participating Shares held by Shareholders having an interest in such issuance of Special Situation Preference Shares (including Special Situation Preference SR Shares); *provided, however,* that the Management Fee rate with respect to any Special Situation Preference Shares (including Special Situation Preference SR Shares), of which the maximum Management Fee rate is set out in Chapter "3. Euler ILS SICAV-SIF - Summary of Share Classes", shall be reduced as of the 19th month following the issuance of such Special Situation Preference Shares (including Special Situation Preference SR Shares) by an amount representing an aggregate 30% discount and as of the 37th month by an amount representing an aggregate 60% discount. Any portion of the Management Fee attributable to a class of Special Situation Preference Shares (including Special Situation Preference SR Shares) will in general be paid from the corresponding Participating Shares held by Shareholders having an interest in such Special Situation Preference Shares (including Special Situation Preference SR Shares). For the avoidance of doubt, if the respective Special Situation Preference Shares (including Special Situation Preference SR Shares) have been in issue for longer than 18 or 36 months (as the case may be) as at 1st August 2021, the above-mentioned fee reduction will only be applied as from 1st August 2021.
Specific Redemption Procedure	Each Shareholder will have the right to redeem any or all of its Shares as of each Redemption Day applicable to the relevant Class of Shares (as specified below) upon prior written notice by fax, email or post mail to the Central Administration or the relevant third party authorised by the Company to accept applications for the subscription or redemption of Shares of the Subfund by 3 p.m. (Central European Time) subject to 90 calendar days' notice prior to the relevant Redemption Day; provided however that a Shareholder who seeks to redeem all, or any portion, of its Shares in respect of Classes QB/QBH, QA/QAH, UB/UBH, UA/UAH, SB/SBH,

SA/SAH, IB1/IBH1, IA1/IAH1, IB5/IBH5, IA5/IAH5, IB10/IBH10, IA10/IAH10, IB25/IBH25, IA25/IAH25, IB50/IBH50, IA50/IAH50, EB/EBH, EA/EAH, DB/DBH, DA/DAH prior to the first Redemption Day occurring not less than one year after the date such Shares were acquired will be subject to a redemption fee retained by the Subfund equal to 1% of the amount redeemed.

In respect of Classes IB100/IBH100, IA100/IAH100 Shares, there is an initial lock-up period for one year after such Shares were acquired during which time a Shareholder will be unable to redeem.

Special Situation Preference Shares (including Special Situation Preference SR Shares) are not redeemable at the request of Shareholders.

Redemption Days:

- first calendar day in January, April, July and October of each year; or
- such other day or days as the Board of Directors may determine either generally or in respect of that Class.

Redemption applications received by the Central Administration without sufficient notice will be deemed to be a request to redeem Shares as at the next available Redemption Day applicable to the relevant Class of Shares, and such Shares will be redeemed at the Redemption Price applicable as of the relevant Valuation Day.

The application for redemption of any Shares must be sent to the Central Administration and must include:

- the number of shares the Shareholder wishes to redeem or the monetary amount the Shareholder wishes to redeem respectively, after deduction of any applicable redemption fee; and
- the Class(es) from which such Shares are to be redeemed.

In addition, the application for redemption must include the Shareholder's personal details. Failure to provide any of the aforementioned information may result in delay of such application for redemption whilst verification is being sought from the Shareholder.

Applications for redemption must be duly signed by the respective registered Shareholders.

A redemption request is irrevocable, unless the Board of Directors accepts the request for a partial or full withdrawal of the redemption request of the Shareholder in its absolute discretion.

The Shares will be redeemed at the Redemption Price as of the relevant Redemption Day.

The Shares will be redeemed in the order of their issuance, starting with the Shares that have been issued first.

Without prejudice to any Deferral, payment of the Redemption Price will be effected within five Business Days after the Calculation Day which is subsequent to the relevant Valuation Day, provided that all the documents necessary in connection with the redemption have been received by the Board of Directors.

A confirmation statement will be sent by the Central Administration or a third party authorised by the AIFM to accept applications for redemption of Shares to the redeeming Shareholder detailing the redemption proceeds due thereto as soon as reasonably practicable after determination of the Redemption Price of the Shares being redeemed. The redeeming Shareholder should check this statement to ensure that the transaction has been accurately recorded.

On payment of the Redemption Price, the corresponding Shares will be cancelled immediately in the Company's share register. Any taxes, commissions and other fees

	incurred in the respective countries in which the Shares are sold will be charged to the redeeming Shareholder. As from the relevant Redemption Day and with respect to their Shares subject to a redemption request, such redeeming Shareholders will lose their rights as Shareholders, except the right to receive their redemption proceeds and any dividend which has been declared in respect of their Shares prior to the relevant Redemption Day, and in particular, will not have the right to receive notice of, attend or vote at any class or general meetings.
Deferral Level	Deferred Redemptions for all Classes of Participating Shares In the event that the Subfund receives redemption requests in respect of the Subfund as of any Redemption Day and the redemption amounts pursuant to such requests exceed, in the aggregate, the Deferral Level applicable to the relevant Redemption Day, the Board of Directors may, in its sole discretion, (i) satisfy all such redemption requests, or (ii) reduce all such redemption requests so that only the amount of Shares not exceeding the Deferral Level (or more, in the sole discretion of the Board of Directors) is redeemed on such Redemption Day for the respective Valuation Day (a "**Deferral**"). Deferral Level: • in respect of the Redemption Day of January: 40% of the Net Asset Value of the Subfund; • in respect of the Redemption Day of April: 25% of the Net Asset Value of the Subfund; • in respect of the Redemption Day of July: 25% of the Net Asset Value of the Subfund; • in respect of the Redemption Day of October: 10% of the Net Asset Value of the Subfund. Shareholders whose redemption amounts are reduced pursuant to a Deferral will participate in the aggregate amount available for redemption *pro rata* in accordance with the amount of each redemption request. To the extent that a Shareholder's requested redemption amount has been reduced by restrictions imposed by a Deferral, a request for the remaining portion of the original redemption amount will be deemed made (unless thereafter rescinded) as of the next quarterly Redemption Day (regardless of the Redemption Day typically applicable to such Class of Shares), and such remaining portion will be satisfied as of the next quarterly Redemption Day and thereafter to successive quarterly Redemption Days at the Redemption Price applicable as of the respective Valuation Day until fully redeemed, each time subject to the Deferral. Any such redemption request will be fully satisfied before satisfying any later redemption requests.
Suspension of Redemptions	The Board of Directors may suspend the redemption of Shares if (i) the calculation of the Net Asset Value per Share has been suspended in accordance with Chapter 15.2 or (ii) in the extraordinary circumstances in which redemptions would, in the opinion of the Board of Directors, materially adversely affect the interests of the Shareholders remaining in the Subfund. The Board of Directors will notify the CSSF and the Shareholders in writing in the event of a suspension of redemptions and will give written notice once the suspension period has been terminated. Any redemption requests made during a suspension period will be processed after the termination of the suspension period.

	In the event of a suspension of redemptions, a redemption request submitted in an earlier redemption request period will be treated in priority to a redemption request submitted in a later redemption request period.
Costs Associated with Investments in Target Funds	Investors should note that in general when investing in shares or units of other ILS theme UCIs ("**Target Funds**"), costs may be incurred at the level of the Subfund as well as the Target Funds. If the Subfund acquires shares/units of Target Funds that are managed, directly or by delegation, by the AIFM or by any other company with which the AIFM is linked by common management or control, or by a direct or indirect holding of more than 10% of the capital or votes ("**Affiliated Funds**"), the AIFM or the other company may not charge subscription or redemption fees on account of the Subfund's investment in the shares/units of such Affiliated Funds. Besides the expenses incurred by the AIFM in managing the Subfund, a management fee may also be charged for investments in Target Funds considered to be Affiliated Funds and be indirectly charged from the assets of the Subfund in respect of the Target Funds contained therein. In addition to such management fee, a performance fee may be indirectly charged from the assets of the Subfund in respect of the Target Funds contained therein. The cumulative management fee (excluding performance fees, if applicable) at Subfund and Target Fund level shall not exceed 3.00%.
Specific Risk Factors	**Investors should read, be aware of and consider Chapter 8, "Risk Factors" of this Offering Memorandum. Potential investors should focus more specifically but not only on the risks associated with ILS described in section 8.7.1. Moreover, the attention of potential investors is drawn to the fact that the Subfund may be predominantly invested during the Transitional Period as referred to in Chapter 7, "Investment Restrictions" in an ILS theme UCI which has an investment objective and policy similar with the Subfund's Investment Objective and Policy.** **Sustainability Risks** Sustainability risks may result in a negative impact on the returns of the Subfund. The main sustainability risks are identified and managed in the context of the overall risk management process and may change over time. Potential investors are also referred to the risks set out in Chapter 8, "Risk Factors" under section 8.8. "Sustainability Risks".

27. SFDR RTS Annexes

Euler (Lux) ILS Balanced Fund (applicable as of 1st January 2026)

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Template pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Euler (Lux) ILS Balanced Fund **Legal entity identifier:** 549300GFGMYC3S76TV26

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

●● ☐ **Yes**	●○ ☒ **No**
☐ It will make a minimum of **sustainable investments with an environmental objective:** ___%	☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of ___% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It will make a minimum of **sustainable investments with a social objective:** ___%	☒ It promotes E/S characteristics, but **will not make any sustainable investments**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What environmental and/or social characteristics are promoted by this financial product?

This Subfund promotes environmental and/or social characteristics through its investments in ILS Instruments which support climate resilience and disaster recovery.

Environmental characteristics are promoted by allocating capital to natural catastrophe protection (e.g. hurricane, flood) and social characteristics by enhancing financial protection for disaster-affected communities.

It promotes environmental and/or social characteristics through:

- Binding ESG exclusions
- ESG screening and internal scoring of each transaction, sponsor, and collateral
- Focusing on investments that contribute to one or more of the United Nations Sustainability Development Goals (SDGs)
- Active dialogue with Sponsors of ILS Instruments

It does not use a reference benchmark for the purpose of attaining the environmental and/or social characteristics.

Please find further information on ESG Exclusions, ESG Integration and Engagement below in the question "What investment strategy does this financial product follow?" in the Euler Sustainability Investing Policy or online at www.euler.ltd/en/sustainable investing.

- **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

This Subfund uses the following sustainability indicators:

- Adherence to ESG Exclusions
- Proprietary ESG Scoring

Qualitative indicators (e.g. contribution to SDG 13.1, 11.5, 17.3, 3.8, 9.4)

- ***What the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

Not applicable – this Subfund does not make sustainable investments.

- ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable – this Subfund does not make sustainable investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How have the indicators for adverse impacts on sustainability factors been taken into account?

The Subfund does not consider principal adverse impacts (PAI) at product level due to the limited availability of standardized and meaningful indicators applicable to ILS Instruments.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable – this Subfund does not make sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

☐ Yes

☒ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The investment objective of the Subfund is to achieve long-term capital appreciation through investments in a number of selected ILS Instruments while taking due account of the principle of risk diversification. ILS Instruments are chosen not only for their return and diversification benefits—seeking low correlation to traditional asset classes such as equities and fixed income—but also based on sustainability criteria defined in the Euler ILS ESG Framework.

Euler's ESG investment strategy consists of binding ESG exclusions, systematic ESG integration and Sustainability Objectives during the investment process, and continuous monitoring and oversight. These strategy components are designed to ensure the Subfund remain aligned with its promoted environmental and social characteristics. The underwriting and due diligence covers inter alia:

1. ESG Exclusions
2. ESG Integration
3. Sustainability Objectives

1. ESG Exclusions

As part of its underwriting and due diligence, Euler applies binding exclusion criteria that prohibit and/or limit investment in certain sectors or activities:

- Norm-based exclusions on Sponsor Level: Prohibiting investments sponsored by entities that violate international norms and revenues derived from controversial or nuclear weapons.
- Value-based exclusions on Sponsor Level: Avoiding industries who derive their revenues from controversial business activities such as conventional weapon and firearms (20%), tobacco (20%) thermal coal (20%), gambling (5%), adult entertainment (5%), oil sands (10%), Arctic oil and gas (5%) of total revenues.
- Business conduct-based exclusions on Sponsor Level: Excluding entities with severe violations of international norms, including United Nations Global Compact (UNGC) principles, or any general ESG controversy flags such as systematic violations of human rights, engagement in forced or child labor, severe environment negligence, corruption, bribery or other unethical business practices.
- ILS-specific exclusions on Subfund Level: Restricts maximum exposure to certain lines of re-insurance businesses such as gambling (0%), life settlement (0%), marine and energy (20%), aviation and space (20%) and/or engineering (20%) of the total assets on Subfund level.

These exclusions are binding and systematically enforced throughout the investment process.

2. ESG Integration

In addition to financial considerations, ESG factors are integrated into the ILS Instruments underwriting and due diligence through pre-defined ESG risk factors and assigned a proprietary ESG sub-score on each of the three levels:

- Sponsor level
- Transaction level
- Collateral level

At the collateral level, Euler assesses the ESG characteristics of the instruments held in the collateral account for the particular ILS Instrument. Collateral structures that include ESG-oriented instruments - such as ESG-labeled money market funds or notes issued by the International Bank for Reconstruction and Development (IBRD) - may contribute positively to the collateral-level ESG assessment.

Each ILS Instrument receives an aggregated ESG score derived from these three sub-scores and the Sustainability Objectives score. This four-part ESG scoring model helps ensure consistency, transparency, and comparability across investments.

3. Sustainability Objectives

Euler defines Sustainability Objectives as a complementary layer of ESG quality. These objectives aim to align certain investments with selected United Nations Sustainable Development Goals (SDGs). Euler applies a structured and multi-dimensional methodology specifically tailored for ILS Instruments, which recognizes the unique nature of insurance-linked risk transfer instruments. The proprietary approach incorporates both qualitative and quantitative factors across multiple dimensions—such as underlying risk coverage, geographic exposure, and beneficiary type—ensuring that SDG alignment is assessed systematically and with clear, pre-defined thresholds for materiality. A minimum materiality threshold is applied at ILS Instrument level to ensure that alignment is substantiated and not incidental.

A proprietary SDG-alignment sub-score is assigned based on a qualitative and materially justified assessment of each ILS Instrument's underlying characteristics. The Subfund focuses primarily on the following SDGs:

- SDG 13.1: Strengthen resilience to climate-related hazards
- SDG 11.5: Reduce disaster-related economic losses
- SDG 17.3: Mobilize financial resources for developing countries
- SDG 3.8: Access to essential health services (indirectly via pandemic-linked bonds)
- SDG 9.4: Sustainable infrastructure in reconstruction

To mitigate the risk of greenwashing and enhance transparency, Euler adheres to the following practices:

- Materiality threshold: SDG alignment is only claimed where the ILS Instrument's core risk transfer mechanism and beneficiary profile materially support the targeted SDG(s). This is based on a methodology that requires at least 75% of the Total Insured Value (TIV) of the underlying subject business to be associated with the relevant sustainability objective, particularly for climate-related risks.
- Structured SDG mapping: Euler applies recognized SDG mapping frameworks, such as the UNDP SDG Impact Standards, where applicable, to guide and validate the relevance of the alignment.

This structured approach helps ensure that sustainability claims are credible, consistent, and meaningful in the context of ILS Instruments investing.

4. Monitoring and methodologies

ESG characteristics are monitored through a structured, multi-level process:

- Pre-trade: All investments are screened using Euler's proprietary ESG framework to ensure compliance with exclusion criteria, minimum ESG score thresholds, and sustainability objectives.
- Post-trade: Portfolio level thresholds are monitored monthly at the Subfund level to ensure ongoing compliance with binding ESG criteria.
- Annual review: ESG characteristics of each position are re-evaluated annually, particularly in cases of material change—such as breaches of norm-based or value-based exclusions, or failure to meet good governance standards according to Euler's proprietary ESG framework. Where misalignment is identified, appropriate actions (e.g. divestment, re-classification to assets classified as "#2 Other") are taken in line with Euler's internal ESG governance.

This monitoring framework ensures that ESG commitments remain effective and consistently applied throughout the investment lifecycle.

The four proprietary sub-scores (meaning the three ESG Integration sub-scores and the Sustainability Objectives sub-score) are weighted as follows:

- Sponsor level: 30%
- Transaction level: 40%
- Collateral level: 10%
- Sustainability objectives 20%

to calculate the overall ESG Score for each ILS Instrument. The overall ESG score ranges from 0-10, with 10 reflecting the highest ESG score.

Eligible assets classified under "#1 Aligned with E/S characteristics" must meet a minimum ESG score threshold in the upper half which translates to >5.

5. Engagement

Euler engages in active dialogue directly with certain sponsors and market participants through bilateral communications, due diligence questionnaires, and post-investment interactions. This dialogue encourages ESG transparency and responsible underwriting but alignment with sound governance practice. This may include:

- Requesting ESG disclosures
- Clarifying sponsor practices
- Providing ESG expectations
- Raising serious ESG-related concerns, if any

Euler also participates in certain industry ESG initiative(s) and contributes to broader sustainability dialogue in the ILS market. While this dialogue is not binding, it supports the promotion of environmental and social characteristics as part of Euler's sustainable investing strategy.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The binding elements are:

- Application of norms, values, and business conduct exclusions, including sector-specific exclusions and exposure caps, particularly at the transaction level, to mitigate exposure to activities inconsistent with environmental or social characteristics (e.g. gambling, life settlements, or high-carbon reinsurance lines).

- Integration of ESG factors into the investment decision-making process, using a proprietary ESG scoring framework. Each eligible ILS Instrument is assessed at inception based on four weighted ESG sub-scores:

  - Sponsor level: 30%
  - Transaction level: 40%
  - Collateral level: 10%
  - Sustainability objectives 20%

  These sub-scores are aggregated to produce an overall ESG score (scale of 0–10). Only investments with a minimum overall ESG score in the upper half (i.e. >5) are eligible to be considered E/S-aligned.

- Meeting the minimum proportion of investments which are environmentally and/or socially aligned, in accordance with the product's classification under Article 8 SFDR. The Portfolio is monitored to ensure that this threshold is respected.

- ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

This Subfund does not have a commitment to reduce the scope of investments by a minimum rate.

- ***What is the policy to assess good governance practices of the investee companies?***

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

The Subfund applies a structured proprietary underwriting and due diligence process to assess and ensure good governance of sponsors of ILS Instruments includes the following:

- Business conduct-based exclusions: companies found to i) systematically violate international norms, ii) where the breaches are particularly severe, or iii) where the management is not open to implementing the necessary reforms may be excluded from the investment universe.
- ESG Integration: assessing the following factors: i) sound management structure (such as board structure, systemic risk management), ii) employment relations (such as diversity and inclusion, labor relations, accident and safety), iii) remuneration of staff (such as fair disclosure, development and retention) iv) tax compliance (such as responsible tax behavior) and v) anti-corruption and bribery (such as business ethics and transparency of payments, competitive behavior, regulatory capture and political influence) as part of the proprietary ESG sub-score on Sponsor Level.

The assessment is carried out through:

- Third party ESG data provider(s) and controversy screening
- Integration of relevant governance indicators into the underwriting and due diligence process
- Proprietary ESG scoring model.

The good governance practices may not be assessed or assessed differently for ILS Instruments issued by sovereigns or supranational entities.

Where governance data is unavailable or non-applicable, the Subfund may rely on alternative qualitative assessments.

The Subfund will exclude ILS Instruments from eligibility to #1 Aligned with E/S characteristics if the minimum good governance thresholds are not met on Sponsor Level.

What is the asset allocation planned for this financial product?

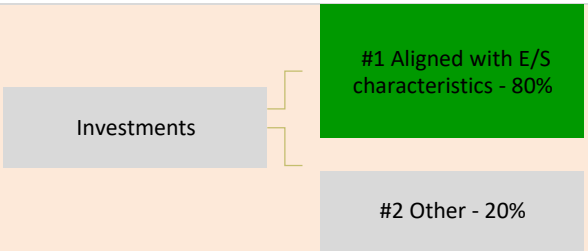
Asset allocation describes the share of investments in specific assets.

The planned minimum proportion of investments used to meet the environmental and/or social characteristics promoted by this Subfund is 80% of its total assets of the Participating Shares. Within this category, the Subfund aims to hold 0% of sustainable investments.

- #1 Aligned with E/S characteristics: 80%
  - #1A Sustainable investments: 0%
  - #1B Other E/S characteristics: 80%
- #2 Other: 20%

In exceptional situations, such as periods of large investor subscriptions and redemptions, release of locked collateral, maturities, the minimum portion may temporarily deviate from the 80% in order to ensure orderly in and outflow management and protect the interests of remaining investors.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

- ***How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?***

Derivatives are not used to attain the environmental and/or social characteristics promoted by the Subfund. However, they may be used as efficient portfolio management tools, for cash management, for hedging purposes, or as an additional source of return.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

0% - This Subfund does not commit to making EU Taxonomy aligned investments. However certain investments made by the Subfund may be aligned with the EU Taxonomy.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules.

- **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?**

☐ Yes:

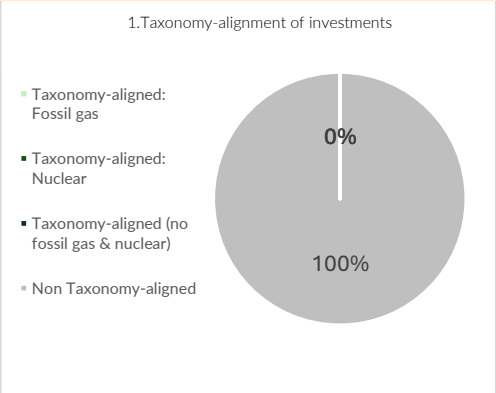
☐ In fossil gas ☐ In nuclear energy

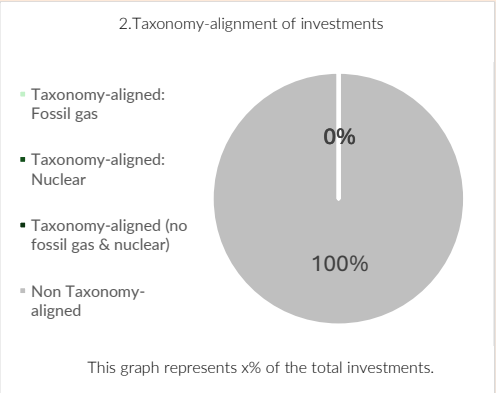
☒ No

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.





** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

- ***What is the minimum share of investments in transitional and enabling activities?***

The minimum share of investments in transitional and enabling activities is 0% considering the Subfund does not make sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

0% - This Subfund does not commit to make sustainable investments.

What is the minimum share of socially sustainable investments?

0% - This Subfund does not commit to make sustainable investments.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

Investments which may fall under "#2 Other" of the total assets of the Participating Shares may be ILS Instruments which are not or no longer considered to be aligned with environmental or social characteristics of this Subfund.

In addition, it may refer to cash, cash equivalents, and derivatives used for hedging purposes that are not aligned with E/S characteristics and do not impair the Subfund's ESG objectives. These investments serve ancillary purposes such as risk management, liquidity management, or operational efficiency and are not intended to impair the Subfund's overall ESG strategy.

No minimum environmental or social safeguards are systematically applied to these investments, as they are not evaluated against ESG criteria and are not included in the proportion of investments used to promote environmental or social characteristics. None of those investments have any minimum environmental or social safeguards.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

No, the Subfund does not use a reference benchmark for the purpose of attaining environmental and/or social characteristics.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

Not applicable

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

Not applicable

- ***How does the designated index differ from a relevant broad market index?***

Not applicable

- ***Where can the methodology used for the calculation of the designated index be found?***

Not applicable

Where can I find more product specific information online?

More product-specific information can be found on the website:

More information about the Euler ILS Framework can be found in the Euler Sustainability Investing Policy or online at www.euler.ltd/en/sustainability and in this Prospectus.

Euler (Lux) ILS Low Volatility Plus Fund (applicable as of 1st January 2026)

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Template pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Euler (Lux) ILS Low Volatility Plus Fund **Legal entity identifier:** 549300K34D7STK4SSV50

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

●● ☐ **Yes**	●○ ☒ **No**
☐ It will make a minimum of **sustainable investments with an environmental objective:** ___%	☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of ___% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It will make a minimum of **sustainable investments with a social objective:** ___%	☒ It promotes E/S characteristics, but **will not make any sustainable investments**

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What environmental and/or social characteristics are promoted by this financial product?

This Subfund promotes environmental and/or social characteristics through its investments in ILS Instruments which support climate resilience and disaster recovery.

Environmental characteristics are promoted by allocating capital to natural catastrophe protection (e.g. hurricane, flood) and social characteristics by enhancing financial protection for disaster-affected communities.

It promotes environmental and/or social characteristics through:

- Binding ESG exclusions
- ESG screening and internal scoring of each transaction, sponsor, and collateral
- Focusing on investments that contribute to one or more of the United Nations Sustainability Development Goals (SDGs)
- Active dialogue with Sponsors of ILS Instruments

It does not use a reference benchmark for the purpose of attaining the environmental and/or social characteristics.

Please find further information on ESG Exclusions, ESG Integration and Engagement below in the question "What investment strategy does this financial product follow?" in the Euler Sustainability Investing Policy or online at www.euler.ltd/en/sustainable investing.

- **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

This Subfund uses the following sustainability indicators:

- Adherence to ESG Exclusions
- Proprietary ESG Scoring

Qualitative indicators (e.g. contribution to SDG 13.1, 11.5, 17.3, 3.8, 9.4)

- ***What the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

Not applicable – this Subfund does not make sustainable investments.

- ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable – this Subfund does not make sustainable investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How have the indicators for adverse impacts on sustainability factors been taken into account?

The Subfund does not consider principal adverse impacts (PAI) at product level due to the limited availability of standardized and meaningful indicators applicable to ILS Instruments.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable – this Subfund does not make sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

☐ Yes

☒ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The investment objective of the Subfund is to achieve long-term capital appreciation through investments in a number of selected ILS Instruments while taking due account of the principle of risk diversification. ILS Instruments are chosen not only for their return and diversification benefits—seeking low correlation to traditional asset classes such as equities and fixed income—but also based on sustainability criteria defined in the Euler ILS ESG Framework.

Euler's ESG investment strategy consists of binding ESG exclusions, systematic ESG integration and Sustainability Objectives during the investment process, and continuous monitoring and oversight. These strategy components are designed to ensure the Subfund remain aligned with its promoted environmental and social characteristics. The underwriting and due diligence covers inter alia:

4. ESG Exclusions
5. ESG Integration
6. Sustainability Objectives

6. ESG Exclusions

As part of its underwriting and due diligence, Euler applies binding exclusion criteria that prohibit and/or limit investment in certain sectors or activities:

- Norm-based exclusions on Sponsor Level: Prohibiting investments sponsored by entities that violate international norms and revenues derived from controversial or nuclear weapons.
- Value-based exclusions on Sponsor Level: Avoiding industries who derive their revenues from controversial business activities such as conventional weapon and firearms (20%), tobacco (20%) thermal coal (20%), gambling (5%), adult entertainment (5%), oil sands (10%), Arctic oil and gas (5%) of total revenues.
- Business conduct-based exclusions on Sponsor Level: Excluding entities with severe violations of international norms, including United Nations Global Compact (UNGC) principles, or any general ESG controversy flags such as systematic violations of human rights, engagement in forced or child labor, severe environment negligence, corruption, bribery or other unethical business practices.
- ILS-specific exclusions on Subfund Level: Restricts maximum exposure to certain lines of re-insurance businesses such as gambling (0%), life settlement (0%), marine and energy (20%), aviation and space (20%) and/or engineering (20%) of the total assets on Subfund level.

These exclusions are binding and systematically enforced throughout the investment process.

7. ESG Integration

In additional to financial considerations, ESG factors are integrated into the ILS Instruments underwriting and due diligence through pre-defined ESG risk factors and assigned a proprietary ESG sub-score on each of the three levels:

- Sponsor level
- Transaction level

- Collateral level

At the collateral level, Euler assesses the ESG characteristics of the instruments held in the collateral account for the particular ILS Instrument. Collateral structures that include ESG-oriented instruments - such as ESG-labeled money market funds or notes issued by the International Bank for Reconstruction and Development (IBRD) - may contribute positively to the collateral-level ESG assessment.

Each ILS Instrument receives an aggregated ESG score derived from these three sub-scores and the Sustainability Objectives score. This four-part ESG scoring model helps ensure consistency, transparency, and comparability across investments.

8. Sustainability Objectives

Euler defines Sustainability Objectives as a complementary layer of ESG quality. These objectives aim to align certain investments with selected United Nations Sustainable Development Goals (SDGs). Euler applies a structured and multi-dimensional methodology specifically tailored for ILS Instruments, which recognizes the unique nature of insurance-linked risk transfer instruments. The proprietary approach incorporates both qualitative and quantitative factors across multiple dimensions—such as underlying risk coverage, geographic exposure, and beneficiary type—ensuring that SDG alignment is assessed systematically and with clear, pre-defined thresholds for materiality. A minimum materiality threshold is applied at ILS Instrument level to ensure that alignment is substantiated and not incidental.

A proprietary SDG-alignment sub-score is assigned based on a qualitative and materially justified assessment of each ILS Instrument's underlying characteristics. The Subfund focuses primarily on the following SDGs:

- SDG 13.1: Strengthen resilience to climate-related hazards
- SDG 11.5: Reduce disaster-related economic losses
- SDG 17.3: Mobilize financial resources for developing countries
- SDG 3.8: Access to essential health services (indirectly via pandemic-linked bonds)
- SDG 9.4: Sustainable infrastructure in reconstruction

To mitigate the risk of greenwashing and enhance transparency, Euler adheres to the following practices:

- Materiality threshold: SDG alignment is only claimed where the ILS Instrument's core risk transfer mechanism and beneficiary profile materially support the targeted SDG(s). This is based on a methodology that requires at least 75% of the Total Insured Value (TIV) of the underlying subject business to be associated with the relevant sustainability objective, particularly for climate-related risks.
- Structured SDG mapping: Euler applies recognized SDG mapping frameworks, such as the UNDP SDG Impact Standards, where applicable, to guide and validate the relevance of the alignment.

This structured approach helps ensure that sustainability claims are credible, consistent, and meaningful in the context of ILS Instruments investing.

9. Monitoring and methodologies

ESG characteristics are monitored through a structured, multi-level process:

- Pre-trade: All investments are screened using Euler's proprietary ESG framework to ensure compliance with exclusion criteria, minimum ESG score thresholds, and sustainability objectives.
- Post-trade: Portfolio level thresholds are monitored monthly at the Subfund level to ensure ongoing compliance with binding ESG criteria.
- Annual review: ESG characteristics of each position are re-evaluated annually, particularly in cases of material change—such as breaches of norm-based or value-based exclusions, or failure to meet good governance standards according to Euler's proprietary ESG framework.

Where misalignment is identified, appropriate actions (e.g. divestment, re-classification to assets classified as "#2 Other") are taken in line with Euler's internal ESG governance.

This monitoring framework ensures that ESG commitments remain effective and consistently applied throughout the investment lifecycle.

The four proprietary sub-scores (meaning the three ESG Integration sub-scores and the Sustainability Objectives sub-score) are weighted as follows:

- Sponsor level: 30%
- Transaction level: 40%
- Collateral level: 10%
- Sustainability objectives 20%

to calculate the overall ESG Score for each ILS Instrument. The overall ESG score ranges from 0-10, with 10 reflecting the highest ESG score.

Eligible assets classified under "#1 Aligned with E/S characteristics" must meet a minimum ESG score threshold in the upper half which translates to >5.

10. Engagement

Euler engages in active dialogue directly with certain sponsors and market participants through bilateral communications, due diligence questionnaires, and post-investment interactions. This dialogue encourages ESG transparency and responsible underwriting but alignment with sound governance practice. This may include:

- Requesting ESG disclosures
- Clarifying sponsor practices
- Providing ESG expectations
- Raising serious ESG-related concerns, if any

Euler also participates in certain industry ESG initiative(s) and contributes to broader sustainability dialogue in the ILS market. While this dialogue is not binding, it supports the promotion of environmental and social characteristics as part of Euler's sustainable investing strategy.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

The binding elements are:

- Application of norms, values, and business conduct exclusions, including sector-specific exclusions and exposure caps, particularly at the transaction level, to mitigate exposure to activities inconsistent with environmental or social characteristics (e.g. gambling, life settlements, or high-carbon reinsurance lines).

- Integration of ESG factors into the investment decision-making process, using a proprietary ESG scoring framework. Each eligible ILS Instrument is assessed at inception based on four weighted ESG sub-scores:

  - Sponsor level: 30%
  - Transaction level: 40%
  - Collateral level: 10%
  - Sustainability objectives 20%

  These sub-scores are aggregated to produce an overall ESG score (scale of 0–10). Only investments with a minimum overall ESG score in the upper half (i.e. >5) are eligible to be considered E/S-aligned.

- Meeting the minimum proportion of investments which are environmentally and/or socially aligned, in accordance with the product's classification under Article 8 SFDR. The Portfolio is monitored to ensure that this threshold is respected.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This Subfund does not have a commitment to reduce the scope of investments by a minimum rate.

What is the policy to assess good governance practices of the investee companies?

The Subfund applies a structured proprietary underwriting and due diligence process to assess and ensure good governance of sponsors of ILS Instruments includes the following:

- Business conduct-based exclusions: companies found to i) systematically violate international norms, ii) where the breaches are particularly severe, or iii) where the management is not open to implementing the necessary reforms may be excluded from the investment universe.
- ESG Integration: assessing the following factors: i) sound management structure (such as board structure, systemic risk management), ii) employment relations (such as diversity and inclusion, labor relations, accident and safety), iii) remuneration of staff (such as fair disclosure, development and retention) iv) tax compliance (such as responsible tax behavior) and v) anti-corruption and bribery (such as business ethics and transparency of payments, competitive behavior, regulatory capture and political influence) as part of the proprietary ESG sub-score on Sponsor Level.

The assessment is carried out through:

- Third party ESG data provider(s) and controversy screening
- Integration of relevant governance indicators into the underwriting and due diligence process
- Proprietary ESG scoring model.

The good governance practices may not be assessed or assessed differently for ILS Instruments issued by sovereigns or supranational entities.

Where governance data is unavailable or non-applicable, the Subfund may rely on alternative qualitative assessments.

The Subfund will exclude ILS Instruments from eligibility to #1 Aligned with E/S characteristics if the minimum good governance thresholds are not met on Sponsor Level.

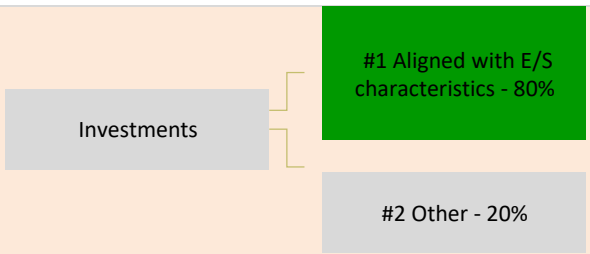
Asset allocation describes the share of investments in specific assets.

What is the asset allocation planned for this financial product?

The planned minimum proportion of investments used to meet the environmental and/or social characteristics promoted by this Subfund is 80% of its total assets of the Participating Shares. Within this category, the Subfund aims to hold 0% of sustainable investments.

- #1 Aligned with E/S characteristics: 80%
  - #1A Sustainable investments: 0%
  - #1B Other E/S characteristics: 80%
- #2 Other: 20%

In exceptional situations, such as periods of large investor subscriptions and redemptions, release of locked collateral, maturities, the minimum portion may temporary deviate from the 80% in order to ensure orderly in and outflow management and protect the interests of remaining investors.



Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

- ***How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?***

Derivatives are not used to attain the environmental and/or social characteristics promoted by the Subfund. However, they may be used as efficient portfolio management tools, for cash management, for hedging purposes, or as an additional source of return.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

0% - This Subfund does not commit to making EU Taxonomy aligned investments. However certain investments made by the Subfund may be aligned with the EU Taxonomy.

- **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[2]?**

☐ Yes:

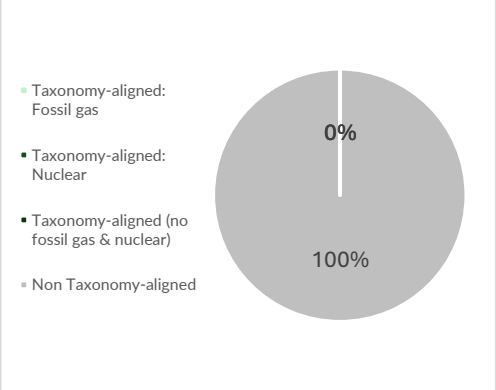
☐ In fossil gas	☐ In nuclear energy

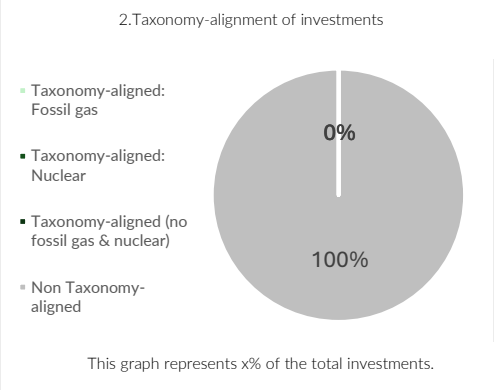
☒ No

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1.Taxonomy-alignment of investments

and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change tion") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas uclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.





** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

- ***What is the minimum share of investments in transitional and enabling activities?***

The minimum share of investments in transitional and enabling activities is 0% considering the Subfund does not make sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

0% - This Subfund does not commit to make sustainable investments.

What is the minimum share of socially sustainable investments?

0% - This Subfund does not commit to making sustainable investments.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

Investments which may fall under "#2 Other" of the total assets of the Participating Shares may be ILS Instruments which are not or no longer considered to be aligned with environmental or social characteristics of this Subfund.

In addition, it may refer to cash, cash equivalents, and derivatives used for hedging purposes that are not aligned with E/S characteristics and do not impair the Subfund's ESG objectives. These investments serve ancillary purposes such as risk management, liquidity management, or operational efficiency and are not intended to impair the Subfund's overall ESG strategy.

No minimum environmental or social safeguards are systematically applied to these investments, as they are not evaluated against ESG criteria and are not included in the proportion of investments used to promote environmental or social characteristics. None of those investments have any minimum environmental or social safeguards.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

No, the Subfund does not use a reference benchmark for the purpose of attaining environmental and/or social characteristics.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

	Not applicable
	• ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***
	Not applicable
	• ***How does the designated index differ from a relevant broad market index?***
	Not applicable
	• ***Where can the methodology used for the calculation of the designated index be found?***
	Not applicable
	Where can I find more product specific information online?
	More product-specific information can be found on the website: More information about the Euler ILS Framework can be found in the Euler Sustainability Investing Policy or online at www.euler.ltd/en/sustainability and in this Prospectus.
